Santa Ana, Cal., Oct. 16.—It has been some years since Orange county had a fair and race meeting, but the success of the "revival" which has just come to a close promises that it will be another several years before she fails to have one again, as the week has been a big one. The exhibit features were excellent and the racing was mighty good and kept the crowds well entertained. The feature of the week was the race between Vera Hal and San Jacinto, which was keen from start to finish, the fastest heat of 2:07½ approaching within half a second of the record set twenty-one years ago by Silkwood, whose old owner and trainer, "Uncle Jake" Willetts, was a member of the participants in this week's activities. Lou Taylor showed a real good pacer in Baxter Lou, who reeled off a mile in 2:11 against the watch, pulling up in the final quarter owing to hitting a soft spot in the going. The events in detail:

Oct. 12.—2:30 trot:

Luana, b m by Kinney Lou	(Taylor)	1	1	1
Maggie M., br m by Carlokin	(Murphy)	2	2	2
Guy Boy, br g by Guy Bellou	(Stewart)	3	3	3

Time—2:18¼, 2:18¾, 2:17½.

Mixed race (local horses):

Dick W.	(Murphy)	1	1	1
Zella D.	(Pausett)	3	2	2
Buster	(Thomas)	2	3	3
California Chief	(English)	4	4	4

Best time—2:20.

Running race, three furlongs:

Dutch (Vose) 1, Manzanita (Pausett) 2, Vocardepelo (Serrano) 3, Foxey (Hall) 4. Time—:39.

Oct. 13.—Special mixed race, purse $100:

Laddie	(Schultz)	1	1	1
Miss Patterson	(Patterson)	5	2	2
Prince Albert	(Murphy)	2	4	4
May Raymond	(Hall)	4	3	3
Pelee	(McCullough)	5	5	5

Best time—2:31½.

Special match for $350:

Vera Hal, b m by Expressive Mac	(Cohen)	1	1	2
San Jacinto, b g by Geo. W. McKinney	(Armstead)	2	2	1

Best time—2:07½.

Trotting race, purse $100:

Danube, br g by Direcho	(Cooper)	1	1	3
Doctor S.	(Faucett)	3	3	1
Guy Boy, br g by Guy Bellou	(Stewart)	2	2	2
Maggie M., br m by Carlokin	(Murphy)	4	4	4

Best time, 3d heat—2:14½.

Running race, four furlongs, purse $50:

Won by Loma (Holcomb). Time—:50.

Oct. 14—Special pace, purse $150:

Baxter Lou, ch g by Kinney Lou	(Taylor)	1	1	1
Walter C., b h by Carpus	(Schumaker)	2	2	2
Humpa Hill, b g by F. S. Turner	(Stewart)	3	3	3
Atlantic Fleet, ch h by Murray M.	(Cole)	3	4	4

Time—2:16, 2:16, 2:17.

Special trot, purse $150:

Danube, br g by Direcho	(Cooper)	1	1	1
Doctor S.	(Pausett)	2	2	3
Dick W.	(W. R. Murphy)	3	3	2
Tom Murphy	(A. S. Murphy)	4	4	4

Time—2:22½, 2:17½, 2:20.

Running race, five furlongs:

Susie H. (Francis)1, Loma (Holcomb) 2, Dutch (Vose) 3, Vera (Clark) 4.

Ladies' riding race:

Marcus (Mrs. Nettie Hawn) 1, King (Mrs. W. H. Sharp) 2.

Oct. 15.—2:20 trot, purse $250:

Danube, br g by Direcho	(Cooper)	2	1	1
Doctor S.	(Faucett)	1	4	3
Guy Boy, br g by Guy Bellou	(Stewart)	3	2	2
Dick W.	(W. R. Murphy)	4	3	5
Happy Clay	(Nesmith)	6	6	4
Caroline	(Williams)	5	7	6
Tom Murphy	(A. S. Murphy)	7	5	7

Best time—2:15½.

2:14 pace, purse $250:

Walter C., b h by Carpus	(Schumacher)	1	1	3
King Lilly Pointer, br h by Star Pointer	(Nesmith)	5	6	1
Humpa Hill, b g by F. S. Turner	(Stewart)	2	2	2
Queen MacGregor	(Williams)	4	3	4
Atlantic Fleet, ch h by Murray M.	(Cole)	3	4	5
Buster	(A. C. Murphy)	6	5	6

Best time—2:14.

To beat 2:10 pacing:

Baxter Lou, ch g by Kinney Lou (Taylor) 2:11

Ladies' running race:

Billy (Mrs. Nettie Hawn) 1, Prince (Mrs. W. H. Sharp) 2.

Time—:25½.

many other members of local stables were crowding the winners at all times. Miss Mary Andruss of this city carried off the honors for the best lady rider, on Wonderland, while Capt. Babcock on Gilderoy won the competition for gentlemen amateurs. There was a fine field of high school horses, California-owned, that afforded much pleasure to the crowd, top honors going to Dr. Anderson's Monte Mitchell, John E. Marble's Bonita P., and Mrs. Leota Zapp's Jupiter, as named.

Among the most spectacular of the show's features were the classes for hunters and jumpers, the standard requirements calling for entrants to be ridden over post and rail, brush, water and in and out jump. Col. Slocum's Monterey topped the weight carriers, while honors in the middle and light weight classes went to J. D. Farrell's Premier and Col. Greble's Dan, respectively. Red and Cosmocrat were the best of the pairs, shown abreast over two four-foot jumps and two of three feet six inches of timber, topped by six inches of brush. Dan also won the Shreve challenge trophy, and Frederick the Great pulled down the amateur event for Capt. Disque. Mrs. Maxwell rode the winners of the two classes for ladies' hunters over four jumps of three feet, with a foot of brush added, Premier carrying her to one victory and Tick Tock to the second, Cosmocrat and Mrs. Zapp's Sylvia taking the second places. Cosmocrat carried Capt. Dean to victory over Shamrock, the Denver jumper owned by Chas. E. Guy, in the professional number of four jumps of five feet each, but Shamrock was the best of the high jumpers, with Adelaide S. Gillis' Bounder taking the next honors. Lt. Watson on Chespeake outjumped Capt. Cootes on Jerry, and a number of others, in the Grafton long jumps, while the pony number over four timbers of moderate height fell to Snowflake, ridden by Walter Foster of this city. Good old Frederick the Great, with his twenty-fifth Christmas staring him in the face, took the special over the standard course for Captain Disque, the crowd giving the game old warrior a rousing send-off.

Much interest was created by the Welsh and Shetland pony classes, in which competition was very keen, the events ranging from single ponies in harness or under saddle up to four in hands. The Illinois breeders, Chas. E. Bunn of Peoria and Geo. A. Heyl of Washington, were the most extensive exhibitors and rivalry ran high between them. Mrs. Adam Stirling & Son of Des Moines, Iowa, were also among the winning visitors, while California ponies held their own and most creditably in all their classes. The Bunn entries took challenge cups at both hitches, and trophies were awarded little Miss Mercedes Anderson of Oakland and Walter Blair Foster of this city as the best juvenile riders. Polo pony honors were divided among Will Tevis, Harry Hastings, Capt. McNally and Lt. Sands, Mr. Tevis having an especially pleasing string of perfectly bitted mounts. The Clark trophy went to Sino, of the Tevis stable

Several events for police officers were incorporated into the program, Officers Hanley, Coates, Merchant and Smith taking the major honors. Entrants in the stock horse competition hardly had a square deal, as Will Tevis' polo mounts were accepted as "stock horses" — which they once upon a time were, all right — and captured first and second. Neither were the conditions fully lived up to in other ways, but the class was one of dash and action, with a bunch of good rope and cutting horses present.

Mr. Tevis took the relay race in which vaqueros were barred, while the cowboy's relay went to Tom Millinck of Sonoma and the cowgirl's relay to Miss Bertha Stadler of Fresno. S. Christenson and that grand old veteran, Bodaker, defeated the field in the mile trot to saddle, and Revel Lindsay English's Daisy E. and Altadena took the six furlong race for saddle tandems. Chespeake and Lt. Watson were a "close corporation" in the hurdle race and steeple chase, capturing both in handy fashion.

While the activities of the draft horse men were confined largely to the breeding classes, a number of performance classes also were provided, several of the exhibitors participating. The odd exhibitor, that is, the one competing in performance events who was not represented in the breeding classes, was the local teaming firm of McNab & Smith, who made a great show with a number of heavy horses, from single horses shown at hand to six horse teams, their well groomed big drafters, with nicely housed harness and spick and span new wagons adding a pleasing touch of variety.

Worthy of a special story of their own, but of necessity passed over hurriedly here, were the events arranged for the express participation of officers and enlisted men from the army. In addition to those events previously reviewed in which army officers were prominent there were also held, for officers of the U. S. A. or N. G. C., steeplechases, flat races, jumping, singly and in pairs, and other classes, while the enlisted men staged jumps, flat races, monkey drills, rescue races, steeplechases, tent pegging competitions, roman races, riding contests, and a machine gun contest between four sections of the machine gun troop of the First Cavalry. The army men not only added a most pleasing touch of "local color," but their contests gave evidence of the excellence of army training and its power for developing steady hands, good nerve, quick eye and brain and quiet, unassuming daring.

Much more might be written, but time and space forbid. The illustrations herewith presented give only a meager idea of the quality of the competitions and the natural and artificial beauties of the scene in which the show was staged. Not to have been there is to have missed something truly worth while, a great show, well planned, well carried out.

WITH VOLUNTEER AT LEXINGTON.

Suldine, the last of the quartette that made up the extraordinary field in the two-year-old futurity, gave a splendid account of himself. True, he was outclassed by the others—yet, under the skillful guidance of Mr. Geers he was at all stages close up, as previously stated, beat 2:10 in the first heat, and came right back in the second and was not more than four lengths to the rear. He has been somewhat unsteady in previous races, but this time never offered to "lift his nose"—which, considering the fact that he was being both out-trotted and out-staid, shows that he is of the stuff of which true race horses are made. A lot has been done with the son of Worthy McKinney this season, and he shows it, being thin in flesh and looking somewhat jaded. Had less been asked of him earlier, he would have shown still more creditably. His yearling record was 2:24¾. If he remains sound he should make a memorable three-year-old—and as he comes from the stout tribe of McKinney in the male line, and on his dam's side traces back to Goldsmith Maid 2:14, the most long-enduring trotter in history, perhaps he has the stuff in him that enables an occasional baby wonder to mature into an aged stake-winner.

* * *

And now for Napoleon Direct's thrill-producing "stunt."

When it was known that Directum I. would be unable to appear in the Tennessee stake, that classic was conceded to the son of Walter Direct, but a good deal of speculation was centered in what the others might be able to do to him in a three-in-five event. Napoleon had raced best this season in two-in-three events, and, in a longer race, had never faced such a field as now opposed him, inclusive, as it was, of Flower Direct 2:00¾, Braden Direct 2:01½, Peter Stevens 2:02¼ and Walter Cochato 2:02¼. That, individually and collectively, the field would make a desperate effort to beat the favorite was well understood—and if they took turns carrying him, it was the idea in some "smart" quarters that he might meet his Waterloo about the third heat.

As it developed, none of the others was good enough really to trouble him. Flower Direct was away off and never a real factor. Braden Direct was only fair. Peter Stevens was still feeling the effects of his duel with Directum I. at Allentown, Pa., two weeks before. Walter Cochato was unexpectedly good—but not good enough.

The first heat Napoleon reeled off in 2:02, last half in :59½, the second heat he came back in 2:01¾. Now came that third heat that all the field-backers were "laying low" for. Napoleon came out a little lame for it in that hind leg that has bothered him all summer and kept him from racing for a number of weeks. Around the first turn he went rough gaited so Mr. Geers took him back and kept him well to the rear of the others, not beginning to move with him until past the half. The horse then began to gain rapidly and at the three-quarters looked ready to rush into the lead, on the outside. He was moving like a whirlwind, when suddenly, just as he swung for home, he made a plunging break. At this time, also, I was standing down on the track, just below the wire, and, looking up at him, the sight he presented was indeed a wild one. When he broke he swerved suddenly and ran full tilt across the track at an acute angle so suddenly, and apparently so uncontrollably, that my heart literally came up into my mouth. It looked as if nothing could prevent his going smash into the outer rail, and in my mind's eye I visioned a terrible accident with Mr. Geers crushed and mangled, perhaps even killed. Then, just as it seemed as if nothing could have him, I saw the madly-running stallion in a twinkling, whirl as if on a pivot, straight with the stretch, and come hurtling down it like a wild horse in full flight. For a moment I supposed him beyond control, and running away—but in another I saw that he was on a square pace and thundering through the air like a cannon ball. At the same instant the crowd began cheering wildly. After being hopelessly out of it, Geers had performed a miracle of reinsmanship and was actually driving for the heat! Lengths in advance Peter Stevens was scudding along, Ray Snedeker driving desperately. Like a hound on the track of a hare, Napoleon rushed after him. The clatter of his foot-falls on the track sounded like the roll of the drum when it is being beaten to rouse a sleeping garrison to defend a citadel attacked without warning in the dead of night. Faster and faster they fell, swifter and swifter they came. Nobody will ever know how fast Napoleon Direct paced the final eighth of that mile. The official time of the last quarter was :29¾, and the Tennessee stallion was, apparently, pacing two feet to the leader's one all the last end of it. To almost everyone it looked as if he had won the heat, but the judges saw Stevens first "by an eyelash."

I cannot recall seeing such excitement at Lexington ever over a racing heat in years, if ever before, as Napoleon's finish elicited. There was one fusillade after another of cheers and cries as he came hurtling through the stretch; and, if he had been declared winner of the heat and race, I believe the roof of the grandstand would just have been lifted off by the outburst that would have followed the announcement.

How Napoleon lost the fourth heat by being interfered with at the head of the home stretch and getting his wheel locked with that of Braden Direct is related in the regular report of the race. Nightfall then called a halt in the contest. The next morning he was quite lame, but the cause was discovered to be one remediable by a change in one of his hind shoes, which he had twisted, causing it to press upon a sore spot in the sole of his foot. Once this was done, he "came out like a giant refreshed," and simply lost the others by pacing a world's record fifth heat in 2:01½, last quarter in :29¼.

Can Napoleon Direct pace in two minutes? Dear reader, if asked to he can, just as surely as you and I are alive!—Horse Review.

COMMENDS EXHIBITION OF CHILDREN'S PETS.

Looking backward to the splendid results of the first Children's Pets Exhibition in a California city, from which originated the National Children's Pets Exhibition to be held at the Panama-Pacific International Exposition, December 2 and 3, Will C. Wood, Commissioner, Secondary Schools, California, prophesies a rich harvest of educational benefits for the great show.

"Such exhibitions," he thinks, "cultivate not only the hearts, but the minds of the children, and interest their parents. Mothers and fathers brought by the young folks to their pets show, renewed their interest in pets and resolved to encourage their children to care for dumb animals.

"We interpreted the word 'pets' very broadly and accepted plants, herbariums and collections of curiosities, making them a part of the exhibition, although most of the entries were of animals. Pet frogs, guinea pigs, guinea fowls, poultry of almost every breed, snakes, rabbits, Shetland ponies, ringtailed coons, badgers, monkeys, parrots, parrakeets, made up a wonderful menagerie in the basement of the school building, to the surprise and delight of the pupils. Those who had no pets resolved to adopt one during the next year so that it might be shown at the next exhibition. The many entries were obtained through entry forms being distributed in the schools, and the children being encouraged by school authorities to show their pets. I hope that every school in California will participate in what promises to be the most interesting of all the exhibitions."

Information and entry blanks for the Children's Pets Exhibition (for which there are no expenses), can be obtained from D. O. Lively, Chief of the Department of Live Stock, P.-P. I. E., San Francisco.

ERROR IN FUTURITY DATES.

Through an office oversight the dates of two of the futurities for two-year-olds were not given properly in our publication of October 9, giving the exposition program. The second race on Thursday, Nov. 4, should read "Pacific Breeders Futurity, two-year-olds, pacers, purse $1,200," and the third race on Thursday, Nov. 11, should be "Pacific Breeders Futurity, two-year-olds, trotters, purse $1,450," thus giving ample time between the events for the various gaits and ages.

Marie Fitzsimmons, a young mare owned by J. W. Swank, Payette, Ida., made a record at the Malheur County Fair at Ontario, Ore., the week of September 20, that is unique and so far as we know a world's record of its kind. Wednesday she started in a trotting race and won in three straight heats. Thursday she was in the pacing race and again won in straight heats. Friday she was driven in the free-for-all trot. She lost the first heat and then came back and won the next three. The track is halfmile and a little slow and there was considerable wind. No fast time was made, but every heat was a real contest, with good horses in it. She is a wonderful mare, handsome and of fair size as well as a level-headed, double-gaited, fast animal.—Pacific Rural Spirit.

Drink Jackson's Napa Soda.

Show, San Francisco, Sept. 30-Oct. 13, '15

that section was most ably represented. Prosper and Sultan, from the stable of J. C. Strubbar, Topeka, Kas., were winners among pairs over 14.2, while Woodland Hackney Stud turned out candidates for the blue in a team composed of Lady Ives and Gwendolyn, while their Julep and Delight were first and second, respectively, among the high steppers.

CAVALRYMEN DOING A STUNT IN THE MONKEY DRILL

Sporting tandems and combination horses provided much entertainment, the entrants in the latter numbers being shown to harness, taken out in the ring and ridden by the same person. Revel Lindsay English's pair, Daisy E. and Altadena, and the two from the San Francisco Riding School, Kildare and Killarney, outranked the other tandems, and in the combination class for three gaited horses first and second went to My Idol and Greyhurst, both from the stable of E. D. Moore of Columbia, Missouri. Mrs. H. B. Thornberry of Los Angeles had the best five gaited combination horse, the famous gray gelding Jack Barrymore, with Mr. Moore's Johnnie Jones second.

While all classes of horses were given a warm reception by the spectators, the ones that created the greatest interest, the keenest competition and the readiest applause were the gaited saddle horses. The pick of Missouri farms were in evidence, and California herself is not backward in the production of gaited saddlers, and the fields in many instances were large. Riders such as Judge Bridgford, the "father of the saddler in California," John Hook of Missouri, Billy Shropshire of south of the Mason and Dixon line, E. D. Moore, and others of fame from former shows gave added distinction to these events and every entry was shown for "all it was worth." Longview Farm, whose horses are famous throughout the land, had an excellent stable present, headed by the stallion My Major Dare and the equally famous representative of the opposite sex, Maurine Fisher. La France among any age mares, My Major Dare among any age stallions and La France among junior mares were all winners of the blue in the performance classes, other members taking numerous other awards and the stable as a whole being the best winner in the breeding classes. The Longview horses were very popular, and their appearance at any time the stimulus to applause. Mr. Moore was another Missourian who was a hard one to beat, gathering several high honors with My Idol, Johnnie Jones, Greyhurst, Majestic McDonald and Butterfly Dare, all admirable types of their kind.

Jack Barrymore, who had such a sensational year last season in the central west, had his old rider, Billy Shropshire, in the saddle and was one of the big attractions of his kind, incidentally becoming the cause of one of the unusual occurrences of the show. Quite properly awarded premier honors in the combination and gelding classes, a storm of protest greeted the pinning of the blue upon him in the class for best stallion, mare or gelding, My Major Dare being relegated to second place and Johnnie Jones to third. The crowd practically "to a man" favored the Major, and did not hesitate to express itself to that effect, the decision meeting with a demonstration in which hisses, boohs, "cat-calls" and the bestowal upon the judge of numerous appellations more noted for their curt sting than for politeness were the outstanding features. The crowd may not always be right, but there were plenty of professional horsemen among this one, most of them joining with the spectators in their way of thinking. It will be recalled that, great as Jack is, the Major has beaten him in every previous meeting, at the Kansas City horse show, at St. Louis, and at the American Royal, and the judge's subsequent explanation to the effect that he didn't like either of them failed to add any improvement to the situation. The crowd liked 'em both, but the Major best, and a person who could be satisfied with neither seemed to them a bit ultra-fastidious in ideas. However, a certain number of such instances are inevitable, and the P.-P. I. E. awards generally met with favor.

California met all comers in the open model class for the best type of saddler shown in hand and came off victorious, the St. Francis Hotel trophy going to Adelaide S. Gillis' handsome chestnut stallion Don Castano 5631, the event calling out a goodly field of high class individuals. Another "Angeleno," Arthur Coronado, owned by John E. Marble, carried off the consolation class on closing day, and Thornberry & Shropshire's Mavis was the pick of the light weight three gaited class. Mr. English was unfortunate in that his horses were much affected by the climatic change and were not up to form, though they and

THE CAVALCADE OF LADIES, MOST ATTRACTIVE OF THE SHOW'S FEATURES

Panama-Pacific International Exposition

ALTHOUGH quite a number of horse shows, both of a "society" and purely "utilitarian" nature, have been held at various points on the Pacific coast with a gratifying measure of success, it fell to the lot of the Department of Live Stock of the Panama-Pacific International Exposition to stage the first pretentious and really great affair of its kind in this section, Chief D. O. Lively and his associates arranging, for the fortnight of September thirtieth—October thirteenth, the most comprehensive program of events that has ever been attempted in America. That the entire show, from first to last, was an unqualified success is an eloquent testimonial to the resourceful energy of its promoters, to the generous response made by breeders and owners, and to the high place occupied by the horse in public esteem.

The program was divided under two general headings, breeding classes and performance classes. The former covered the ground in a strictly utilitarian way and included all the families of horseflesh popular in America today, from the tiniest of watch charm Shetlands to the most ponderous drafters, the Suffolk Punch being the only kind provided for in the program and failing to have a representation. These classes were shown to halter in the forenoons in the stock stadium, and as they constituted the "meat" at the show the awards have been published in full, together with the roster of exhibitors, in this and a former number of this publication. The horse parades held on certain days just as the afternoon program began included practically all the animals entered in either the breeding or performance classes, and was a most magnificent display of equine quality.

The performance classes were of a scope including all the accepted features of the usual "society" horse show, with many added features giving the event a truly western "tang"—events for stock horses, cowboys and cowgirls and for the soldier boys of our beloved Uncle Samuel, both officers and enlisted men. It was a truly complete show, and was the source of more genuine pleasure and pure enjoyment, both to participants and spectators, than any of the special events of the exposition period. A special field was prepared for this portion of the show inside the racetrack enclosure. The tanbark ring of the accepted proportion served for a great majority of the events, while for those requiring more leeway there was the big race track and its infield. One might view the proceedings from the boxes half-encircling the ring, from the grandstand overlooking the entire enclosure as well as the Golden Gate and San Francisco bay, or from a comfortable chair on the clubhouse roof, nothing being left undone that would in any way add to the pleasure and comfort of those present.

Harness horses were provided with a wide range of events and the awards were well distributed, so keen was the competition. Chas. W. Winter of Alhambra with Alhambra Prince captured the roadster class for stallion, mare or gelding, as well as the Palace Hotel Challenge trophy for a like class. Dan Hoffman's Tom Smith and Jonesie Mac continued the "even tenor of their way" as exemplified in former appearances by taking first award for road-pacing roadsters. Miss Helen Farrell of Portland drove Union Jack to victory over a big field in the runabout class, with the entry of Col. Hogan of Pasadena second, Union Jack, driven by Miss Farrell, also taking the challenge trophy for the best standard bred gelding.

The Woodland Hackney Stud of this city had a popular pair in the mares Delight and Emmeline, who took quite a number of awards at various hitches, singly or as a team, including the blue for harness tandems. Mr. Gethin also won the four-in-hand event with a nice quartette from the same stable, so that they ranked well up among the best prize winners. Bill, Col. Hogan's favorite bay gelding, won the gig class for horses 15.2 or over as well as the event for hitch to victorias and two other classes. In the ladies' phaeton class the Hogan entry was second to Old Glory, driven by Miss Farrell, the latter horse eventually being adjudged the best single horse in harness and awarded the challenge trophy for such. His victory was no surprise, as he is a grand gelding and a winner in many former shows, both east and west. The Pacific Northwest had another winner in the entry of James Turner of Victoria in the field of three-year-olds or over, 14.2 to 15.2, so that altogether

JUVENILE RIDERS AND THEIR PONIES—NOTE THE "APPOINTMENTS"

OLD GLORY AND UNION JACK

A Pair Whose Colors Flew High at the Exposition Horse Show

Now there is no difficulty in determining what the breeder of Old Glory had in mind when he bestowed that name upon the colt which was in time to become one of America's best known show horses, but the writer is "up against it" in the case of Union Jack; there is only one Old Glory, praise be, but the Union Jack is restricted to no one nation. However, the device most readily brought to mind by the term is the familiar union of the crosses of St. George, St. Andrew and St. Patrick which is the sign manual of the British empire, and we take it that it was in honor of this particular pennant that Union Jack was named. Old Glory and Union Jack! Many and many is the time they have whipped in the breeze after a hardwon victory, and in the hands of Miss Helen Farrell of Portland the horses bearing these names have been victorious in just as hot engagements of their kind as ever fell to the lot of forces under the original ensigns. The pair and their accomplished driver have been familiar figures in prominent exhibitions from coast to coast, and at the exposition horse show were signally successful, each horse numbering a first and a challenge cup among his honors. Perhaps we should not reveal family secrets in this public manner, but it is a well demonstrated fact that the Farrell horses achieve more success in the hands of the daughter than they do when handled by the father or other "mere men," an eloquent tribute to the reinsmanship of the young lady referred to herein.

It must be a source of pleasure to those true lovers of the horse, Mr. Farrell and Miss Helen, to know that the exhibitions of Old Glory and Union Jack have been productive of more than personal pleasure, blue ribbons or silver trophies, for their appearances here, alone, awakened an interest in horseflesh that had lain dormant for some ten years or more. There were many who first visited the horse show from idle curiosity or a tugging at old memories who became constant attendants out of pure interest and enjoyment. Such, in particular, was the case of a reinsman of the pre-motor day who occupied a seat in one of the boxes at the initial performance on September 30. The show opened with the judging of geldings to runabout, and a grand lot they were. In they came to the tanbark, one, two, three, all fine animals. Then came the fourth in a style that drew the attention of all eyes and there was a craning of necks to catch the number which floated from the rear axle. It was number seven, the horse was Union Jack, entered by J. D. Farrell and driven by his daughter Helen. Others came, but Union Jack was performing in challenging style and when the judges finally awarded the blue ribbon to the "ship's stem pennant," not only those in the boxes but in the grandstand as well evidenced their approval by the bestowal of one of the "best hands" that graced any award of the entire show.

That one competition brought at least one man back into the fold of horsemen, the reinsman referred to above. As the event progressed he became more and more interested, more restless, too—he had something on his mind. As the horses were driven from the arena he found relief in words, as he exclaimed with ringing emphasis: "I must have a horse. I've been hurtling through space as fast as ninety miles an hour in a motor car, and enjoying it, but all along I have been missing something and now I know what it is. I'm not knocking my car but there is one essential thing it lacks, and that is l-i-f-e. Union Jack's work made my blood tingle; the one place I wanted to be was up behind him with Miss Farrell, or a-hold of those reins. I'd like to drive him around this ring just once. The motor car is all right and it adds zip and snap to life, but after all it is only the horse that gives the real old 'home and fireside' pleasure, comfort and consolation. Watch me grab one!"

Not a day of the show passed that did not find the "comeback" at the ringside and in the barns among the horses, and when closing day came he purchased one of the prize winners and has taken a daily spin through the park to old ocean ever since. This one particular instance was especially noticeable, and no doubt there were any number of similar ones, as the show grew in favor from day to day and numbered among its constant devotees many, many people who in recent years have pinned their faith to the motor propelled vehicle. The horse show is one of the greatest means of popularizing the horse, and when he again "comes into his own" he will owe much to friends like the Farrells, whose garage has merely supplemented, not supplanted, their stable.

But to get back to Miss Farrell's prizewinners, it is interesting to note that they have come rightly by their quality through inheritance. "Pedigree" in show horses counts for less, perhaps, than it does in campaigners on the trotting or running turf, but "blood will tell" in every class. Union Jack is a standard bred trotter, while Old Glory comes of a line that has long been famous in the show ring and on the track. He was bred at Brook Nook Ranche and traces through his sire, Jubilee de Jarnette 2:29¼, direct to Lady de Jarnette 2:28, who was one of the most famous show mares of the seventies and eighties. It is a matter of regret that C. X. Larrabee, Old Glory's breeder and a true horse lover, could not have been on earth and present to join the applause earned by Miss Farrell and her favorites.

MISS FARRELL AND UNION JACK

THE NECESSITY OF ERADICATING FOOT-AND-MOUTH DISEASE.

There are a large number of the diseases of domestic animals, as well as diseases of the human species, which are known to be due to the activities of "germs," minute members of the vegetable and animal kingdom, which may not be visible even with the high-powers of a microscope. Of all these it is doubtful if any is as easily spread as is the foot-and mouth disease. Experience has taught the majority of people the infectious nature of many of the more common human diseases, such as smallpox, scarlet fever, measles, etc., but a great many live-stock owners do not realize that the infectious diseases of their domestic animals are just as easily communicable.

Foot-and-mouth disease attacks cattle, hogs, sheep, and goats, and sometimes other animals, including the human. The disease is highly infectious. The germs may be carried on the shoes, clothing, or bodies of persons; upon the feet or bodies of poultry, birds, dogs, cats, or other animals which may have been in the immediate vicinity of afflicted animals; by insects; by particles of straw or litter which may be carried by the wind; and in many other ways.

Owing to its extremely infectious nature, foot-and-mouth disease, when once started in a community, spreads with great rapidity. An example of this is shown in the recent outbreak, when in less than three months from the first case, and despite every precaution that could be taken by the authorities, the disease had affected animals in 21 states and the District of Columbia.

The results of an investigation as to the means by which the disease was spread during this outbreak disclosed the fact that about one-quarter of all the affected herds were infected by germs carried by persons, although not one single case was found where the infection was carried by inspectors, these men being required to fumigate and disinfect themselves after visiting each farm. In the majority of cases infection was carried by farmers or some member of their household, who, for curiosity or other reasons, visited infected premises, or where persons from infected premises visited other places where animals were confined.

An interesting example of this is found in the fact that the health authorities of Cincinnati, Ohio, were compelled to have an injunction issued restraining a certain stock buyer from going upon any premises containing animals, as it was ascertained that he was spreading the infection.

In one respect foot-and-mouth disease differs from the majority of infectious diseases, in which one attack confers upon the person or animal affected a permanent immunity from future attacks of the same disease. Foot-and-mouth disease does not confer such immunity, at least of a permanent or lasting nature. Animals which may recover from the disease during one outbreak may again be attacked during future outbreaks, or they may even reinfect themselves by means of germs carried upon their own bodies.

Certain persons who recover from typhoid fever are known to be carriers of that disease long after they have ceased to show or feel any evidence of the disease. In this same manner animals which have recovered from foot-and-mouth disease may continue to be a constant menace to the health of other animals with which they may come in contact. It is true that these germ carriers, both animal and human, are not frequently found, but the fact that they exist must be taken into consideration when attempting to eradicate the disease.

An estimate issued by the Department of Agriculture shows there were in the United States on January 1, 1915, a total of 58,329,000 cattle, 64,618,000 swine, and 49,956,000 sheep. All of these animals are susceptible to foot-and-mouth disease, and should this disease be allowed to spread promiscuously over the country it is fair to assume that the majority, if not practically all of these animals, would become affected.

Although the death rate is not large (estimated from 2 to 3 per cent in average outbreaks), every animal attacked by the disease is injured to a greater or less extent. As the disease continues to spread, however, strains of virus passing through successive herds sometimes result in a much more virulent form of the disease, in which the death rate may reach as high as 40 or 50 per cent of the animals attacked.

In Holland, where the disease now exists continuously, cattle are said to be damaged to an extent of $10 each on the average. In Germany, where the same condition exists, the loss is said to average $7 for each head of cattle attacked by the disease. If the disease should become similarly prevalent in the United States the loss sustained on the vast number of cattle would aggregate an immense sum. While swine, sheep, and goats are injured to a less average extent, the injury in the aggregate would amount to many millions of dollars annually. Breeders of swine in the United States are already struggling with hog cholera and other diseases pecuiar to this species, and to permit foot-and-mouth disease to become prevalent might mean a deathblow to the industry.

Nor do the losses end here. Not only is there considerable danger to human life, through infection of children and weak persons, but the economic loss to the dairying and allied industries, the effect on the market price of animals, and the expense and trouble of unavailing but persistent efforts at quarantine which always result would add to the burdens of the producer and the consumer.

Even a superficial study of this question should convince the most skeptical of the necessity of eradicating this disease before it becomes established to the point where eradication is impossible.

Three methods are open by which to control or eradicate an infectious disease, namely, vaccination, quarantine without slaughter, and quarantine with slaughter of all infected or exposed animals.

No vaccine has yet been found which is of value or which will produce a permanent immunity in foot-and-mouth disease. Quarantine without slaughter has been tried in various ways by European countries, and has invariably resulted in permitting the disease to become fastened upon the country employing that method. It has proved impossible to maintain an effective quarantine upon a farm for the long period of time necessary. There remains, then, but one effective method—that of quarantine with slaughter—which is the method now in common use in all countries which have so far successfully coped with the disease.

One large herd of cattle in Chicago was saved from slaughter because conditions made possible methods of quarantine to prevent the spread of the disease. Such conditions would be absolutely impossible on an average farm and far too costly to employ with ordinary cattle. This case, therefore, offers no criterion by which the effectiveness of this method may be judged, and the experience of European countries with farm quarantines is that the disease invariably spreads and gains a lasting foothold. The herd in question, which was held in close quarantine at Chicago for a period of seven months, consisted of over 700 valuable purebred cattle. They were confined in the second story of a tight brick building. A large force of veterinarians and police officers was employed, and no employee or other person was allowed to leave the building until he had been thoroughly fumigated and disinfected. No outside animals—dogs, cats, poultry, or birds which carry the disease from one place to another—could gain access to the building. Conditions for feeding and handling the cattle and disposing of manure and bedding were such that none of it could get out of the building without being thoroughly disinfected. These conditions would be difficult to duplicate outside of a large city and would be impossible to maintain on any farm. Even were it possible to maintain similar quarantine on farms the large number of veterinarians needed to supervise the work could not be obtained, and the heavy expense of maintaining such a quarantine would exceed many times the value of the animals involved. In the case of the large Chicago herd the expense per head amounted to several times the average value of farm cattle.

Owing to the low death rate and the mild form of the disease which is usually manifested at the beginning of an outbreak, the drastic methods of eradication necessary, and the general lack of public knowledge of foot-and-mouth disease, considerable contention is apt to exist wherever those in charge attempt eradication work.

It should be the duty of every interested stock owner or other well-meaning person in affected districts to assist in preventing the spread of foot-and-mouth disease by every available means.

In all such cases it is necessary for the individual to sacrifice his own special interests and to give a spirit of co-operation in these measures which experience with the disease wherever it has occurred shows to be essential to the safety and prosperity of the national cattle-raising and dairy interests.

Every person can help by keeping away from stricken animals. Do not go to see them out of curiosity, and do not permit other members of your household to visit the premises on which such animals are confined. Keep your dogs, cats, chickens, and other domestic animals at home, and keep other people and their animals away from your stock and barns.

Telegraph immediately to the Department of Agriculture at Washington reporting any suspicious cases of sore mouth associated with lameness in your stock. Do not take chances. Delay will save you nothing, and may greatly harm you or your neighbors.

Observe strictly the quarantine regulations and induce your neighbors to do likewise. Experience has shown that where people work with the authorities the loss to the community is trifling compared to what it is when they work against them or show indifference.

If you are feeding skim milk or garbage see that it is thoroughly cooked by boiling before being fed. If there is an outbreak in your vicinity do not permit milk cans or other objects from creameries or other farms to be brought onto your promises.

If the inspector visits your farm aid him in every way to do his work quickly and thoroughly.

If you have not already done so, secure Farmers' Bulletin 666, read it, and assist in desseminating the true information about this disease, for no price is too great to pay to prevent its gaining permanency in this country.

—o—

Maggie Ansel, Prince Ansel's yearling daughter out of Maggie Hall by Moko, purchased some time since by a horseman of Groves, Oregon, was a blue ribbon winner and champion and grand champion standard bred filly at the Oregon State Fair.

T. W. BARSTOW UNCOVERS GOOD PACER.

The San Jose Driving Club put on a pleasant little matinee at the Driving Park in that city last Sunday, the winners of the various events being Loma Logan (Wm. Cecil), Kiss Ka Dee (Ferri), Alto Mack (McCracken) and Lady Barstow (Salazar). The contests were close though in some instances the time was not especially fast, but T. W. Barstow made up for all those deficiencies by supplying speed for the bunch. The track and weather were O.K., and T. W. set sail for the matinee record with the four-year-old All McKinney. Starting to beat 2:12 the lad made the trip in 2:10, after which his owner sent him another mile in 2:08¾ for good measure, this being the local track record for a matinee performance. All McKinney is all his name implies, being intensely bred to the family founder, McKinney 2:11¼. He is by Mr. Barstow's speed sire, Nearest McKinney 2:13¼ and his dam is Mrs. Weller by McKinney. He is a good going fellow and looks like a great prospect for a campaigning horseman to pick up.

—o—

THE "WINDUP" AT LEXINGTON.

Lexington, Oct. 15—Save for the fact that the second division of the 2:10 pace could not be finished, the forty-sixth annual meeting of the K. T. H. B. A. would have been brought to a close last night, the balance of the program having been entirely cleaned up. As it was, only a few spectators journeyed to the track today to see the one heat required for a decision, May Direct winning in time just a trifle better than her fastest trip yesterday. Ed Geers made an unsuccessful trip against the watch with Napoleon Direct in an effort to reduce his record of 2:00¾, while Etawah, starting to beat 2:03¼, trotted in an even 2:03.

Horsemen are shipping out immediately, a number going west to take in the P.-P. I. E. meeting at San Francisco. The final summary:

2:10 pace, purse $1,000, second division (two heats Oct 14):

May Direct, b m by Very Direct.....(Taylor)	1	2	1
Patrick M., br g by Norbells.....(Valentine)	2	1	3
Bessie R., b m by Geo. Sentell.....(Robinson)	3	4	2

Fern Hal, Goldie C., Clara Walker, Elmer Dickson, The Importer also started.

Time—2:05½, 2:05¾, 2:05¼.

—o—

CATTLE SHOW IS IN PROGRESS.

For several days the cattle show at the P.-P. I. E. has been in full swing, almost all the available stabling capacity of the livestock department having been required to house the representatives of the various beef and dairy breeds sent to the event by western farms, as the quarantine limited its participants to animals from sections heretofore and at present free from every trace of foot and mouth disease. Owing to winding up the horse show the report of the present event is deferred until next week. The judging has been pretty well completed, but the prize winners will be on exhibition until next Saturday and a visit to the stables will prove an eye-opener to those not fully familiar with the quality of cattle produced by our home breeders.

—o—

A NEW "INTERNATIONAL" PICTURE.

Pictures of that most popular of all light harness horses, Dan Patch 1:55¼, adorn the walls of many homes and offices throughout the world, for no horse was ever so greatly beloved as grand old Dan. The presence of the racing stable of the International 1:55 Horse Farm on the coast this summer and the recent sensational performances of its members at Los Angeles have awakened new interest in Dan and his get, and the "headquarters" at Minneapolis are besieged with requests for more pictures. To fill this demand Mr. Savage has had prepared in colors a new group picture of the three champions, Dan Patch, George Gano and Minor Heir. Address your request to Mr. Savage at Minneapolis, mentioning the Breeder and Sportsman, and you will receive this picture and some entertaining and instructive literature containing the story of their "making" and their subsequent performances.

—o—

$12,500 REFUSED FOR MARY PUTNEY.

The three-year-old division of the Kentucky Futurity did not furnish as much of a contest as did the two-year-old division but the mile in 2:05½ by the winner, Mary Putney, was one of the most remarkable performances of the week. Dick McMahon, who drove Mary in her races at Columbus, stated that he believed that she could trot in 2:04, and after seeing her go her mile here, I do not think that he was far out of the way when he made that statement. Mary Putney is a trotting freak. She came to the wire strong in her record mile, which by the way is a new record for three-year-old fillies, and trotted the last quarter in 31 seconds. Mr. C. H. Sears, the Fall River, Mass., horseman, who purchased her less than a month ago for $5,000, certainly made a lucky buy when he added Mary Putney to his stable, for she has won all three of her starts, and added $17,500 to his bankroll. After her race here, Mr. Sears was offered $12,500 for the daughter of San Francisco 2:07¾, but refused to let her go, even at that price.—Western Horseman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE B. C. FIELD TRIALS.

[By "Burrard."]

The British Columbia Friend Trials Club held the thirteenth annual trials at Ladner, B. C., on Thursday, Friday and Saturday, Oct. 7, 8 and 9, 1915.

The Derby Stake with eight entries was commenced at the Patterson Farm, four miles east of the town, at 10:30 a. m. Thursday. There were between 50 and 60 followers who motored out from Vancouver, a distance of about 20 miles. The trial grounds are on a large delta, divided into large fields set out to stubble or pasture; Mongolian pheasants and Hungarian partridges were quite plentiful, although the scenting qualities were very poor owing to the extreme dryness of the ground and atmosphere and heavy night frosts.

The awards were given out by Mr. C. M. Rolston, assisted by Mr. Norman Lyne, both of Vancouver, men who have had years of experience in the game, and were well received generally.

The first brace was a fine looking, stylish pair of nearly white English setters:

Budge—Kitchener, down at 10:50 to 11:25. These dogs were both very stylish; ranged moderately and had a very pleasing way of going with fair speed; they had little opportunities on birds and there was very little to choose with some advantages to Kitchener.

Pat—Jeff, down 11:40 to 12:15. These dogs embodied the extremes in many ways; Pat ranged closely, showing the effects of heavy cover-hunting, while Jeff, recently returned from the prairies, was extremely wide in range. Pat pointed and was steady, later pointed, flushed and chased; Jeff has a merry manner of going and is very fast. He made a long cast back to the handlers and shortly after was away off side and was out of hand when ordered up.

Spot's Queen—Fred, down 12:18 to 12:55. Fred pointed before released and pointed several times before driven out, the handlers flushed a covey of partridges which he had not been given an opportunity to locate. Queen missed an opportunity to find a covey which laid very close, then pointed nicely, then pointed, flushed and chased. Fred did a great deal of pointing, sometimes flushing and chasing but frequently was unable to raise anything. He was fast, very wide in range and at the end of a very long sprint pointed and flushed two pheasants. He is very timid on birds. Queen was limited on range and speed, showing the result of training on "hardack" territory.

An adjournment was made for lunch, the party motoring to Ladner where a splendid meal was served at the hotels. A couple of cars well filled arriving from Vancouver, joined the party. About three miles out on the Slough road the next brace was put down.

Cheshire Shot—Manly, down 2:38 to 3:15 p. m. This brace put up as good a heat as one will see anywhere, both going far and fast with delightful energy, confidence and dash. Spot having a little advantage in style; Manly going the widest; at one time nearly a mile away, both with excellent nose.

Rip—Lady Belle, down 3:39 to 4:15. This was another case of extremes. Rip at times was fast and stylish but limited in range, he like some of the others has had the most of his training in heavy cover while Belle went out wide and covered a great deal of territory in an easy manner, with considerable style; she pointed once and chased, she pointed again and failed to locate. Rip had one point and was making game when ordered up, both dogs skirted a field in which the gallery raised a large bevy of partridges.

The Second Series—Fred—Jeff down for forty minutes at 4:10. These two were old friends that had not seen each other for some time and trailed each other nearly all the while, taking about equal turns at leading. Neither did as well as in the first series.

Manly—Kitchener got fifteen minutes, commencing at 5:00. Manly did not sustain the excellent reputation he made in the first series; he considerably curtailed his speed and range while Kitchener improved his opportunities by consistently working. He ranged better and demonstrated his scouting abilities.

Lady Belle—Cheshire Spot were allowed fifteen minutes from 5:20. Belle took a right tangent out of the territory, picking up a bird or two, and then doubled back behind the followers. Spot improved the good impression he had previously created by excellent quartering, splendid range and speed and picking up numerous birds which he handled in every degree from a point to a wild chase, giving occasional barks. He fully demonstrated his right to first place in his excellent nose and improvement in speed, range and style.

Summary.

Ladner, B. C., Oct. 7, 1915, Thirteenth Annual Derby for pointers and setters, whelped on or after January 1, 1914, open to the world. Ten starters, 7 English setters, 3 pointers. Judges: C. M. Rolston and N. F. Lyne.

I.

Budge, white, black and tan English setter dog, by Songhee Chief x Tessie; W. S. Holland, owner, Chas. Murray, handler,

with

Kitchener, white, black and tan English setter dog; Typee Whitestone x Eanham's Lady; Chas. Herman, owner and handler.

Pat, w. and l. pointer dog; Tod Sloan's Son x Queenie; owned and handled by S. L. Howe,

with

Jeff, w. b. & t. English setter dog; Eastview x Princess Betsey; owned by H. Seukler, handled by Chas. Murray.

Spot's Queen, w and l. pointer bitch; owned and handled by Chas. H. Wilson,

with

Fred, w. b. and t. English setter dog; Melrose Mohawk x May; owned by C. A. Godson, handled by Chas. Murray.

Cheshire Shot, w. and l. pointer dog; Sandringham Shot x Coronation Shot; owned and handled by J. E. Owen,

with

Manly, b. w. and t. English setter dog; Melrose Mohawk x May, owned by D. G. MacDonnell, handled by Chas. Murray.

Rip, w. b. and t. English setter dog; Songhee Chief x Tessie; owned and handled by G. W. Hutchings,

with

Lady Belle Lingfield, w. b. and t. English setter bitch; Tony Spot x Lady Lingfield; owned by D. G. Macdonnell, handled by Chas. Murray.

II.

Fred with Jeff,
Kitchener with Manly,
Cheshire Spot with Lady Belle.

Awards.

1. Cheshire Spot. 2. Kitchener. 3. Manly, Lady Belle Lingfield.

All Age Stake.—Open to any setter or pointer. There were eight contestants.

The Winnipeg dog Add with Count as a bracemate had the distinction of opening this stake. They were put down at 10:30 Friday, Oct. 8, ran over stubble and pasture. Both dogs had good range and speed. Add carried a high head and showed his enjoyment by a merry tail. Count was steady to one point, false pointed on more than one occasion and twice steady to flush. Add pointed nicely three times but flushed and chased more.

Lassie and Shotover down 11:20 to 12:50. Lassie is a very stylish little bitch, not very fast and with limited range; she made one very nice point and honored her partner's point very nicely, which courteous act he refused to reciprocate when the opportunity was presented. He had plenty of chances with game, demonstrated he had a good nose, but a bad education, poor range and fair speed.

Fluette and Jim were down for half an hour at 11:55. Both showed well in range, speed and style. Jim got all the bird work, making five steady points; he false pointed occasionally, flushed and chased on one occasion. Fluette acknowledged one point with a very nice back. Her nose was off apparently or she did not seriously consider the necessity for hunting.

Maximus and Spring got a thirty-five minute heat from 2:30 in a nice breeze and leaden sky. Birds were too plentiful to give Maximusa chance to show extreme range which his conformation would indicate him capable of, both dogs had good style and speed. Maximus had seven good points to his credit, he flushed and chased four others. On one occasion coming down wind he ran into a bevy of partridge which got up all around him when he promptly dropped. Spring Maid's nose seemed to be off color, she making only one point when birds were raised.

Second Series.—Add and Jim opened the second series at 3:35 and were given twenty minutes. Both dogs were good in speed, range and style. Add was not up to his first heat, he flushed and chased. Once while Jim was on a steady point he refused to back, ran in, flushing and chasing. Jim did not move a muscle. All through he put up a faultless heat, getting four points which he handled perfectly.

Count and Maximus, down at 4:20 to 4:40. Both dogs improved a little in this heat. Count did not trail as formerly and Maximus got better range. Then both made three nice points, Count backed once and was steady to flush. Maximus' demerits consisted of a couple of chases and unsteady to wing, both dogs, however, are high class animals, stylish, with good range and speed.

Summary.

Ladner, B. C., Oct. 8, 1915. Thirteenth All Age Stake for setters and pointers. Open to the world. Eight entries, six setters and two pointers. Judges: C. M. Rolston and N. F. Lyne.

I.

Add, white and lemon English setter dog; Count Whitestone II. x Miss Winnipeg; owner, Jos. Lemon, Winnipeg; handler, Chas. Murray,

with

Count, w. and lemon English setter dog; Count Whitestone; owned by P. W. Charlston, handled by Chas. Murray.

Shotover, w. and l. pointer dog; Spot's Rip Rap x Wilson's Point; owned and handled by C. A. Godson, Vancouver.

with

Lassie, b. and w. English setter bitch; Powhattan x Ch. Monora, owned by D. G. Macdonnell, handled by Chas. Murray.

Jim, w. and t. English setter dog; Spots Bad Boy : Harper's Nora; T. W. Williams, owner and handler,

with

Fluette, w. and b. pointer bitch; Spots Rip Rap x Jessi Russell; D. G. Macdonnell, owner, Chas. Murray, handler

Maximus, w. and tan English setter dog; Eastview : Westwind II; owned by D. G. Macdonnell, handled by Chas. Murray,

with

Spring Maid, w. and l. pointer bitch; Ch. Spot's Ri Rap x Jessie Russell; owned by H. H. Abbott, handle by Chas. Murray.

II.

Add with Jim,
Count with Maximus.

Awards.

1. Jim. 2. Maximus. 3. Count.

Shooting Dog Stake.—Open to any dog. To be handled by amateur members of B. C. F. T. Club to be judged as a shooting dog. As there is no well defined standard by which a shooting dog is to be judged there was naturally some difference of opinion existing until the awards were announced. Some handlers contended that a few good points nicely handled in a stylish manner should carry more weight than mere quantity. Judging from the awards one would suppose that the opportunities to secure birds were considered of more importance than the quality of the work.

Jack Revere and Don were the first brace, and were put down at 10:25 to 11:10 Saturday morning near the Smellie ranch. Jack got two points over which the birds could be shot, range good. Don was strange to his handler, he has fair range and speed, made one shootable point.

Lassie and Obie down 11:15 to 11:50. Both dogs were good in range and speed. Obie was strange to handler, made two points. Lassie had three to her credit.

Jordan's Nell and Fluette, 12:00. Nell ranged narrow and was not very fast; she made one good point and was steady. Fluette was fast and ranged well, had three good points.

An intermission was made for lunch at Ladner, after which a start was made in the Slough road, about three miles out, with:

Add and Jordon's Queen at 2:20 to 2:45. Add located and pointed four points over which birds could be had, while Queen found and held two. A great many birds were available in this heat.

Spot's Queen and Shotover were put down in stubble at 3:00. Queen pointed twice, flushed and chased several times. Shotover made ten points, eight of which were very good. Some reasonably nice bird work was done by Shotover, his speed and range were both good.

Second Series.—Jack Revere and Lassie ran from 3:45 to 4:10. Both ranged well and were fast. Jack backed Lassie, then stole the point and flushed, both were steady to wing. Lassie got three points.

Fluette and Shotover, 4:15 to 4:45. This was a beautiful working pair of dogs, their range and speed was very good and both were very sylish, Fluette doing some exceptionally beautiful work; both were steady to flush, although both had one unsteady point. Shotover had two points more to his credit than the bitch.

Summary.

Shooting Dog Stake, by the B. F. Field Trial Club held at Ladner, B. C., Oct. 9. Ten entries—five English setters, one Gordon setter and four pointers. Judges: C. M. Rolston and N. F. Lyne.

I.

Jack Revere, w. b. and t. English setter dog; Paul Revere x Lady Belle; owned and handled by T. Williams,

with

Don, w. and b. pointer dog; owned by W. Hancock, handled by J. E. Owen.

Lassie, b. and w. English setter bitch; Powhattan x Ch. Monora; owned and handled by D. G. Macdonnell,

with

Obie, w. and b. English setter dog; Scamp x Lottie Gladstone; owned by W. Hodson, handled by J. E. Owen.

Jordon's Nell, b. and w. pointer bitch; owned and handled by Thos. Jordon, Ladner,

with

Fluette, b. and w. pointer bitch; Spot's Rip Rap x Jessie Russell, owned and handled by D. G. Macdonnell.

Jordon's Queen, Gordon setter bitch; owned and handled by Thos. Jordon, Ladner,

with

Add, w. and lemon English setter dog; Count Whitestone II. x Miss Winnipeg; owned by Jos. Lemon, Winnipeg, handled by D. G. Macdonnell, Vancouver.

Spot's Queen, w. and l. pointer bitch; owned and handled by C. H. Wilson, Vancouver,

with

Shotover, w. and l. pointer dog; Tod Sloan x Wilson's Point; owned and handled by C. A. Godson.

II.

Jack Revere with Lassie,
Fluette with Shotover.

Awards.

1. Shotover. 2. Fluette. 3. Lassie.

Charles Murray, the veteran handler, has recently returned from the prairie where he was successful in landing most of the big stakes. He is now located at the Fair Grounds at Ladner, in excellent quarters. He has an exceptionally fine string of dogs, most of them being the property of Mr. D. G. MacDonnell.

This has had a very strenuous season and the derby dogs are worked as fine as old stagers. The head of the kennel Ch. Melrose Mohawk was left in the hands of Mr. Gude, who will hold in condition for the big winter trials in the South.

Two Irish terrier puppies which are of exceptional quality were brought out by Alf Delmont at the recent Toronto show. These puppies, Leeds Tipster and Leeds Belle of Shannon, went from puppy to winners in their class.

SAN JOSE SHOW.

One of the most interesting events of the recent arden City show was the appearance of Failsworth White Knight in the judging ring. It was the first ime the famous English bulldog has appeared in the ing in this country, although he has won sweep- takes in many shows throughout England. He easily vent through to first in winners class and over sev- ral good ones, too.

The exhibit of the Anoakia kennels of Santa Anita is the most elaborate in the history of San Jose hows. Owned by Mrs. Anita Baldwin, the dogs are benched in keeping with her artistic ideas. The ex- hibit was at the southern end of the hall in special benching, upholstered in black felt with trimmings of cardinal felt, the colors of the Anoakia kennels— a red maltese cross on black ground, the famous col- ors of Lucky Baldwin's stable that made turf history more than once—forming a distinctive decorative feature. At the back of the benching was a large screen of cardinal, outlined in black, with a maltese cross outlined in tiny red incandescent lamps. Across the top of the screen was the name of the kennels. Potted shrubs added to the artistic effect and three white-clad attendants completed the display.

Miss Lydia K. Hopkins of Menlo Park had an in- teresting exhibit of toy dogs, among them being her internationally famous Yuen Shi Kai of Braywick, a beautiful reddish golden brown Pekingese spaniel which came from Lady Samuelson's English kennels. Miss Hopkins' entries were in the name of the Sher- wood Hall kennels of which she is the owner. Miss Hopkins is the president of the Pacific Coast Toy Dog Association, the members of which have offered many valuable special trophies for the exhibitors in the toy dog department. Miss Hopkins always has her own special benching which is prettily decorated.

It was a thrilling moment the last night when Chris Shuttleworth declared Failsworth White Knight the best dog in the show. For an hour or more hundred of spectators had stood, figuratively and literally on tiptoe of expectancy for the declaration. Dogs of various breeds, sizes and color had been paraded around the sawdust ring time and time again—they were the winners in the many classes. Dogs they were that experts claim to be the best in quality and breeding ever assembled in a show on the Pacific Coast. Dogs from all over California were in that long-waited-for parade before Judge Shuttleworth. He eliminated them one by one until the list num- bered two—Failsworth White Knight and Havelock Perfection, a beautiful sable and white collie. While the crowd waited in interested silence, he examined each in turn again and again—he stood to one side and reflected upon them and then—the white bulldog was declared the winner.

Anaokia Kennels also won the brace class trophy with two Russian wolfhounds.

EXPOSITION SHOW JUDGES.

There will be but two judges at the Exposition Dog Show, to be held from November 30 to December 1. They will be W. M. Coates, of Vancouver, B. C., for terriers, and J. W. Burrell, of Broomall, Pa., for all other classes of dogs.

Coates has been chairman of the advisory board of the Canadian Kennel Club for three years, and president of that organization for a like period.

Burrell has had many years' experience with the best dogs and leading kennels of the country. He was judge of collies in San Francisco in 1897.

THE PYRENEAN MOUNTAIN DOG.

This is one of the oldest known breeds, and was used to protect the flocks from wolves and bears in former days. Of course, wolves have long been ex- tinct in the Pyrenees and bears are very rare there; but the dogs are useful all the same, for human marauders are to be found even in the most solitary places of the earth. At the end of March the flocks leave the villages for the mountains, where they fol- low the thaw up the slopes, returning in October for the winter. I am familiar with the country (i. e., the French side of the Pyrenees), and carefully col- lected all information about Pyrenean mountain dogs when I decided to try and found a kennel of them in England. People sometimes call them Sheepdogs; this is quite wrong and misleading. In their native country they are always known as "Les Chiens de Montagne," and as there sheep follow the shepherd, Sheepdogs, in our Collie sense of the word, are superfluous. Their attractions are undeniable. Be- sides being beautiful to look at, they are also abso- lutely hardy and healthy, and are far more intelli- gent than any other kind of a big dog that I have ever come across. These points and type have always remained the same. A good specimen must be com- pact with plenty of bone, but not of clumsy build, with a powerful head and small ears. The coat should be long and dense, like a fleece, and pure white, the tail feathery (often with a kink in it), perfectly round feet, and last, but not least, double dew claws.

As I say, the coloring is white, it may be accom- panied by brindle or pale yellow markings, or else remain all white. The females are rather smaller, and have usually rather less coat than the dogs, which resemble small Bernards in size. Their walk is another characteristic (one which English judges find it difficult to understand); it is as though they were picking their way among rocks, and is very dignified. Though making perfect guards, they are most delightful and gentle companions as pets. I have always found them to possess iron constitu- tions and to be easy to rear. My chief difficulty has been to secure perfect specimens that are also un- related. When wolves disappeared from the moun- tains the breed became very rare; till, now that they have been discovered by foreigners, every ani- mal, however inbred or inferior, is carefully kept for sale to the tourist.—Lady Sibyl Grant in "The Field."

THE DUPONT HAND TRAP.

There have been occasional notices lately in the various sporting and daily papers, regarding the growing interest taken broadcast concerning the Du- Pont Hand Trap, and as that most enterprising com- pany has never been known to foist a "dead one" on the public, it may be taken for granted that when it advocates the use of any particular article, full confidence may be reposed on whatever is recom- mended. Trap shooting in the United States has attained such vast proportions today that its votaries are numbered by the tens of thousands, and there is hardly a village, however small, that is not equipped with some sort of shooting ground—good, bad or in- different. Up to date, however, the general style of shooting at flying targets has all been of the same kind—a sort of stereotyped regulation brand, admit- tedly good enough practice as a target shooting and target breaking game, but obviously not a style of shooting best suited to perfecting its votaries in ac- quiring the most essential knowledge in handling and shooting the sportsman's recognized and ac- knowledged double barrel game gun. So, when it was announced that Mr. and Mrs. Ad. Topperwein were going to give an exhibition of fancy shooting on the grounds of the Golden Gate Gun Club, in San Francisco on the 10th of this month, and moreover as that date was selected as "Beginners' Day," many who take but little interest and no enthusiasm in the usual style of target shooting came out to the club, and, I am sure, spent a pleasant and I hope profitable time in viewing the shooting. Nothing that I could say would add one particle of luster, nor even in- formation, regarding the splendid marksmanship of the two greatest stars in their particular line this, or any other country, has ever known, so I will merely record that this unique exhibition was simply a repetition of what those celebrities perform at all times and under all conditions— the whole perform- ance going through in that slap-bang, offhand manner, that makes the most difficult shots appear easy, illus- trating from every point of view that both are mas- ters of the game as well as of their weapons.

In the regular 100 target club event, Mrs. Topper- wein ground out 97, which is about her regular, every day gait, and so long as the present rules governing trap shooting are in vogue, everyone who would learn to handle a shotgun properly could do no bet- ter than copy this charming, amiable woman's style. When it comes to fancy shooting with rifle and pistol, with only her husband as a competitor, her great skill is not so apparent, because as a fancy shot he has all along been her instructor, and is a marvel himself; but when in competition with either professional or amateur members of any gun club—then Mrs. Top. shines as a brilliant star, with never a woman in her class.

By the way, there was another 97 made that day under precisely the same conditions, and who do you thing turned the trick? Why, the redoubtable Tony Prior, who during the whole season has, all along, landed just one point behind the winner, whether at pigeons, double or single targets, it has been the ding-dong same Tony—one point shy, and only one point, mind you.

So, being high amateur, Tony waltzed off with the Dupont spoon, while his son, E. T. Prior, by scoring 20 out of 25 targets, carried off the Dupont watch fob, being the highest in the "Beginners'" class. It was a good day for the Prior family, especially as the lad, who is in his teens, showed himself worthy of his sire.

Of course, I could have got to the point much sooner and started right off with a few remarks about the hand trap; but then, I could not skip the Topperweins nor the Prior kid, so please excuse me.

Well, when one says "hand trap" the mind instinct- ively reverts to Jack Fanning, for he has most un- doubtedly put a few kinks and flourishes in the flight of the targets thrown by it, that will puzzle anyone, regardless of age, color, creed or previous reputation, real or faked, and therein lies its principal charm; and where it proves itself at once and for all the very finest kind of contrivance so far known, by which one can actually learn to handle and shoot a game gun under game and field conditions.

Fanning simply gloats and revels in his work, and while he does not serve impossible shots, i. e., throw targets so low that one can't be fast enough to catch them, yet he does spin out some artful dodgers that tax the skill of the very best and quickest shots, and it is no disgrace to be baffled by such erratic flights and curves, high and low, sideways, coming from behind as they do and darting by in all directions and angles, fast and slow, up and down—any old way.

Now it stands to reason that this kind of practice is of inestimable value, and from any standpoint the most admirable way of practicing field shooting dur- ing the close season so as to be ready for anything when the time arrives. In the hand trap shooting both barrels are allowed, which is a very wise pro- vision, for it teaches the prompt and accurate deliv- ery of the second load, an inestimable asset in all kinds of game shooting afield.

Furthermore, the hand trap itself is inexpensive, not bulky, easily carried and always ready at a mo- ment's notice, and any one after a little practice can at any rate handle it well enough, although, of course, to make it do such duty as Fanning exacts from it is quite another story, for he actually "plays" on it, as would a musician on his favorite instrument, giving one such lively erratic offers, that one actually for- gets he is shooting at a mere saucer.

It is quite safe to say that one can acquire more actual, serviceable field practice shooting at 500 tar- gets from a hand trap, by making the flights difficult, irregular as to direction, speed, elevation, and time of starting—i. e., being sprung—than one can possibly gain from shooting from now until doomsday at reg- ulation targets and angles with the gun to the shoul- der—one shot only allowed, and very little variation in flight on all calm days. These remarks apply ex- clusively to practice, not to any kind of open compe- tition, because the mere fact that some rule as to elevation, distance, speed etc., etc., must perforce govern to make all contestants shoot on an even keel, would at once emasculate the very raison d'etre of the hand trap, which is an outlaw in trap- shooting parlance, as it acknowledges no set rules nor does it abide by any printed regulations, but rather is a handy, simple, inexpensive little machine that, with proper treatment and a liberal supply of "pep" in the operator, will surely teach beginners to handle their double guns, and improve the skill of the most proficient veterans. The question resolves itself into whether a man wants to learn to break a whole lot of targets under existing rules and regula- tions, which is obviously a most laudable endeavor, although not conducive in developing the best there is in the shooter, there being too much sameness one shot with another—or whether he desires to become a good rough and ready game shot, pure and simple, one well able to take care of himself in any company, whether upland or wildfowl shooting, albeit in no way detracting from the stand-in-a-row, gun-to-the-shoul- der, word-of-command style now in vogue and in which so many excel; but it is a display of a lament- able lack of skill when, for example, a busy, whirring, darting quail has the audacity to spring from an un- expected spot, at an unannounced moment, and sail gracefully away without having had the common po- liteness to wait until the disconcerted nimrod had said "Pull!" Very rude, of course, but the hand trap that, gives no warning, waits for no command, send- ing the target anywhere, anyhow and at any moment, prepares one admirably for all such emergencies. So I say, All hail, the Hand Trap!!

GAUCHO.

At the Traps

Near Los Angeles.—Notwithstanding that it was the first open Sunday on quail and ducks, twenty- four target shooters turned out at the Vernon Gun Club to match their skill shooting the elusive black- bird, which has no closed season on this coast.

Wilshire, McMurry, Groat and Dr. Bishop, after the smoke cleared, were found tied at 48 breaks for the Stanton A. Bruner challenge trophy, event 1.

Ties were shot off at 25 targets and a second tie resulted between Groat and Dr. Bishop.

As Groat was obliged to leave the grounds in order to catch a train, the tie between him and Dr. Bishop will be decided tomorrow on the first 25 birds shot in the regular event. The scores follow, event two being practice shooting:

R. L. Hall	50	46	..	..
J. C. Perceval	50	44	..	..
George Keeny	50	44	..	..
J. D. Dierdorff	50	47	..	..
C. Linderman	50	43	..	..
R. I. Keeton	..	..	25	15
George Oliver	40	37	..	..
Godfrey Knutson	..	..	..	..
Peter Person	..	..	25	10
A. W. Bruner	50	41	100	86
William Pugh	50	42	25	21
W. G. Brown	..	..	25	10
W. T. Dougherty	50	40	75	55
W. H. Wilshire	50	48	25	21
Less McMurry	50	48	25	22
Dr. Packard	50	44	..	..
O. A. Evans	50	47	..	..
C. E. Groat	50	48	50	45
George Cline	..	..	75	57
J. L. Smith	..	..	75	35
C. J. Shaul	..	..	50	26
Dr. Bishop	50	48	..	..
Fred Kimble	..	..	25	21

Following is the score for ties in the cup match, shot at 25 targets: W. H. Wilshire 21, Less McMurry 22, C. E. Groat 24, Dr. Bishop 24.

Dr. Packard wins A class and watch fob. Less McMurry wins B class and watch fob. C. E. Groat and Dr. Bishop tie for C class and watch fob. W. T. Dougherty wins D class and watch fob.

* * *

Garden City Closes Season.—The season of the San Jose Blue Rock Club terminated with its final shoot last Sunday, the scores being as follows:

George H. Anderson 90—100, C. H. Nash 89—100, A. F. Baumgartner 88—100, C. R. Arques 87—100, Dr. Barker 41—50, William McKagney 40—50, S. Tomp- kins 38—50.

Doubles, 24 pair—George H. Anderson 41—48; Wil-

liam McKagney 40—48, A. F. Baumgartner 35—48, Dr. Barker 33—48, C. R. Arques 32—48.

Charles H. Nash made a straight run of 50.

Many good scores were made and considerable improvemept noted during the past six months. The trophies were well distributed. Dr. A. M. Barker was high in class A and was closely pressed by C. H. Nash and George H. Anderson. E. W. Jack won first in class B and Clem Arques first in class C.

Charles H. Nash won the Santa Clara county championship seven times out of 12; E. W. Jack, the handicap; George H. Anderson, doubles championship; Mrs. Ada Schilling, the trophy for the greatest number of shots for 1915; Dr. A. M. Barker, long run (60 straight on June 20); C. H. Nash, second long run (55); George H. Anderson, third (48); A. F. Baumgartner 44, Mrs. Schilling 43, C. R. Arques 31, E. W. Jack 30.

Class A, 12 best scores:

A. M. Barker	295	300	A. F. Baumgartner	284	300
C. H. Nash	293	300	J. T. Douns	281	300
Geo. H. Anderson	292	300	R. C. Hogg	277	300
Mrs. Ada Schilling	288	300			

Class B, 12 best scores:

E. W. Jack	285	300	W. J. McKagney	280	300

Class C, 12 best scores:

C. R. Arques	280	300	H. S. Anderson	225	300
H. H. Clark	250	300	F. Riegel	220	300
John Guilbert	230	300			

Handicap, 12 scores (Class A had two "dead" added; class B, 4; and class C, 6):

E. W. Jack, class B	299	300
C. R. Arques, class C	295	300
George Anderson, class A	201	300
Charles H. Nash, class A	294	300
A. F. Baumgartner, class A	282	300
A. M. Barker, class A	289	300
Mrs. Ada Schilling, class A	291	300

The doubles championship of Santa Clara county:

Geo. Anderson	237	288	A. M. Barker	211	288
A. F. Baumgartner	219	288			

Santa Clara county championship, 12 matches—C. H. Nash won 7, A. M. Barker 3, A. F. Baumgartner 2.

C. H. Nash's winning scores were 25, 25, 24, 23, 24, 24, 25. A. M. Barker's, 24, 24, 23. A. F. Baumgartner's, 25, 23.

On October 24 Mr. and Mrs. Ad. Topperwein will give a free exhibition at the San Jose Blue Rock Club. Mr. Topperwein is the world's greatest rifle and pistol shot. Mrs. Topperwein is the world's greatest professional lady shot. They are just finishing a tour of America. Mrs. Topperwein has qualified as an expert marksman, shooting with the United States soldiers at two, three, and five hundred yards. Each exhibition given by these two great experts with rifle and revolver is done with solid bullets.

The first squad in a 500 blue rock exhibition shoot, October 24, will be composed of five corking good shots—Mrs. Ad. Topperwein; Mrs. Ada Schilling of San Jose, lady champion amateur of the Pacific Coast; H. E. Poston, R. C. Reed, and O. N. Ford of San Jose. Squad No. 2 will be the champion squad of the San Jose Blue Rock Club, headed by Charles Knight.

* * *

Beginners' Day Was a Hit.—Many trapshooting clubs throughout the country held a "Beginners' Day" during the late summer. The idea proved to be a fascinating one and many persons faced the traps for the first time.

Reports show that there was hardly a locality that didn't hold such a shoot. In many cases women participated.

A record of all shoots showed that 6,784 men and 522 women took part, which emphasizes the increased interest in learning to shoot.

* * *

At the annual meeting of the Nemours Trapshooting Club the following officers were elected to serve for one year: Mrs. Harry White, president; Dr. Florence Seward, vice-president; Miss Harriet D. Hammond, corresponding secretary; Miss Marie V. Lannan, recording secretary; Miss Celeste D. Gentieu, treasurer.

The club decided to hold regular meetings the second Monday in every month at the homes of the members and combine business and pleasure by having a little social evening each month after the business meeting.

The following handicap committee was appointed, consisting of Miss H. D. Hammond, Miss Amy Cchofield and Miss Marie V. Lannan.

* * *

Yale Holds First Shoot.—The first practice shoot of the year was held at New Haven Wednesday, when a large squad of shooters reported to Captain E. Lyman Jr. The scores were unusually good for so early in the season and Coach Von Lengerke is confident of producing a team that will be a strong contender for the intercollegiate championship.

* * *

Beginners' Shoot at Cornell.—The first student shoot at Cornell will be held October 23, when a Beginners' contest will take place over the Lakeside traps. The beginners will shoot according to class and trophies have been provided for the five highest shooters on the winning class team. G. T. Hecht, '17, is arranging the details of the shoot and Samuel Walden '16 will be on hand to instruct the new shooters.

TWO DAYS WITH THE "CANS."

I had been longing for some time for a good duck hunt, and when Germain Carp invited me up to the S—— Gun Club for a two-days' shoot I quickly accepted the bid, and promised to meet him at the depot next morning. I had "blew" myself for a new automatic a few days previous, and thought of no better way to initiate it than amongst the canvasbacks in San Pablo bay.

The club boasted of one of the finest preserves on San Pablo bay, and was composed of some of the keenest sportsmen I ever had the pleasure to meet. It was not their desire to slaughter right and left, but to enjoy a few days shooting once or twice a month, which seemed a treat after being penned up in offices in a busy city day in and day out.

Fred, unlike his brother, cared little for hunting, so leaving him behind to keep house, we packed our decoys, ammunition and guns in the little flat-bottomed skiff, and waving a farewell, pulled for the blind.

The day was ideal; clouds hung over the horizon, and there was just enough breeze to make the water choppy and keep the birds on the wing. The club owned several "blinds" which were built so they floated low on the water. An anchor on each end kept them in position, and the sides were well covered with tules, so they resembled small islands. Two of the "boys" had come down the night before, and some sharp reports in the direction of one of the blinds was evidence of "something doing."

A few minutes' row, and we were busily employed setting out decoys, for it was after one o'clock and the birds were commencing to work inshore looking for a good place to feed. Every evening during the week the water around each blind was strewn with rolled barley, which sinks and tends to keep the birds inshore. Seated comfortably in the blind, we were prepared for the sport that was to come.

A sharp whisper, and a "dig in the ribs," warns me of an approaching bunch of "cans." Looking over the edge of the blind I perceived about a dozen fine birds coming "dead on" for the decoys, not twenty feet in the air. On they came and as a pair of grand old drakes swung by my end, I brought my sight on a level with the chestnut head and quickly drawing a bit ahead fired. He collapsed like a "rag," while the other one withered in the air, twenty feet beyond. Germain had not been idle, for over on his quarter a couple of beauties lay wildly fanning the air with their black paddles.

The tide was running out like a mill-stream, and our "kill" were some hundred yars away before we picked them up. Looking back we saw a couple of bluebills hover over our decoys for an instant, and the next moment drop in amongst them. What can be more exasperating than to have a bunch of ducks calmly light in your decoys when you are completely out of range of them? They soon saw their mistake and with a sharp whistle they were off for some feeding ground more neutral. I sent a charge of fives after them but it only hastened them on.

We had just reached the blind when a saucy little butterball came skimming over the water at a "2:40 clip." He probably had a pressing engagement in some choice feeding ground and was losing no time in making connections. As he passed by us at forty yards Germain remarked, "Watch me pulverize him." Leveling his trusty old "pump," he gave him a good lead and fired. After making a few startling somersaults, our webfooted friend struck the water and was under like a flash. In a few seconds he came up like a rubber ball, within a dozen yards of us, but we both decided he had earned his liberty. He gave a few startled glances in our direction, and was up and off, a scared but wiser individual. I have no doubt but that they are the hardest birds to kill in the whole duck family. I have hit them with two charges of shot, and then had them flop out of range and escape? As Germain said, "All they are made of is a 'bunch of feathers and a piece of gall.'"

Towards evening we had some fine shooting. Out of a bunch of three bluebills I managed to drop two, but when a flock of "cans" came over a few minutes later, I openly made a clean miss out of three shots, which made me think of that old saying, "To miss is mystery. To hit is history." Germain was in fine form that day, killing twenty-two birds out of a possible twenty-five.

About five o'clock the tide was running out so rapidly that we decided to pull for land. Even before we were in the club house our blind was high and dry. Fred had prepared a fine spread for us and when the other boys came in we certainly did justice to it. Lamb chops, fried spuds, canned corn, hot French bread and coffee, was the menu, and it could not have tasted better to our keen appetites had it been served in the best grill in the city.

Supper over, we "drew" our birds and compared strings. Germain and I totaled up thirty-eight "cans" and bluebills, while the other two fellows went us twelve better. We were all satisfied with the day's sport, and hoped the morrow would net us as well. Dishes were washed and put away, and all hands sat down to a friendly game of cards. One of the boys opened up a box of cigars, and we all smoked to his health "tul" the clock striking eleven warned us of the strenuous day before us. I was soon asleep, dreaming of all kinds of impossible shots, and I don't think I moved till I heard someone calling "breakfast." We were all dressed in a hurry, for there was a streak of dawn over towards the eastern hills. Steaming coffee, ham and eggs and hot biscuits put us in good condition for the day's work. It was just daylight when we finished placing our decoys, but there was not a breath of air stirring and the bay was as smooth as glass. We got very little shooting till after nine o'clock, when a passing launch frightened a few flocks toward us. A bunch of "cans" drifted in and hovered over our decoys, presenting a beautiful shot. We poured six shots into them, and they departed after leaving five of their members in a hopeless condition.

That ended the shooting till afternoon, when we shot a pair of sprig that gave us a chase over about ten acres of water before we managed to kill them. A duck when slightly wounded can swim under water nearly as fast as a man can row a boat, especially against the tide. There was nothing much doing the rest of the afternoon, so about 4:30 we pulled in our decoys and rowed for the shore. We had covered about half the distance, when Germain called my attention to a lone bluebill that was flying over us at a height that seemed well out of range. Hastily slipping in fives I gave him a good lead and pressed the trigger. For an instant the bird seemed to hover in midair. Then dropping his head he came down like a chunk of lead. On examining him we found where a single shot had penetrated his head. That was the only visible mark we could find. It was a chance shot.

The other boys came in shortly after we landed, and then it was hurry scurry to get cleaned and catch our train. "Old John," the good-natured keeper, came in just as we were leaving and helped us to the train with our game.

Germain and I had a total of sixty-two birds, while the other two fellows had a string of seventy-one birds. We were all satisfied with our two-days' sport, and there was no one on the train that could show a better bunch than we carried home. After a hearty handshake, I bid my good friends adieu and wended my way through the crowded streets. I don't know of anybody that could have been prouder than I, as I swaggered down the street with my string of thirty-one birds carelessly thrown over my shoulder.

FLY CASTING CONTESTS.

The final regular medal contests of the San Francisco Flycasting Club took place at Stow lake Saturday afternoon and Sunday forenoon last. After the final "make up dates" are cast and the ties, if any, cast off, the winning rodsters for this season will be announced. Event 1, light tackle accuracy percentages; event 2, dry fly accuracy percentages; event 3, ¼-ounce lure casting accuracy percentages; event 4, average distance in feet, ¼-ounce lure; event 5, light tackle distance in feet; event 6, salmon tackle flycasting distance in feet.

The "slam" cast ¼-ounce lure, Saturday scores were: Forbes 145 feet, Davis 140, Wekell 141, Burgin 120, Forbes 100. Sunday scores: Forbes 145, Davis 130, Gardner 120, Kewell 125, Burgin 95.

"In and out" points—Davis 6, Forbes 4, 3; Kewell 1, Burgin 6, Gardner 3, Brookes 1, Rogers 1; six other entrants scored goose eggs. The scores for the two days follow:

Saturday Contest No. 10, Stow Lake, October 16, 1915. Wind, southwest. Weather, cloudy.
Judges, W. A. Thomsen Jr., C. H. Kewell, Joe Springer. Referee, W. J. Davis Jr. Clerk, Chas. E. Hills Jr.

FIXTURES.

Registered Tournaments — Pacific States and Territories:

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 15, 16, 17—The Arizona State Tournament, scheduled for Tucson, Ariz., November 5, 6, 7, has been transferred to Phoenix, Ariz., under the auspices of the Phoenix Gun Club, and the dates changed to November 15, 16, 17. Sunday, November 14, practice day.

THE FARM

FROST PROTECTION WORK.

With the approach of the period of frost occurrence action is being taken to extend the frost protection work of the weather Bureau.

In the fall this work is confined largely to the protection of tobacco, cranberries, alfalfa seed, tomatoes, etc. Considerable extensions of the service in the large tobacco-growing sections of the Connecticut Valley and southern Wisconsin have recently been authorized, and action is now being taken to organize a similar service in the tobacco districts of Kentucky.

Some extensions have been made last year in the cranberry protection work in New Jersey and Massachusetts. A similar service in the cranberry marshes of Wisconsin has been maintained for a number of years.

Early frosts in the western mountain districts where alfalfa seed is largely produced frequently cause serious loss, which, however, can be overcome to a great extent if the alfalfa is cut before their occurrence, as the seed will ripen afterwards. On this account special forecasts are now being made for some of the more important districts whenever the conditions favor the occurrence of frost at critical periods and interested persons are notified in time to secure their crop from serious injury.

A similar service is maintained in some of the districts where tomatoes are extensively grown for canning purposes. The protection of fruits from the frosts of early spring is also being studied further by the bureau. Additional temperature surveys of some of the more important fruit districts have recently been authorized, notably in the Rogue River Valley of Oregon, in the Salt River Valley near Phoenix, Ariz., and in some portions of southern California.

Assistant Farm Advisor Dougherty has lined up about 350 walnut trees on which the growers will keep records. Mr. Dougherty takes notes on the size and vigor of the tree, the type and quality of the nuts, the methods of culture, and the relative amount of blighted nuts. The growers weigh the nuts as picked up and record the weight on a card attached to the trung of each tree. The object of this work is to show that some trees in the orchard are "boarders," that some barely pay expenses, and that others are profitable and worthy of propagating. The citrus growers who are practicing tree-record work in the county have already begun to work-over some trees, and it is hoped that the result of this walnut record work will show the desirability of the walnut growers doing likewise.—William B. Parker, Farm Advisor, Ventura county.

There is a difference between farm woodland and the farm woodlot. Farm woodland is farm land which has not yet been cleared. Farm woodlot is a term which might best be used to mean a part of a farm permanently devoted to timber production, under a sound plan of farm management. The size and the location of the woodlot will depend upon various considerations, of which the most important are the home needs of the farm, the character of the land, and the present and prospective market for material from the woodlot.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints

REMOVES THE SORENESS--STRENGTHENS MUSCLES

HOUGHTON MARION, O.

"How to Break Colts"—
It will soon be time to break your colts and give them their first lessons.

We have one very important suggestion to make. Don't endanger your life or the future usefulness of valuable colts by using an old broken down cart.

Buy a new, up-to-date, easy-riding Houghton break cart,—a cart of perfect balance, easy-riding with no horse motion, something that will be safe for you to ride in and safe for your colts to be hitched to. It will be mighty cheap insurance. What will it profit you to save $50.00 and ruin a good colt?

After your colts are broken and you are ready to "step them up" a little, the best vehicle for the purpose is a Houghton high wheel cart of which we have several "big selling" models.

Send for our "special cart circular" and price list. A postal will do.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address, I. F. EATON, Chico, Cal.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.25

Breeder and Sportsman
One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly
Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3 Now and Get Them Both

$1.00 NOMINATES YOUR MARE IN

THE WESTERN HORSEMAN

STAKE NO. 10

FOR FOALS OF MARES BRED IN 1915---FOALS OF 1916

A REAL STAKE—A FIXED PERPETUAL ANNUAL CLASSIC

Every Cent Paid IN in Payments---With Accrued Interest

TO BE PAID TO THE WINNERS AND NOMINATORS IN 1919

CONSERVATIVELY ESTIMATED VALUE $10,000.00

And if Worth More The Winners Will Get More

$300 WILL BE PAID TO NOMINATORS OF THE DAMS OF THE MONEY WINNERS

The Balance of the Amount Paid in Will Constitute the Purse or Stake Which Will be Divided as Follows:

65 PER CENT. FOR TROTTERS | **35 PER CENT. FOR PACERS** | **TO RACE AS 3-YR.-OLDS IN 1919**

Total Cost to Year of Race Only $11.00

CONDITIONS—Open for the nomination of mares bred in 1915—foals of 1916, to close November 1, 1915. A fee of $1 will be charged for each mare nominated. Nominations must be made on or before November 1, 1915, at which time the nominator must give the name, breeding and description of the mare, and the name of the stallion to which she was bred in 1915.

PAYMENTS—On November 1, 1916, a payment of $5 will be due on each foal which it is desired to keep eligible, when color and sex of foal must be given, and on May 1, 1917, an additional payment of $5 must be made on all foals kept good, including substitutes.

NO ADDITIONAL PAYMENT TILL YEAR OF THE RACE, and not one cent liability at any time beyond the amount paid in or specifically contracted for. On May 1, 1919, the year of the race, a payment of $40 on trotters and $20 on pacers will fall due, and on August 15, 1919, a starting fee of $75 on trotters and $40 on pacers must be paid, certainly making the total payment and starting fee the lowest on record for the value of the stake.

THE ABSOLUTE GUARANTEE of The Western Horseman Co. is that every dollar received on payments, and every cent of accrued interest (we never use a cent of stake money, but put every dollar out at interest the day it is received), shall go into the stake, and be paid out in spot cash to the winners.

SUBSTITUTION—Any nominator may, up to November 1, 1916, substitute any other foal regardless of breeding, or by whom bred, for the one originally nominated, but only original nominator may substitute.

RACING CONDITIONS—This stake will be raced during the fall of 1919, when nominated foals are three years old, over a first-class mile track, and will be contested under the 1915 rules and regulations of the parent association in which the track holds membership.

MONEY DIVISIONS—$300 will be given to the nominators of the dams of the money winners, and be divided as follows: $100 will go to the nominator of the dam of the winner, $25 to the nominator of the dam of second; $15 to the nominator of the dam of third, and $10 to the nominator of the dam of fourth in the trotting division. Like amounts will be given to the nominators of the dams of the winners of first, second, third and fourth moneys in the pacing division. The balance of the amount paid in will be divided into two stakes, namely 65 per cent. of the full value for trotters and 35 per cent. for pacers, each of these to go to the winners in the ratio of 50, 25, 15 and 10 per cent.—the usual four moneys. Races best 2 in 3, mile heats. Trotting and pacing horse breeders, both large and small, are cordially invited to consider the liberality of this stake and its absolute equity and fairness and to send their nominations to

THE WESTERN HORSEMAN COMPANY, Indianapolis, Indiana

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

SELF-LOADING RIFLE, .401 CALIBER

IT GIVES A STREAM OF SMASHING BLOWS

No need to fear the most powerful or most dangerous animal, if equipped with the .401 Winchester. It can deliver five smashing, one-ton blows in a few seconds, with aim. This rifle is a self-loader, and it is only necessary to pull the trigger for each shot. It shoots cartridges small in size but powerful in execution loaded with either 200-grain or 250-grain bullets. It beats any other rifle of this type for power and is the most effective hunting rifle made. Your first hunt will prove every word we say.

THE GRAND PRIX—The highest honor—was awarded to Winchester Guns and Ammunition at the Panama-Pacific International Exposition.

$300 TO NOMINATORS OF DAMS OF WINNERS

MONEY DIVIDED AS FOLLOWS:

$2100 for Three-Year-Old Trotters.
100 to the Nominator of the Dam on whose Original Entry is named the winner of the Three-Year-Old Trot.
800 for Two-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1200 for Three-Year-Old Pacers.
100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
500 for Two-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914.

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before May 1, 1916, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

E. P. HEALD, President.

ADDRESS

BREEDER AND SPORTSMAN, 366 PACIFIC BLDG. SAN FRANCISCO.

WEDNESDAY, NOVEMBER 10

HAS BEEN DETERMINED AS THE DATE OF

De RYDER'S FALL SALE

AT THE RIDING AND DRIVING SCHOOL, SAN FRANCISCO

(NUMBER 5 CAR TO SEVENTH AVENUE)

Sale starts at 7:00 p. m. and contains the following horses:

From C. L. DeRYDER, Agent:

El Volante S., b h, (5) by El Volante (3) 2:13¼, dam Seville by Strathway; 2nd dam by Simmons; 3rd dam by Baron Wilkes; 4th dam by Mambrino Patchen. One of the handsomest horses in California and with limited training as a three-year-old showed a mile better than 2:20. Stright and sound every way and a pick-up for any one wanting a fine, well-bred young stallion.

Bay Filly, (2), trotter, by Zombro 2:11; dam Katherine A. by Diablo 2:09¼. With a very limited training as a two-year-old showed a quarter in 36 seconds. Has never been trained since and is sound and straight every way. Full sister to Zomerine S. (3), trial 2:16.

Two-year-old filly by The Bondsman, dam Rosemary 2:25 by Raymon 2:27¼; nicely broken as a yearling, since when she has been on pasture.

Blanca S. (5) by Red McK. 43766, dam Katherine A. by Diablo 2:09¼; a show mare, never trained for speed.

Katherine A., brood mare by Diablo 2:09¼, dam by A. W. Richmond.

Rosemary 2:25, brood mare, by Raymon 2:27¼, dam Black Bess by Guide 2:16¼.

Dr. Dawson, bay gelding, pacer, trial 2:11¼, by Del Coronado 2:09½; never raced, but has the speed to win; one to buy to race next year; level headed and free legged.

Black mare, five-year-old, by Oh So 2:25½, and two of her produce, an unbroken two-year-old by Directly 2:03¼ and a weanling by Vernon McKinney 2:01½. Right all around.

Crabtree's Gift, broodmare, by Hedgewood Boy 2:01, dam Trusty Maud 2:24¼ by Beaumont, grandam Flo M. by Keeler 3465.

Prince Del Monte, ch g, trotter, foaled 1906 (tr. 2:15½), by Kinney Lou 2:07¾. Prince Del Monte is a full brother to Della Lou 2:15¾. He is handsome enough for a show horse and gentle enough for a lady to ride or drive. Sound in every respect and is sold to settle an account.

Leola Lou, gr m, trotter, by Kinney Lou 2:07¾; dam Princess Leola by Lionel K., son of Bay Rose 2:20½; 2nd dam Lady Menlo by Menlo 13028 by Nutwood 600. She is a fine, large road mare, gentle for a lady to drive and has been used exclusively by Mrs. MacKenzie. She is sold for no fault.

Asa Pointer, bay gelding, by Star Pointer 1:59¼, dam Eva H. by Washington McKinney 2:17½. This is a very fast son of the old original two-minute pacing king and has shown himself to be possessed of a great flight of speed, as he has a public work to his credit of 2:06¼.

Bay horse, by Copa de Oro 2:01, one of the best present day sires of speed in California.

Bay filly, yearling, by Graham Bellini (3) 2:11¼.

Filagree (registered broodmare), by Beau B.

From BUDD DAVIS, Caldwell, Idaho:

McGregor Bond, 60149, b g by The Bondsman; dam Gregan by Steinway 2:25¾; 2nd dam Maggie McGregor by Robert McGregor 2:17½, etc. He is a nice, fine looking two-year-old, just nicely broken but has never been trained. A better bred or finer looking colt does not live, and with just a little training will show enough to make him worth while.

Brown Filly (2), trotter, by The Bondsman, dam Ava J. 2:28 by Zombro 2:11; 2nd dam Ventura by Secretary. She is a little beauty and is sure to make a trotter. She is by The Bondsman and her dam is by Zombro 2:11, McKinney's best son.

From E. A. SWABY, Dixon:

Roan mare (6) by San Francisco 2:07¾, dam Birdie (dam of Bodaker 2:13) by Jay Bird 5060; grandam Lady Lyle by Geo. Wilkes 2:22. Bred right, handsome, 16 hands, 1100 lbs., a trotter, sound, gentle for road use and broken to ride. You will like her.

From T. D. SEXTON, Oakland:

Lucretia Bond (3), br f by The Bondsman, dam Lucretia 2:13¼ by Nazote 33527 (full brother to Azote 2:04½), grandam Lucyneer by Electioneer 125. Here is a nice filly for someone, a little beauty and making speed every day. It is safe to say that she will show better than a twelve gait by the day of sale. Don't overlook her.

From MRS. C. L. JONES, Modesto:

Johnny, a standard bred gelding, has worked in 2:20 pacing, but is now a full fledged saddle horse. He goes that old Kentucky single foot as oily as can be, and will soon show all five gaits. A nice young pleasure horse, one you will enjoy owning.

From H. S. HOGOBOOM, Woodland:

Palo King (2) 2:28½ by Marengo King, dam Palo Belle 2:24½ by Palo Alto 2:08¾. A well bred stallion of proven worth, the only one standing for service in California at present who is the sire of a three-year-old with a race record of 2:09.

Beautiful Bird, bay mare, by Nutwood Wilkes 2:16½, dam Expressive (3) 2:12½ by Electioneer 125, grandam Esther by Express. The recent performances of Mary Putney have made these blood lines familiar. This mare should be more sought after than any other matron in this sale as she is a beautiful individual, a regular breeder, and has already produced three standard trotters. Like all of the Hogoboom consignment, she is sold purely and simply because her owner must have the money.

Beautiful Morn 2:25, bay mare by Iran Alto 2:12¼, dam Beautiful Bird.

Beautiful Girl 2:29¾, bay mare, by Iran Alto, dam Beautiful Bird.

Woodland King (3), bay colt by Palo King, dam Beautiful Bird. This youngster has shown that he is better than a standard trotter and is a nice individual.

Little Express (2) 2:20, bay filly by Alto Express, dam Diawalda, a double producing daughter of Diablo 2:09¼. You all know this filly as she won the two-year-old pacing division of the Breeders Futurity Stake last year.

Marlin, bay gelding, by Dialect, son of Diablo 2:09¼. This is a big, stout pacing gelding belonging to the estate of the late Dr. Randolph and is a fast horse as Mr. Hogoboom has driven him in August of this year a mile in 2:08¼ without hopples.

High Head (2), by Palo King.

Sun Up (3), by Palo King.

From F. E. EMLAY, Marysville:

Washington McKinney Jr. 49593 by Washington McKinney 2:17½, dam Hazel Turk by Silas Skinner 2:17, grandam Miss Brown by Volunteer 2:27, etc. Washington McKinney Jr. is a good sized, good gaited trotter and has worked the Marysville track in 2:12¼ well within himself. He was prevented from filling his recent engagements by sickness and has now rounded to in excellent shape.

From C. W. BOWERS, Davis:

College Boy II. by The Magnet. Elmo Montgomery worked this colt 90 days and says that he can count on one hand the horses that have done what this colt did in the same length of time. He has worked in 2:16 and Elmo regards him very highly.

From HENRY B. SMITH, Pleasanton:

Della H. 2:10 by Hal B. 2:04½ (sire of Hay Boy 2:01¼ and many others), dam Jessie M. trial 2:22 by Del Norte 2:08. Della H. is a full sister to Hal J. 2:09¼ and is too well and favorably known to need comment here. Only two years ago she was unbeatable through the California circuit and she is still just as good. Only the lack of local classes for her puts her on the market.

Lottie D., bay filly (4) by Charlie D. 2:06¼, dam by Nutwood Wilkes, grandam Cricket 2:10. This is a nice filly and bred right to go on with.

Alton S. 2:15, chestnut gelding by Alton. This is a good mannered race horse and is much faster than his record as he has worked the Pleasanton track in 2:09.

From F. GOMMET, San Francisco:

Prince McKinney 2:29¼ by McKinney 2:11¼, dam Zorilla by Dexter Prince, grandam Lilly Thorne by Electioneer 125. Prince McKinney was a good two-year-old trotter and is a proven sire of speed.

Baby Gommet, (4) bay mare by Prince McKinney, dam Arawanna B. (dam of Sweet Princess 2:13¼) by Sidney Dillon. This is a nice mare with a lot of developed speed as she has worked for Al Schwartz in 2:10, with a quarter in 30 seconds.

From WM. STUART, Eureka:

Irving Pointer (8) by Star Pointer 1:59¼. This is a good, big stout, sound horse, gentle, stands 16 hands, weighs 1250 pounds and should make someone a good stock horse.

Philip Pointer (3) by Irving Pointer. This youngster has been a quarter in 33 seconds and is worth training.

From AL SCHWARTZ, San Francisco:

Ray Alto, chestnut horse, by Iran Alto 2:12¼, with a trotting trial of 2:18, and May Alto, with a two-year-old trial of 2:26, also by by Iran Alto 2:12¼. These are put on the market because Mr. Schwartz has too many horses. The horse is a handsome one, broken to ride, and the mare is on pasture.

From JERRY DORAN, Oakland:

Bay gelding, two-year-old, by The Bondsman; good conformation and bred to make speed early. Will be broken to harness before sale day.

MANDATORY RULES A NECESSITY.

[By the American Sportsman.]

The end of the racing season is rapidly approaching and we believe the present a good time to call attention to some of the shortcomings of the year, particularly so since the biennial meetings of the congresses of the American and National Associations are scheduled to take place before another year of harness horse activities will be staged.

The easiest thing for any critic to do is to pick out individual instances of undesirable results occurring during the season and to thereupon base strictures of the present codes of law, but that is not our intention or desire. We are animated solely by the wish to better conditions generally and our comments on the season will be based upon general, not special, operations of the rules laid down by the parent associations for the purpose of governing impartially the racing activities of the year.

The most crying need for legislation, in our opinion, is a mandatory law upon the time allowance system, as the utter absence of any restrictions on this point has permitted such a variance in the announced conditions of the different racing associations as to render it almost impossible to determine the eligibility of the entrants at many points. The present rules of both of the parent associations are definite and explicitly provide that no allowance for the previous season will be granted by said associations except one second for each consecutive year that a horse has raced without winning a race. If this was the limit of time allowance, nothing could be said against it and in this respect the present general code of racing rules meets with our hearty approval, but, unfortunately, this provision is not decisively stated as the limit of allowance that will be permitted and as a consequence additional time allowances have been advertised in accordance with the ideas of the secretaries of each individual racing association, with the effect that it is almost absolutely impossible to determine eligibility.

It is natural that in such a country as ours the different racing associations may and will desire some latitude in their power to determine the conditions under which they will announce their racing program, but it is also an undeniable fact that unless this desire is curbed to some extent there will simply arise a condition more resembling chaos than uniformity and each and every association will become a governing body by itself.

Such being the case, what advantage is it to any follower of the sport to post himself on the general code where in each protest against a violation of it he is met by the statement that the special conditions of that particular association prevail. In each of such instances the particular well being of the association in question is allowed to control and the general laws are invariably discredited.

No possible good can come from such practices and the inevitable conclusion is forced upon all the parties involved that the general racing rules are of no effect and are to be honored more by a breach than by an observance thereof.

Therefore, we believe that it is up to the parent bodies to pass a restrictive rule governing time allowances and especially to couch that rule in such language that it will admit of but one interpretation.

Such action can not possibly be construed as a denial of personal rights as the present authority by which additional time allowances are granted is based entirely upon a direct grant of power by the individual associations, but would only be regarded as a regulation, especially so since the affiliated associations have so clearly shown their inability to handle the subject in such a manner as to produce uniformity.

We will frankly admit that we have never had as many perplexing questions submited to us during our connection with the light harness sport as the last season has been productive of, and will also say that the peculiar conditions originated by enterprising secretaries on the time allowance question have been responsible for ninety per cent of the queries that have been addressed to us.

Without assuming any spiritual message from a higher power that would give us the authority to answer these questions authoritatively, we nevertheless claim that the experience of an editor and representative of a turf journal qualifies him ordinarily to answer such questions in a fairly positive manner and the general racing public so concludes; but consider the position we are placed in when we are forced to admit, as we often are, that we cannot possibly place the construction upon conditions that the secretaries are anxious we should do.

A turf journal, according to our conception of its duties, is supposed to be at all times open to questions as to the interpretation of racing rules and, speaking for ourselves, we are willing to answer such queries at all times, but we find it impossible to act as a court of last resort under a system that permits each of the units thereof to totally disregard the basic laws of the main body.

Experience teaches us that only a regard for the established laws of any country will enable it to take a place among the civilized nations of the world, and, equally so, no organization can be regarded as stable without an unquestioning obedience to its regulations. Therefore we unhesitatingly state that the American and National Trotting Associations are decidedly in error in permitting a fixed law, decided upon properly according to the usages of those bodies, to be added to or detracted from as the personal vagaries or the imagined self-interest of any particular association, a member thereof, may dictate.

One of the highest compliments paid to a public man in these days is embodied in the statement that "he has backbone." Of course this is an Americanism, pure and simple, but one can search the standard dictionaries from cover to cover and not be able to express the idea intended to be conveyed thereby in any better or more expressive language. It means courage in his convictions, with a determination to follow the same and enforce those views to the limit.

Can anyone say that our parent bodies have "backbone" when they pass a law that in itself is capable of bringing the best results and then qualify it by granting permission to individual secretaries to obey or not to obey as they see fit? We, ourselves, had ten years' army experience and can unhesitatingly say that the only army regulations that we ever disobeyed were those that admitted of more than one construction. The absolute, mandatory laws never suffered any infraction at our hands and there was never any need to ask any one to explain what our rights were under them. We accordingly, not regarding ourselves as other than ordinary citizens, are forced to the conclusion that only those laws are respected that are mandatory and absolute and we feel that it is folly to attempt to pass any others.

We are not entitled to membership in either of the American or National Trotting Association congresses and in consequence must say our part on the outside, but, we submit, that despite our ineligibility to said meetings, our interests are more closely interlocked with the result of such sessions than those of the members thereof.

Each and every member of the governing bodies we refer to have interests other than those they are, by their positions, required to pass upon, while for ourselves, in our present vocation, the interests of the light harness horse are dominant. Supposedly, these gentlemen are elected to place the interest of the light harness sport first, and, undoubtedly, they believe such to be their mission and the duties devolving upon them by their election to the responsible positions they occupy, but one and all of us know that in their own immediate personal contracts they never think of anything but binding all parties interested to an absolute compliance with all of the terms of the contracts they make. Such being the case, why should they make so-called rules, with exceptions? What authority or respect is the result of saying you should do so, but, if you don't like it, do as you please?

All of these proceedings are worse than useless, as they tend to create disrespect for all legislation by such bodies, and when such a condition is reached the legislative body fails entirely.

We do not insist that the congresses shall say what entrance shall be charged, whether or not freight shall be paid, stall rent be free, or otherwise, but we feel that all racing rules should be stamped as absolute and conclusive, beyond the power of any individual association to tamper with.

Under such conditions, it is possible for the followers of the light harness sport to familiarize themselves with the general rules and, as we believe the majority of owners and drivers are law abiding, infractions of the fixed regulations would be few and far between.

Only the one thing will be necessary to accomplish this—the adoption of a regulation specifically providing that the rules shall govern and exceptions will not be permitted.

Particularly will this be of advantage in construing the question of time allowance as, under such circumstances, the conditions of the individual associations would be of no force or effect and it would be possible to definitely determine what class a horse is eligible to.

Verily, "this is a consummation devoutly to be wished for."

THE DeRYDER SALE NOV. 10.

Very soon after his return from the east last week Chas. L. DeRyder made a flying trip to this city and arranged definitely for the holding of his fall sale on the evening of Wednesday, November 10, at the Riding and Driving School on Seventh Avenue, near Fulton. The sale will begin early in the evening, as soon after seven o'clock as possible, and the offerings will be knocked down by Auctioneer William Higginbottom in rapid order.

There are several newcomers to the list of consignors this week, and we respectfully recommend that you give the announcement on the opposite page a thorough inspection and send for the catalog as well, as details therein are more extensive. The roster of venders now includes the added names of such well known horse owners as H. S. Hogoboom, F. E. Emlay, C. W. Bowers, F. Gommet, Wm. Stewart and Al Schwartz, all of whom have consigned animals of the desirable kind. It especially pleasing to note the quality of "Hi" Hogoboom's offerings, headed as they are by the speed sire Palo King (2) 2:28½ and that triple producer of standard trotters, Beautiful Bird by Nutwood Wilkes 2:16½, out of the famous matron Expressive (3) 2:12½. Palo King is the only horse at present at service in California to sire a three-year-old with a record of 2:08, and Hiram's band carry a preponderance of the blood of these two. A full review of the sale's offerings will be made next week.

THE WOODLAND SALE.

Just what deep water the California breeder of trotters finds himself in at this moment was pretty plainly portrayed last Monday when Woodland Stock Farm attempted to dispose of a portion of its surplus stock. In spite of the fact that the sale had been well advertised and that many of the offerings were of unusual quality, buyers were sadly lacking. A few colts were sold for moderate prices, but there was absolutely no demand for breeding stock and many matrons of high degree were led into the ring and passed out without a bid, while others more fancied by the few buyers present failed to be carried to a figure at which the establishment would let them go. At that, the location of the sale and the fact that many horsemen were too busy to be present owing to a rush of final preparation for the exposition meet made it hardly a fair test.

It seems up to trotting horsemen themselves to take the steps that will determine whether or not the harness horse is to die out here in California or be re-established on a basis in keeping with the existing conditions of the present and those apparently impending in the future. It has been suggested that the presence of the majority of California horsemen at the exposition meeting would present an excellent opportunity for getting together for a consideration of ways and means of inaugurating some activities of a generally beneficial nature, and probably a "session" of some kind will be held during the coming fortnight. Brush up your ideas and be prepared to present them if occasion arises.

The "O-O" on Visitors and Some Others

Not since the Fourth of July had I been in Pleasanton until last Friday evening, when I gladly got out from under a grind of several long-houred days in the office, crossed the bay on that good old reliable tub, the Alameda, and boarded the train at the mole for the town which early-day Californians put on the trotting horse may and which R. J. MacKenzie is keeping there, for after due credit is given Pleasanton for all its natural advantagees as a horse heaven it is due to the man-made attributes of the MacKenzie establishment that it holds its place as California's foremost training center. Year in and year out, for twelve months of the year, Pleasanton offers unrivaled facilities for speed making, and since the Canadian sportsman rebuilt the plant it has been more popular than ever. Just now, with the exposition meeting right at hand, harness horses have gathered there from various points in order to be in readiness for the short order ship required to land them at San Francisco the moment stable room is available, and quite a number of thoroughbreds are also being fitted for the winter racing season at Tia Juana, Juarez, New Orleans or Havana. The trotters and pacers, of course, have things their own way on the big ring, while Monte, the speedway wizard, has the two-lap course well harrowed up for the runners. Thus everybody has the footing desired and an unchallenged right of way thereon, and the different camps bear none of the earmarks of the bivouacs of belligerents, so well is strict neutrality preserved by the perfection of the arrangement.

While there was not very much real leveling indulged in by many of the teamsters on Saturday, there were a number of good stiff works that evidenced the fact that there are a lot of horses here that are ready to score for the word whenever Colonel Updegraff gives the paddock man the "high sign" that means "send 'em out." From two-year-olds to aged campaigners they are ripe, and if the weatherman is kind it looks like the exposition track would have a new record at each gait before the second meeting comes to an end. Sure it is that there will be plenty of good sport every day of the fortnight.

Of course the first things a visitor asks for are the easterners, and they are not hard to find though not so numerous as was feared. However, the quality is there even if quantity may be somewhat lacking, and my guess is that some of them will prove hard nuts to crack, especially Hal Boy and Peter Scott. We know the Boy can pace the exposition track handily, and as Peter has never required that one identical piece of footing be carried around for his benefit, I believe he will operate here all right. What the climate down on the beach will do to him is of course merely conjecture, but my personal notion is that the delegation that has been east all summer will stand the change just as well as horses trained inland here in California. However, before long we shall know.

One thing is certain, the ship out didn't have any bad effects. The DeRyder, Murphy, McMahon, Fleming, Rutherford and Kinney horses all came in a bunch and came fast and in good shape. They left Lexington on Friday morning after the meeting, unloaded for a good rest at Ogden and came on out over the Western Pacific, unloading Tuesday evening, which is nice shipping. Good weather helped a lot, and horses and men came off the cars mighty fit.

* * *

When Tommy Murphy entered two and three horses in almost every event which he patronized at all, including the big stakes, it looked like hard sledding ahead for some folks. As the members of his stable are owned by various gentlemen it appeared that the horses might be "turned over" at the close of the Grand Circuit to their individual owners and then bunched three ways, a string to Murphy, and one each to a couple of other amicably disposed teamsters such as McMahon, Cox, Valentine or others of like capacity, but such doesn't seem the intention at this writing, as only five have shown up and all are in the one stable. The way they are entered they will do well to race the program one horse to an event, and it looks like good sportsmanship on the part of Murphy and his patrons to adopt this plan. It may not prove so profitable in cash as the other system, but it throws a pleasanter, more friendly aspect upon the general situation.

Murphy himself had not yet arrived at Pleasanton on Saturday, but Ned McCarr was much in evidence all day long, one of the first pairs I spotted being Ned and the Scott horse, passing me the wrong way of the track while I was moseying along from the little pass gate toward the wire, "auguring" with Mr. Sutherland. It was early and Ned hadn't started moving up to amount to anything, and at ordinary speed Peter Scott is a good deal like a great many other Peter the Greats—nothing to get excited about. You look at him and make a mental comparison with the picture conjured up by the mention of thirty-thousand iron men and you fail utterly to "make the connection." He is a nice big trotter, but there are nice big trotters that can be bought in job lots at three hundred per, just as good looking, just as strongly bred, and just as pleasing — going slow. The difference between the three hundred and the three-hundred hundred kind is evidenced only when he flattens. Then he shows like a race horse and his way of going is of the determined, do or die, stick-to-it-come-hell-or-high-water kind, nothing fancy. If Peter had been a man the Standard Oil Company might have been headed by some one other than John D. Rockefeller. All things considered and all credit given where credit is due in other quarters, he is the logical first choice for the money in the 2:10 trot on San Francisco day.

While McCarr was one of the first men I saw Saturday morning he was one of the last ones I caught "on the ground" long enough to get a word in edgewise with, as he was going over the bunch and merely dismounting from one sulky to climb into another. In addition to Scott, the pacers Jean 2:10¼, Major Ong 2:03½ and Hal S. 2:06¾ all received a number of heats during the morning, and in the afternoon Mirthful and Hay Boy were gone over, Dick McMahon not yet having arrived to give the Boy his course of sprouts. Mirthful, who trotted second to Ross B. in 2:05¼ at Lexington, is no prize package for looks but covers a lot of ground and is a good goer. I like the trotters better than the pacers, and from what I have seen of the latter so far I don't figure Murphy "one-two" in the big pacing stake, though I may have my dope backwards and my personal notions may be all wrong—they quite often are. Hal S., the roan lad, has a lot of lick and is no slouch of a pacer, or he wouldn't be where he is, but he takes an awful hold that is bound to tell on him and wear him down in scoring in a big field. Jean is a rangy bay mare, racy looking, and apparently right in tune for some of the class pacing events, while Major Ong bears out Bud Fisher's recent cartoon to the effect that military geniuses come in all shapes and sizes. Remember Alberta? Rumor had it that when George Haag wanted to ship that monster he merely threw away a couple of pairs of socks and then packed him in the resultant ample cavity in his suit case. It seemed like a pity to waste the socks but the saving in freight was considerable, so it broke out better than even. Well, Alberta was a better looking horse than Major Ong and about the same size, both of them being "powerful peppery" for their heft. The Major is not a good doer but he seems to like the California chuck and has plenty of strength, apparently, so he may prove very bothersome to some good men next week.

* * *

Hal Boy, for a horse that has been raced to his limit since June 5, is in wonderfully good shape and as hard as nails. Here, folks, is one really and truly genuine pacer—no foolin'! He was never better than in his last race and he is going to be hard to beat in his next one. He doesn't carry quite the meat his bones were upholstered with when Marvin Childs had him, and his head is set a bit higher, I believe. He puts 'em down an' picks 'em up just like he used to do, and if he wins that big stake in a clean-cut way no one is going to begrudge him the victory. He was the real hero of the 2:06 pace here this spring and has proven as game and fast a little scamp as ever hit the big line. If he and White Sox by any grace of fortune chance to draw positions in the front tier and both square away on a pace for a full mile they will go the route perilously close to 2:04. The mare has worked at Los Angeles in 2:02½ and went two good races at Riverside, while the Boy's mile at Lexington in 2:01¼ was an even better performance. There is at least three seconds difference between the courses just mentioned and that at the exposition, taking into consideration footing shape and weather conditions, but good luck a around will at least mean a mile better than five.

* * *

R. J. MacKenzie, who framed up the Hal Boy-Judge Ormonde match that proved a hair-raiser fo the Lexington crowds, taking the winner's end, wa among those present Saturday and derived conside able pleasure from the condition shown by Anvilite Miss Perfection, Bertha Carey and Maymack. For pair of mares that were off in the spring, Bertha an the General Watts filly came around very nicely fo Charley DeRyder and the latter may have somethin to say about that stake money Tuesday. She is game and honest bit of femininity and is workin nicely, while Bertha was a winner at Lexington an also looks fit. Maymack is as much of a character a ever, and was never faster. She had hardly enoug racing to fit her properly for her Lexington engage ments, but at that was separately timed there in 2:0 and 2:04¼. The amateur free-for-all trot is her onl engagement here and she will doubtless annex th big end of it.

Anvilite, much to the regret of his many admirers will not be a starter in the two-year-old trots at th fair, though he may be ready for the Pleasanto stake. He was a "dead colt" some weeks ago an though he has come around wonderfully the strateg board has decided it would be asking too much fo him to race here, as he is too good a prospect to risk for such a small sum as is involved in the two-year old trots here. Just a few days before he was taken sick he worked the Peoria track in 2:12 and can trot halves in 1:03 and quarters in :31. He looks fine in spite of his hard luck, and seems the making of a grand horse. Anvil 2:02¾, his sire, came back in the DeRyder car under lease to Mr. MacKenzie and is a wonderful individual for one of his inches, a beautiful pattern, richly colored, good tempered and intelligent. Anvilite will make a more substantial and, I believe, an equally pleasing fellow and one just as fast.

Our Pleasanton correspondent last week included both Governor Mason and Madam Mac among those included in Charley's car, but both were sold at Lexington, the Governor going to Bob Davis of New York for speedway use and the Madam to Ed Best of Minneapolis, who proposes racing her on the ice. Four weanlings were picked up by C. L. at the Lexington sale, one by The Northern Man 2:06½ out a General Forrest dam and three by General Watts (3) 2:06¾ out of mares by The Native 2:10½, The Bondsman and Cochato 2:11½, respectively. The General Watts trio have already changed hands, passing at a profit to Will DeRyder and his patrons, the owners of Spriggan.

* * *

Speaking of Spriggan—and we may as well get used to speaking of Spriggan, as from present indications we will speak of him considerably during the future—the winner of the June stake is in excellent condition for a race for his life and another snug fortune. He threw out a small curb after the meet here but Will DeRyder subdued it with "neatness and dispatch," also much success, for he raced up to form all summer without being affected by it. He isn't a meat carrier at any time, but seems to hold to a certain amount pretty persistently and I can see little difference in his condition now as compared to that shown in June. Just how fast he can trot is an unknown quantity, but Will, while conceding Peter Scott to be the best favored in general for the head of the summary, doesn't seem to be losing much sleep worrying. He certainly can trot the short turns here like a runaway motor car, and I believe the horse that beats him, if he is beaten, will make the trip right around 2:07.

* * *

Another stake trotter at Pleasanton that is not to be entirely ignored is none other than our old friend San Felipe. The big gelding has been working good for George Ryan and has had a lot of miles from 2:09½ to 2:13, so he is good and hard. George handled him during the summer for Mr. Sesnon and last Saturday turned him into Dick McMahon's stable, as Richard will pilot him in the big trot. He was an original entry, so one time in the money would put him winner.

George N. Patterson, Homer Rutherford's three-year-old, was a dead horse on his arrival at the end of his eastern trip in June, his condition being such that extreme measures, fortunately successful, were adopted for his relief. He came around gradually and went some excellent races in midseason only to get off a bit again later on. Just now Homer describes him as "just fair," but he paid his starting fee in the stakes and will probably rank up among the money winners. He is a good trotter and his experience will be of benefit to him when the bell rings. Seneca Boy and The Beaver look pretty fair but it is hard to say just how good they are. The Beaver, off for some weeks owing to an injured foot, went some nice miles at Columbus but didn't show quite so well at Lexington; if he is in trim here he will race close up in the first division. Seneca Boy trots at a decent rate of speed but he is a snaky bird at times and not a pleasant horse to handle or to lay money on. Impetuous Palmer, who rounds out the delegation from the east, is credited with having worked very fast at Denver but got off a little when Mr. Kinney took him down to finish him up on the mile tracks at Columbus and Lexington. He has a raft of speed but not much racing experience, being of doubtful behavior in company. A lucky score might enable him to throw a scare into somebody at that in the big pace.

* * *

The firm of Keefer & Spencer celebrated a reunion here, Charley arriving from the northwest with Bonnie Ansel and Nuristo a few days in advance of Mel and The Proof from the central west. The big mare won some money up north and is in good shape, while The Proof came home with a world's record. He started in over a dozen races during the season, had over half as many different drivers as he had engagements, and was never out of the money. Most all the skinners who piloted him this season figure that he is a 2:06 trotter for next year in the hands of one man who really knows him. Charley Marley's two-year-old filly by him, still in the Keefer & Spencer stable, is doing nicely and will be a starter here in the stakes.

Henry Helman, the lengthy politician from Salinas, has a pair of good pacers in Prince Zolock 2:06½ and Mack Fitzsimmons 2:11½, both raced successfully this season in the northwest and both to start here at the exposition. The Prince was not in trim when he took his present record, having a severe attack of shipping fever, and Henry is a bit in doubt as to whether he will really he "ready" here, as he lost a lot of flesh and strength. However, he has a lot of pep, feels all right and is eating well, so he may "do." The Fitzsimmons horse, raced first as a trotter, is cut on a different pattern and is a whole lot better than his mark says, as he made Potrero Boy pace a third heat in 2:06¼ to win.

* * *

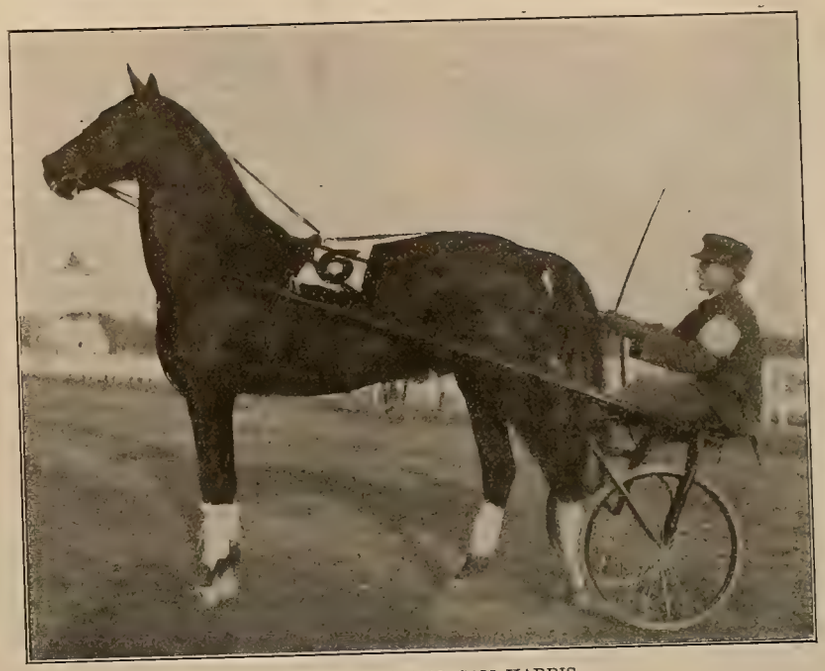
Will Durfee was expected to ship to Pleasanton several days ago but failed to materialize, evidently deciding to make one ship and go directly to the exposition grounds. When he came down from Salem he left a couple of good men at Sacramento with the horses raced at the Oregon State Fair and these were brought to Pleasanton to join the balance of the string. Pending the arrival of Son William, one P. Durfee, the "P." standing for "Pa," is riding behind some of them, liking especially the Nickerson pacer, Rayo de Oro (3) 2:09¾, with a recent trip over the Pleasanton track a bit faster. He is a right good colt and I believe he will make Bondalean pace faster here than he did at Salem, with any kind of a day for weather and footing. Contention B. is in nice shape, but Helen Belle, winner of the trotting division of the Oregon futurity, had a bit of hard luck that has retired her for the season, Will relying upon the Tom Moko colt, Byron, for the trots. At Salem he bought the Keeler gelding, Sargo, and this homely trotter has made quite a bit of speed, working the Sacramento track better than 2:10. Charley will have the black colt Carl in the three-year-old trots, but he was off part of the season and will hardly have a fair show. Tim Sexton's Trampfast gelding, Future Tramp, has made a lot of speed for the elder Durfee and has had a mile in eight. He is an honest sort of a lad, with a nice mouth, and as "T. D." is a handy boy with the reins the amateur free-for-all trot may be quite a race.

* * *

I found that entertaining variety artist, O. U. C., calmly taking a tubbing for the relief of his front feet, and learned regretfully that he will not fill any of his engagements here. This lad's stunts here and at North Randall inclined many to the belief that his was a case of "nobody home" when it came to having a "head," but from subsequent developments I believe his trouble was traceable directly to those front feet. "No foot no horse," as everybody knows, and if O. U. C. ever acquires a set of front Trilbies upon which he can stand or pace without pain I believe that he will be formidable in fast company. Not until after his purchase did Mr. Bailey become aware of the fact that the horse was troubled with corns, and a veterinarian's examination at Indianapolis revealed traces of a former trouble of a more serious nature, the condition of the feet and the discharge therefrom after being cut into indicating a more or less severe case of laminitis, or founder, at some previous date. Under treatment a considerable improvement was made, and at Indianapolis, during the state fair, with everything in evidence that should cause one of the bird-headed kind to go from one tantrum to another, he worked on perfect behavior in company. For a time Mr. Bailey hoped to have him ready to race here, but abandoned the idea for a better one—to give him every chance in the world to get fit for one future campaign. He is fast and I believe he has a good heart, and if he gets those front feet referred to above I believe he will be as good mannered as the average run of racehorses.

* * *

There are so many things stepping along at Pleasanton that going over the entire number is a week's job for a man and a boy, so that only some of those who are strangers to us or newcomers to fame have been included in this hurried story. There are a lot of good young things that have shown nicely that will appear in the futurities in the course of the next fortnight, so we will try to take care of them then.



* * *

Sunday morning I went "over in the valley" in order to be at Woodland Monday, having just a moment to say hello to Dick McMahon as he alighted from the train I was due to leave by. Dick was still using four legs as a result of the injury to an ankle some weeks ago, finding a portion of his Mary Putney and Hal Boy money very useful in obtaining porters' assistance in his travels. I had intended only a one day visit at Pleasanton, but the pull of the Tuesday work was too strong to be resisted, and I made a second trip that day, as the stake horses were getting their last levelling. Since Saturday the ranks of visitors had been augmented by the arrival of both McMahon and Tommy Murphy, Tom Gahagan, the syndicate scribe, Edward Thompson of Northport, N. Y., of Frank Bogash Jr. and Native Belle fame, and Robert McAfee of Pittsburg, owner of Jean and a member of the Peter Scott combine. Mr. MacKenzie, in turning over the keys to the driving park to these strangers to our glorious clime — (Horse Review, please note) — included a big car and a benzine skinner and the party is quartered at the St. Francis in this city and making the daily trip to and from the track via the Dublin canyon road. Besides these new faces, Mr. MacKenzie's cheery countenance was in evidence for a few hours, and the grandstand and fence furnished vantage points for a number of visitors from San Francisco, Oakland and Sacramento.

There was plenty to look at, as futurity prospects, stake horses and candidates for the class races were being moved along pretty regularly and a railbird with as many arms as an octopus, with a clock in each hand, would have missed some of the miles, so no attempt will be made to go much into detail. Miss Perfection trotted like a girl who would be dangerous in the big trot, and has a lot of friends pulling for her. Murphy and McCarr were doing double out tricks with Peter Scott and Major Ong one trip and Mirthful and Hal S. the next. Scott and the Major tramped a couple of miles right around 2:08, with the last halves not far from the minute

Will Gahagan's Idea of Axtien 2:06 1-4

A trotter that came into the limelight at Lexington and set the horsemen to talking about him again, was the Illinois stallion, Axtien 2:06¼, that proved to be the contender to Peter Scott in the Walnut Hall Cup on Monday afternoon. Last season Axtien trotted a remarkable race in the $10,000 Paper Mill Stake at Kalamazoo, where he battled it out with Lassie McGregor. I timed the chestnut horse four miles in 2:08 or better, two of them being in 2:06½, that day, and Harris got him to the front and he just romped home, in front, in 2:06¼. Peter Scott was hemmed in until the stretch was reached and after getting out was unable to reach the Illinois stallion. Axtien was a good second in the next three heats, the time being 2:05¾, 2:06¾ and 2:07¼. Harris started him back in the 2:12 trot on Thursday, and won that event in straight heats. He had no trouble whatever in showing the bunch the way in 2:07¾, 2:09½ and 2:07¼.

AXTIEN 2:06¼ AND SAM HARRIS

after his race Sam Harris, who owns and also drives the handsome son of Axworthy 2:15½, refused some flattering offers for him. He got a bit off and did not show anything startling after that. This season he has been sick and was in no condition to start until just recently. In the Transylvania last week he trotted third to Peter Scott in the third heat, and although out of the money, showed that he was getting back to the form that he displayed early last season. In the first heat of the Walnut Hall Cup, Axtien is an eligible to the $20,000 2:10 trot to be raced off at San Francisco on November 2, and if the chestnut horse retains his present form he ought to stand a good chance at landing a large piece of the rich purse, for I believe that he is up to a mile in 2:05 right now. His winning race record is now 2:07¼, which leaves him eligible to most of the big stakes. If he can escape the hoodoo that has followed him the past two seasons, miles in 2:04 will be within his reach next season.—Western Horseman.

mark, while the other pair beat ten by a comfortable margin. The roan gelding didn't take as much hold as I had expected after reading some eastern comment concerning him, and I have developed a mighty healthy respect for Mirthful. I doubt very much if Peter has it on her by more than a very small margin, and she will undoubtedly be a good mare here.

I can see somebody, or several somebodies, have an incipient attack of heart failure next Tuesday when Scott is challenged, or challenging, in the stretch. Right now I can see the portly gentleman with the numerous chins, etc., turn purple and whoop "He's broke" just before "going out," and he'll be wrong at that. I don't know just how he does it, but there are times when Peter is "leveling" that to the uninitiated eye he has every appearance of being just ready to leave his feet, but does not. He is a "true gaited trotter" in one sense only, that the trot is his true gait and he refuses to do anything else. However, it's only a few days until you can judge for yourself.

* * *

After giving Spriggan the once over last week and learning how he had worked since coming home I wrote a little squib appearing in this same story to the effect that my belief was that the horse that beat him would trot right around 2:07. Now I believe that if I am mistaken my error is on the slow side of the figure, for Tuesday morning I saw him work in 2:09½ and 2:07, or 2:07¼ at the slowest, just as nicely as anybody's horse, Prince Zolock "siding him." Spriggan showed this spring that the exposition track was built to his order, and while way down in my brogans I still think Peter Scott ought to win I believe he will find that Spriggan and perhaps two or three others will give him the most competition he has had for some time. DeRyder's horse came out of Tuesday's work as fit as a fiddle, and the way I feel about him right now I wouldn't bet a plugged nickel that he didn't win a heat, at least.

* * *

The only thing that detracted from the enjoyment of a genuine "one and only" California day Tuesday was Will Fleming's mishap. The Canadian teamster has always had plenty of friends here and made a lot of new ones last spring, every one of whom will regret to learn that Will's driving career has been very unpleasantly interrupted. The trotting gelding Seneca Boy has never been famous for manners and indulged in a tantrum up by the stables when Fleming attempted to turn him to score down. He often performs more or less at this part of the work and Will thought nothing of it for a moment, keeping his seat and endeavoring to humor the varmint. The Boy was out for a record, however, and almost in a flash reared and threw himself backward, Fleming getting practically the entire weight of the horse upon his chest. Down at the stand it looked bad but Will beat the horse to his feet and held him down until the onlookers got to him. Only after the crazy brute was in the clear did Will realize he was badly hurt, and he was loaded into a handy auto and rushed down town, the doctor's inventory of the damage revealing a superficial cut on the head, a cracked bone or so in the right shoulder, as well as severe bruises about the chest and back, the latter being the most disturbing features in view of the pain inflicted and the possibility of grave consequences from internal injuries. Will came back to the track and remained until along in the afternoon, when Tim Sexton took him to the sanitarium at Livermore in the hope that he could be made more comfortable there. Complimented on his grit in getting control of the horse, hurt as he was, Will merely grinned and remarked that he'd been in a lot of spills and never had the horse beat him to his feet yet, which means a whole lot that it doesn't say. While not a hospital case, unless unexpectedly severe complications have ensued, Will's condition precludes any driving for some time to come, so that The Beaver will go into the big stake in strange hands.

* * *

Up at Woodland I ran square against a combination that has a partnership smile of the "won't come off" variety, from all indications, Messrs. L. B. Daniels and C. F. Silva of Sacramento. Potrero Boy, the big gelded brother to Airlie Demonio 2:05½, has all the appearances of being a real pacer, and Silva undoubtedly made a ten-strike when he purchased Bondalean. He has already grabbed one pacing futurity and I will be very much surprised if he fails to win his other engagements. Charley paid a pretty stiff price for this youngster in the spring, and my notion is that it would require four or five times as much to get him now. No man gets more real pleasure out of his stable than Silva, and his many friends will not begrudge him any success achieved by Bondalean, who looms as a candidate for many future honors. Johnny Quinn, Walter Tryon, D. D. McDonald, Will Ivey, Elmo Montgomery, Jim Thompson, A. W. Longley, "Doc" Delano, Mel Keefer and S. Christenson were among the other "home folks" present, Daniels, McDonald and Longley being about the only ones who had on their "buying clothes."

* * *

There have been a number of stumbling blocks in the pathway of the fall meeting, but most of the "wrinkles" have been ironed out and the big fortnight of sport is scheduled to begin early Monday afternoon, day after tomorrow. The re-arrangement of the program has, of course, worked some unwelcome hardships upon horsemen, and the general situation has been unsatisfactory in that stabling accommodations were not available until the very last minute, causing much discomfort and inconvenience. Under ordinary conditions most all horses would have been here some days ago, but as it is one lone trotter, Axtien, has been "monarch of all he surveyed" until yesterday or today. However, as we had it so plainly stated to us this spring by the powers that be, "this is not a fair or a race meeting, but an e-x-p-o-s-i-t-i-o-n," and things might always be a little worse.

* * *

Next Tuesday, San Francisco Day, will be the greatest day of the entire exposition period, weather permitting, and the crowd at the trots should surpass that of any day of the June meet. When it became apparent that the program would have to be rearranged the big trotting stake was set for the feature of this paticular afternoon, the card also including the Occident Stake and the 2:12 pace, both of which should be good contests. Racing will start at 12:30 in order to clear the way for some spectacular special features, and those who go to the track are assured of an excellent run for their money.

* * *

Some weeks ago there was published in this journal the program and entry list for the meeting, complete save in the colt stake events. Subsequently the starters for the Occident have been printed, and the fields for the various events of the P. C. T. H. B. A. series of futurities are also completed, though as we go to press the starters in the Stanford and the State Fair classics are not yet at hand. The Breeder's events promise some good racing, with from five to ten colts being eligible to the various divisions. The junior classes look especially good, and the colt races this fall will be much better contests, I am sure, than those of the spring meeting. The dates of racing and entrants to the events just mentioned are as follows:

THURSDAY, NOV. 4.

First Race—Pacific Breeders Futurity Pace—2-Yr.-Olds—$1200.

The Puzzler, b g by Cochato—Baroness Maid by Baron Wilkes. E. R. Dunn, Morgan Hill.
Rico, ch c by Manrico—Pavlowa B. by Petigru. W. G. Durfee, Los Angeles.
Fiesta Lou, b f by Wilbur Lou—Fiesta Queen by On Stanley. Hemet Stock Farm, Hemet.
Fresno Bond, b c by The Bondsman—Fresno Girl by Seymour Wilkes. Frank Malcolm, Fresno.
Verna McKinney, br f by Vernon McKinney—Ramona by Demonio. J. W. Marshall, Dixon.
Surety, b c by The Bondsman—Eva H. by Washington McKinney. A. L. McDonald, Pleasanton.
Carolyn, b f by Lock Logan—Trilby Maid by Black Ralph Jr. J. E. Montgomery, Davis.
Patti C., ch f by El Angelo—Mary W. by Dictatus. D. W. Wallis, Los Banos.
Capt. Mack, br c by The Bondsman—Bessie L. by Montana Director. Fred Woodcock, Forest Grove, Ore.

SATURDAY, NOV. 6.

First Race—Breeders Futurity, 3-Y. O. Pacers—$1,800.

Sheldon B., s c by Barney Barnato—Ramona by Prince Robert. I. L. Borden, San Francisco.
Greatness, br f by Peter Wilton—Abbie McNutward by Guy McKinney. Eugene Cerciat, San Francisco.
Dixon Boy, b g by The Patchen Boy—Leota by Diablo. J. W. Marshall, Dixon.
Rayo de Oro, ch c by Copa de Oro—Easter D. by Diablo. J. S. Nickerson, Los Angeles.
Bondalean, b c by The Bondsman—Katalina by Tom Smith. Chas. F. Silva, Sacramento.
Bondholder, b c by The Bondsman—Corinne Sidmore by Sidmore. D. W. Wallis, Los Banos.

THURSDAY, NOV. 11.

First Race—Breeders Futurity, 2-Y. O. Trot—$1,450.

Alesandro, b g by Barney Barnato—Ramona by Prince Robert. I. L. Borden, San Francisco.
Natalday, b c by Wilbur Lou—Ella J. by Bob Mason. S. Christenson, San Francisco.
Virginia Humbug, b f by Cochato—Fanny Wiggins by Wiggins. E. R. Dunn, Morgan Hill.
Hermes, br c by Carlokin—Miss Quealey by Moko. W. G. Durfee, Los Angeles.
Miss Axworthy Dillon, b f by Axworthy—Cleo Dillon by Sidney Dillon. E. A. Gammon, Hood.
Miss Bond, b f by The Bondsman—Miss Harris by Sidney Dillon. Frank Malcolm, Fresno.
The Expense, br f by The Proof—Nusta by Nushagak. Chas. R. Marley, Woodland.
Inspector, br c by Lijero—Queen S. by Sable Wilkes. Chas. F. Silva, Sacramento.
Sadie Ansel, ch f by Prince Ansel—Lauress by Mendocino. Woodland Stock Farm, Woodland.
Lulu B., b f by The Bondsman—Loma B. by Stam B. M. L. Woy, Fresno.

SATURDAY, NOV. 13.

First Race—Pacific Breeders Futurity, 3-Y. O. Trotters—$2,800.

Carl, bl g by Carlokin—My Irene S. by Petigru. C. J. Berry, San Francisco.
Allie Lou, br f by Kinney Lou—Lady Zombro by Zombro Hemet Stock Farm, Hemet.
Byron, bl g by Tom Moko—Reta H. by McKinney. Wm Loftus, Whittier.
May Alto, b f by Alto Express—Maymonio by Demonio Rodman & Hoy, Woodland.
Geo. N. Patterson, br c by On Voyage—Yu Tu by R. Ambush. Homer Rutherford, Pleasanton.

* * *

Major and minor race meetings have all been more or less the victims of bad weather in the east this season, and the unusual run of weather California has had has caused some apprehension concerning the probable course to be pursued by that unwelcome added starter, one J. Pluvius, during the meeting here. Our spring and summer were abnormal, but we have had no finer days and nights than those of the present week. We are overdue for a bit of dampness and it may be "horseman's luck" to have it come with a splash before the 2:06 pace is ended on November 13. With decent weather there will be some really excellent racing, and we will hope for the best and take what we get. If the rain will hold off general conditions will be more pleasant than in June and the footing will also be a bit better, I believe. Harrowing up the track for the runners helped it, and at present there is a good cushion on it. Whether this condition can be maintained after racing starts is a question, as the soil packs and hardens so persistently that a track worker is almost helpless, but if Superintendent Maxwell does have a hard course it will be in spite of every effort, and not for lack of it.

* * *

That versatile Scotchman, Magnus Flaws, arrived in the city early in the week and was followed a bit later by Col. O. P. Updegraff, both being registered at the Washington, where they were accepted as welcome guests owing to the fact that they paid their June bills in full prior to their departure. Both gentlemen are looking fit as can be after a season of constant activity on the other side of the divide and will no doubt give excellent service here in their respective official capacities, the Chicagoan as presiding judge and the Topekan as starter. Both visited San Diego while coming out and report a pleasant trip, the Colonel being accompanied by Mrs. Updegraff, who returns home at an early date after taking in the local exposition. Magnus, as usual, is demonstrating his versatility by officiating not only as judge but as the authoritative correspondent of our esteemed sole surviving Chicago contemporary, and if properly approached on the matter might even go farther and repeat, for our benefit, his famous Davenport specialty of baby christening. Anyway—welcome to our city, everybody, and here's hoping it doesn't rain. [N.]

MATINEE SEASON CLOSES.

With a card of four races, each of which brought out a good field and a good contest, the matinee season of the San Francisco-California Driving Club came to a close last Sunday at the Stadium, the bright particular star of the day being George Giannini's brown mare Ella M. R., who set the season trotting record at 2:12¾, only the fraction removed from the Stadium trotting record held by Reina Directum. Ateka, like Ella M. R., was a winner in straight heats but the other events were split, Lucia S. taking one heat of the 2:10 pace from Little Bernice in 2:10½, the Welsh mare taking the first and third in 2:10 flat, Dick W. being the contender throughout the greater part of the race. Emma M. after being twice second (once each to Senator H. and Greatness), won the third heat of the 2:15 pace and headed the summary. The details:

2:15 pace:

Emma M.	(W. Malough)	2	2	1
Greatness	(E. Cerciat)	6	1	2
Senator H.	(Joe Kidd)	1	5	3
Victor Pointer	(Dan Keating)	3	4	5
Jack	(J. McDonnell)	3	5	4
King Pointer	(H. Campodonico)	4	6	6

Time—2:12½, 2:14¼, 2:14.

2:18 trot:

Ella M. R.	(G. J. Giannini)	1	1
Birdeye	(A. Combatalade)	3	2
Francis S.	(J. E. Strain)	2	3
Kinney Lou Jr.	(Frank Burton)	5	4
St. Patrick	(J. Holland)	4	5

Time—2:16, 2:12¾.

2:10 pace:

Little Bernice	(Jack Welsh)	1	6	1
Lucia S.	(J. E. Strain)	3	1	5
Dick W.	(A. Ottinger)	5	2	2
Happy Dentist	(Fred Lauterwasser)	2	3	3
Bradmont	(G. J. Giannini)	4	4	4
W. J. K.	(W. J. Kenney)	6	5	6

Time—2:10, 2:10½, 2:10.

2:25 mixed:

Ateka	(Frank Burton)	1	1	

Lassie S. ..... (M. M. Bates)	2	2
Silver Logan ..... (Dan Healy)	3	3
Zomwellyn B. ..... (Pat Foley)	4	4

Time—2:21, 2:20½.

MAGNUS STATES THE CASE.

The following comment upon the existing situation was made by Magnus Flaws for the readers of the Horseshoers' Journal, and without further needless remarks on our part we recommend it to your consideration:

The business of breeding, training and racing of harness horses is in a peculiar anomalous condition at the present time. There are more horses racing for more money at more places than ever before in the history of the American trotting turf. The sport was never before conducted on so high a plane and the reports everywhere indicate largely increased attendance at race meetings and fairs.

On the other hand the breeding of the harness horses, despite the scarceness of light horses, is practically at a standstill, and there is a feeling of unmistakable pessimism among horsemen generally. Both these conditions are attributable to the same source, and that is, the by-product of the turf has no marketable value. In other words, if the breeder does not raise a fast, a very fast, race horse he has practically nothing, and if the trainer fails to develop a racehorse of the first class he has nothing. Stated in another way, the cheap auto and the cheap motor truck has taken the place of the light harness horse, either for the road or draft purposes, as the fraternity which your journal represents are already well aware; and the trotter or pacer with only mediocre speed has no earning capacity on the race course.

I have always contended that the racing harness horses should be considered as a sport, pure and simple, and should be carried on by men of sufficient means to indulge their penchant for the pastime regardless of the financial emoluments, yet conditions that leave the patron of the turf with either a deuce or a full hand are not conducive to the popularity of the sport.

Many are of the opinion that the fad for the gas-wagon will die out and that the good road horse will come back again, but my horizon fails to disclose even a hope of this. In the metropolitan cities it is practically unsafe to drive a good horse any more and in the rural districts, while there will for years to come be many good teams and single drivers, the gradual advent of the auto as an economic necessity is a certainty.

We have then only left the possibility of adopting some method whereby our slow horses can be assured an earning capacity on the race track, and this is a problem that will tax our turf-makers to the limit.

Last year rules were adopted handicapping horses on their winrace records only and allowing horses a second on their record who have raced and not won, and this brought some of the outclassed horses back again, but not in any great numbers.

In order then to provide against the scarcity of horses, to assure an earning capacity for the horse of ordinary speed and incidentally to enhance his value for breeder, owner and trainer is the desideratum.

With a reputation for proposing many turf reforms, some of doubtful value, I hesitate to suggest a plan of such far-reaching importance, but for the first time I will herewith submit a solution that I have been considering all the year.

In handicapping by the time record system, in legislation and in practice, it has been the custom and plan to do everything possible to avoid a record, thereby keeping the fast horses in the slower classes just as long as possible—an incentive to cheat and productive of bad racing.

Instead of giving only the horse that wins a race a record, as at present, I would give every horse that wins a heat a record as well as every horse that finishes second. Under this plan if a horse is to win any money, it will only be a week or two before he will have a record classifying him where he belongs, thus having evenly matched contests, and if it turns out that he has scratched a mark in one heat which outclasses him, by an allowance of a second for a losing race he can soon get back where he can race with profit.

The most important feature of the plan is that by this wholesale marking of the first and second horses in every heat, the faster ones are soon ineligible to the slower classes, and hence in the latter half of the season at the many fairs, it will be possible to have a 2:30 trot that will be raced in not better than 2:25, and a 2:25 pace that will be won in slower than 2:20, instead of from five to ten seconds faster, as is usual.

We then have an earning capacity for an ordinary horse, and that accomplished, we will revive breeding, and give the man of ordinary means who cannot afford to own a world-beater an opportunity to stay in the game, which for him is so fascinating.

It will also be of benefit to the associations giving meetings, as it will give them more entries and more even contested races, if in some cases not quite as fast.

And lastly, I am now going to tell your readers that it means more horses to shoe, but every horseshoer of my acquaintance has the red blood circulating through his brawny body that thoroughly enjoys this most distinctive of all American sports, in which the science and art of shoeing and balancing has played so important a part.

THE EXHORTATIONS OF REVEREND SAMMY McMILLAN.

[From J. S. Wood.]

On the night of Oct. 14, 1915, Peter Volo, the great trotter, bred and owned by W. E. D. Stokes of New York City, was brought back to The Patchen Wilkes Stock Farm on the Winchester Pike, near Lexington, Ky., and his great trotting career was over—where he got his first lessons in the game—and his record of 2:02 will stand for many years for a stallion four years old. He is undoubtedly the greatest trotting stallion the world has ever known.

There were present a number of gentlemen from New York and elsewhere, and the occasion of the great horse's coming home to his box stall, 25 feet square, bringing with him at the time the gold cup (Castleton Cup) presented by David Look, that had on it the picture of his sire's great rival, Bingen, once owned by Mr. Look, and the honors of many great races, was made the occasion of an ovation.

At the request of the large delegation present, the Hon Samuel McMillan, ex-Congressman from New York and ex-president of Old Fleetwood Park, who was bubbling over with Kentucky enthusiasm, was asked—so much feeling existed—to lead in prayer, and our dictaphone, in a bystander's pocket, took down his words ad libitum, for the benefit of all horse lovers.

Mr. McMillan kneeled down before the great horse, with the gold cup in one hand and hat in the other, and his prayer was as follows:

"God bless us, dears, and bless Peter Too-loose, for he did not get all that was rightfully coming to him, and forgive his enemies and those who did not do him justice, and may the sin, if it is a sin, of Peter Too-loose, coming to his harem be forgiven, since Solomon had, as Scripture tells us, 8,000 wives and some more who were not his wives.

"In this age of automobiles, Peter Pooloo can do what no auto ever did or could do—breed many another auto like unto himself as two pease—tho' when it comes to Gondolas, I'm not so sure as to them. Be that as it may—Peter Rooloo has not left the race track for good and all, and not like a busted railroad train, that when it gets off the track is put on again, but like a good Mohammedan saint in heaven coming to his own—and to the embrace of his 140 wives—God bless them all. God rest him well, and give him strength and great pleasure and many great sons and daughters who will bear his name and make it ever as illustrious as his own.

"This is a great occasion and me old heart swells with sincere sentiment, tho' the good whisky of Lexington is invigorating and famous the earth over, and not to be despised by a cold and disagreeable world of sin and misery. Oh, Lord! we who don't appreciate this world's blessings are all miserable sinners, but we thank thee for it with all our hearts, for no man is a real man until he has sinned and repented, for it makes us better. May, oh Lord, Peter Volo have strength to enjoy what's now coming to him and may he hand down to posterity a greater list of 2:10 performers than ever his illustrious sire, who is the greatest sire of extreme and early speed the world has ever known. Amen."

Mr. McMillan then rose to his feet amid loud A-mens, and was called on for a speech in honor of the occasion. He responded as follows:

"Before taking this great horse into his padded cell, I wish to take a few moments of your time, in bidding a welcome to the noble beast, Peter Volo, the greatest horse in America even though he always drinks water. [Applause and cries of approval.]

"God bless us all, dears, but this horse, Peter Volo, has done greater wonders than even Abraham Lincoln, when he started the war and saved the colored race. He out-done Moses crying for milk in the bulrushes, he is a second prophet of Israel at the battle of Bull Run—a horse whose pedigree goes back to Pegasus, the horse that got the Greeks into the walls of Troy, New York, without losin' a life—a horse that if he had wings would try to fly to the beautiful moon above us as she looks down out of the cerulean skies on Sammy McMillan and proclaims me the lover of the horse, since the time of Azael, whoever he was, and I say before you all that Peter Whooloo is my friend from the time I was foaled, and a weanling in the year 1831, if I remember rightly, for I was a boy at the time as ye must know, and not a child at that time in me teens an' in me me jeans. God bless us all, and especially Peter Volo—the horse and me have been friends and owners since that time.

"God bless us all, dears, and friends, and so good night to yees all. But stay! I have a word (God bless us all, dears!) for the colored brethern present, whose love for the great Peter Woodoo is notorious but not scandalous, for ther's no sin in loving a horse, if he is the horse they say he is—an' if the records spake true, his success and his happiness is now assured, comin' to his mares in the embrace of 140 wives, some of whom are maidens. God bless 'em and may no pesterin' Legislater nor Woman's Christian Assassination ever seek to declare a law or statute makin' a horse harmen sinful, dears, as the women may declare it to be, bless their hearts—if they get Suffrage in the November elections. So may Peter Who-oo rest in pace—but mind yees, he was no pacer in the buzzem of his many wives, but an honest trotter with the right kind of action—he gets there sure. God bless 'em, and may his progeny win great races in the years to come on the heavenly shores, where there's no sorrow nor sadness forever." [Loud applause in which Peter Volo, himself, nodded and tried to bite Senator McMillan's left ear, the rascal.]

Amid these solemnities, the great stallion walked into his stall, and the curtains were closed as he prepared himself for his well merited rest.

FOUNDER OR LAMINITIS.

Laminitis is an inflammation of the sensitive laminæ and may involve the adjoining structures. There are two forms of the disease: acute and chronic.

Ordinarily, in case of inflammation, the blood vessels become enlarged and a surface swelling appears, but when the sensitive laminæ are inflamed, the local veins confined between the horny wall and the coffin bone have no room to expand; in consequence the pain of acute laminitis is very sharp and persistent.

Causes.—The most common are concussion, overexertion, exhaustion, drinking cold water when the animal is heated, overeating and the eating of various improper foods, such as musty grain, hay, etc.

Symptoms.—In laminitis of both front feet the animal is excessively lame, moves with great difficulty, especially when starting, and appears as if the entire body were in a state of cramp. He stands with the hind legs drawn under his belly and the fore feet advanced in order to relieve the painful feet of as much weight as possible. Occasionally he may be seen to sway backward, raising the toes and throwing the weight for a moment upon the heels of the front feet and then resuming the original position.

If compelled to move, he raises the feet laboriously, not because the muscles are sore, as is sometimes supposed, but because if all four feet are not on the ground at the same time, to bear the weight of the body, his suffering is increased. He will often groan with pain and sweat will break out over the body.

To diagnose a case quickly, the best method is to rush the horse backward when, if affected, he will elevate the toes and throw his weight upon the heels.

In some instances the animal will lie down upon his side, with legs stretched out, for hours at a time, evidently feeling great relief in his position; in other cases, particularly the early period of the disease, he will stand persistently.

Treatment.—Remove the shoes from the affected feet, stand the horse in hot water for several hours each day, or what is equally good and perhaps safer, apply hot flaxseed poultices, changing them every hour, as they become cold. After two or three days of this treatment, change to cold water, which can be applied either in the form of a foot bath or by standing the animal in a running stream for five or six hours at a time.

As soon as the pain has diminished, moderate exercise is beneficial. This may be gradually increased until the animal shows no further signs of trouble. If, after five or six days, pronounced symptoms of recovery are not apparent, apply a stiff blister of cantharides around the coronet, repeating the blister if necessary. In addition to the local treatment, nitrate of potash (saltpeter) in doses of two to four ounces, may be given three times a day. If he is constipated, give one quart of raw linseed oil.

Chronic laminitis is permanent laminitis, resulting from one or two attacks of the acute form of the disease. In the chronic form, there is always inflammation, sometimes more, sometimes less, but never as severe as in the acute form. This varying inflammation affects the adjoining sensitive structures and interferes with continuous regular secretions. The coronary band becomes affected and consequently the growth of horn is not steady. This is shown by the growth rings of the outer surface of the wall.

The interruption of the natural secretions of the sensitive laminæ results in irregular growth of the horny laminæ. In bad cases there is a rapid (false) growth near the toe that has not the ordinary amount of vitality and seedy toe frequently results. This extra false growth also forces the coffin bone back from its proper station and as the dovetail attachment is not as strong as in natural growth, the weight of the animal forces the coffin bone down upon the sensitive sole, causing the ailment known as drop sole. In very bad cases the bone actually pierces the sole and the animal is, of course, absolutely useless.

In shoeing cases of laminitis, pay special attention to the concaving of shoe and use a rocker motion bar shoe; this produces a smooth breaking over and keeps all jarring effect away—Horseshoers' Journal.

Ed Parker, who developed the three-year-old trotter Pinewood by Lijero and sold him this spring to Tom Pollock of Flagstaff, is back at the old familiar stand at Woodland. Ed bought from E. D. Dudley a two-year-old by Palite out of the dam of Pinewood, and is breaking for Mr. Dudley a three-year-old filly by Palite out of Friskerina 2:13¼ by Baywswater Wilkes.

"Sidelights" on the Trots at Lexington

[From the Western Horseman's Correspondent.]

Lexington, Ky., Oct. 16.—With the close of the meeting here the horses and horsemen scattered to the four winds. A big majority of the stables went into retirement for the season, but portions of the stables of Tommy Murphy, Dick McMahon, Charley DeRyder and W. W. Fleming went to California for the big Exposition races. Murphy took Peter Scott, Hal S., Mirthful, Major Ong and Jean. McMahon had the winner of the big match race, Hal Boy 2:01½, and Fleming had The Beaver and Seneca Boy. The well known turf writer, Tom Gahagan, left for Chicago for a few days, and from there will leave for the coast with Dick McMahon. Tommy Murphy will be accompanied to the coast by M. E. Sturgis, William Thompson and some other patrons. The major portion of the Murphy stable was shipped to the home training track at Poughkeepsie, some going back to their owners.

The stable of Walter Cox was shipped home, with the exception of Earl Jr., Aconite and Clara Walker, which go to Windsor, Conn., after which they will race two weeks more before going into final retirement. A. S. Rodney also shipped Todd McGregor 2:10 and Lustrous McKinney to Windsor for the meeting.

Lulu Lumine 2:06¼, a member of the Murphy stable, owned by A. H. Cosden of New York, was sent to Walnut Hall Farm, where the other Cosden mares are kept, and will be bred in the spring, though to what stallion has not been announced.

The trotting stallion, Governor Mason 2:08¼, winner of the 2:13 trot here, was bought by Ed Willis for his patron, Herman S. Crossman, and shortly will be shipped to him at New York where he expects to use him in the matinees.

Axtien 2:06¼, the good looking big Axworthy stallion, winner of the 2:12 trot on the closing day and second to and a heat winner from Peter Scott in the Walnut Hall Cup, was shipped to California by owner Sam Harris. He should be a good trotter on the coast and there are few trotters there likely to beat him.

The champion three-year-old pacer, Anna Bradford (3) 2:00¾, now a four-year-old, accompanied the stable of trainer Bert Shank back to North Randall.

* * *

Mr. Geers gave the three-year-old filly, Straight Sail, a record of 2:08¾ at the Breeders' meeting, which led rise to the opinion that she would accompany the stable south. Horses that went with him were Zombro Rex 2:10¼; Lightsome Watts (2) 2:23; Reamore, and Bonington 2:06¼. Zombro Rex was added to the Geers stable here and was given a record of 2:10¼ at the meeting. Lightsome Watts is a two-year-old filly owned by Gen. C. C. Watts, and Reamore is a fast green trotter owned by H. B. Rea, and formerly known as General Axworthy. Bonington was a member of the Geers stable for the major portion of the past season.

* * *

One of the best sales of a yearling trotter learned during the meeting was that of the chestnut colt by Peter the Great, out of Lena Moore by Hinder Wilkes, which trainer William Owings sold to Walter Cox for Earl F. Shropshire. The youngster has been a quarter in 35 seconds, which is not considered anything like sensational these days, but had a quick, rapid stroke, like a good trotter, and was a tight-made, snug little fellow that looked like on of the kind that would do.

* * *

Murphy bought the three-year-old trotter Ess H. Kay Jr., a son of the fast pacer Ess H. Kay 2:00¾, that had shown himself to be a high-class trotter. He trotted in 2:07¾ for Murphy when sampling him.

* * *

The greatest exhibition of extreme speed seen during the meeting was displayed Wednesday morning with the three-year-old pacing champion, General Todd (3) 2:05¼. Guy Rea, who trained and drove the colt in his five races without losing a heat, decided to step him a quarter at speed, so he turned him round at the wire and let him breeze to the quarter, where he began to drive, and his watch registered the half in 1:01¼, with the last quarter in :27½. "Percy" Smith, in the judges' stand, timed him in :27¾ and other watches timed him in :27½ and :27¾. Guy has just added the gray pacing gelding, Fay Richmond 2:03¼, to his stable and will race him the coming season in the free-for-all classes over the halfmile tracks and in the 2:04 class over the mile tracks.

* * *

W. R. Neill, nephew and bookkeeper for Mr. Geers, bought the brown trotting mare Guy Nella 2:07¾ during the last few days of the sale from Samuel Merkle, Narberth, Pa., and will continue to campaign her in the Geers stable. Though a bit erratic at times, Guy Nella is quite a good trotter and showed to be on the last day here, when she was twice second and secured second money to Axtien.

* * *

Frank G. Jones took a "weeding out" among his stable here and at the close of the meeting had sold three of his pacers. The Assessor 2:04½, that has been in the stable of Dick McMahon for the past two seasons, was sold to Culp & McGeary of Vandergrift, Pa.; Hal Connor to Frank Childs, and Bud Elliot (3) 2:08 (now a four-year-old) to J. Dillon, a Canadian horseman. The Assessor is a user of the hobbles and Hal Connor seemed to need them very badly, so he will probably appear with more rigging the coming season.

* * *

W. A. Owings has a sensational pacer in the bay colt by J. Malcolm Forbes 2:08, out of Annie Fox 2:19¼, by Nuthurst 2:12. The youngster stepped a quarter for Mr. Owings last week in :31¼, with the first eighth in 15 seconds. Annie Fox was quite a pacer in her day, working in 2:10 as a three-year-old, which meant considerably more than such a mile in these days. This is not the only sensational yearling that Mr. Owings has, as he has a black colt by The Northern Man 2:06½, out of the dam of Anna Bradford, that can fairly fly at the pace and worked an eighth some time ago in 15½ seconds.

* * *

Allie Watts' race in the three-year-old trot, in which she was fourth, is her twenty-fifth start, in all of which she has been out of the money but twice. (These races were the two futurities trotted at Columbus.) It was her eighteenth start of the present year, after having started seven times last year, and during the season she has won seven races and been second in a big majority of the rest. The mare is owned by the Black River Stock Farm, Jonesville, La., and was bred by John F. Barbee, formerly of Millersburg, Ky., and one of the owners of the Black River Farm. He has never seen the mare start. Her career and present high-class condition attest to the skill and care of her trainer, Fred Edman, who raced her both this year and last.

* * *

San Francisco secured another 2:10 performer Tuesday in the four-year-old pacer, Robert Frisco (4) 2:05¾, that Walter Traynor marked against time. Luke A., a good little three-year-old trotter, was given a record of 2:14 during the morning, while in the afternoon his son, St. Frisco, won the Ashland in 2:07¾, making the day, on the whole, a splendid one for San Francisco. Walter Traynor has quite a trotter in the bay mare Zobediah 2:09¼, by Zombro 2:11, out of Erirange 2:21¼, by Prodigal 2:16. The mare is owned by S. A. Pickering, who has successfully matineed her the past season. Traynor worked her a mile in 2:05½. She was bred by A. B. Coxe when he had her sire at his Nawbeek Farm. Erirange is also the dam of this season's good three-year-old, Colorado Range (3) 2:08½.

* * *

Bingen Silk, winner of the Lexington yesterday, was bred by Senator J. W. Bailey, being the second winner of the stake that he has bred. The previous one was Lucille Marlow, that Harold Childs drove to victory in 1906. Previous winners of this stake include such good trotters in their days as Belle Patchen, dam of Baron Wilkes 2:18; Steinway, former three-year-old champion; Jay Bird, one of the greatest sires; Silicon 2:13¼, a champion and dam of Siliko 2:08½; Oakland Baron 2:09¼, winner of the Kentucky Futurity; Grace Bond 2:09¼, the second double Futurity winner; Lady Wanetka (2) 2:10, etc. Yesterday was the first time that Chandler ever drove a winner of the Lexington, though for many years reckoned as one of the leading colt trainers in the country.

The deceased California sire, Zombro 2:11, had a great day of it yesterday. Not only did Bertha Carey and Auto Zombro win good races, but Fair Virginia was second to Bertha Carey, and during the morning The Zombro Belle reduced her record to 2:06¼ His son San Francisco secured another two-year-old trotter during the morning, and with the performance of his granddaughter, Mary Putney, in the Futurity, in all Zombro has been well to the front here.

The year that Zombro stood at the Nawbeek Farm of A. B. Coxe, Paoi, Pa., he got ten foals for Mr. Coxe, of which five have either taken records or trialed in 2:10 or better.

Some of the many friends of trainer Walter Randall Cox, better known to the followers of the light harness horse as "Long Shot," fixed up a job for him yesterday. A telegram was sent him stating that he would be given a ten weeks' contract of $500 per week for himself and Earl Jr., to appear in vaudeville, and Cox to make a short talk on the ethics of training. These men who, it is said, included a trainer, owner and newspaper man, were not as well posted on theatrical matters as the "shining lights" of the trotting sport and made the fatal mistake of signing the name of Charles Frohman to it. Cox, being much better posted on such matters, knew that Frohman was dead, having gone down on the Lusitania, and so the joke fell flat, Cox saying that he didn't mind the attempt to josh him, but hated to be taken for such a "boob" as not to know that the great play-producer was no longer on this mundane sphere.

* * *

During the morning two seasons' records were smashed, that for two-year-old trotting colts, when J. B. Chandler drove Bingen Silk, owned by Midway Farm, Kearney, Neb., a mile in 2:08¾, and a new one for the season for three-year-old pacing fillies when Walter Cox drove J. L. Druien's three-year-old filly, Sad Thoughts, to a record of 2:06¼. Both precocious youngsters are by the dead Bingen, and Bingen Silk is out of Nell Cord (2) 2:26¾, by Silk Cord, son of Prodigal 2:16. Sad Thoughts is out of Pleasant Thought by Prodigal; second dam the famous double-gaited champion, Ecstasy p. (2) 2:10½, tr. (3) 2:11½. This filly is also a double-gaited one, trotting a quarter as a yearling in 33½ seconds.

* * *

In the matter of winning races, Tommy Murphy led all drivers for the meeting with a total of six races. Two of these were with Peter Scott, one with Peter Volo, one with M. L. J., one with Peter Worthy, and one with Sunloch. Mr. Geers stood second on the list with five victories, two of these being with Napoleon Direct, one with Russell Boy, one with Deroche and one with St. Frisco. Lon McDonald came third, having four victories, of which Ames Albingen won three(the only triple winner of the meeting), and Duchess the other. No other driver had more than two, the following having two each: Cox, DeRyder, McMahon, White, Valentine, Bob Wright, Loomis and Nuckols. Harry Jones, Egan, Mann, Rea, Serrill, Birney, Chandler, Gosnell and Harris each headed one summary.

* * *

Axworthy started the day off well Saturday, when his son, Axtien, won the 2:12 trot in straight heats, while his granddaughter, Guy Nella, by Guy Axworthy 2:08¾, was second.

* * *

Peter Volo seemed to have reached his limit for the year at 2:02, which figure he placed in the first heat of his great match race with Lee Axworthy at Cleveland, for since that time he has trotted in 2:02 on four occasions, besides another in 2:02¾, while in the Castleton he cracked in two heats in 2:02½ and 2:02¾.

* * *

Etawah also seems to have tied up around 2:03, going in 2:03 twice at Lexington and once in public, while he worked a mile for Mr. Geers Friday morning in 2:03, and came back in 2:03 again. But for his stud season the little horse would probably have been up to a faster mile by now, as last fall he gave indications of trotting much faster than his four-year-old world's record of 2:03¼ for his age.

* * *

When it comes to amount of money won during the meeting, Dick McMahon is a comfortable leader, as he won two races—the Kentucky Futurity, first money $8,500, and the $10,000 match race. Murphy, with Peter Scott's Transylvania and Walnut Hall Cup, Peter Volo's Castleton Stake, which total $5,500, and the Dinner stakes, match race, $3,000, besides his purse races, comes second, with a total of $9,500.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

SILVER FOX FARMING.

Those thinking of engaging in fox farming as a source of profit should consider carefully the cautions and the data as to the expense of equipping a farm, and would do well to weigh carefully the conservative statements as to the profits from this industry, which are included in U. S. Department of Agriculture Bulletin 301, The Domestication of the Silver Fox.

The bulletin points out that the prices of furs and of breeding animals have fallen considerably since July, 1914, and states that the prices running into thousands of dollars formerly paid for live silver foxes were based not on the fur value of the animals, but on their possibilities as breeding animals, in an industry in which there was great speculative excitement. On this general point the author says: "The business of fox breeding will be on a much more stable basis than at present when the value of breeding animals bears an approximate relation to the value of their pelts in the open market. The profits in silver fox farming prior to 1910 were realized mainly from the sale of pelts; since then, they have been derived almost entirely from the sale of live foxes for breeding purposes. There has been a recent sharp decline in the prices of breeding stock."

The choice of location of a fox farm is of prime importance. The best furs come from cool, moderately humid regions. If a locality furnishes native furs of high grade, that locality is favorable to the domestication of fur bearers. The climate of the Middle and Southern States is not well suited to this industry, as shown by the medium or low prices commanded by furs from these areas. The ratio of expense to income must be considered with care. One can not pay the exorbitant prices animals for stocking purposes sometimes bring and expect to raise fur at a profit. Neither can one expect to raise furs of a fine quality from inferior stock. But given a normal market for breeding-stock and pelts, a favorable location, a love for animals, and an ordinary degree of prudence, one may engage in black or silver fox farming with a good prospect of satisfactory returns, provided, of course, a high price for pelts is sustained. Values of animals and pelts were very high a few years ago, when the industry was being launched, but are now on a much lower basis. Those who contemplate going actively into the business or investing their money in corporations or companies organized for fox farming should investigate thoroughly all phases of the business.

The records show that 133 silver fox skins of all grades offered in 1914 at a London auction sale realized an average value of only $118 each.

The silver fox is simply a color phase of the common red fox. The name "silver fox" as commonly used by furriers, includes the dark phases of the ordinary red fox variously called silver, silver gray, silver black, or black, and is not to be confused with the gray, or tree fox, the fur of which is of comparatively little value. The red, the typical cross fox, the silver, and the black fox all interbreed, and when one occurs occasional examples of the others may be expected. This fact can be used, as the bulletin points out, to develop silvers by cross mating, and selective breeding is important to produce silver progeny. Breeding to produce less nervous animals, as well as to produce fine pelts, must be considered.

The most valuable skins are those in which the entire pelage is dark at the base and overlaid with grayish white. The black skins recently have fallen below silvers because furriers find they can dye red skins black. Silver foxes can be raised wherever the red foxes live in the wild state but will produce superior fur only in regions where the fox naturally produces a superior fur. Records of the Biological Survey show that such localities occur only north of the southern boundary of the Canadian Zone. This boundary, as shown by a map in the bulletin, crosses the States of Maine, New Hampshire, Vermont, Michigan, Wisconsin, Minnesota, and South Dakota, and extends southward along the mountains in New York, Pennsylvania, West Virginia, and in all the States of the Rocky Mountain region and westward. South of the forested regions of the northern tier of States and Western Oregon, however, the Canadian Zone, although sufficiently cold, is too dry and sunny for the production of first-class fur. In the Transition Zone, a region less cold, foxes having a fair quality of fur may be raised, but the best are obtained only in more northern latitudes.

To raise silver foxes calls for a pair of foxes, which will cost from $150 to $250 each for the common silvers, up to several thousand dollars each for the best silvers. The yards in which they are kept must have high and strong wire-net or board fences with an overhang at the top to prevent the foxes from crawling over. These fences either have to be sunk in the ground or the fence wire has to be extended as a mat on the ground to prevent the animals from digging under. The cost of yards runs from $100 to $150 each, which includes the making of the special dens needed for the animals. The equipment is described in detail in the bulletin. The chief requirements for a fox farm are well-drained, wooded land in a secluded section where the foxes, which are inclined to be nervous, will not be subject to outside disturbance. The fox ranch must have good drainage and must be partially shaded by a young growth of deciduous trees. Each pair of foxes should have a runway of about 2,500 square feet, and provision should be made for separating them. One reason for properly equipping the yards and locating them away from outside interference is that fact that the vixen is very nervous about her cubs and frequently mishandles and kills them in attempts to hide them from imaginary dangers. Attendance is an important feature because foxes do not tame readily and rarely become friendly. Constant changes of persons in charge, like in the presence of absolute strangers, has a detrimental effect on them.

Foxes require some special attention, certain skill in handling, and great care in feeding. They thrive on a varied diet, including meat, fish, mush, milk, bread, and table scraps, but they are easily injured, especially when young, by improper food. It costs from $5 to $15 a year to feed foxes, depending on whether ther are cows and whether grain and vegetables are raised on the farm. The fixed annual charge against a pair of foxes will vary with the locality and value of equipment, etc. On some ranches it has been estimated about as follows:

Interest on cost of yards	$10
Depreciation of yards	10
Food	20
Attendance	50
Amounting to	$90

To this must be added a reasonable charge for interest on the original cost of the foxes.

The young are born in April or May, the average litter containing four cubs, but, as only about half of the captive females produce young in any given year, the annual increase on fox farms has not averaged above 100 per cent.

THE LATE DR. CHARLES F. HOLDER.

[By Charles V. Barton.]

In the death of Dr. Charles Frederick Holder, it is not going too far to say that the entire civilized world suffers a real loss. Certain it is that thousands of devoted personal friends in this country and in Great Britain will mourn him deeply.

An educated gentleman of rare refinement and great personal charm, and a writer of world-wide fame, Dr. Holder by reason of his personal tastes and preferences, early became interested in wild life, and it was as an angler and a writer on big game fish that he became best known. He had caught nearly all the species of big game fish extant, and had written with authority upon all. He was almost equally as well known as a conservationist of other forms of wild life, particularly of birds.

Dr. Holder was the founder of the Tuna Club of Santa Catalina island and was for many years president of that world-famous angling organization. He was the first man to catch a leaping tuna of over 100 pounds with rod and reel, and by the work of his pen he gave Catalina island and its teeming waters the unique and splendid reputation as an angling resort which it enjoys all over the world.

The motto of the Tuna Club is: The Protection of the Game Fish of California, and a Higher Development of the Art of Angling; and no man has done more, or indeed as much, to establish these laudable principles as Dr. Holder. Practically single handed, at the last session of the State legislature he secured the passage of the act setting apart the waters of Catalina island is a game fish preserve, thus putting an end to the wholesale seining of fish which was fast exterminating the game fish which frequent those waters.

In the Wild Life Protective League of America Dr. Holder was president of the department of Southern California, spending a great deal of time and money in promoting the conservation of wild life in all its attractive and useful forms. He was also the founder and the former president of the Valley Hunt Club, Pasadena's most exclusive social organization.

Dr. Holder, besides writing innumerable magazine articles, was the author of a dozen or more books on angling, sea life and kindred subjects. The Log of a Sea Angler, Big Game Fish at Sea, The Channel Islands of California, and a comprehensive volume on the Game Fish of the World, were among his principal works. He also collaborated with Dr. David Starr Jordan in an epic volume of fishing stories.

Several years ago Dr. Holder visited Great Britain, where he was enthusiastically entertained by many notable men among British sportsmen.

Charles Frederick Holder will be missed and mourned most by those who knew him best.

DOWN SAN DIEGO WAY.

You gotta hand it to San Diego! She has everything outdoor folk crave—weather made to order and ordered each day of the year; a back country that awakens in every red-blooded mortal the slumbering "call of the wild," and now is waking time; a region of foothills and mesa and valley that is the home of wild game in abundance. So this shall be a story of San Diego's famous wild game hinterland, a hunting preserve famed in all the broad reaches of the Golden State, says Tenderfoot in the San Diego Times. Fostered, nourished, protected by the law's might, this splendid preserve is free to all who heed the law when following the lure that lured Nimrod. Now for the wild ones!

First in hustling, first in knack, and first in the hearts of Clan Scatterguns is the king of all game birds—California valley quail. And back in San Diego's foothills are thousands of these jaunty, self-reliant aristocrats of the feathered kingdom. Time was when valley quail were slaughtered and sold in the open market, but those days are gone forever, thanks to belated wisdom in our treatment of wild game. Under the law's protection, valley quail have held their own, bringing forth each year thousands of broods that now are beginning to gather in big coveys.

The present summer has produced more quail than in several years, giving promise of raresport when the open season begins. And quail hunting is rare sport. The foxy little rascals savvey the getaway game even as will-o'-the-wisp, blending softly into a memory of clever wild life, or flushing with nerve-racking crash that puts wrinkles on mental poise and calls into action, with the average gink, his best boob efforts in wingshooting. Time and again seasoned veterans have been separated from their conceit by these wonderfully adroit little feathered strategists, while a yokel at the game is fruit, ripe and mellow, for Senor Valley.

To tell where quail hunting will be good this year is easy, for the hinterland harbors many thousands. So hunters can be sure of a big harvest.

Another game bird that is a bad actor on the wing is paloma—swift, erratic dove. In full flight, a dove can fade away like Matty's famous slant, and then the bird's twisting, flashing wingwork makes the hardest kind of gunpointing. At other times, when flushed close up or settling to a water hole, doves are easily killed. The present open season on doves, which will run to December 1 has furnished unusually good shooting to those who have gone afield in hunting togs. If you have not been out, Mister Stick-Around, it's about time you jarred loose and introduced yourself to a touch of the strenuous. Don't worry about absent-mindedly overshooting the limit, rather avoid overshooting the birds, and if you don't believe me, Jasper, your sentiments are commendable and should be followed strictly by all but a few of us. Doves are plentiful—do you hunt, Tigellenus?

Which brings this essay to the place where the webfeet get into the glare. Funny thing about ducks is that a lot of hunters wax enthusiastic about killing quacks, and talk languidly or listen abstractedly to stories of upland joy. Well, San Diego county's duck ponds are there with bells on, and they're not mission bells—not by several miles of scenery—just dancing little airbells kicked up by busy webfeet. False bay, Sweetwater, Upper and Lower Otay, Warner's, Cuyamaca, La Mesa and Morena lakes furnish splendid duck shooting, and of them all perhaps Sweetwater is favorite. To the Brotherhood of Chilled Sixes many happy hours have winged into memory's archives at Sweetwater, where ducks galore have been bagged by disciples of the Great Matted Rib.

Driving the lake is the usual method employed. This is accomplished by forming a line of boats across the lake and sweeping the ducks' domain from one end to the other. As the webfeet flash by, or swing over, the hunter picks his bird and pulls the trigger. Ruddy ducks furnish most of the close chances, winging over or past the boats at deceptive speed and offering a puzzling array of leads. The bid ducks—like redheads, cans, sprigs, mallards, widgeon and spooneys—usually climb high when they leave the water. Coaxing, seductive calls used by hombres in blinds, aided by decoys, usually toll the flock into the gunplay. More of the big ducks are dropped by "blind" hunters than by those in boats.

When the city editor called for a wild game story he wound up with, "Mention all the 'varmints,'" which includes rabbit and deer. Now, bunnies can be found anywhere, from Balboa park to the desert—brush and jackrabbits and Molly Cottontail. Rabbits are famed mostly for their astonishing ability to prosper in spite of man's persistent warfare. To those who go afield in search of Molly, the ranchers will grant open sesame to their bailiwick and wish them good luck, for bunny is persona non grata with most soil tillers.

Deer could be killed legally up to October 1, if the hunter was a real Bumppo or real lucky. Deer in the open heap savvey getaway, and are prized accordingly. They will sneak through brush with all the stealth and cunning of El Coyote, and again they crash into headlong flight, a buck's bobbing flag offering anything but an easy mark. But deer are out in the back country and can be venisoned by those who make "good medicine" and hunt faithfully.

Of course, back in the mountains are mountain quail and tree squirrels, and big rattlesnakes and

hoot-owls, and fat bucks and friendly ranchers, but there's no open season on ranchers, so confine your gunplay, amigo mio, to the wild ones. Hunting, the primitive method of sustaining life, is modern man's greates joy—at least, it "gets" a lot of them—and in the broad stretch of mileage between the city limits and Mountain Springs is a preserve well stocked with wild game, a district easy of access and full of charm—San Diego's famous hinterland.

BY WAY OF COMPARISON.

Taking into view the facts that well over 200,000 fishing and hunting licenses are annually taken out in this State and that there is open hunting ground and fishing water enough to enable every license buyer, of either sex, to enjoy outdoor recreation and sport, the story given below, taken from the New York Times, should be of more than usual interest to Coast sportsmen—when contrasted with conditions that prevail here now, and which conditions , by the way, have been severely criticised and condemned by some shotgun and rod followers who claim that fish and game affairs in this State are in a most deplorable condition:

Sportsmen throughout South Jersey are preparing for the deer shooting season, which begins Wednesday (October 13),being the first of the four Wednesdays, three in October and one in November, that it will be lawful to kill this game.

Already camping parties are pitching their tents in the deer woods in the vicinity of Weymouth, Carmantown, Doughty Tavern, Buck Hill and English creek. The deer seem most plentiful in the woods surrounding Weymouth, and during the last summer it was no uncommon thing to witness herds of deer grazing in the fields and along the roadside. In other sections of the county, reports are made by farmers that deer frequent their truck patches and feed. At Eelwood, almost daily the last summer, several deer could be seen eating apples that dropped in an orchard, and they were so tame that they would wander within a few yards of the farmer's house.

While the deer are reported so plentiful the same reports are heard of the quail and rabbit in the Atlantic county woods and fields. While automobiling from Egg Harbor City to May's Landing, a distance of seven miles, parties recently counted twenty-three rabbits sporting in the roadway. [Going that distance on some of our roadways one can count that many hundreds.—Ed.]

The abundance of quail is attributed by sportsmen to the mild winter last year; also to the fact that the Southern quail liberated by the Game Commission remained here and mated and multiplied. In previous years the birds shortly after being liberated would migrate.

The abundance of rabbits is principally due to the scarcity of foxes. In former years these animals would destroy more young rabbits than all the other enemies of the cottontails together. As the State offers a bounty of $3 for each fox killed, the hunters went after Reynard not only for the sport but for profit also, and as a result many were killed.

Under the new deer law the shooting of doe as well as buck deer, over one year old, is permitted. This will be a welcome change to many gunners, as it is practically impossible for a hunter to distinguish bucks from does in the woodland when the deer are running. Only one deer a year may be taken, and rifles, also shotguns, of less than 12 gauge, are illegal. The new law provides that it is illegal to have deer in possession on any day except those on which they legally may be killed, and the burden of proof will be on those who have venison in their possession on other days to prove it was taken on one of the Wednesdays in season.

With the approach of the open season for shooting wildfowl, sportsmen are warned that the Federal regulations will be strictly enforced. Some misunderstanding has arisen from the fact that the various State laws do not always conform to the Federal regulations. This is regarded as unfortunate, but in such cases the department must insist upon the observance of the Federal regulations.

The department will consider any recommendations submitted in good faith for amendment of the regulations, but will hold no public hearings thereon, nor will it amend the hearings prior to Oct. 15, 1915. It is the purpose of the department to conform the regulations to the wishes of the majority of sportsmen so far as it can be done, and at the same time give wild fowl the necessary protection.

The 1915 Fish and Game Chart for New Jersey, revised in accordance with the Federal law, gives the following open seasons:

Quail, rabbit, squirrel, male English ring-necked pheasant, ruffed grouse, prairie chicken, and Hungarian partridge—Nov. 10 to Dec. 15.

Wild turkey.—Closed season until March 3, 1919.

Female English ring-necked pheasant.—Closed season until April 15, 1919.

Reed bird.—September and October. All small birds not designated by name under the open season, little brown, sandhill and whooping cranes, swans, curlews, upland plover and wood ducks.—Closed season until Sept. 1, 1918.

Shore birds.—Only black-breasted plover, jack or Wilson snipe and greater and lesser yellow legs.—Sept. 1 to Dec. 15.

Rails, coots, gallinules, marsh hen or mudhen.—September, October, and November.

Woodcock.—Oct. 10 to Nov. 30.

Waterfowl, except woodduck and swan.—November, December and January.

Brook, brown and rainbow trout and land-locked salmon.—April 1 to July 15.

Black bass, Oswego bass, white bass, crappie and pike perch.—June 15 to Nov. 30.

Pike and pickerel.—May 20 to Nov. 30; Jan. 1 to 20.

Skunk, mink, muskrat, otter (may only be trapped)—Jan. 1 to April 1; Nov. 15 to Dec. 31.

Deer, bucks and does over one year old.—Last three Wednesdays in October and first Wednesday in November.

Raccoon.—Oct. 1 to Dec. 15.

It is illegal to take or have in possession in any one day more than 25 trout, 10 salmon, 10 black bass, 10 quail, 3 pheasants, 3 partridges, 10 woodcock, 3 ruffed grouse, 20 ducks, 10 geese, 10 brant, 10 rabbits, 30 marsh hens or mudhens. Also to take more than 10 pike or pickerel in January, no bag limit being fixed for the remainder of the open season.

The taking of white and yellow perch, catfish, sunfish, suckers and eels with hook and line only is permitted at all times of the year, provided that not more than three hooks are used.

It is illegal for dogs to run at large except during quail season, and for any person to go into the woods and fields with a hound or firearm except during the quail season, but the law does not apply to legal hunting for deer, woodcock, snipe, rail, mudhen or waterfowl.

A dog may be trained in the woods and fields without firearms (without permit) in daylight from Oct. 1 to first day of the quail season, excepting during the deer season. A dog may be taken into the woods or fields at any time without firearms (and without permit) if such dog is not allowed to hunt or pursue game and is under control. Persons may hunt raccoons with dogs and firearms (without permit) from Oct. 1 to Dec. 15, between sunset and sunrise.

WHEN THE TEAL COME IN.

Wherever there are waterways of any size; wherever there are reedy, rice-grown lakes, wherever there are stretches of alternate mudflat and sandy sea beach—wherever, in short, there is water and feed to lure them, there the duck family will be found, lording it over all the other game birds of the locality, I care not whether they be quail, or grouse, or turkeys, or wild pigeons.

The Pacific Coast, lacking the myriad little bays and estuaries which cut into the shore of the Atlantic, has never been the highway nor the abiding place for ducks and geese as has been the eastern shore of the United States. But as the country settled up and the Mississippi Valley, once the main highway of all the feathered hordes of the New World on their migration to breeding places close to the Circle, became filled with men and guns, the birds began to seek a new route to the north.

Naturally they turned to the Pacific shore of the continent, and the principal pathway of the ducks and geese into the far recesses of the north nowadays is over the land west of the Rockies, either along the coast or a trifle inland, over the Great Basin.

All in all, there come to the Coast every year (or remain there during the breeding season) seventeen species of ducks, five varieties of gees, one brant (the black), and one swan, the trumpeter. This list does not pretend to split hairs, but is given to good species, well marked and easily identified, even by the tyro.

Of the geese and the brant and the swan it is not mine to speak, though the season for shooting the geese is here, but rather of the swift-winged, eye-trying little rascals, the teal, of which there are three species to be met with by the shooter on this Coast.

When the winds of winter make uncomfortable the warmest blind, when the rain drives down that wind at forty miles an hour, when your fingers are so cold you cannot work the safety on the little double-barrel, on such days as these the teal seem most at home above the marshes and along the river mouths of the southwest.

Rising reluctantly as if hateful of leaving its day-long resting place, a mallard, heavy with much good feeding, drives slowly across the wind and the rain, striving to reach the sandhills and after them the river, where he can float even more securely and where he can find a band of his kind. He looks slow—he is slow; the twelve-gauge cracks and the green-head tumbles with a splash into the water. One bright spot in the day at any rate! Life seems to return to you; you finger the warm barrel of the gun lovingly and wish another bird would come along to give you a chance to warm the other barrel.

And then, out of the mist and the rain, out of the mean day which is to be your last of duck shooting for the season, there comes a faint "Mark west!" from the nearest blind. You do, and thrown across the sky is a wavering line, so thin in the fog as to seem a long way off. It doesn't look like ducks, but it moves and wavers along the sky and it must be ducks; no other living things on earth but ducks and you could be abroad on such a day as this.

The line crumbles up in the center, rises into an arch as it sees your decoys; almost stops in midair, then breaks down to fall into your lure, suddenly suspects something and straigtens out to circle round your clump of weeds just at the right range.

Deceived by the mallard's big body and by the murk, you figure them as going slow, a nice mark. The right barrel cracks; nothing doing. The nitro rips out a peppery word from the left barrel, and the last bird in the last wing of the rude crescent stutters in his flight and, over in the next pond, pitches into the water.

This is the teal, not held in high repute by "epicures" (!)—most of whom could not tell a canvasback from a mallard or a gadwall from a mudhen if they saw the birds cooked only—but to the old gunner along the Coast the very epitome of all that is hard to hit when in full flight, and of personified wariness when once it has been warned of the dangers of any locality.

The speed of the teal is wonderful; I believe it is the fastest of all the duck tribe once it gets under way, but in rising from the water it is beaten by the mallard, or the redhead, or the ruddy, or any one of half a dozen other ducks I could name which are found in the same localities as the teal.

Commonest of all the ducks which come to the Coast hunter is the green-winged teal. It is abundant in winter throughout the lowlands and along the lower parts of the rivers which flow down to the sea.

For the man who gets his duck shooting by poling along some river in a skiff or by walking up or down its side, putting up here and there a bird, the mallard is best and the teal a long way down the list, but nine out of ten of the ducks which are shot in small meadow ponds in the farms of the lowlands are teal.

They seem to be remarkably sociable little fellows, and I have seen the water of small ponds near Alamitos and Westminster and the alkali lakes down below Santa Ana black with them in winter. Along toward spring these green-wings go north and east to their breeding grounds, though they are among the last to leave of all the migrant ducks, just as they are one of the first to come out of the north at the beginning of winter.

On the wet-weather lakes of the hills I have found the best place to gather in the green-wings. Usually a man can get one of these lakes pretty much to himself if he arrives there early enough in the morning, and if, before the duck season opens, he makes a blind at some convenient place he can have good sport even without decoys or dog. About the best all round duck shooting I ever saw was on a little pond not far from Whittier, in La Habra valley. There the teal came, literally by thousands every winter, to feed in fancied security from men and guns.

Along the shore of the sea, and on the sandhill lakes and little estuaries, the teal is not so common, though it is occasionally seen in the rafts of other ducks, resting just outside the surf. It is in no sense a sea duck, but is the game bird par excellence of inland waters.

With the green wings now and then the hunter will kill a teal which has a blue patch on the wing in place of the green feathers with which he has become familiar during long acquaintance with the green-wing. This is the rare blue-winged teal, a straggler from the East where, on the Atlantic Coast at least, I am told it is about as comon as the green-wing here.

The blue-wing is the most beautiful of the teal and it is a great pity that it has not become more common, though the introduction of any migrant game bird is quite out of the question. I am a great believer in the keeping of game birds in aviaries and on the grounds of large estates. Where judgment is used, and some attention paid to different foods for different seasons of the year, there is no reason why ducks should not be kept as well as quail, grouse or pheasants—and none of the web feet are more hardy or more to be desired than the teal.

But the abundant fresh water duck of the Coast, and of the southern end of the Coast in particular, is the cinnamon teal. Resident through the spring, summer and fall wherever found in Southern California, the cinnamon teal leaves this part of the State only for a brief stay.

Wherever there are reedy marshes, wherever there are green fields bordered by brooks or even by drainage ditches and in the vicinity of practically all the ponds and lagoons of the southern counties of the State, the cinnamon teal builds its saucer-shaped nest, lays its six to ten cream-colored eggs in April or May and rears its young.

There is not a farm—I doubt if there is a beet or celery ranch in the lowlands of Los Angeles, Orange, San Diego, or even Ventura county—that has not any number of these pretty little birds nesting in its boundaries. While the female is sitting there is no more secretive bird in all the outdoors, and when the young come off the nest they learn to swim and dive so rapidly that the waters of the creek or pond along which they are born is as much a home to them as was their grassy cradle a few hours before.

Young teal grow rapidly, and by midwinter are ready to begin the long flight to the marshes of Mexico and even farther south with the parent birds. The nesting time is mostly in May, though late April sometimes finds several pairs engaged in the duties of home making. Newport Bay was once a famous place for these birds and also, in the winter months, for the green-wings, but of late the growth of the beach city and cutting up of the tide lands into gun clubs properties has spoiled the shooting for any but members of these organizations.

[Concluded Next Week.]

Drink Jackson's Napa Soda.

At the Traps

Garden City Doings.—The trick rifle and pistol shooting of Mr. and Mrs. Adolph Topperwein featured the final shoot of the San Jose Blue Rock Club, October 24. A thousand people were attracted by the performance which was declared by enthusiasts to be one of the best ever seen in California. One of the feats which took big with the crowd was the bullet picture of "Uncle Sam" shot into a large target by Topperwein. Every shot seemed to be perfectly placed. He followed this up by smashing with rifle bullets three objects hurled into the air at the same time. Not to be outdone by this rapidity of shooting, Mrs. Topperwein, using a pumpgun, battered up six objects tossed skyward simultaneously. She then scrambled half a dozen eggs which were thrown out at the same time.

Mrs. Ada Schilling, the club's diminutive lady shot, ran Mrs. Topperwein a fairly close race in the regular 100-bird event, getting 91 while the brilliant visitor was breaking 95.

O. N. Ford, who broke 97 out of 100, was the best performer of the day over the traps. H. E. Poston scored 95 and E. C. Reed 94. Ford shot a straight run of 65.

A. F. Baumgartner also shot splendidly, getting 12 straight pairs in the doubles event. This is the first time that anyone has gone through this event on the local grounds without a miss. "Louie" is a wonder with the pumpgun.

C. R. Arques, with a handicap of 12, won the San Jose handicap. Ford with 4, Mrs. Ada Schilling with 10, C. A. Arques with 12, W. J. McKagney with 15, each made 100. Ford then withdrew and in the shooting Arques broke 49 out of 50 and won the silver trophy. George H. Anderson and N. A. Howard of San Francisco tied with 99 out of 100 for second money. The shooting of A. Richter, the boy wonder, who broke 79 out of 100, was also a feature of the day. The scores at 100 birds were:

O. N. Ford 97, Mrs. Topperwein 95, H. E. Poston 95, R. C. Reed 94, N. A. Howard 93, G. H. Anderson 92, Mrs. Ada Schilling 91, C. R. Arques 88, W. J. McKagney 88, Charles H. Nash 87, A. Richter Jr. 79, Fred Willet 79.

Doubles, out of 24—A. F. Baumgartner 24, H. E. Poston 22, O. N. Ford 21, C. R. Arques 20, G. H. Anderson 19, W. J. McKagney 18, A. B. Jones 16, C. B. Smith 15.

* * *

Novel Trap Shooting Trip.—We are advised by Mr. T. E. Doremus, of Wilmington, Del., of an interesting trapshooting novelty in the shape of a barnstorming trapshooting trip which will be made during the month of November by the following famous major league ball players: "Chief" Bender, Christy Mathewson, "Doc" Crandall and Harry Davis.

These men all have the reputation of being pretty fair target shots, and at least two of them are wonderful live bird performers, although they will do none of the latter on the trip. They will travel under the auspices of the Du Pont Company and the trip will be in charge of E. R. Galvin, of Wilmington, Del.

It is the intention to shoot a match in each place visited against a team of local stars, same to be at 100 targets per man, and the total team scores to determine the final result. As it was possible to secure but four ball players for this trip, a prominent shooter in each city where a shoot is held will be invited to captain the visiting squad for the day and to shoot with them.

A feature of this attraction is that admission to all grounds where shoots are held will be absolutely free. baseball and trapshooting who will be present.

The itinerary of the squad has been arranged with a view of making the trip interesting to the greatest number of people possible, at the same time keeping in mind the importance of having the men shoot where the grounds are accessible and large crowds of spectators can be accommodated. That both of these considerations have been well taken care of is evidenced by the following schedule:

November8, undecided; November 9, Baltimore, Md.; November 10, Pittsburgh, Pa.; November 11, Cincinnati, Ohio; November 13, Indianapolis, Ind.; November 14, St. Louis, Mo.; November 15, Kansas City, Mo.; November 16, Omaha, Neb.; November 17, Des Moines, Iowa; November 18, Minneapolis, Minn.; November 19, Milwaukee, Wis.; November 20, Chicago, Ill.; November 22, Toledo, Ohio; November 23, Detroit, Mich.; November 24, Syracuse, N. Y.; November 25, New York City (under auspices of New York Athletic Club); November 26, Hartford, Conn.; November 27, Boston, Mass.

From the above, it will be noticed that the ball-players will travel and shoot in 15 States and visit all the great baseball and trapshooting centers.

It may interest the general public to know that most every major and minor league baseball player is an owner of firearms, and usually manages to get in a few days' hunting after the ball season. In the major leagues nearly every ball player owns two or three rifles and shotguns, and quite a number are frequent visitors at the traps. The public, generally, is not well informed as to the doings of ball players off the baseball diamond and when their time is their own, but the amount of "gun talk" and shooting "dope" one hears in associating with them is evidence of the popularity of the shooting game with them.

VALUE OF CLOSED SEASON ON GEESE.

In one section of the State, at least, the ranchers have awakened to the advantages to them of protection for the geese. The protection of the waterfowl, far from having caused the birds to damage their grain crops, has actually resulted in an increase of the production. This is the story told by some of the ranchers near Davis and along the tulle, and the reason given seems very plausible.

One rancher says that during the time the geese were not protected, when the market hunters were keeping them moving all the time, the most he ever produced on a certain tract of ground was 700 sacks of barley. During the last two years when the geese were protected in the spring and late winter, he has raised 2700 sacks of grain yearly on the same piece of land, the field not having been molested by the birds.

The rancher explains the situation as follows:

"During the fall, after the harvest, when the barley fields are strewn with scattered grain, and when the geese are gaunt and hungry after their summer in the Arctic, the birds visit the fields in great numbers to pick up the grain. At daybreak they can be seen rising from the tulle and moving to the fields in clouds. About 10 o'clock, back to the tulle refuge they go again. This movement they keep up day after day through the fall and early winter, but as the winter season progresses they grow fatter and fatter, and lazier, and the flights decrease in length and in the number of birds taking part.

About the middle of January, when the newly sown grain is sprouting nicely and is up enough that hungry flocks of geese could damage it, the fat, heavy birds prefer to loaf in the tulle, if left to themselves, pulling up the new shoots of various water growths that then are putting forth and otherwise living on the natural food of the marshes. During the time the geese were not protected, however, the constant attacks of the market hunters and others kept them on the move and drove them from the tulle resting places and feeding grounds out onto the newly planted grain fields where great damage often was done."

The Davis ranchers say that they have learned their lesson and they are heartily in favor of a closed season, such as the present one for the geese, and the curtailing of market hunting; and they believe that when ranchers of other sections of the State observe the facts a little more closely, they will fall in line as boosters for game protection.

Many large scale farmers have begun to realize that the market hunter with his trained bull, steer, or horse, and the gunner who digs holes in the fields which later interfere with the harvesting, do more damage than the geese, and many of them have prohibited hunting on their grounds for this reason. Thus last season the Natomas Consolidated prohibited goose hunters from going on its lands, preferring to keep a goose herder on the place to scare the birds away with a rifle when any stray flocks did visit the place.

HUNTING NOTES.

Among the many hunters who resort to the bay shore marshes and along the coast shores there is some confusion as to just what are protected "shore birds" and what members of the snipe family may be shot in season. In answer to queries on this subject it may be stated that the only shore birds the Federal and State laws allow to be hunted and shot are four species, the Wilson snipe, often called the English or jacksnipe, and usually the bird referred to when snipe shooting is mentioned, and the yellow-legs, a bird never overly plentiful on this Coast. Black-breasted and golden provers are included in the open list of "shore birds." The latter variety is more plentiful than the black-breasted bird.

"Shore birds"—that is, curlew, three varieties, black and bronze ibis and the forty odd varieties of snipe are on the protected list. Among these may be mentioned a number of birds known here and there as the stilt, avocet, godwit, willet, robin snipe, killdeer, the different sandpipers, marlin, sicklebill curlew, upland plover, and the many other varieties of snipe that feed in marsh lands and which visit our shores in large numbers during the months they are traveling from breeding grounds to feeding resorts. With the exception of the four varieties mentioned above any and all other "snipe" are shore birds and are on the federal protected list. Shore birds, owing principally to the numbers of hunters who pursued the birds in the hunting sections of the Eastern States, it is claimed by the U. S. Biological Survey, were disappearing in such alarming numbers that local government laws were insufficient to stop the annual decrease in the supply of these migratory birds. On this Coast shore birds are almost as plentiful as they were twenty or thirty years ago. The federal law has caught the Coast sportsmen in this respect, and the measures now in force are considered by a majority of our sportsmen as unnecessary at the present time.

* * *

Hunters report that never in many years have wild ducks of all varieties been so phenomenally numerous along the upper coast waters in this State than they have been since the season opened, October 15.

The reason ascribed for the splendid showing of the birds is the stoppage of the spring shooting through federal regulation. In former years the duck season did not close until along in April and May and now the bars go up February 1. In the Big Meadows ducks by the millions are reported.

* * *

In the San Pablo and Suisun bay waters "cans" and bluebills have been seen for the past fortnight in big flocks. Along the Redwood City shores of lower San Francisco bay, "cans" and "blueys" have been bagged for a week past. The early appearance this year of the deep water ducks is phenomenal.

* * *

"Home bred ducks are getting scarce in the shooting preserves," say the sportsmen who came in Sunday last from the Butte slough clubs, and they do not expect any more extra good shooting until cold weather and storms drive the Alaska birds down from Oregon and Washington. "A little rain will not be sufficient," they assert. "It must be cold weather, or cold weather and plenty of shooting in the north." Not many of the northern ducks are said to have arrived in that locality, and with the continuance of the mild fall weather they need not be expected.

With ducks it is different than with geese. The geese come south in the fall before the arrival of extreme cold because their green feed in the northern marshes has shortened and because the grain stubble fields of the State beckon to them. They now are busied throughout the grain sections in gathering up the scattered barley left by the harvesters, as examination of the geese killed this fall clearly proves.

In another respect also the geese differ from the ducks; they do not seem to care for rice. So far as the State Fish and Game Commission has been able to learn from dissection of birds none have been found with rice in their craws. And contrary to current belief, the ducks do not seem to be such voracious eaters of rice as was supposed. So far as the examination of the dead birds discloses, but three varieties are eaters of rice, the mallard, the sprig and the teal. Of these the mallard is most addicted to the rice habit.

* * *

For the unattached hunter the tip is here given that ducks are fairly plentiful in Tomales and Bolinas bays. Around Bolinas bay sprig and mallard are more plentiful than for years past.

* * *

Quail hunters who have been out in the Coast foothills from Russian river down to Santa Cruz county find that many bevies are made up of half-grown birds with the old ones. The rains last summer up till June set back the breeding season. Reports from the Zyante creek section in Santa Cruz state that quail and cottontail rabbits are most numerous .

In the foothills east of Newman quail are very plentiful, limit bags have been shot by many hunters during the past fortnight.

Small Boy, Big Deer.—Rocklin claims the youngest hunter known to have killed a deer single-handed this season, in the person of George McGrath, seven years of age. The buck killed by the young nimrod weighed over 200 pounds.

George was hunting with Hulta L. McGrath and Alfred Willard, who were scouting on the hill near Rattlesnake bar for game when the dogs started a large buck which crossed the path of the boy who, armed with a single barrel shotgun loaded with buckshot, fired, bringing down the deer. The other hunters ran to his assistance, which George did not need as he had dispatched the wounded buck with a load of birdshot fired at close range.

California Lion Bounties.—Mountain lions are more plentiful in California than most people believe, judging by the amount of a claim approved by the State Board of Control for the State Fish and Game Commission, for bounties on these animals. The claim was for $380, representing 19 lions killed. The bounty on mountain lions is $20.

The lion claims came from the following counties: Ventura 4, Lake 2, Santa Barbara 2, Calaveras 2, San Diego, San Luis Obispo, Monterey, Humboldt, Kern, Stanislaus, Mendocino, Tulare and Canta Clara, 1 each.

Buck Crop Large.—More than 12,000 deer were killed in California during the present year, the State Fish and Game Commission reports in a recent bulletin. Had it been possible to sell the deer on the market the number killed would have brought the hunters $300,000—$25 apiece. It cost more than that to get the bucks.

IMPORTANT NOTICE.

On and after January 1, 1916, no American-bred dog will be eligible to registration unless its parents (both sire and dam) have been previously registered. Owners of stud dogs and brood bitches are afforded the balance of the year to December 31, 1915, to register their breeding stock.

FIXTURES.

Registered Tournaments—Pacific States and Territories:

November 2—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

November 15, 16, 17—The Arizona State Tournament, scheduled for Tucson, Ariz., November 5, 6, 7, has been transferred to Phoenix, Ariz., under the auspices of the Phoenix Gun Club, and the dates changed to November 15, 16, 17. Sunday, November 14, practice day.

SCOTT McCOY IS DEAD.

Scott McCoy, one of the best-known and ablest of western trainers and race drivers of former days, died at Marion, Ia., on Sunday, Oct. 10, the immediate cause being a stroke of apoplexy. He had been virtually retired from the sulky for several seasons past on account of shattered health, the result of his being struck by a bolt of lightning four years ago while working out a horse at the Columbus, Ohio, Driving Park. The occurrence was a strange one, as the bolt fell from an almost clear sky and hurled him from the sulky, he being found unconscious on the track, and being carried to a hospital, where he was a long while rallying, his death even being reported. At length he slowly got around again and even resumed his duties, but was so weakened and enfeebled that he was obliged to give up and practically retire. He had been for a number of years previous to this time in the employ of Littleton Farm, Washington, Pa., the property of W. H. Davis, and had a stable of horses from that establishment quartered at Columbus when the accident befell him. After retiring from activity he made his home at Marion.

The reports of his death that have reached us fail to state his age or the place of his birth, but it is our impression that he could not have been much above sixty years of age. He rose to fame as a reinsman in the west, and his first pupil of great prominence was that very fast, but somewhat erratic mare, Belle Archer 2:12¾. His skill in making a useful racing tool out of her in the early 'nineties attracted much attention to him, as she had been considered, while of extreme speed, of little account as a money-earner. This led also to his being in great demand as a trainer, or even a "catch" driver with horses difficult to control, and for a number of seasons he was seen behind many of that description, from Ryland T. 2:07¾, down. In the later 'nineties he was employed by W. A. Paxton Jr. as head trainer at his Keystone Farm, near Omaha, Neb., where he attained great success with the colts placed in his charge, winning the two-year-old Kentucky futurity of 1898 with The Merchant, son of The Conqueror 2:12¼, while in 1900 he made a memorable campaign with Contralto 2:10, by the same sire, going through the season unbeaten, and at its close being sold at a large price for export.

Scott's next important engagement was with C. K. G. Billings, whose large matinee stable he took charge of while Mr. Billings was most active as an amateur reinsman, keeping his string at Cleveland, O. He remained with Mr. Billings for several seasons, and then entered the employ of F. G. Jones of Memphis, whose horses he trained until the connection formed by Mr. Jones with E. F. Geers, which still endures. Not long after McCoy went to Littleton Farm, which was his last notable engagement. He also at various times trained a public stable, and the number of famous trotters and pacers that he prepared and drove during his long career was very large.

For pure skill as a trainer Scott McCoy has had few equals and still fewer superiors. He was a master at gaiting and balancing colts and developing their speed, while with aged horses he was equally adept. His patience was infinite, and this it was that helped him much in the many successes he won with horses that other trainers had given up in despair. There seemed to be something magnetic in his touch that soothed and gained the confidence of erratic and irritable speed marvels, and they would race steadily for him when for everyone else they would do nothing but misbehave. He was also a first-class conditioner, and, in his prime, a skilful and even brilliant race driver, with remarkable judgment of pace and resourcefulness in emergencies. He was a brother-in-law of the noted Iowa trainers, the Allen Bros., of Marion, which led to his settlement in that town after retiring from active work, and he continued to the last to take pleasure in sitting behind a promising horse in a work-out, or even in a race. His last ride in public was at the Omaha, Neb., meeting, as late as Sept. 24 last, where, in the 2:08 pace, he drove Kenney Win, one of the Allen Bros.' horses, to fourth money.

The funeral took place on Wednesday, Oct. 13, burial being at Marion. To Mrs. McCoy, who survives her husband, and who was, throughout his career, of great assistance to Scott, being his "helpmate" in the full sense of the term, the sympathies of the members of the Review staff not alone will be extended, but those of a host of friends and acquaintances in all parts of the trotting world.—Horse Review.

SYSTEM IN HORSE BREEDING.

During the past 40 years many millions of dollars have been spent in importing draft horses for breeding purposes, primarily to improve our native stock. That results have not been proportionate to the outlay is seen in the fact that there is hardly a county in the United States where a uniform class of good draft horses can be found. The reasons for this condition are that at the time the big trade began in the '60's, and for several years thereafter, no restrictions were imposed by the United States Government except that the importer must declare that the animals were for breeding purposes. No socities existed for registering; as a consequence many hundreds of stallions, imported annually, were not only of mongrel or mixed blood but carried transmissible diseases and blemishes. This trade flourished to such an extent that it became a common saying among dealers in Europe, when a stallion became unsound, "Put him to one side; fatten him up; he will make a good American."

Comparatively few of the farmers who purchased stallions have ever had much if any experience in buying or breeding, so that naturally any animal a little better than they had been used to looked good to them. Having no fixed standard or type in mind before setting out to buy, the longer they looked the more confused they were, and often "Went all through the woods and chose a crooked stick at last."

These mistakes were not confined to buyers at home, but to importers fresh at the business. In England, especially, the average horses are so much better than in the United States that they all looked good, and suckers were easily taken in, myself among the rest, for, having grown up among what were considered good horses, I went on my first trip to England with as "big" a head as any one else. I paid well for my conceit in my first purchase. For several years afterward I seldom risked my own judgment but took an expert along to protect me.

Too many importers go abroad with the price they will pay as the biggest item in their minds, and are easy victims, for stallions can not travel in England nor win prizes unless a certificate of soundness by a licensed veterinarian is secured; consequently unsound stallions have no market at home, and unscrupulous or inexperienced importers picked them up at nominal prices, and found ready sale at large profits among inexperienced breeders at home.

The government restrictions that are now in force, together with some of the state regulations, will in a measure check this. Allowing weight to be the first consideration has made a market for hundreds of stallions annually, with sidebones, short wind, defective eyes, and other transmissible blemishes and diseases. I can show by my sale books of the last 40 years a much larger percentage of Shire stallions around 1,750 to 1,800 pounds that have been successful breeders than those around 2,000 pounds, because the former are often more perfect in proportions and breed more evenly. Haphazard breeding has been another detrimental custom. The farmer too often fixes on a certain stallion without considering his fitness to mate with his mares, oftentimes breeding the same mare one year to a draft stallion and the next year to a trotter, expecting good results in each case. If he fails he faults the stallion. If community breeding can be arranged in America, as it is in many places in England, it will bring good results. There, farmers of a district appoint a committee to select a stallion suitable for their use, and hire him, with a groom, for the season. If he proves a good breeder, they secure him for several seasons, paying a lump sum for the service. Another plan is to induce a well-known breeder to travel his stallion in their district at a fixed fee. As a result, go into any county in England and one will find a uniform style in the horses, whether Hackneys, coachers, or drafters. The same can be accomplished in America, if a systematic course of breeding is fixed on and followed for a series of years.

If instead of forming large companies by questionable means, as has been done of late years in America, two, three, or at most, four, farmers will join, agree on a class that they will breed, and select a stallion for their own purpose primarily, they can always secure all the outside patronage they wish. A good young stallion will earn his price and cost of keep in three seasons, and then sell for enough to replace him with another of the same class, and so in a few years make the neighborhood noted for a uniform class of good horses that buyers will seek. This method divides the cost and risk and insures a profitable return on a small outlay for each.

Mating ton stallions with small mares results in a large percentage of failures; the progeny are almost sure to be out of proportion in many points, mainly having too much top for legs to carry and remain sound. It is far better "to make haste slowly." Follow the example of scientific English breeders who have achieved world-wide fame, building up their various breeds by a patient, persistent course.—Breeders' Gazette.

CHILDS BROTHERS AT OMAHA.

Frank Childs departed Friday for Omaha, Neb., where he and his brother Marvin will train next year a semi-public stable, in which Edward Peterson and Thomas Dennison, both of Omaha, will be the principal owners. Marvin Childs left the Columbus, O., meeting, going to a meeting in Iowa, where he purchased the Illinois pacer Ben Earl 2:12¼, by The Earl 2:11½, sire of the Grand Circuit war-horse, Earl Jr. 2:01½. Ben Earl was unbeaten this year at last reports, and is credited with the same hardy makeup that has carried Earl Jr. through eight campaigns. He has been inspected by a number of scouts for big ring goods, and all praise his appearance and manners.

Frank Childs bought of F. G. Jones the brown horse Hal Connor p. 2:11¼, for Mr. Dennison, and shipped him with a western-bound car to Omaha. Hal was rated the best green pacer seen in recent years at Memphis, Tenn., last spring, but developed a tendency to jump at the wrong time, and as Mr. Geers is an anti-hobblist, Hal was never in danger of having to "wear them." While not addicted to the hobble methods, Childs will no doubt have him locked on his stride next summer, when the time arrives for action.—Horse Review.

FRANK ERWIN GOES TO SALT LAKE.

F. C. Erwin, the well known harness horse trainer and driver, who has spent the past year or more at Boise, Ida., and who usually has a string of his own, is going to Salt Lake, Utah, where he has been offered and has accepted the superintendence of the track at the state fair grounds. It has a big pavilion in which it is agreed horses may be cooled out. This, Mr. Erwin believes to be the best halfmile track in the entire Northwest with all modern conveniences for horses and men, and there is good racing there every year.

Mr. Erwin will take several good horses from Western Idaho and has quite a number promised from about Salt Lake. It is the first time in fifteen years that Mr. Erwin had a purely public stable. But he has now sold every horse he has and for about a year has been dealing in horses for the armies of European governments. He will now train and race for all who may desire.

It was Frank Erwin who trained College Maid, the wonderful guideless pacer. He showed her at many of the fairs in the Pacific Northwest and it was he who gave her her record of 2:06½ guideless. He trained and raced Oronteo first at twelve years of age and won numerous races with him, taking a record of 2:16¼. He broke and trained Johnny K. 2:16¼ on a halfmile track. Johnny K. was raced six years and was outside the money just twice. Frank also developed most of the sons and daughters of the great horse, Bob Fitzsimmons 2:07¼, that have taken low marks in the Northwest. He recognized Bob as a sire and used and bred him. Jenny Fitzsimmons this year has taken a mark of 2:15¼ and has worked a mile in 2:07. Mack Fitzsimmons 2:08¼ is a horse Erwin brought to his high speed. He sold Yedno, a daughter of Bob Fitzsimmons at five years old. She took a mark at Toronto, Can., this year of 2:02½ in the third heat of a race. Her dam, Golden Silence, is by Gold and her dam Truth by Ben Lomond Jr.

Mr. Erwin will train two or three Fitzsimmons colts at Salt Lake. His prospects seem bright for doing a good business and making some new records and both fair association and Mr. Erwin have the Rural Spirit's best wishes.—Rural Spirit.

TRACEABLE TO FOOT AND MOUTH DISEASE.

There will be a complete abandonment of the International Live Stock Exhibition for 1915. Owing to the unfortunate recrudescence of foot-and-mouth there is a very general feeling that it is inexpedient at this time to undertake any sort of an exhibition in Chicago which would attract crowds of people from nearby agricultural districts, as well as from a distance. The directors have been circularized upon this subject, and an overwhelming majority are in favor of abandonment.

While this is most unfortunate, The Gazette is frank to say that it believes that such a course is fully warranted by the existing situation. The experience of the country with foot-and-mouth has been so costly, and of such long duration, that all necessary sacrifices must be made in order to put an end to an intolerable situation in respect of live stock traffic. There seems no other course open but to put hands up, and declare everything off until the clean-up is complete. All of which simply means that when the International comes back, as it surely will in 1916, the event will undoubtedly be celebrated by the opening of the doors upon the grandest aggregation of tip-top specimens of the leading breeds the world has ever seen. Now is the time to begin to prepare for it.

In the meantime The Gazette suggests that it might serve an exceedingly useful purpose if the management would arrange for an early spring stallion show. The quarantines should all be off by that time and such an exhibition would serve an eminently useful purpose.

* * *

Late advices from South America tell of the recent death of the famous Shorthorn bull Americus from enteritis attributed directly to an attack of foot-and-mouth through which the victim had just passed. In fact, the Montevideo Standard of Sept. 4 speaks of the great loss as directly due to this plague. Americus was champion at Palermo in 1913. He was bred by one of Argentina's greatest cattle-growers, Senor Leonardo Pereira, and was sold to Senor Ginocchio for $80,000 Argentine, which at this writing would be the equivalent of about $33,000 American gold. We do not know what the exchange value was at the date the transaction was made, but in any case the loss is a heavy one.

The incident is brought to the notice of those who persist in the assertion that no evil effects follow acute foot-and-mouth. A lot of breeders in other countries know to their sorrow that sometimes such is the case. We can only reiterate our previous statements upon this point—the disease may or may not be followed by disastrous consequences. If a $30,000 Shorthorn succumbs to its after-effects, there would seem to be no reason why a $30,000 or a $10,000 or a $1,000 or a $100 dairy-bred animal might not be similarly attacked. Is it possible that there is any superior immunity from after-effects enjoyed by the milking types? Everybody knows what it did to the Warlaby Shorthorns. Now comes this shining mark—Americus. It is certainly an important as well as a curious fact if this disease is a pronounced respecter of types. —Breeder's Gazette.

THE FARM

SQUAB RAISING.

The raising of squabs both as a regular business and as a side line on farms has become so general that the department, to meet the needs of practical advice on this subject, has assigned one of its poultry specialists to a study of this subject, and also has obtained accurate data as to methods from 22 large breeders and from a large number of those who keep less than 300 pigeons. The questions to which practical replies were received covered all phases of the subject, from breeds that produce the best squabs to the housing, feeding, and general care of the pigeons. The results of investigations and the information supplied by breeders are published in Farmers' Bulletin No. 684, Squab Raising. The bulletin on its first page, however, contains a strong caution which in substance is that while an annual profit of $1.50 for a pair of breeders is considered good, success in raising squabs calls for special experience, business ability, and a good steady market. It points out that many successful pigeon farms make a business of selling breeding stock and are not primarily interested in producing squabs for market. To quote the author, "there have been many failures on squab plants, as the profits in this business have frequently been greatly overestimated and the care of the stock regarded as something very easy in which anyone could succeed."

"Many people," the writer continues, "can keep pigeons successfully as a side issue, although this requires constant oversight and careful attention to details. The greatest difficulties confronting the successful raiser of pigeons seem to be in securing good breeding stock and finding a good market for the produce of a small flock. Pigeons are a profitable source of income on general farms where they may secure much of their feed from the fields, provided they are not a nuisance and the loss by shooting and by hawks, owls, and cats is not large. They can also be raised successfully on farms where they are closely confined, provided the squabs can be marketed to good advantage."

Then it is pointed out that prolific pigeons producing large squabs are commonly kept confined in pens, which involves proper housing and a flyaway, or outside yard, covered with wire. Common pigeons, allowed their liberty, are less prolific and produce smaller squabs. A study of New York squab quotations shows that the price per dozen for dressed squabs falls rapidly as the weight goes down and the color departs from white. While Prime White weighing 10 pounds to the dozen brought $3.75 per dozen in March, 1915, in New York, 6-pound squabs were not quoted above $2 per dozen, while $1.50 was the high price per dozen for dark squabs, and culls brought only 5 or 6 cents apiece. Squabs weighing 8 pounds to the dozen, a fair average weight from good plants, bring various prices abous as follows throughout the year, according to the wholesale quotations in New York: February, $4; March and April $3.25; May and June $2.75; August, $2.50; December, $3.50. A summary of reports from 22 large-scale squab farms showed an average weight of 9 pounds to the dozen and an average price of $3.43 for the year. It must be remembered, however, that the squabs were produced definitely to meet the exact demands of the market, were dressed exactly according to the local requirements, and delivered to the wholesaler in prime condition. It is evident, while these figures are not offered as indicating the prices that the small-scale or new squab raiser can secure, they do establish that care in selecting breeds to produce large-sized squabs is a prime requisite.

Of the squab-raising varieties the Homer is considered the most popular variety. The habit of this bird of returning home if allowed freedom makes it necessary to confine pigeons purchased from other lots. The Carneaux pigeon has recently become popular as a squab producer. This variety is somewhat larger than the Homer and it is stated is about as prolific. Several other varieties of pigeons larger than the Homer are used on a small scale in squad raising, especially in crossing with the Homer and Carneaux to increase the size of squabs. The Runt is one of the largest, but is not as prolific or as good a breedr or feeder as the Homer.

Some of the other varieties reported used as squab breeders are the Dragoon, White Maltese or hen pigeon, the White King, and the common pigeon.

A good mixed feed may be made of staple grains, using equal parts, by weight, of cracked corn, hard red wheat, kafir corn, and Canada peas, with a small quantity (10 per cent) of hemp and millet seed added during the molting period. Other grains which may be substituted for or added to these are peanuts, oats or hulled oats, buckwheat, Egyptian corn, barley, cowpeas, and milo maize, while a small quantity of stale bread, rice, rape, millet, canary, vetch, and sunflower seed may be fed for variety. Canada peas are expensive, but seem to be essential to the best results, especially during the breeding season, and apparently take the place of green fed to some extent. Peanuts are being used to some extent in place of Canada peas. Green fed such as cut clover, alfalfa and grass, lettuce, and plaintain leaves may be fed to advantage, but is not absolutely essential.

A variety of good, hard grains is essential to success, and grains which are in poor condition should not be fed. Old grains which are hard are better than new soft grains, especially for pigeons with squabs. Red wheat is considered better than white wheat by many pigeon breeders. Good wheat screenings are often fed with success, as they usually contain a variety of seeds. Various stimulating seeds, such as lentils and vetch, are sometimes fed as a tonic to breeding birds during the molting period.

The grain may be fed on the floor of the pen, in troughs, or kept before the birds in hoppers. It is not generally considered advisable to feed the grain on the ground, especially on heavy soil where it may get wet and moldy. Unless the floor is kept clean it is better to feed the grain in troughs than on the floor. The troughs should be made so that the pigeons will not roost on them and soil the feed with their droppings. Hoppers are used with good success, but may attract rats in some pigeon houses. They should bt fitted with wires or nails about 2 inches apart so that the pigeons can not waste the feed by throwing it onto the floor. If the grain is not fed in hoppers the pigeons should be fed twice daily, in the morning and in the afternoon, at regular hours, giving from 1½ to 2 quarts of grain at each meal to 20 pairs of pigeons and adding an extra pint if the pigeons have may squabs. The feeder must regulate the quantity of grain according to the appetite of the birds, giving them all they will clean up in one to two hours.

The cost of feeding a pair of pigeons varies from $1 to $1.50 a year at the present price of grains (1914). Reports from a number of pigeon farms give an average cost of $1.32.

Clear drinking water, grit, broken oyster shell, and charcoal should be kept before the pigeons all the time. Salt is fed to pigeons in various forms and a supply of this material is generally considered essential. Pigeons not accustomed to eating fine salt are apt to eat too much if given a large quantity at one time, although fine salt is used with good success by many careful feeders. Salt may be fed in a lump form, such as rock salt or as fine salt moistened and baked into a hard lump, without danger of the pigeons eating too much. Salt may also be fed mixed with grit, charcoal, and oyster shell.

Pans of water should be provided daily except during the winter and placed in the yards or flyways. These bath pans are usually filled in the morning and emptied about noon. They should be used only about twice a week during the winter, but should then be kept on the floor of the house.

As squabs are reared and fed by both of the parent birds on a thick, creamy mixture called pigeon milk, produced in the crop of the pigeons, It is essential that pigeons rearing squabs should have a plentiful supply of grain to insure rapid growth of the young. Pigeons usually feed the squabs shortly after they themselves are fed and should not be disturbed at that time, thus making it advisable to water them before they are fed. Care should always be taken not to frighten or disturb pigeons or squabs any more than is absolutely necessary.

Information in detail concerning squab raising is given in the bulletin, which may be had upon application to the Editor and Chief, Division of Publications.

The nervous system of every good cow is high-strung, and any extraordinary happening interferes with milk secretion. For this reason kindness is essential. This includes a warm, well-ventilated stable, an occasional grooming and constant friendship. The disposition of each animal can well be studied. Some cows are phlegmatic and others are wild when new to their surroundings, but now cow can stand abuse and at the same time make money for her owner. They do their most satisfactory work where they receive good treatment, are well housed and have their wants carefully attended to. A dairy farmer may have just an ordinary wooden barn and plain cows, and yet get a good price for his milk. He should make his business a calling with a purpose, and that purpose should be the filling of orders for the most delicious of all human food.—Rural World.

As a race we have never had enough fruit. We have lived too much on meat and white flower. Any doctor will tell you that there are a hundred diseases that would absolutely disappear if we would adopt a fruit diet, say for one meal a day.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Harpers Weekly and The Breeder and Sportsman
$5.50 worth for $3.25

Breeder and Sportsman
One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly
Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3 Now and Get Them Both

THIS OFFER is made to all who will send us $3 before December 1st, 1915, whether for extension of subscription, renewal of subscription or a new subscription. Address:

—THE WORLD'S RECORD!!!

Mr. Lester German, shooting at the Westy Hogan tournament at Atlantic City, September 15 to 17, scored

647 OUT OF 650 TARGETS

shooting his PARKER GUN, which is the greatest score ever made at a Registered Tournament.

At Portland, Oregon, Mr. Peter H. O'Brien scored 241 targets straight, making

PACIFIC COAST RECORD

with his Parker gun.

At San Diego Mr. Henry Pfirrmann won the Pacific Coast Handicap, with Mr. J. Foster Couts second.

At San Francisco, in the California-Nevada State Tournament, Mr. Pfirrmann won high average and Mr. Couts won the Championship of California — all of which was done with

PARKER GUNS

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

HOUGHTON MARION, O.

BARGAINS

Our annual invoice shows that we have on hand the following second hand sulkies and carts:

	Houghton make	Other makes	Described in price list
Sulkies	4	5	201
Winter Training Carts	1	6	202
Jogging Carts	12	11	203

These sulkies and carts have been taken in trade in selling new Houghton jobs and have been rebuilt by the same workmen that have made the Houghton name famous. We are anxious to dispose of them before the first of the year so we have just gotten out new price lists with prices cut to move the goods quickly.

White for price list today. Specify 201, 202, or 203, as the case may be. A postal will do. Do it now.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv., so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, San Francisco, Cal.

WEDNESDAY, NOVEMBER 10

HAS BEEN DETERMINED AS THE DATE OF

De RYDER'S FALL SALE

AT THE RIDING AND DRIVING SCHOOL, SAN FRANCISCO

(NUMBER 5 CAR TO SEVENTH AVENUE)

Sale starts at 7:00 p. m. and contains the following horses:

From C. L. DeRYDER, Agent:

El Volante S., b h, (5) by El Volante (3) 2:13¼, dam Seville by Strathway; 2nd dam by Simmons; 3rd dam by Baron Wilkes; 4th dam by Mambrino Patchen. One of the handsomest horses in California and with limited training as a three-year-old showed a mile better than 2:20. Stright and sound every way and a pick-up for any one wanting a fine, well-bred young stallion.

Bay Filly, (2), trotter, by Zombro 2:11; dam Katherine A. by Diablo 2:09¼. With a very limited training as a two-year-old showed a quarter in 36 seconds. Has never been trained since and is sound and straight every way. Full sister to Zomerine S. (3), trial 2:16.

Two-year-old filly by The Bondsman, dam Rosemary 2:25 by Raymon 2:27¼; nicely broken as a yearling, since when she has been on pasture.

Blanca S. (5) by Red McK. 43766, dam Katherine A. by Diablo 2:09¼; a show mare, never trained for speed.

Katherine A., brood mare by Diablo 2:09¼, dam by A. W. Richmond.

Rosemary 2:25, brood mare, by Raymon 2:27¼, dam Black Bess by Guide 2:16¼.

Dr. Dawson, bay gelding, pacer, trial 2:11¼, by Del Coronado 2:09½; never raced, but has the speed to win; one to buy to race next year; level headed and free legged.

Black mare, five-year-old, by Oh So 2:25½, and two of her produce, an unbroken two-year-old by Directly 2:03¼ and a weanling by Vernon McKinney 2:01½. Right all around.

Crabtree's Gift, broodmare, by Hedgewood Boy 2:01, dam Trusty Maud 2:24¼ by Beaumont, grandam Flo M. by Keeler 3465.

Prince Del Monte, ch g, trotter, foaled 1906 (tr. 2:15½), by Kinney Lou 2:07¾. Prince Del Monte is a full brother to Della Lou 2:15¾. He is handsome enough for a show horse and gentle enough for a lady to ride or drive. Sound in every respect and is sold to settle an account.

Leola Lou, gr m, trotter, by Kinney Lou 2:07¾; dam Princess Leola by Lionel K., son of Bay Rose 2:20½; 2nd dam Lady Menlo by Menlo 13028 by Nutwood 600. She is a fine, large road mare, gentle for a lady to drive and has been used exclusively by Mrs. MacKenzie. She is sold for no fault.

Asa Pointer, bay gelding, by Star Pointer 1:59¼, dam Eva H. by Washington McKinney 2:17½. This is a very fast son of the old original two-minute pacing king and has shown himself to be possessed of a great flight of speed, as he has a public work to his credit of 2:06¼.

Bay horse, by Copa de Oro 2:01, one of the best present day sires of speed in California.

Bay filly, yearling, by Graham Bellini (3) 2:11¼.

Filagree (registered broodmare), by Beau B.

From BUDD DAVIS, Caldwell, Idaho:

McGregor Bond, 60149, b g by The Bondsman; dam Gregan by Steinway 2:25¾; 2nd dam Maggie McGregor by Robert McGregor 2:17½, etc. He is a nice, fine looking two-year-old, just nicely broken but has never been trained. A better bred or finer looking colt does not live, and with just a little training will show enough to make him worth while.

Brown Filly (2), trotter, by The Bondsman, dam Ava J. 2:28 by Zombro 2:11; 2nd dam Ventura by Secretary. She is a little beauty and is sure to make a trotter. She is by The Bondsman and her dam is by Zombro 2:11, McKinney's best son.

From E. A. SWABY, Dixon:

Roan mare (6) by San Francisco 2:07¾, dam Birdie (dam of Bodaker 2:13) by Jay Bird 5060; grandam Lady Lyle by Geo. Wilkes 2:22. Bred right, handsome, 16 hands, 1100 lbs., a trotter, sound, gentle for road use and broken to ride. You will like her.

From T. D. SEXTON, Oakland:

Lucretia Bond (3), br f by The Bondsman, dam Lucretia 2:13¼ by Nazote 33527 (full brother to Azote 2:04½), grandam Lucyneer by Electioneer 125. Here is a nice filly for someone, a little beauty and making speed every day. It is safe to say that she will show better than a twelve gait by the day of sale. Don't overlook her.

From MRS. C. L. JONES, Modesto:

Johnny, a standard bred gelding, has worked in 2:20 pacing, but is now a full fledged saddle horse. He goes that old Kentucky single foot as oily as can be, and will soon show all five gaits. A nice young pleasure horse, one you will enjoy owning.

From H. S. HOGOBOOM, Woodland:

Palo King (2) 2:28½ by Marengo King, dam Palo Belle 2:24½ by Palo Alto 2:08¾. A well bred stallion of proven worth, the only one standing for service in California at present who is the sire of a three-year-old with a race record of 2:09.

Beautiful Bird, bay mare, by Nutwood Wilkes 2:16½, dam Expressive (3) 2:12½ by Electioneer 125, grandam Esther by Express. The recent performances of Mary Putney have made these blood lines familiar. This mare should be more sought after than any other matron in this sale as she is a beautiful individual, a regular breeder, and has already produced three standard trotters. Like all of the Hogoboom consignment, she is sold purely and simply because her owner must have the money.

Beautiful Morn 2:25, bay mare by Iran Alto 2:12¼, dam Beautiful Bird.

Beautiful Girl 2:29¾, bay mare, by Iran Alto, dam Beautiful Bird.

Woodland King (3), bay colt by Palo King, dam Beautiful Bird. This youngster has shown that he is better than a standard trotter and is a nice individual.

Little Express (2) **2:20,** bay filly by Alto Express, dam Diawalda, a double producing daughter of Diablo 2:09¼. You all know this filly as she won the two-year-old pacing division of the Breeders Futurity Stake last year.

Marlin, bay gelding, by Dialect, son of Diablo 2:09¼. This is a big, stout pacing gelding belonging to the estate of the late Dr. Randolph and is a fast horse as Mr. Hogoboom has driven him in August of this year a mile in 2:08¼ without hopples.

High Head (2), by Palo King.

Sun Up (3), by Palo King.

From F. E. EMLAY, Marysville:

Washington McKinney Jr. 49593 by Washington McKinney 2:17½, dam Hazel Turk by Silas Skinner 2:17, grandam Miss Brown by Volunteer 2:27, etc. Washington McKinney Jr. is a good sized, good gaited trotter and has worked the Marysville track in 2:12¼ well within himself. He was prevented from filling his recent engagements by sickness and has now rounded to in excellent shape.

From C. W. BOWERS, Davis:

College Boy II. by The Magnet. Elmo Montgomery worked this colt 90 days and says that he can count on one hand the horses that have done what this colt did in the same length of time. He has worked in 2:16 and Elmo regards him very highly.

From HENRY B. SMITH, Pleasanton:

Della H. 2:10 by Hal B. 2:04½ (sire of Hay Boy 2:01¼ and many others), dam Jessie M. trial 2:22 by Del Norte 2:08. Della H. is a full sister to Hal J. 2:09¼ and is too well and favorably known to need comment here. Only two years ago she was unbeatable through the California circuit and she is still just as good. Only the lack of local classes for her puts her on the market.

Lottie D., bay filly (4) by Charlie D. 2:06¼, dam by Nutwood Wilkes, grandam Cricket 2:10. This is a nice filly and bred right to go on with.

Alton S. 2:15, chestnut gelding by Alton. This is a good mannered race horse and is much faster than his record as he has worked the Pleasanton track in 2:09.

From F. GOMMET, San Francisco:

Prince McKinney 2:29¼ by McKinney 2:11¼, dam Zorilla by Dexter Prince, grandam Lilly Thorne by Electioneer 125. Prince McKinney was a good two-year-old trotter and is a proven sire of speed.

Baby Gommet, (4) bay mare by Prince McKinney, dam Arawanna B. (dam of Sweet Princess 2:13¼) by Sidney Dillon. This is a nice mare with a lot of developed speed as she has worked for Al Schwartz in 2:10, with a quarter in 30 seconds.

From WM. STUART, Eureka:

Irving Pointer (8) by Star Pointer 1:59¼. This is a good, big stout, sound horse, gentle, stands 16 hands, weighs 1250 pounds and should make someone a good stock horse.

Philip Pointer (3) by Irving Pointer. This youngster has been a quarter in 33 seconds and is worth training.

From AL SCHWARTZ, San Francisco:

Ray Alto, chestnut horse, by Iran Alto 2:12¼, with a trotting trial of 2:18, and **May Alto,** with a two-year-old trial of 2:26, also by by Iran Alto 2:12¼. These are put on the market because Mr. Schwartz has too many horses. The horse is a handsome one, broken to ride, and the mare is on pasture.

From JERRY DORAN, Oakland:

Bay gelding, two-year-old, by The Bondsman; good conformation and bred to make speed early. Will be broken to harness before sale day.

SOME PURELY PERSONAL OPINIONS.

The writer, who much prefers to praise than to criticise, has derived a considerable amount of satisfaction from the fact that horse racing in California and the Pacific Northwest, especially during the present season, has been remarkably free of suspicious driving or conduct of any improper sort necessitating action by the judges. The spring meeting at the exposition passed off without a cloud of any kind, and the fall meeting progressed famously in this respect until Thursday, when circumstances compelled the judges to penalize one driver, while another showed "symptoms" which fortunately failed to develop to a point where a diagnosis and operation would have been imperative. It is the more regrettable, owing to the fact that both gentlemen in question should have at heart the best interests of the harness horse and do everything in their power to keep racing absolutely clean rather than to cast suspicion upon it. They are, moreover, a couple for whom the writer entertains a high personal regard, making any comment upon their conduct all the more unpleasant to him.

In the 2:17 trot, C. A. Spencer, driving The Proof, was beaten by Al Schwartz with Matawan in the ridiculously slow time of 2:20, Mr. Spencer making no effort to win the heat of a nature apparent either to the judges or the spectators. The horse had shown his ability on Monday to trot much faster, and even with a full understanding of all conditions surrounding the race, some of which were a bit unusual but in no way contrary to propriety, I have not yet been able to decide to my own personal satisfaction why in the name of Death Valley and other equally famous hot places Spencer drove as he did. The theory advanced in some quarters that Matawan might have been "meant" and played on a few handbooks I cannot give credence, being ridiculous on the very surface. Taking things "by and large," however, the kindest thing that can be said is that Mr. Spencer, duly credited with every honest intention, drove not merely like a wooden man but like one who had been the subject of a visitation of a "stroke" of some sort, the result of which was complete and instantaneous ossification — from the neck up. That he got off with a fine of $100 is, to my way of regarding these things, a stroke of good fortune for him.

The other "incipient case" was that of Mr. Sexton, with Future Tramp. After winning the second heat in 2:08¼, Friend Tim displayed a rather coy and blushing disinclination to be among those present in fast company. After driving a few furlongs, however, he apparently underwent a change of heart and set sail with the little trotter and assumed his proper position as a contender in the race. In the stretch he was well up when a break by both Esperanza and Future Tramp, the former swerving directly in front of Sexton's mount, left Maymack the undisputed winner. I have no fault to find with Mr. Sexton's intentions after the first three-eighths of the last heat, but if he was really "gunning" for the race when the last heat started, and if he goes gunning for scalps in the same way, I will stake him to a tried and trusty "weepon" and give him the first two shots when he starts after mine.

These things are not pleasant to mention, but they should not have been allowed to happen in the first place. I do not believe either driver will again be an offender, and this mention of these particular instances may serve as a restraint upon others who might get a bit locoed in their ideas of how to drive in public races. The welfare of harness horse racing demands that it be clean, and I hope I may never again be called upon to express myself in criticism of my friends, whom I value, or of my few enemies, on whom I would be no more severe.

This is not an editorial opinion of the Breeder and Sportsman, but a purely personal view of the news editor.

W. M. NEAL.

[Please note—The fighting editor is on a vacation.]

HORSES FOR CHICAGO SALE.

Owing to the scarcity of racing and breeding operations on this coast at present, very many people incline to the belief that the east affords a much better market for their surplus than does the home country, and are preparing to send a number of horses to the Chicago Sale, December 13 to 18, in charge of the well known Los Angeles horseman R. A. ("Bob") Smith. Mr. Smith, whose home address is 1216 Dewey avenue, Los Angeles, is at present attending the exposition race meeting, and believes that by shipping time he will have assembled a band of California trotters and pacers for which the patrons of the Chicago sale will pay excellent prices, as he is already assured of a goodly number of the proper sort. The consignments made in his care will be assembled at San Francisco and Los Angeles and personally conducted to the sale ring, no advance money being required for transportation expenses. Times in the east are improving rapidly, according to the reports from that section, and persons wishing to send horses to the Chicago market should get in touch with Mr. Smith at once.

SAN JOSE TRACK TO LEASE.

The San Jose Driving Park, whose destiny for the last several months has been rather uncertain, has now passed back into the hands of its owners, who are not horsemen or race promoters but who wish to preserve the property as it stands, believing that harness horse racing is eventually due to rise on a wave of popularity that will make the plant a most desirable and profitable one. To this end, they desire to lease it for a term of years to some practical and popular horseman who will maintain it as a training ground and be "in line" with horsemen in general.

The San Jose track needs no introduction to local trainers, as it is accepted as one of the best and safest of courses, both for training and racing. There are ample stabling accommodations, the quarters being in a fair state of repair, and the infield and the tract of several acres adjoining the residence furnish quite a bit of pasture, a good portion of the land available for agricultural purposes having a fair stand of alfalfa. A good proposition will be offered the right man, and any wideawake hustler interested in the same may obtain all particulars from S. C. Campbell, 910 South Third Street, San Jose.

DeRYDER SALE NEXT WEEK.

Promptly at seven o'clock on the evening of Wednesday, November 10, at the Riding and Driving School in this city, Auctioneer William Higginbottom will ask for bids on the five-year-old trotting stallion El Volante S., number one in the catalog of offerings at Charley DeRyder's annual sale of trotting horses. Forty-two individuals in all are catalogued and there will be a few others put up, consignment of which was made too late for publication, so that Mr. Higginbottom has a busy evening in store for him.

Seventeen horses of various ages and sexes are consigned by C. L. DeRyder as agent for various owners, the band including stallions, broodmares, colts, fillies and well developed racing prospects, among the latter being El Volante S. by El Volante, with a three-year-old trial of 2:20 at the trot; Blanca S. by Red McK., a show mare with a lot of natural speed; Dr. Dawson by Del Coronado, a free-legged pacing gelding that has gone the route in 2:11¼; Prince Del Monte by Kinney Lou, that has trotted in 2:15¾, and Asa Pointer by Star Pointer, a five-year-old gelding, sound and right, that has worked in 2:06¼ and has paced three heats better than 2:09. The mares are by such sires as Beau B. 32606, Kinney Lou 2:07¾, Hedgewood Boy 2:01, Oh So 2:25½, Raymon 2:27¼ and Diablo 2:09¼, while there are partially developed prospects and young things by Zombro 2:11, The Bondsman, Graham Bellini (3) 2:11¼, Directly 2:03¼, Vernon McKinney 2:01½ and Copa de Oro 2:01. None of them are sold for fault, and many are offered solely that old accounts may be squared up, so you may know there is no reserve on them. Incidentally, it may be well to remember that by-bidding has ben sonspicuous at Mr. DeRyder's former sales principally through its absence.

F. E. Emlay, the Marysville horseman, sends the seven-year-old stallion Washington McKinney Jr., recommending him as a fast natural trotter, with work to his credit in 2:12½, halves in 1:04 and quarters in :31, while from the establishment of H. S. Hogoboom at Woodland comes a draft of nine that "will do." "Hi" Hogoboom needs no introdution to horsemen, nor do his horses, and the latter are sold only on account of the fact that the owner needs the money to meet the deficit caused by the dearth of racing and breeding operations here on the coast. He has more at home and sends the ones that should sell best, topping the bunch with the stallion Palo King 2:28½, the only horse at present at service in California to sire a three-year-old with a race record of 2:09, and the great brood mare Beautiful Bird (dam of three trotters) by Nutwood Wilkes 2:16½, dam the still greater matron Expressive (3) 2:12½ (dam of three in 2:10 and half-sister to the dam of Mary Putney (3) 2:05½). Two daughters and one son of Beautiful Bird are in the consignment, as is last year's futurity winner Little Express (2) 2:20. Last year this filly beat Bondalean but while she has her speed with her this season, also, Hi figured the Silva colt too much of a wolf and didn't pay up in the stakes. The bunch is rounded out by a couple of Palo King geldings that should prove useful in the future, and for the estate of Dr. Randolph of Willows Hi also sends the pacer Marlin, with a trial in August of this year in 2:08¼.

Various owners are represented by consignments of excellent quality, the greater portion of which should find new owners readily. C. W. Bowers of Davis sends the bay colt College Boy II. that has shown Elmo Montgomery a mile in 2:16 in ninety days' handling, while from E. A. Swaby of the same town comes a handsome six-year-old daughter of San Francisco 2:07¾, out of the dam of Bodaker 2:13—Birdie by Jay Bird 5060. Here is breeding for you, and the girl has the other qualities that should accompany it. Jerry Doran puts in a nice two-year-old bay gelding, just broken, by The Bondsman and out of a registered mare, and any one in search of one of those dreamy gaited saddle horses is advised to watch for Number 31, a good one. "The Bondsmans" are doing nicely at the races, thank you, and Budd Davis of Caldwell, Idaho, offers a pair of them, two-year-olds, that are bred to be as good as they come—a gelding from Gregan by Steinway, grandam by Robert McGregor, and a filly out of Ava J. 2:28 by Zombro 2:11. They have been on pasture and are in good condition.

Henry Smith of Pleasanton, also feeling the lack of racing severely, sends along three that have been tried and not found wanting, Della H. 2:10, a game race mare still good in her class; Alton S. 2:15, a good chestnut gelding with a public trial of 2:09, with fractional distances at a two-minute gait, and Lottie D., a four-year-old filly by Charley D. 2:06¼, with maternal crosses through developed dams to Nutwood Wilkes and Steinway. This lass has been a mile in 2:15, half in 1:04, quarters in :30, and Henry sends her as sound. All of these will do to race.

F. Gommet of this city puts in Prince McKinney (2) 2:29¾, and a four-year-old filly by him, Baby Gommet, dam Arawanna B. by Sidney Dillon. The Prince is a proven speed sire and a high class horse, one that should prove useful in any section. He has always been owned here in San Francisco and has had access to but few mares, but has sired two to beat 2:10 in their work, Sweet Princess, trial 2:08, and Baby Gommet, trial 2:10. The Baby is a nice filly, gentle and good headed, wears few boots and no panties.

Wm. Stewart recommends to anyone wishing a stock horse the eight-year-old stallion Irving Pointer, trial 2:16. He is a big fellow, a good foal getter, and useful on the road, a son of Star Pointer and Maud J. C. by Nearest. Mr. Stewart also sends Phylip Pointer by Irving Pointer, dam Phyllis B. 2:24½ by Greco B., and thinks he will do to train. He is a three-year-old, gelded, and has paced quarters this summer in :33.

The cataloged offerings conclude with a nicely bred pair, brother and sister, consigned by Al Schwartz, who is reducing his holdings in horseflesh. They are by Iran Alto 2:12¼ and out of Lorenzo Girl, trial 2:13, by Monterey 2:09—a five-year-old chestnut gelding and a six-year-old mare. The gelding has worked in 2:18 on the trot and may either be driven or ridden by a lady in perfect safety, while if trained may do to race. The mare has been breeding, having raised one colt and now being believed with foal to the cover of Prince McKinney.

Anyone wishing horses for any sort of use can certainly find them among the above and should be on hand when the sale starts. The Riding and Driving School is on Seventh avenue, near Fulton street, and may be reached without transfer from downtown points by the McAllister car, Number Five.

Good Racing at Fair

A welcome stranger in our midst, one somewhat elongated gentleman answering to the name of Tommy or Thomas W. Murphy, according to the degree of formality gracing the particular occasion, gathered unto his strong box a brace of nice yallertinted thousand dollar bills and some odd change in dollars and two-bit pieces on opening day of the fall meeting of the Panama-Pacific International Exposition, the exact figures being $2,093.75—none of it Mexican money, either. So far as Mr. Murphy's perfectly good intentions were concerned his initial winnings might have been a trifle larger, but had not Senor Ricardo McMahon's equally good intentions gone wrong the Murphy share would have been a little less, so the Poughkeepsie wizard is well content with the way things turned out.

Monday was a pleasanter racing day than almost any of the June meeting, as the sun was out full and clear, what little fog was in evidence hung to the opposite side of the Golden Gate, and there was not such a pronounced breeze to buck down the back stretch. The track afforded a bit better going, also, but the November sun quickly gets under the brow of the encircling hills of the Presidio and the grandstand is in the shade throughout the afternoon. The opening day crowd was not what it should have been, but as the publicity department of the exposition had not done much overtime work in an endeavor to attract people to the meeting or make it easy for the public to get there they certainly could not have expected any million. The fields were not large but at that most of the wiseheads failed to name three winners in advance, and there were a few displays of stretch driving that brought much pleasure to the spectators.

Virginia Barnette, Bonnie Ansel, Major's By Guy and Agnes Carter were the starters in the meeting's initial event, and for a small field they were a hard lot to get away, Starter Updegraff having to sound the recall six or seven times before finally letting them go. Virginia was a bit nervous the first time or so down but settled to good behavior, Agnes Carter being the main offender through scoring on a pace, eventually being put on her own protection. The start was rather ragged and Major's By Guy broke shortly after the word, Virginia taking the pole on the turn with Bonnie second. Agnes broke on the back stretch and from there on it was Virginia all the way, with the other mare hanging with her well, the two slacking their pace a bit just before reaching the wire as though to give the others a chance to get inside the flag. However, Mr. Sandy Smith is a grim little executioner and he chortled in fiendish glee as he dropped the red rag some instants prior to the arrival of either Agnes or the Major at his post. In the second heat Durfee evidently underestimated Bonnie's brush, Spencer bringing the big mare in a nice winner in 2:09¼, the last half being trotted in 1:03¼, the pair coming around the short turn in thirty-one seconds. Different tactics were adopted in the final heat, the girls going to the half in 1:07 and then slowing up a bit around the turn, with Durfee in the trail. In the stretch both had a lot of whizz and the brush was a pretty one, Virginia winning with the big mare's nose at her saddle, the last quarter being at a flat two-minute gait by the official time, so the Durfee mare must have done it a bit better than :29¾.

The 2:09 pace furnished the upset of the afternoon, The Beaver being generally regarded as the boss of his bunch, the other starters being Major Ong, John Malcolm and Soumise. Billy Fleming, while able to be present, much to the gratification of his many friends among the spectators, was in no condition to drive and his place in the pilot house of the Canadian destroyer was filled by Dick McMahon. Major Ong was an unknown quantity to all save a very few of those present, Soumise was acknowledged to be in company a little too rapid for her in her present form, and John Malcolm, while known to be a very fast horse, is a very uncertain one. Malcolm drew the pole and took the field away on the first score, the Major and The Beaver close up around the turn. Pilot McMahon, who was in strange waters, laid a course down the inside passage of Goat Getter channel and rang for full speed ahead, getting an immediate response. The good boat surged through the chop all same like Oregon Kid II. and for a moment promised to go to the front, but of a sudden was seen to be settling by the stern with the bow riding high and the distance gained was lost. From the stand the exact cause could not be determined, but one of the twin propellers struck a soft spot that broke away under the force of the impact. Murphy asked it of the Major in the stretch, but Malcolm stayed pacing and won in a neat drive. Daniels went to the front again in the second, and The Beaver broke but settled quickly near the three-eighths. Around the hogshead curve Ong was in the trail where he would have been compelled to take out to third place ordinarily to get a shot for the wire, but Malcolm came wide on the turn, letting him slip through to win by an open length from The Beaver, Malcolm breaking in the stretch and just escaping the flag. The Beaver cut out the pace in the last heat but broke under the drive in front of the club house, the heat and race going to the Murphy gelding, the flag catching Soumise and Malcolm, the latter having lost much ground through an early break.

The 2:15 trot was a gift for Mirthful, with the other entries trotting creditable races, Bon Courage displaying a lot of lick but being unsteady. The Proof, not a handsome gaited trotter but a dogged one, hung on well and Seneca Boy went a well behaved race for Charley DeRyder. The summary:

Monday, Nov. 1.—2:20 trot, purse $2,000:

Virginia Barnette, b m by Moko—Zephyr 2:07¼ by Zombro 2:11.....(W. G. Durfee) 1 2 1
Bonnie Ansel, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20.. .....(Spencer) 2 1 2
Major's By Guy, br h by Major Dillon 2:18½—By Guy by Guy Wilkes 2:15¼.....(Alvord) ds
Agnes Carter, b m by Nutwood Wilkes 2:16½—Excella by Monbells 2:23¾.....(Schwartz) ds

Time—:32¾, 1:07¼, 1:40¾, 2:11¼
:32½, 1:06 , 1:37 , 2:09¾
:32½, 1:07 , 1:42 , 2:12

Distribution of purse—Virginia Barnette $875, Bonnie Ansel $625, Association $500.

2:09 pace, purse $2,500:

Major Ong, b g by Major Gantz 2:08½—Bessie J. by Iowa Sentinel 2:29¾.....(Murphy) 2 1 1
The Beaver, br h by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook.....(McMahon) 3 2 2
John Malcolm, br g by Dan Logan 2:07¼—Susie Miller by Prince Ansel (2) 2:20½.....(Daniels) 1 4 ds
Soumise, b m by Billy Dunlap—Cricket Basler by Robert Basler .....(Leggett) 4 3 ds

Time—:33¼, 1:07 , 1:40½, 2:09½
:31 , 1:03¼, 1:35½, 2:06½
:31¾, 1:05 , 1:37½, 2:07

Distribution of purse—Major Ong $1,093.75, The Beaver $562.50, John Malcolm $375, Soumise $126.25, Association $312.50.

2:15 trot, purse $2,000:

Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by George Simmons 2:28.....(Murphy) 1 1 1
Seneca Boy, ch g by King Entertainer 2:10½—Seneca Maid 2:30 by John Adams(C. L. DeRyder)2 2 2
The Proof, b h by The Exponent 2:11¾—Chord 2:27 by Wilkes Boy 2:24½.....(Spencer) 3 3 3
Bon Courage, ch g by Bon McKinney (3) 2:24¼—Helen Keyes by Sidney Dilon.....(Hayes) 4 4 ds

Time—:32 , 1:05½, 1:38½, 2:10¼
:32½, 1:05 , 1:38¾, 2:10½
:32¾, 1:07 , 1:39¾, 2:10¾

Distribution of purse—Mirthful $1,000, Seneca Boy $500, The Proof $300, Bon Courage $100, Association $100.

Second Day, Tuesday, Nov. 2.

Mark it up forty-six thousand, three hundred and eighty-five dollars, you dopesters who are keeping cases on Peter Scott's winnings for the season of 1915, for the big brown son of Peter the Great annexed ten thousand bucks here today when he straight-heated the field in the twenty-thousand dollar 2:10 trot at the exposition. Only once seriously challenged, the Murphy trotter won like the true race horse he is over a track that was heavy and holding, a good two or three seconds slow. The balance of the stake money remains in California for purely local circulation, Miss Perfection taking $5,000 for that good sportsman, Rod MacKenzie, Spriggan drawing $2,250 for V. K. Dunne, Esperanza tucking $1,500 into her sock for safe keeping until her arrival back home in the city of angels, and Baby Doll laying claim to $1,250 for the benefit of I. L. Borden's strongbox. Axtien, starting in the race a very lame horse, and Electric Patch, who had a bit of hard luck, barely missed connection for portions of the money, while San Felipe, clearly outclassed, managed to last through the three heats on the right side of the distance flag.

Miss Perfection, with a world of friends among the spectators, was fortunate enough to draw the pole in the position lottery, with Esperanza second, Electric Patch third, Baby Doll fourth, San Felipe fifth, Pet Scott sixth, Axtien seventh and Spriggan eighth, t latter scoring in the trail. It was a good manner field, and after a couple of warming up scores Start Updegraff sent them away in pretty fair shape, Mi Perfection going to the front from the first. Bo Axtien and Esperanza broke before getting out the straightaway, and on the turn an unlucky mixu butted in to play a part in apportioning the mone Just how it happened is hard to say, as no two peop see these mishaps alike, but Spriggan and Electr Patch hooked sulkies with the result that Macey wa thrown out and Spriggan was put down on all four coming up trotting and going on in the race, whil Electric, going guideless, refused to trample on hi pedigree by misbehavior and trotted along as uncon cernedly as could be until stopped at the paddoc gate by caretakers. At the half it was Perfectio Peter and Baby Doll, with Spriggan coming steadil and taking the long route on the short turn. In th stretch Peter swung into second position and race alongside Miss Perfection, both Murphy and DeRyde doing some excellent teaming, the stallion wearin down the game brown filly in the last few feet an winning by a small margin in 2:07¼, a new trottin record for the local course by a full second. Spriggan finished third a bit back, with Baby Doll fourth an Esperanza fifth. The judges, after considerable de liberation and the interviewing of a number of team sters, settled upon Spriggan as the goat for the spil on the turn and placed him last, naming Electri Patch the seventh horse and advancing the balanc of the field one notch, a stroke of good fortune fo Messrs. Berry and Borden. It is a question wit some as to whether Spriggan was properly penalized they viewing Peter Scott as the possible cause of th initial troubles of Spriggan, but no intentional mis conduct can be laid to any of the parties concerned These things will come, at times, and it is fortunat that no more serious results accrued.

They were off on the first score in the secon heat, the lame Axtien making an early break. Pete Scott assumed the lead, with Perfection just outsid him, and down through the "narrows" both Spriggan and Electric Patch moved up, the former on th inside and the latter taking to the beach, Spriggan landing third into the turn and keeping that positio to the wire, Scott winning more easily than in the first mile. The Patch horse, none too fit after his experience previously, tired a bit toward the las and Esperanza, coming well to the outside, copped the five hundred that went to the fourth horse. Ax tien, after repeated breaks, was on the wrong side of Sandy Smith's fateful banner when Scott went under the wire.

For the third and final heat the field again came down in nice shape on the first score and were given the word to go on, Perfection dropping into Scott's trail and Baby Doll ranging up alongside. Past the quarter Quinn quickened the pace and took Peter to the half in 1:04½, the fastest first half of the race, but the gait was a bit swift and the Borden mare left her feet and lost her advantageous position, Peter leading Perfection, Spriggan, Esperanza and Electric Patch around the turn in the order named. The MacKenzie mare was again a good second, with Spriggan a couple of open lengths back for third and Esperanza fourth, the Durfee mare having spoiled her chance for a better position by a break in the stretch. All in all, the money went about as the most knowing ones had expected, and was won on merit. Spriggan's shaking up and Electric Patch's mishap undoubtedly caused these horses to be a bit off edge for the balance of the race, but had the accident not occurred it is doubtful if any material change would have been made in the distribution of the lion's share of the purse. Peter Scott "had the class," and Miss Perfection trotted a faultless race. The footing rather favored the more rugged Scott, and had the going been drier and lighter the time hung out would have been considerably faster.

Only four three-year-old trotters put in an appearance for the historic Occident stake, and of these the Hemet Stock Farm filly, Allie Lou, was much the best. Charley DeRyder had the mount behind her and drove her a nice race, having the others at his mercy after the first heat. With Carl and May Alto some lengths behind them, Allie and Byron went to the three-quarters in 1:44 and then indulged in a nice little duel through the last quarter in :31½, a final clip very nearly as fast as that set by the big stake trotters. DeRyder, a stranger to the home three-year-olds, perhaps underestimated Byron's capacity

Peter Scott Takes Trot

nd in a late drive, with the black colt just overhauling her, the Hemet filly left her feet only a few yards rom the wire and the heat went to the Los Angeles ad. The second heat was a "comedy of errors" for ll save Allie Lou. Carl, Byron and May Alto all had unsteady notions that cost them much ground. Taking no chances on losing a race with another man's horse, DeRyder kept plugging away, going to the half in 1:05¼ and the three-quarters in 1:39. Once well into the stretch he began a lifelike imitation of the policy now immortalized as one of "watchful waiting," but watch as he could and wait as he did, to say nothing of listening with a pair of very acute ears, he could get no tidings of the enemy, so pulled down to a jog to enable them to beat the flag, May Alto not being able to turn the trick at that. The third heat was also an easy one for the winner, with both Byron and Carl trotting better miles than in the second time out and finishing much closer up, though not in striking distance of the brown filly.

The 2:12 pace, like its winner, was a "small horse and soon curried." Hal Boy, the hard luck hero of the season, east and west, drew the pole and the lead right at the outset and never surrendered either, taking three in a row in 2:08¼, 2:06¾ and 2:07¾. He was never extended and Dick McMahon merely sat still and peeled an observing eye at the contest going on just to the right of him, and a trifle to the rear, for place. The pacers, like the trotters of the day, were on their good behavior and there were no delays in scoring. Hal Boy, Red Rock and Pointer's Daughter were the leading trio at the quarter, Potrero Boy moving up down the back stretch and taking the long route on the turn, pacing fast. Red Rock landed the place handily, but Potrero Boy and Pointer's Daughter hit it up nose and nose for third money, the judges seeing the mare's muzzle in the lead. In the second, Potrero carried Hal to the half in 1:02½ but tired from there home, the Daughter finishing second lengths ahead of him, Daniels having to use the bud to stave off the rush of Princess Patch. The third heat found the leaders well bunched throughout the mile, the Sacramento gelding taking second from the Santa Maria mare in a close drive. Red Rock, on three legs, tired after his first heat.

The day was far from being a good racing day, as a thick fog hung over the bay country throughout the daylight hours and the clay track soaked up moisture like a sponge. The going was not dangerous, but packed hard in a very short time and was of just the right consistency to be holding and tiring, especially to horses who have a pronounced preference for first-class footing. The crowd was the largest yet assembled to witness racing at the exposition, and the day's sport was well received by the spectators. The summary:

Tuesday, Nov. 2.—Occident Stake, three-year-old trotters, purse $2,885:

Allie Lou, br f by Kinney Lou 2:07¾—Lady Zombro 2:24½ by Zombro 2:11.....(C. L. DeRyder)	2	1	1
Byron, bl c by Tom Moko 2:13—Rita H. 2:12½ by McKinney 2:11¼ .....(W. G. Durfee)	1	2	2
Carl, bl g by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(C. A. Durfee)	3	3	3
May Alto, b f by Alto Express 2:22¼—Maymonio by Demonio 2:11¼ .....(Ivey)	4	ds	

Time—:35 , 1:09¾, 1:44 , 2:15½
:33 , 1:05¼, 1:39 , 2:16½
:33 , 1:05¾, 1:39¾, 2:16

Distribution of purse—Allie Lou $1,442.50, Byron $1,154, Carl, $288.50.

2:10 trot, purse $20,000:

Peter Scott, br h by Peter the Great 2:07¼—Jenny Scott 2:14¼ by Bryson 2:16¾..(Murphy)	1	1	1
Miss Perfection, br m (4) by Gen. Watts (3) 2:06¾—Sue Fletcher by Tregantle 2:09¼.....(C. L. DeRyder)	2	2	2

Axtien, ch h by Axworthy (3) 2:15½—Protein 2:11¾ by Glenwold .....(Harris)	5	ds	

Time—:32 , 1:05 , 1:36 , 2:07¼
:33¼, 1:05½, 1:38 , 2:09½
:32½, 1:04½, 1:37¼, 2:08½

Distribution of purse—Peter Scott $10,000, Miss Perfection $5,000, Spriggan $2,250, Esperanza $1,500, Baby Doll $1,250.

2:12 pace, purse $2,000:

Hal Boy, b g by Hal B. 2:04½—Altalena by Altamont 2:26¾.....(McMahon)	1	1	1
Pointer's Daughter, b m by Star Pointer 1:59¼—Banker's Daughter 2:13¾ by Arthur Wilkes 2:28¼.....(Finley)	3	2	3
Potrero Boy, b g by Demonio 2:11¼—Potrero Girl by Prince Airlie.....(Daniels)	4	3	2
Red Rock, ch g by Louis Wilkes 2:15½—Red Bird by E. S. 2:11¼.....(McGuire)	2	5	4
Princess Patch, b m by Dan Patch 1:55¼—International Queen 2:13½ by Tom Exum 2:14½.....(Macey)	5	4	5

Time—:32 , 1:05 , 1:38¼, 2:08¼
:31¼, 1:02½, 1:35 , 2:06¾
:32 , 1:04 , 1:37 , 2:07¾

Distribution of purse—Hal Boy$1,000, Pointer's Daughter $400, Potrero Boy $325, Red Rock $225, Princess Patch $50.

Third Day, Wednesday, Nov. 3.

It is doubtful if there was ever staged on this coast a more really entertaining afternoon's card of harness races than the one put on at the exposition course today, as there was plenty of speed on tap and many of the finishes were contests in the fullest sense of the word, the leaders fighting it out in evenly matched brushes that in numerous instances left the spectators undecided as to the winner prior to the official announcement. The crowd was not large, but it was a highly appreciative one and voiced its approval of the brisk racing in no uncertain terms.

Peter Scott and Miss Perfection, the headliners of the San Francisco day program, were both billed for a re-appearance in the 2:30 trot, but after an inspection of the course about the middle of the morning the latter was drawn, Charley DeRyder not caring to ask her to race two days in succession on a track just the opposite to the kind that suits her best. The huskier Scott was present, however, and added some hundreds of dollars to his roll, his performance bringing his total up to the sum of $47,260. The advance dope had him down for a round thousand in today's race but the corrected figures were $875, the hundred and a quarter having been nipped from him in the crowd by a light fingered lassie whose name appeared on the docket as Virginia Barnette, residence Los Angeles, William Gee Durfee of the same city being booked as her accomplice. To be absolutely fair, it is not believed that the smooth couple from Angeltown had any preconceived notion of rolling our eastern visitor for any portion of the wealth which he has been flaunting so brazenly of late, but the opportunity presented itself unexpectedly, the flesh is weak—and there you are. Similar moments have caused digression from the "straight and narrow" since time immemorial, and the victim may thank his patron saint that the sum involved was no larger.

Virginia drew the pole and took 'em away the first time down, Peter dropping into Murphy's favorite place in the trail with Bonnie Ansel close up outside. Major's By Guy broke in the first eighth but settled and was pretty well up at the half, only to break again when the pace quickened on the turn. It was a handy win for Scott, with Virginia and Bonnie racing for place in a very close fit on opposite sides of the winner, Bonnie having a wee bit the best of it. In the second heat both Major and Virginia made early breaks and good catches, the big bay mare setting the pace to the quarter in :31½ for Scott. Spencer eased up down through Hungry Hollow and at the half and around the turn the three leaders were nicely bunched, coming down the stretch in pretty shape. Peter had command of the situation but Virginia's nose was at Murphy's shoulder and Bonnie Ansel was barely beaten for place.

Two races in two days over a bum track began telling on Peter, and he surprised the spectators by making a slight break warming up for the third heat. After the word he made another one before reaching the turn and at the quarter the pair of mares had him three lengths to the bad. He closed up down the stretch and was lapped on Bonnie and Virginia around the turn, coming into a slight lead when well up the stretch, with the girls hard after him. Here the unexpected happened, owing to a wave or the sting of the pavement they were racing over. Scott made an ascension, and while he was busily engaged trying to find his feet, Virginia searched him for the hundred and a quarter previously referred to. Bonnie Ansel is of a higher moral character and refused to go through Peter's other hip pocket, finishing third. Major's By Guy, while not a contender, went a much better race than on opening day.

The 2:15 pace was a warm baby for a November day, Prince Zolock and Strathtell racing each other to two of the closest finishes that have been seen here during the season, the judges having to use the microscope to separate 'em at the wire in both the first and second heat. Dicto threw a shoe in scoring for the first mile but the delay was short. Joe Carson's pony pacer, Strathtell, drew the pole but surrendered the lead in the first eighth to Prince Zolock, Hal S. in turn assuming it only a few seconds later. At the half it was Hal S., the Prince and the pony horse, the trio drawing away a bit from the balance of the field around the turn and coming into the stretch sizzling. Hal S., having pulled Tommy Murphy up to a point where his knuckles were barked against the terrets, evidently realized the impropriety of his pilot's position and began sitting in his lap until he had him pushed back in the sulky where he belonged, Strathtell and Zolock passing him like rockets and racing head and head to the wire, Heiman's pacer winning by a margin of inches only. The second heat was a repetition of the first in a large measure, Hal S. setting the pace only to fade in the stretch before the rush of the black and the little bay. Barney Barnes began his drive earlier and the "fit" at the wire was even closer than before, while the final quarter was half a second faster than formerly. A spill was narrowly averted in the early portion of this heat when the pantalooned Ben Corbett Jr. did a tango before leaving the stretch, but Finley managed to settle him before the promised accident materialized. In the final heat things were eased up a bit, the leaders racing much as before but Strathtell winning by three lengths. It was a great little horse race for November and only one entry failed to last through the event. A. B. C. was a handy fourth in each heat and went a real good mile the last time out, getting the word unexpectedly the first time down when at the tag end of the bunch.

Now the spectators thoroughly enjoyed the thirty trot and also cheered the fifteen pacers, but the amateur event for free-for-all sidewheelers was the one that caused the most enthusiasm. It witnessed the first appearance of June's stake winner, White Sox, and Leata J., both prime favorites with western crowds, the balance of the field being composed of the ever popular Teddy Bear, Dick W., W. J. K. and Little Bernice. Teddy was not at his best, and the race developed into a peach of a duel between the two fast mares, Bob Smith piloting Sox and Chester Jones teaming the pride of Stockton. Leata had the pole and raced out to the front, with Sox and Teddy second and third, the field spreading across the course on almost even terms at the quarter. Into the stretch the top mares had it their own way and went at each other doggedly and fast, Sox copping the kale in the last few feet amid generous applause. Little Bernice's sulky went down on one side past the quarter but Sexton "stayed with the kite" without injury and the mare was placed.

In the second, Jones pursued different tactics and took Leata into the trail behind Sox, who went to the three-quarters in 1:37½. In the stretch Jones pulled out and Leata buzzed past the leader with an awful rush and won rather handily, Sox apparently not going as smoothly as before through the final quarter. For the third the first quarter was slow, :33½, Leata taking back to get into the trail, but down through Poverty Flat the pace quickened, Sox going to the half in 1:05 and around the short turn in :31, with Leata a couple of lengths to the bad till near the three-quarters. From there home the clip was a dizzy one, Jones coming to even terms at the club house and winning by a long head while the crowd whooped its approval. The last half was in 1:01½ and Leata's separate time for the final quarter was :28¾, which is some gait for an amateur event.

Considering the circumstances, the afternoon was a most exceptional one from a performance standpoint. The track was as hard as a pavement for a good portion of the entire route owing to the damp weather and the packing it received during the preceding day's military operations at the conclusion of the racing program, and at this season of the year most horses are laid away for the winter. Every heat was raced below 2:10, the average for the afternoon being a trifle faster than 2:08¼. The details:

Wednesday, Nov. 3.—2:30 trot, purse $2,000:

Peter Scott, br h by Peter the Great 2:07¼—Jenny Scott 2:14¼ by Bryson 2:16¾ (Murphy)	1	1	2
Virginia Barnette, b m by Moko-Zephyr 2:07¼ by Zombro 2:11.....(W. G. Durfee)	3	2	1
Bonnie Ansel, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20..(Spencer)	2	3	3
Major's By Guy, br h by Major Dillon 2:18½—By Guy by Guy Wilkes 2:15¼.....(Alvord)	4	4	4

Time—:32¼, 1:04¾, 1:37¾, 2:08¼
:31½, 1:05½, 1:38½, 2:09½
:32 , 1:05½, 1:38½, 2:09¾

Distribution of purse—Peter Scott $875, Virginia Barnette $575, Bonnie Ansel $350, Major's By Guy $200.

2:15 pace, purse $2,000:
Prince Zolock, bl h by Zolock 2:07¾—Princess Direct 2:05¼ by Teddy A.....(Helman) 1 1 2
Strathtell, b h by Motell—Ruth Strathberry by Strathberry 2:04¼.....(Barnes) 2 2 1
Hal S., ro g by Hal Chaffin 2:05¼—Bessie Hal 2:16½ by Red Hal 2:13¾.....(Murphy) 3 3 3
A. B. C., bl s by Young Monterey 2:24¼—Rosalie by Dudley 2:24.....(Chadbourne) 4 4 4
Dicto, b g by Dictatus Medium—Letter B. Jr. by Benton Boy 2:17½.....(Wm. DeRyder) 6 6 5
Oro Mc, ch g by Demonio 2:11¼—Hanora by Oro Wilkes 2:21.....(Daniels) 7 5 6
Buzz Patch, bl m by Dan Patch 1:55¼—Heloise Grattan by Grattan 2:12.....(Macey) 8 7 7
Ben Corbett Jr., b g by Ben Corbett 2:21—Miss Thompson by Thompson .....(Finley) 5 ds

Time—:31¼, 1:04 , 1:36½, 2:07¼
:32 , 1:04½, 1:37½, 2:08¾
:32 , 1:05 , 1:37¾, 2:08¼

Distribution of purse—Prince Zolock $875, Strathtell $625, Hal S. $500, A. B. C. $200.

Free-for-all pace, amateur, purse $2,000:
Leata J., b m by Royal McKinney 2:29¾—Geraldine 2:16¾ by Mount Vernon 2:15¾.....(Chester C. Jones) 2 1 1
White Sox, b m by Del Coronado 2:09½—Subito by Steinway (3) 2:25¾.....(Bob Smith) 1 2 2
Teddy Bear, b h by Del Coronado 2:09½—Queen S. by Sable Wilkes 2:18.....(C. F. Silva) 3 3 3
Dick W., b g by Athadon (1) 2:27—untraced..
.....(A. Ottinger) 5 4 4
W. J. K., b g by Dexter Prince—Psyche.....
.....(W. Smith) 4 5 5
Little Bernice, b m by Del Coronado 2:09½—Pearl Pointer by Sky Pointer.....(T. D. Sexton) 5 ds

Time—:32 , 1:04½, 1:38½, 2:06¾
:32 , 1:04 , 1:37½, 2:07¾
:33½, 1:05 , 1:36 , 2:06½

Distribution of purse—Leata J. $875, White Sox $625, Teddy Bear $300, Dick W. $150, W. J. K. $50.

Fourth Day, Thursday, Nov. 4.

Only one race developed out of the three called for today, but that one was a good one, a real one, the two-year-old pacing division of the Breeders' Futurity. Eight young things faced the starter and only one fell by the wayside during the two fast heats, while it was nip and tuck between the winners both trips. On breeding, individuality and general "class" the bunch was a hard one to beat.

Pattie C. drew the pole but was not in shape to take advantage of the position, having hurt a tendon in a recent workout and being started without much hope of her having a "look in" when the money was cut. Verna McKinney, with Lou Daniels driving, went to the front closely followed by Surety and Rico, the former making a break on the turn. Captain Mack, Oregon's sole representative, and a good one, moved into third place and was still there handily when the wire was reached. Verna and Rico drawing away from him in a warm little stretch drive in which both contenders raced like aged horses. Fresno Bond, with one ouchy leg, made an unhandy ascension on the last turn but managed to beat the flag all right, the unlucky Patti C. being the sole victim of Sandy's offensive operations. Verna opened up a little lead in the first quarter of the second, her closest companions being Rico, Fiesta Lou and Captain Mack, the quartet coming into the stretch in similar order, though Verna's lead had been cut down a trifle. Both Durfee and Daniels began their drive earlier and came down the stretch with a rush, both young 'uns game, both good headed, and both speedy. They drew away from the Captain and the balance of the bunch, and with both drivers going their limit on teaming, flashed under the wire so evenly matched that most of the spectators disagreed with the judges' decision, as is not unusual in close finishes.

The 2:17 trot was a joke. The Proof should have won in straight heats and when the judges assessed C. A. Spencer $100 for not driving to win the first heat the concensus of opinion was that he was a lucky man. Old Folks, who was a very sick horse for some time earlier in the season, is also handicapped by a pair of hot feet in front and was not in condition to put up much of a contest, while Matawan is notoriously fainthearted at the end of a mile in any kind of time. He did establish a new record for himself, however, by being on his good behavior and never spoiling a score or making a break.

Maymack was conceded the amateur trot and made good after losing one heat. Esperanza, with Owner C. J. Berry up, drew the pole and took 'em away the first score, Future Tramp making one of "them things" early in the mile. Ella M. R. went to the front but broke on the back stretch and again coming home, Tramp making up a good deal of his lost ground and finishing a fair third, though leaving his feet again at the club house. In the second, Esperanza stuck her head and neck past Maymack's down the back stretch and the pair went to the half in five, both leaving their feet shortly afterward almost simultaneously. Esperanza settled first and Tramp, coming on steadily, passed first Maymack and then Esperanza, trotting the last half separately timed in away very moderately in the final heat, Sexton showing no great inclination to race and dropping some lengths behind in the first quarter, Esperanza speeding up when once away. Sexton began moving up after going to the quarter and got up where he belonged before heading into the stretch. It looked like a horse race for a few seconds, but Esperanza and Tramp both broke coming home and Maymack and Bob Smith won in a jog. The summary:

Thursday, Nov. 4.—Breeders Futurity, two-year-old pacers, purse $1500 ($1000 to race and $100 to nominator of dam or whose original entry is named the winner of this division of the stake):
Verna McKinney, b f by Vernon McKinney 2:01½—Ramona by Demonio 2:11¼.....(Daniels) 1 1
Rico, ch c by Manrico (3) 2:07¾—Pavlowa B. by Petigru 2:10½.....(W. G. Durfee) 2 2
Captain Mack, br c by The Bondsman—Bessie L. by Montana Director .....(Woodcock) 3 3
Fiesta Lou, b f by Wilbur Lou (3) 2:10¾—Fiesta Queen 2:22½ by On Stanley 2:17½.....(Walker) 5 4
The Puzzler, b g by Cochato 2:11¾—Baroness Maid by Baron Wilkes 2:18.....(Chadbourne) 4 5
Surety, b c by The Bondsman—Eva H. by Washington McKinney 2:17½.....(McDonald) 6 6
Fresno Bond, b c by The Bondsman Fresno Girl 2:10¾ by Seymour Wilkes 2:08½ (C. L. DeRyder) 7 7
Patti C., b f by El Angelo—Mary W. 2:10¾ by Dictatus 2:17 .....(Allen) ds

Time—:33½, 1:07¾, 1:41½, 2:13¾
:32¾, 1:06 , 1:40¼, 2:13¼

Distribution of purse—Verna McKinney $500, Rico $250, Captain Mack $150, Fiesta Lou $50, The Puzzler $50, A. L. Scott, owner of original nomination, $100.

2:17 trot, purse $2,000:
The Proof, br h by The Exponent 2:11¾—Chord 2:27 by Wilkes Boy 2:24½.....(Spencer) 2 1 1
Matawan, br g by Athadon (1) 2:27—Cora Wicksham by Junio 2:22.....(Schwartz) 1 3 3
Old Folks, br g by Del Coronado 2:09½—Iran Belle by Iran Alto 2:12¼.....(W. G. Durfee) 2 2 3

Time—:35 , 1:10½, 1:46 , 2:20
:36½, 1:11¾, 1:46¾, 2:19½
:34 , 1:08½, 1:43¼, 2:17½

Distribution of purse—The Proof $575, Matawan $525, Old Folks $400, Association $200.

Free-for-all trot, amateur, purse $2,000:
Maymack, b m by Arthur Wilkes 2:28½—Lady Whips by Whips 2:27½.....(Bob Smith) 1 3 1
Future Tramp, b g by Tramfast (2) 2:12¼—Future Princess Ideal by Chimes..(Tim Sexton) 3 1 2
Esperanza, b m by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½...(Clarence Berry) 2 2 3
Ella M. R., br m by Lord Alvin—Excella by Monbells 2:28¾ .....(Fred Lauterwasser) ds

Time—:33½, 1:06½, 1:39 , 2:11¾
:33 , 1:05 , 1:38½, 2:09¼
:32¼, 1:06½, 1:38 , 2:11

Distribution of purse—Maymack $825, Future Tramp $575, Esperanza $400, Association $200.

"Along the Fence"

Lou Taylor of Hemet, who went into winter quarters with a campaigning average of one thousand per cent for the season, is among those present at the exposition who are racing 'em from the ground. Lou raced two horses for two weeks, without getting outside of walking distance from home and won eight races out of eight starts, not a bad sort of a performance at all. Both his trotter, Luana, and the pacer, Baxter Lou, seem to be the right kind for next season.

* * *

Willis Parker, one of the original headliners of the movies, is taking in the meeting with a great deal of interest. For some years Mr. Parker was one of Palo Alto's trainers and took a prominent part in the experiments of the photographer Muybridge, the success of which formed the foundation for the subsequent development of motion picture photography as we know it today. In later years he developed and sold the great pacer and coming sire, Vernon McKinney 2:01½, and for some seasons has been taking things easy at his home in Stockton.

* * *

Opening day brought two new additions to the 2:10 list, the trotter Bonnie Ansel 2:09¼ and the pacer John Malcolm 2:09½. They are genuine Californians, the mare being by Prince Ansel (2) 2:20½ out of Woodland Bonnie Derby by Charles Derby 2:20, and the gelding being by Dan Logan 2:07¼ out of Susie Miller by Prince Ansel, Susie Miller being the first daughter of the premier of Woodland Stock Farm to become a producer of 2:10 speed.

* * *

Portland is represented at the meeting by Messrs. Frank Anderson, B. F. Jagger, A. R. Shreve, Fred Woodcock and Gallup, Mr. Shreve also being accompanied by his wife. Frank, who had Imbro here in the spring in Marvin Child's stable, is "afoot," but Shreve and Jagger are pulling for Mack Fitzsimmons, and all gave Fred the glad mitt when his two-year-old pacer dropped into third money in the Breeders' futurity.

* * *

Shortly before leaving Pleasanton Tommy Murphy was kicked in the side by a horse and an abscess has threatened as a result, causing the Poughkeepsie reinsman no end of discomfort and some apprehension. He drove Wednesday's races and then retired from the scene until Friday, keeping to his room under medical attention, but apparently is coming around all OK.

* * *

M. E. Sturges, former owner of Dan Patch 1:55¼ and present owner of that other pacing marvel, Directum 1, 1:56½, arrived in the city some days ago and has joined his other eastern friends in "seeing America first" and taking in the exposition races, incidentally keeping an eye upon some green on that rather suit his fancy. He was accompanied the journey by Walter Heineman, another famili figure on the eastern tracks.

* * *

M. W. Savage and family party are occupying t same box near the wire that was theirs at the spri meeting, Mr. Savage taking his share of the b breaks of racing luck like a sportsman should. Ever thing but good luck has come his way out here, b the stable has made lots of friends for the hon establishment and the season has been by no mea a wasted one. The especial favorite of the Minneso breeder just now is the bay gelding, Power Patc whose mile in 2:08½ at Los Angeles stamps him the fastest of his tribe. He has improved physical while making speed and looks like a real campaigne

* * *

Carrietta 2:18 and her Peter the Great weanlin are occupying a box stall at the exposition an attracting many visitors. Only a few days ago Hu ter Moody drove Senator O'Brien to a record of 2:2 making Carrietta the only mare in the world to pr duce four yearlings to trot to standard records. O the same day Anselila lowered her yearling recor to 2:22½, so that the year has been a great one fo the Considine yearlings in Kentucky.

* * *

The second new 2:10 trotter of the meeting showe up Thursday when Future Tramp won a heat in th amateur trot in 2:09¼. He is the fourth 2:10 pe former for his sire, Trampfast, and the second fo his dam, Future Princess Ideal by Chimes, and loom as a real handy horse to have about the barn nex season.

* * *

Vernon McKinney 2:01½, Rodney MacKenzie's fas pacer, secured his first performer Thursday whe Verna McKinney (2) 2:13¼ won the junior pacin division of the Breeders' futurity. She was pilote by Loren Daniels but the credit of her making mus be given Sutherland & Chadbourne, who handled he exclusively until necessary to find a race driver fo her, Fred's services being required behind The Puz zler. Like many another good one, Verna has "good dam," being out of Ramona, the daughter o Demonio that produced the ten-thousand-dollar De Rey. Ramona is still at the Marshall ranch, and in cidentally you have doubtless noted, en passant (se Horse Review), that when it comes to bothering th treasurer of the Breeders Association and State Ag ricultural Society year after year, this man Jim Mar shall is so persistent as to be very nearly a "pest."

REVIEW OF THE GRAND CIRCUIT SEASON.

Last week's Review contained the report of the closing days of the Lexington meeting, which marked the conclusion of the Grand Circuit of 1915, and this week we may, therefore, with appropriateness, offer some statistics and facts derived therefrom which will interest all horsemen seriously devoted to the light-harness sport and industry.

The circuit opened at North Randall, O., July 19 and therefrom the line of march took the horses consecutively to Detroit, Kalamazoo and Grand Rapids, Mich.; then to Montreal, P. Q.; then to New York City, to Hartford, Conn., Syracuse, N. Y., Columbus, O., and Lexington. It included, therefore, ten separate and distinct meetings, of which, however, three—Montreal, Columbus and Lexington—each gave two-weeks' programs, making a total of thirteen weeks of racing. Contrasting this with last year's Circuit, we find that it then opened the same week, at North Randall, and again proceeded thereafter to Detroit, but then the itinerary took it to Grand Rapids before going to Kalamazoo, a reverse of this year's order. From Michigan the horses went to Pittsburgh, Pa., which this year dropped out, Montreal taking its place, as well as that of Fort Erie, Ont., which last year followed Pittsburgh; the meeting at Montreal, as aforesaid, filling two weeks. From Fort Erie the line in 1914 extended to Syracuse, then to Hartford, then switched back west to Detroit, again, after which came the usual final meetings at Columbus and Lexington. This year there was quite a radical departure from this schedule, as New York, a new member, folowed Montreal, and the next stop was Hartford, after which Syracuse took its place, just preceding Columbus and Lexington, Detroit dropping out of the fall alignment.

From a geographical—or, rather, topographical—point of view, the circuit was far from ideal in 1914 and the regrettable conflict between Detroit and Hartford was hurtful. This year it was better arranged, "hung together" more homogeneously, while the "team work" between the different members was also more harmonious.

Taking it "by and large," the weather, upon which the success of harness racing always very largely depends, was more favorable this year than last, despite the fact that 1915 has passed into meteoro-

logical records as marked by an almost unprecedented rainy summer. The chief sufferers from rain this year were Kalamazoo and Montreal. The former meeting carried through but eleven of its nineteen originally scheduled events. Montreal did not suffer so badly, but encountered a succession of bad days the second week that materially interfered with the disposing of the program, as well as militated against the financial success attained. The entire program at Columbus was also not raced off, rain there the second week making it impossible to start several of the closing events. Considering the average rainfall of the season, however, it must be said that the Circuit, as a whole, escaped very luckily; while the close at Lexington was favored with something almost phenomenal, as eleven days of racing were given consecutively (with an intermission for Sunday), during which not even a single heat had to be postponed on account of bad weather conditions.

Having offered these preliminary observations, we present herewith a brief statistical recapitulation of the results of the Circuit racing, as "boiled down" from our weekly series of elaborate statistical resumes of each meeting:

TABLE I—THE GRAND CIRCUIT OF 1915

Meeting	Races	Starters	Heats	Average Time	Money Awarded
North Randall	21	164	59	2:07.93	$31,720
Detroit	20	142	71	2:09.19	40,020
Kalamazoo	11	75	41	2:10.18	25,310
Grand Rapids	14	93	41	2:06.71	29.713
Montreal	17	91	61	2:09.31	31,375
New York	12	60	48	2:10.53	28,240
Hartford	14	91	44	2:07.87	26,600
Syracuse	19	116	59	2:08.24	40,360
Columbus	36	302	137	2:07.80	86,880
Lexington	42	304	136	2:07.97	87,300
10 meetings	206	1,438	697	2:08.57	$427,788

For comparative purposes, we append herewith the similar table of a year ago, as it appeared in the Review Racing Guide:

TABLE II—THE GRAND CIRCUIT OF 1914

Meeting	Races	Starters	Heats	Average Time	Money Awarded
No. Randall, O.	19	139	66	2:08.68	$31.670
Detroit, Mich.	20	137	77	2:08.77	37,390
Grand Rapids, Mich.	16	112	55	2:07.15	29,050
Kalamazoo, Mich.	17	104	62	2:08.19	43,209
Pittsburgh, Pa.	17	101	67	2:09.79	28,950
Fort Erie, Ont.	11	67	41	2:08.43	20,650
Syracuse, N. Y.	12	63	41	2:06.90	38,400
Hartford, Conn.	12	46	39	2:11.28	30,545
Detroit, Mich.	29	169	115	2:09.29	50,790
Columbus, O.	37	243	138	2:07.40	90,160
Lexington, Ky.	21	138	72	2:07.82	51,125
11 meetings	213	1.319	773	2:08.51	$451,330

The closeness of the totals in the two tables is, we think, quite remarkable, and where the most noticeable discrepancies occur there are explanatory circumstances. For instance, the table for 1914 includes one more meeting than that of 1915—11 as against 10—and the extra one is accounted for by the Detroit fall meeting. This was originally a Grand Circuit affair, but owing to the trouble that arose between it and the Hartford meeting, it eventually was given independently; but, as it was to all effects and purposes a Grand Circuit meeting, the horses racing there being chiefly those that had raced "all along the line," it was included in the Circuit, as its omission would have left an unfilled gap in the organization.

Studying the footings of the two tables, we discover that this year only 206 races were given, worth $427,788, as against 213 in 1914, that were worth $451,330. However, had it been possible to carry out the Kalamazoo program in full, as well as that at Columbus, the footings in both tables would have been almost equalized. It remains to be said, though, that in 1914 rain at Lexington caused a large portion of the program to be declared off, and, had this also been carried out, the footings for 1914 would still have shown in excess of those of 1915, both in respect to number of races given and amount of money awarded. In this latter regard we may point out that the falling off is largely due to the fact of the reduction in value of a number of the Circuit's leading events. For instance, North Randall, which gave a $5,000 event in 1914, had nothing larger than $3,000 in 1915; Grand Rapids had two $5,000 events last year and only one this; Fort Erie and Pittsburgh gave, between them, over $50,000 worth of races in 1914, while Montreal, which took their place this year, gave but $31,375 worth—this, however, being due to the fact that under Dominion laws the meeting had to be confined to but six days, though extending over two weeks; while Hartford this year cut the Charter Oak stake's value from $10,000 to $5,000. Thus it figures that the average value of the 213 races of 1914 was $2,118 each, while that of the 206 races of 1915 was but $2,076. This is a rather slight difference individually, but worked out to scale, the aggregate reaches a not inconsiderable sum.

As far as contests were concerned, the horses of 1914 appear to have raced harder than did those of 1915. In 1914 there were 773 heats raced in 213 races, an average of 3.62 heats per race, while in 1915 there were 697 heats raced in 206 races, an average of 3.38 heats per race. This result is also borne out by the figures on heat-winners, which we will quote, though they do not appear in the tables above. In 1914 there were 341 heat-winners in 213 races, while in 1915 there were but 314 heat winners in 206 races—showing that the heats were "split" oftener last year. On the other hand, the "man with the red flag" was kept busier this year than last, as but 168 horses were distanced then in 213 races, while in 1915 there were 177 distanced in but 206 races.

It is not, however, any increase in the "clip" that caused the proportionately greater number of horses to be distanced. The column of speed averages shows that 1915 was a trifle behind 1914 in this regard. The figures are astonishingly close considering the immense number of heats—1914 averaging 2:08.51 for 773 heats, while 1915 averaged 2:08.57 for 697 heats. Taking separate meetings, however, the honors go to 1915 by a distinct margin. The fastest average for 1914 was 2:06.90, at Syracuse, for 41 heats, while in 1915, at Grand Rapids, precisely the same number of heats averaged 2:06.71, which is a world's record of its kind. Coming to single heats, we find that on the trotting side this year shows a gain over 1914. The fastest heat raced on the Grand Circuit then was the 2:03¼ of Etawah, at Columbus, while this year Peter Volo raced two consecutive ones in 2:02½, 2:02¾, at Lexington. On the pacing side, however, 1914 has a lead that more than counterbalances this. No heat was paced in a race this year "along the line" faster than the one in 2:00¼, by Directum I., at Detroit, while in 1914 the same speed marvel paced two consecutive ones in 1:58, 2:00, at Columbus.—Horse Review.

MR. BILLINGS AND THE THOROUGHBRED.

There is no man better qualified to speak on the horse and anything pertaining to him than C. K. G. Billings, who owns more championship trotters and pacers than any other man and who has become interested in the racing of thoroughbreds recently, having purchased, in partnership with Frederick Johnson, a dozen head of English yearlings, which reached this country on Wednesday and are now quartered at Belmont Park.

Mr. Billings' early love was the harness horse, and he has a very remarkable breeding stud at Curles Neck Farm, 14 miles from Richmond, Va., where the champion trotting stallion of the world, The Harvester, with a record of 2:01, holds court over a priceless collection of trotting dams, many with records better than 2:10, and having as its bright particular star, Lou Dillon 1:58½, the fastest mare in the world. The produce of this stud is marketed in the fall; they are weaned in an absolutely untrained condition. It is Mr. Billings' plan to have the opportunity for obtaining a world beater open to everybody and when the youngsters go into the ring they are sold on their breeding and individuality, coupled with whatever quality of action they may possess naturally.

In discussing this plan recently the distinguished horseman said: "I started the farm chiefly as a diversion, and if I succeed in breeding good horses I shall be tremendously gratified. It has been my endeavor to start right. The Harvester has all that a sire should have—size, speed, conformation, disposition and breeding—and the mares that have been mated with him are my idea of what trotting dams should be. In having their produce pass to the people at large I aim to benefit the community. If anything sensational develops I can buy the same as anybody else after they are trained."

Mr. Billings takes much pleasure with the champion Uhlan 1:58, which he both rides and drives, and while he has so far used trotters exclusively under the saddle, he confesses to a growing fondness for horses of pure blood. This is most encouraging to his associates in the Jockey Club, who know that he will bring to their deliberations a wealth of knowledge in connection with the horse family at large.

Like many other Americans of great affairs, Mr. Billings is an ardent disciple of the gospel of preparedness and thinks that no matter engaging the attention of the people of the United States at the present time surpasses it in importance. No part of the policy, in his estimation, outweighs that which has to do with the horsing of cavalry and the equipping of the gun and transport service. Speaking in this connection a few days ago he said: "It is imperative that the work of breeding horses for the army should be in the most competent hands possible. The Government's own experiments, which have been limited because of insufficient appropriation, should be broadened—money should not be a consideration at this time—and the work should be carried on under the control and direction of the army which should be competent to pass on the needs of the service much better than a commission of outsiders oftentimes not in sympathy with the movement. Washington is ideally situated for the prosecution of the work as it is in a section abounding in land that would be suitable for the purpose. There are regions in Virginia, with its rich, rolling pastures and spring water that should produce as sound and well furnished horses as any district in the United States."

"How do you regard the thoroughbred as a sire in this connection?" Mr. Billings was asked.

"The thoroughbred sire of proper type is the horse par excellence for this work in the estimation of Continental authorities whose success has made their accomplishment a standard for other countries. Mated with the right kind of mares, and personally I prefer the trotter, they should give satisfaction in a majority of cases. Where the sire is of high strung, excitable type, discretion in the selection of mares should be used. I am of the opinion that many of our thoroughbreds are made nervous and excitable through faulty education. The policy pursued by many trainers is to my mind wrong. Some trainers keep horses hidden away. There must be no noise lest the animal become irritable. To my way of thinking the system prevailing in trotting horse stables is infinitely better. There each horse has his own groom or "swipe" and the animal's education is broader because of the close human companionship. I believe if the thoroughbred was handled from his birth in the same intimate fashion as the trotter, we would have better behaved horses in the paddock and at the barrier and our racing would be benefited tremendously. There would be fewer bad actors and kickers and the percentage of crippled horses would be reduced to a minimum.

"Russia does these things well," continued Mr. Billings. "In that country the favorite hitch is the troika—three horses abreast—usually two mares and a stallion, the entire horse in the middle of the team. There is no noise, no fuss either during the breeding season, or at other times. Stallions and mares are worked in the double teams everywhere. Geldings are few, and the knife is never used on a good horse. When we took Uhlan to Moscow and St. Petersburg, the authorities were amazed to find him a gelding, and one high dignitary asked in thunderous tones who was responsible for the unsexing of the king of trotters. The troika which they presented to me on that occasion consisted of a stallion and two mares, and they were representative of the country both as to disposition and gait."

"Do you think the people of the United States at large appreciate the importance of the horse and what he means to the community?" Mr. Billings was asked.

"I do not," was the response, after a moment's deliberation, "but I believe we are on the eve of a gradual awakening. The horse shows and amateur racing are giving a world of help. Thoroughbred and half-thoroughbred hunters and saddle horses are becoming more and more in demand in large centers of population where the leisure class must be catered to, thus furnishing a market for the products of horse breeding communities. The people at large are thus acquiring at closer range the benefits of racing as exemplified in the thoroughbred and his products. The amateur race meets, such as Piping Rock, are bringing into the sport men who would probably have been less keen under different circumstances."

In conclusion Mr. Billings, who returned from Lexington only a few days ago, was asked about the racing at that point. He pronounced it a great success, and had high praise for Etawah, Peter Volo, Peter Scott, Lee Axworthy and other stallions he saw there.

"They spoke of reducing the stallion record during the meeting, and Volo did trot in 2:02," he said, "but when a horse goes in 2:03 every fraction from there to two minutes is a mighty gap to close."—Rider and Driver.

NEW ZEALAND TROTTING NOTES.

Early Meetings Promising.

That the new season's campaign will soon be in full swing is clearly shown by the fixtures that are advertised to be held during the next four or five weeks. We have already referred to the Auckland Trotting Club's Spring Meeting, set down for October 20 and 23, which is the first trotting fixture of the present season in the North Island, though the Horowhenus Racing Club's Spring Meeting to be held on September 30, which has two trotting events on its Sept. 30 program, will provide owners in the southern portion of that island with an earlier opportunity to give their horses a race. In the South Island the Labor Day holiday is usually taken full advantage of by sportsmen, and on October 25 next, the Kaikoura Trotting Club will hold their annual meetings, while the Greymouth Trotting Club's spring meeting is set down for October 25 and 28. The Kaikoura Trotting Club's fixture will be looked forward to with considerable interest, as the club will, for the first time, be privileged to use the totalisator. The members of the club have displayed much enthusiasm in establishing it on its present foundation, and any success they may achieve next month will encourage them to launch out in the direction of offering stakes that will attract good fields. The Oamaru Trotting Club has made very rapid progress during the past few seasons, and it is fortunate in being so situated that it is able to command support from Canterbury as well as from Otago and Southland. At next month's meeting it is offering a total of 1000 sovs in stakes, and this will prove sufficient inducement to insure good fields and interesting racing. The Greymouth Trotting Club's spring meeting is the first of the season's fixtures on the West Coast of the South Island, and this progressive club may confidently look forward to an auspicious opening next month. A considerable amount of enterprise has been displayed by the executive in increasing the stakes under present conditions, and that enterprise will not go unrewarded. After the meetings we have referred to above have been disposed of, all attention will be centered on the New Zealand Metropolitan Trotting Club's spring meeting on November 9, 11 and 12, which is, of course, the most important gathering held during the season in the Dominion.

Sires of the Season — Croesus.

The success of the descendants of that remarkable sire Rothschild, both on the race track and at the stud, has been so firmly established as to have become one of the most striking features of the history of trotting in the Dominion. The sons of Rothschild have proved themselves not only endowed with speed and stamina in their contests on the track, but at the stud they have shown themselves able to transmit their inherited excellence to their progeny, and the family's record is one that is marked by its genuine merit. The subject of this notice, Mr. H. W. Kitchingham's stallion Croesus, by Rothschild—Palm Bell, possesses in a marked degree the sterling qualities of his family, and he promises to gain for it further distinction. He is a handsome, well-built chestnut, standing 15.3, with good bone and substance, and being now only ten years old, he should have many years of usefulness before him. Croesus was himself a good performer during his racing career, and his records of 2:19 and 4:46 show that he was possesed of pace, while his pedigree combines strains of rare excellence. The headlines of his pedigree read:—

Sire: Rothschild by Childe Harold—Bell Briggs. Childe Harold by Harold (son of Hambletonian and Enchantress) from Young Portia, by Mambrino Chief —Portia. Belle Briggs, by James Lick (son of Homer and Lena Lenape) from a mare by John Nelson.

Dam: Balm Bell by Brookholm—Puella. Brookholm, by Blackwood Abdallah (son of Homer and Blackwood mare) from Watlass, by Berlin—Messenger Maid. Puella, by Berlin (son of Woodford's Mambrino and Sue Dudley) from Woodburn Maid, by Stirling—Brown Bread.

Croesus has already demonstrated his ability to sire high-class stock, and I hear very good accounts of some of his progeny. One of his fillies gave promise of exceptional brilliance, for when only about sixteen months old she was stepping furlongs at a 2:16 gait, and if she fulfills her early promise she should turn out a great advertisement for her sire. Rothschild's fame as a sire of horses that not only have plenty of pace, but are endowed with great stamina, is well known to all who take the slightest interest in trotting. His list of winners is of truly formidable dimensions, and his stock have won over practically all distances. It would be impossible to give anything like a complete list of his winning representatives, but one or two of the most brilliant may be mentioned. They include such high-class performers as Emmeline (2:08 3-5 and 4:30), Dan Patch (2:09 3-5), Revenue (2:11 2-5), Almont (2:21¼, and holder of the world's record for three miles, 6.50), Belmont M. (2:13 2-5), Sal Tasker (2:16 and 2:20 as a two-year-old). Apart from his merit as a sire of winners, Rothschild has established a line that is breeding on with pronounced success, and his sons have shown themselves sires of marked individuality and potency. Bred on such lines as he is, Croesus may be depended upon to continue the family success. Palm Bell, the dam of Croesus, is a daughter of Puella, the dam of Almont and Belmont M., and Puella's full-sister Fraulein is known as an exceptional brood mare, having produced the famous Fritz and such other speedy horses as Franz, Frederick, and The Heir. Palm Bell's sire, Brookholm, is a full brother to Brooklyn, who was well known throughout the Dominion some years ago as the holder of the mile and a half and two mile records—New Zealand Referee.

CATTLE SHOW CHAMPIONS.

The cattle show at the P.-P. I. E. which came to a close last week was purely and simply a western affair and, unfortunately, not an absolutely "representative show" at that. Not that the quality was in any way lacking, as the various individuals were of excellent type in every way, but the event lacked the prestige that would have accrued to it had the names of many famous establishments, conspicuous by their absence, been included in the roster of exhibitors. Righ up to the last possible moment the promoters of the affair insisted that eastern conditions were sufficiently alleviated to permit of admission of animals from certain portions of the country upon inspection by the state veterinarian, and as not one vet in steen hundred is competent to pass upon hoof and mouth troubles, as we have had so amply proven at such a great expense, California breeders announced their intention of safeguarding their interests by staying at home. At the last moment the bars were put up, but too late for many of our leading establishments to make proper preparation for participating in the show. In some classes there were entries from the farms recognized as the coast's foremost plants of their kind, and the quality displayed throughout spoke eloquently of the high degree of excellence attained by coast breeders in general. The championship awards follow:

BEEF CATTLE.

SHORTHORNS.

Section 13—Shorthorn Senior Champion Bull: Scottish Baron, A. Chalmers, Forest Grove, Oregon.
Section 14—Shorthorn Reserve Senior Champion Bull: Snow King, Allen Cattle Co., Colorado Springs, Colo.
Section 15—Shorthorn Junior Champion Bull: Bobbie Burns, Hopland Stock Farm, Hopland, Cal.
Section 16—Shorthorn Reserve Junior Champion Bull: Pacheco Lad LXVII., Pacheco Cattle Co., Hollister, Cal.
Section 17—Shorthorn Senior Champion Cow or Heifer: Snow Girl's Queen, Hopland Stock Farm.
Section 18—Shorthorn Reserve Senior Champion Cow or Heiger: Fork Branch Mildred X., A. Chalmers.
Section 19—Shorthorn Junior Champion Heifer: Belle Cumberland, Allen Cattle Co.
Section 20—Shorthorn Reserve Junior Champion Heifer: Lavender Maid, Allen Cattle Co.
Section 21—Shorthorn Grand Champion Bull: Bobbie Burns, Hopland Stock Farm.
Section 22—Shorthorn Reserve Grand Champion Bull: Scottish Baron, A. Chalmers.
Section 23—Shorthorn Grand Champion Cow or Heifer: Belle Cumberland, Allen Cattle Co.
Section 24—Shorthorn Reserve Grand Champion Cow or Heifer: Snow Girl's Queen, Hopland Stock Farm.
Section 30—Premier Championship for Breeder: Awarded to Allen Cattle Co.
Section 31 — Premier Championship for Exhibitor: Awarded to Allen Cattle Co.

HEREFORD.

Section 13—Hereford Senior Champion Bull: Gay Lad VIII., Geo. Chandler, Baker, Oregon.
Section 14—Hereford Reserve Senior Champion Bull: New Era, Geo. Chandler.
Section 15—Hereford Junior Champion Bull: Debonair 42, Geo. Chandler.
Section 16—Hereford Reserve Junior Champion Bull: Hopeful Prince II., University California, Davis, Cal.
Section 17—Hereford Senior Champion Cow or Heifer: Omycam, Geo. Chandler.
Section 18—Hereford Reserve Senior Champion Cow or Heifer: Harris Princess CCIX., Geo. Chandler.
Section 19—Hereford Junior Champion Heifer: Standard's Lady, Geo. Chandler.
Section 20—Hereford Reserve Junior Champion Heifer: New Lass, Geo. Chandler.
Section 21—Hereford Grand Champion Bull: Debonair 42, Geo. Chandler.
Section 22—Hereford Reserve Grand Champion Bull: Hopeful Prince II., University of California.
Section 23—Hereford Grand Champion Cow or Heifer: Omycam, Geo. Chandler.
Section 24—Hereford Reserve Grand Champion Cow or Heifer: Standard's Lady, Geo. Chandler.
Section 30—Hereford Premier Championship for Breeder: Awarded to Geo. Chandler.
Section 31—Hereford Premier Championship for Exhibitor: Awarded to Geo. Chandler.
Section 42—Champion Steer, Spayed or Martin Heifer: California Choice 2nd, University of California.
Section 43—Champion Steer, Spayed or Martin Heifer: California King, University of California.

ABERDEEN ANGUS.

Section 43—Champion Steer, Spayed or Martin Heifer: Sunset, Western Meat Co., San Francisco.
Section 6—Grand Champion, Steer or Heifer: U. C. Jock, University of California.
Section 7—Reserve Grand Champion Steer or Heifer: California, King, University of California.
Section 15—Junior Champion Bull: Blackcapon, University of California.
Section 21—Grand Champion Bull: Blackcapon, University of California.
Section 37—Champion Steer, Spayed or Martin Heifer, any age: U. C. Jock, University of California.

RED POLLED.

Section 13—Senior Champion Red Polled Bull: Lordly, F. H. Porter, Halsey, Oregon.
Section 14—Reserve Senior Champion Red Polled Bull: Crobat, R. R. Cartwright, Angels Camp, Cal.
Section 15—Junior Champion Red Polled Bull: Boblett, R. R. Cartwright.
Section 16—Reserve Junior Champion Red Polled Bull: Jester, F. H. Porter.
Section 17—Senior Champion Red Polled Cow or Heifer: Pansy, F. H. Porter.
Section 18—Reserve Senior Champion Red Polled Cow or Heifer: Laura Davyson, F. H. Porter.
Section 19—Junior Champion Red Polled Heifer: Mayette, F. H. Porter.
Section 20—Reserve Junior Champion Red Polled Heifer: Maple Leaf, F. H. Porter.
Section 21—Grand Champion Red Polled Bull: Lordly, F. H. Porter.
Section 22—Reserve Grand Champion Red Polled Bull: Boblett, R. R. Cartwright.
Section 23—Grand Champion Cow or Heifer: Pansy, F. H. Porter.
Section 24—Reserve Grand Champion Cow or Heifer: Mayette, F. H. Porter.
Section 31—Premier Championship for Breeder: Awarded to F. H. Porter.
Section 32 — Premier Championship for Exhibitor: Awarded to F. H. Porter.

DAIRY CATTLE.

JERSEY.

Section 23—Senior Champion Bull: Golden Fern's Noble Jr., G. G. Hewitt, Monmouth, Oregon.
Section 24—Reserve Senior Champion Bull: Altama Interest, Guy H. Miller, Modesto, Cal.
Section 25—Junior Champion Bull: Fancy's Raleigh, H. West, Scappoose, Oregon.
Section 26—Reserve Junior Champion Bull: Onoto's Prince of S. B., H. West.
Section 27—Senior Champion Cow: Nashville Susie, F. E. Lynn, Perrydale, Oregon.
Section 28—Reserve Senior Champion Cow: Imp. Great Pride, H. West.
Section 29—Junior Champion Cow: Cotillon's Sunny Maid, H. West.
Section 30—Reserve Junior Champion Cow: Cowslip's Financial Maid, Clifford F. Reid, Portland, Oregon.
Section 31—Grand Champion Bull: Fancy's Raleigh, H. West.
Section 32—Grand Champion Cow: Nashville Susie, F. E. Lynn.
Section 33—Premier Championship for Breeder: Awarded to H. West.
Section 34 — Premier Championship for Exhibitor: Awarded to H. West.

AYRSHIRE.

Section 23—Senior Champion Bull: My Beuchan Peter Pan, J. W. Clise, Redmond, Wash.
Section 24—Reserve Senior Champion Bull: Willowmoor Robin Hood 31st, P. W. Clise.
Section 25—Junior Champion Bull: Willowmoor Peter Pan 26th, J. W. Clise.
Section 26—Reserve Junior Champion Bull: Willowmoor Robin Hood 18th, J. W. Clise.
Section 27—Senior Champion Cow: Old Graitney Queen 4th, J. W. Clise.
Section 28—Reserve Senior Champion Cow: Lily of Willowmoor, J. W. Clise.
Section 29—Junior Champion Cow: Willowmoor Woodbine 2nd, J. W. Clise.
Section 30—Reserve Junior Champion Cow: Willowmoor Lucy, J. W. Clise.
Section 31—Grand Champion Bull: My Beuchan Peter Pan, J. W. Clise.
Section 32—Grand Champion Cow: Old Graitney Queen 4th, J. W. Clise.
Section 33—Premier Championship for Breeder: Awarded to J. W. Clise.
Section 34 — Premier Championship for Exhibitor: Awarded to J. W. Clise.

GUERNSEY.

Section 23—Senior Champion Bull: Imp. Itchen May King, W. H. Dupee, Santee, Cal.
Section 24—Reserve Senior Champion Bull: Yeoman's King, L. H. Albertson, Santa Clara, Cal.
Section 25—Junior Champion Bull: Imp. Ricardo of Edgemoor, W. H. Dupee.
Section 26—Reserve Junior Champion Bull: Fermain's Iowa Boy of the Oaks, D. H. Looney, Jefferson, Oregon.
Section 27—Senior Champion Cow: Imp. Itchen Wood Sorrel, W. H. Dupee.
Section 28—Reserve Senior Champion Cow: Marguerite of Pinehurst 2nd, W. H. Dupee.
Section 29—Junior Champion Cow: Veda of Chicona, A. L. Gile, Chinook, Wash.
Section 30—Reserve Junior Champion Cow: Polly of Chicona, A. L. Gile.
Section 31—Grand Champion Bull: Imp. Itchen May King, W. H. Dupee.
Section 32—Grand Champion Cow: Imp. Itchen Wood Sorrel, W. H. Dupee.
Section 33—Premier Championship for Breeder: Awarded to D. H. Looney.
Section 34 — Premier Championship for Exhibitor: Awarded to W. H. Dupee.

HOLSTEIN-FRIESIANS.

Section 23—Senior Champion Bull: Hazelwood Ormsby Posch, John L. Smith, Spokane, Wash.
Section 24—Reserve Senior Champion Bull: Hazelwood Sir Ormsby, John L. Smith.
Section 25—Junior Champion Bull: Sir Fayne Dot Cornucopia, Wm. Bishop, Chimacum, Wash.
Section 26—Reserve Junior Champion Bull: Sir Chimacum Wayne Pontiac, Wm. Bishop.
Section 27—Senior Champion Cow: Bonnie Ormsby Lass, Wm. Bishop.
Section 28—Reserve Senior Champion Cow: Aggie Nena Cornucopia, Wm. Bishop.
Section 29—Junior Champion Cow: Riverview Chloe Mechtilde, Wm. Bishop.
Section 30—Reserve Junior Champion Cow: Clothilde Homestead Ollie 2nd, Carnation Stock Farm, Seattle, Wash.
Section 31—Grand Champion Bull: Hazelwood Ormsby Posch, John L. Smith.
Section 32—Grand Champion Cow: Bonnie Ormsby Lass, Wm. Bishop.

[Continued on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

BEFORE THE MUIR TRAIL.

The "Muir Trail" is destined to become a scenic roadway through the California Alps that will have an international reputation in more ways than one. The following article by Chester H. Rowell was published in the Fresno Republican and vividly describes a region renowned for Sierra panoramic ensemble and a majestic mountain territory that will ere long have its wonders listed in the itinerary of thousands of lovers of nature and mountain grandeur. The story is of so much interest that we pass the good thing along:

The appropriation by the last legislature of $10,000, to open a high-mountain route from Yosemite to Kings River canyon, to be known as the "Muir trail," gives something more than a personal interest to a recent trip of a party of Fresnans over the proposed route of that trail.

Route of the Trail.—The trail project itself is the outcome of a long and interesting history of mountaineering effort. For many years, endeavors have been made to block out a practicable high route between California's two most famous mountain valleys. The intervening region had been explored piecemeal by John Muir, and by the pioneer sheep men, and the mountains had been crossed many times, by the available passes, from west to east, but the north and south route, down the crest, and therefore transverse to the principal valleys, was regarded as too rough for pack animals and too long for a knapsack party to carry its own provisions. Theodore Solomons made several efforts to traverse the route on foot, but was always compelled to desist for lack of provisions. However, he added much to the knowledge of the country. Finally, in 1898, Prof. J. N. Le Conte worked out a partly high-mountain route, which was the only one known for ten years, and is practically the only one ever used since. This route follows the high mountains from Yosemite as far as the Goddard country, and then turns westward and downward, into the middle-mountain altitudes, through Hell-for-sure and Toonemah passes and the Tehipite country, and then returns to the higher mountains and enters Kings River canyon, or even continues into the Kern river and Mt. Whitney region. Even this trip is rough enough, as may be judged by the names of the principal passes. "Hell-for-sure" needs no translation and "Toonemah" is said to be Chinese for an even stronger expression. But as compared to the real high-mountain route, over which the Muir trail is to run, these picturesquely named passes are boulevards.

Muir Pass.—The key to the difference between the high-mountain route and the more familiar middle-mountain one is the Goddard divide, now named the Muir pass, which is said to have been first crossed by Basque sheepherders in 1877, was crossed in 1907 early in the summer, in the snow, by the geological survey, by Le Conte, in 1908, by McGuire of Burr valley, in 1910, and by our party this summer. So far as we could learn, or find any traces of, these are the only times the pass has been crosser with animals, and our party was the first to cross it with any considerable train of animals. LeConte had three mules and McGuire two burros. We had six mules and two horses. LeConte estimated that Grouse valley, into which Muir pass leads, had been visited by about one party in three years, but nearly all of these were from the Mono side of the mountains. There is a trail over the Bishop pass into the valley from the east, but there is no trail nor established pass from either the north, south or west. Yet, within another year, this wonderful little-known valley, the key to the whole high-mountain route, will be made accessible to anyone who can ride a horse, sleep on the ground and eat camp fare. It is destined, no doubt, to become as famous, among high-mountain valleys, as Yosemite is among low-mountain valleys.

It was by this route, passing east instead of west of the Goddard range, that LeConte first pioneered the high-mountain route, in 1908. It is the way the Muir trail is to go; and the way our party undertook to go this summer, in advance of the trail.

The High Country.—A party composed of M. B. Harris, his son, Ronald Harris, Clayton Chandler and myself, with Fred Bonds and Steve Farley as packer and cook, left Yosemite August 1, and spent the month of August making the trip "before the Muir trail." We had six mules to carry the packs, and riding horses for the cook and packer. The rest of the party walked the entire distance. From Yosemite to Huntington Lodge, where we finally emerged, we walked a horizontal distance, by the map, of some 250 miles, and vertical distances totaling about 100,000 feet, or nearly twenty miles up and down. We did no peak climbing, since it was a touring rather than a climbing party, but going north and south, across the line of the canyons, there are so many high passes, almost equal to peaks, separating the various river-drainage basins, that the actual vertical distance covered was almost equal to a peak-climbing expedition.

We were in the high country all the time. After leaving Yosemite we came as low as 7000 feet only once, at Fish valley, which is 6,500 feet high. With this exception the average altitude of our night camps, which were usually in the bottom of a valley and at the lowest point of the day's trip, was over 9,000 feet, or higher than the top of Half Dome, at Yesemite. The average high point was 11,000 feet, so the general average elevation of the trip was fully 10,000 feet, or as high as the top of Cloud's Rest. The two highest camps were at Lake Wanda, getting into Grouse valley, and Bishop pass, getting out, both 11,500 feet. The highest pass was Glacier pass, over Parker mountain, 12,500 feet. Altogether we crossed twelve mountain passes, several of them from 11,000 to 12,000 feet, and we were all the time in the midst of great peaks, from 13,000 to over 14,000 feet high. Practically the entire route was above the forest belt of pines and firs, and the camps were usually near the upper edge of the tamarack belt. We were much of every day above the tree line, even of tamaracks, and twice we camped above it. There was frost on the ground and on our blankets every night, and we were often in the midst of snow. This in central California, in August! Needless to say, the scenery, at such altitudes in such a region, is of indescribable grandeur. In fact, when the route is opened to tourist travel, it will stand without a rival, as incomparably the most scenic mountain trip in America.

The route led from Yosemite by Tenaya Lake, Tuolumne Meadows and the Devil's Post Pile, Fish valley, Cascade Meadows, at the head of Fish creek, down the North fork of Mono creek to Vermillion valley, Upper Bear creek, Blaney's Meadows, Evolution creek and Muir pass, Grouse valley, Cataract creek and Observation pass. From here we should have gone by Carthage creek and Bubbs creek to Kings River canyon, but for reasons to be subsequently described were obliged to retrace our steps by Bishop pass to the Mono country, back over Piute pass to Blaney's Meadows again, and straight across the Sierras to Huntington Lodge. The passes crossed were Glacier, Gem, Agnews, Mammoth, Silver, Sheldon, Muir, Bishop, Piute and Hot Springs. We also climbed Observation pass ourselves but did not take our animals over it—whereby hangs the rest of the tale.

Other Trails.—I will not attempt a technical account of the route, as this article is intended for the general reader. But a few observations on one or two points may be permitted for the benefit of those familiar with the country. We took the more easterly route from Yosemite over Parker and Glacier passes, instead of the more westerly one over Donahoo pass, outlined by LeConte; and having all been over both passes, we were unanimous in preferring the eastern route. The Parker pass route is higher and offers a view down the great gorges into the Mono plain on the east side of the mountains. It does not go quite so close to Mt. Lyell, but the general view of the great range of Lyell and Ritter is quite as good. A very great practical advantage is that by the Parker pass route you do not get lost. It is easy to lose the way over Donahoo pass, and everybody who attempts to go over Donahoo pass by way of Thousand Island Lake to the Agnews trail gets lost. Over Glacier pass, on the other hand, the way is unmistakable.

Going from Vermillion valley to Blaney's Meadows, the usual route by way of Jackass Meadows goes into the lower country. The Upper Bear creek trail over Seldon pass, which we took, is far more picturesque, but it is easy to lose the trail at the point where the two divide, unless one watches very carefully for the signs which the forest service has placed on the trees. Except for these points, the northern part of the rout is probably already reasonably familiar to lovers of the mountains. Some of the trails are rough, but most of them are sufficiently well marked to leave little danger of getting badly lost. The scenery in this part of the route is wonderful, especially the near view of the great range of which Lyell, Ritter, Banner Peak, and the Minarets are dominant points. But even this more familiar scenry is itself far out-classed by the less known and rougher country farther south.

Sierra Club Girls.—At Tuolumne Meadows, the Sierra Club had established its permanent camp, and as long as we were within a few days' walking distance of this camp we were constantly meeting parties of Sierra Club walkers, mostly women, whose speed and exploits were so remarkable that the term "Sierra Club Girl" soon became synonymous to us with any feat of which we regarded ourselves incapable. A couple of weeks before we arrived, one of these Sierra Club girls, Miss Elizabeth Winter, had slid down several hundred feet of the granite face of Lambert Dome, to the great and extensive damage of her integument and subcutaneous tissue, but before we had been out two days we met the herone of this adventure tramping across the country on a seven days' walking trip, leading the entire party at a speed which none of us would have cared to emulate. Miss Winter may not know it, but after this exploit the packers working for the Sierra Club changed her name and she was subsequently known to them as "Lambert Lizzie." One night, sleeping on the ground by the Mono trail, I was awakened in what seemed the middle of the night by a shout, and looking up saw another Sierra Club girl standing on the trail. A second look revealed the fact that her husband was with her. They had come up that day from somewhere in the Mono country, had climbed Bloody canyon, one of the most difficult trails in the mountains, in the dark, and now thought themselves very near home, since they had only ten miles more of easy trail before reaching the home camp in Tuolumne Meadows. It was then 10 o'clock at night, and they hoped to reach camp by two o'clock in the morning. The next day they were going on 21 miles to Yosemite. They refused all help and their only motive in waking us up was fear that we might be belated members of their own party who might need assistance. When we made out with the field glasses the cairn of rocks on the summit of Mt. Ritter, we immediately attributed its construction to more Sierra Club girls, but as a matter of fact we understand it was built by John Muir. All of us had long been familiar with the fact that the modern woman is the intellectual, educational and moral superior of man, but here was a demonstration that she is rapidly becoming the physical superior also.

The Mountain Mule.—As I have already suggested, the key to the whole high-mountain route is the central portion of it east of Goddard, in which there are no trails and no recognized passes. And it may be added that the key to this, or any other mountain situation, is his majesty, the mountain mule. One may indeed make short trips in the Sierras on foot, carrying on his back an eiderdown sleeping bag and a few days' rations, but for long touring no man can carry his own bedding and food, and the tourist therefore becomes absolutely dependent on the pack mule or burro. It is curious how one comes to identify one's self with his own mules on such a trip. For instance, the council of war in which we decided that "we" could not get up Observation pass was held at the top of that pass, just after we had ourselves climbed it. What we meant by "we" was not the six able-bodied men of the party, but "Sugar Pine," our most picturesque but least capable mule, and "Old Blue," our bell horse. What "Old Blue" and "Sugar Pine" could not do was impossible for "us" even though at that moment in our personal capacities we had just accomplished it.

This dependence on the mule arouses an interest which leads also to much philosophical and psychological observation. It is, for instance, curious to watch the pathetic humility with which an intelligent mule will follow in the footsteps of a stupid horse. The fiction that the horse is an intelligent animal is the mere product of human egotism. We regard the horse as intelligent because he is stupid enough to let us do his thinking for him. The mule is in fact a far more intelligent beast, and he inherits his intelligence from his paternal ancestor, the jackass, whose name ought to be a synonym, not of stubborn stupidity, but of self-reliant resourcefulness and intelligence. If other animals than man are given to comparative speculations, doubtless they reach like conclusions. A horse will follow a man, and a mule will not. Therefore the man regards the horse as intelligent. The mule will follow a horse, while a dog will not. Therefore, if the horse were intelligent enough to notice such things, it would doubtless regard the mule as more intelligent than the dog. Sheep will follow a goat, but a burro will not. Therefore, the goat which, unlike the horse, does have a mind with which to reach his conclusions, doubtless concludes that the sheep are intelligent and that the burro is not. But all of these conclusions, including the human estimate of the horse, are fallacies based on the mere egotism of the observer.

The mule's deference to the horse is an even more pathetic fallacy, but is one from which human beings are likewise not exempt. Doubtless the real reason is that the mule never grows up, but remains all its life a colt, with the colt's instinct to follow. But it is also significant that the horse is well-born and high-stepping, therefore an aristocrat, while the mule is an incorrigible plebeian. You can not get a mule to strut or prance even on dress parade. So, just as the common people of Europe allow the aristocrats to lead them into ways which they would be far too intelligent to choose for themselves, so a mountain-wise mule will follow a stupid horse into a blunder which the mule would never make of its own initiative. And human beings, especially those who are plebeians themselves and therefore have an instinctive reverence for any sort of an aristocrat, uniformly speak of the horse in terms of affection and respect, while no mule is ever treated by anybody with anything but contempt and contumely. It is a social injustice which the plebeian, whether in the human, the equine or the asinine world, imposes on himself, and there is, therefore, apparently no remedy for it.

[To be continued in next issue.]

Marked Salmon.—State Deputy Fish and Game Commissioner Ray Heacock caught a marked salmon at the mouth of the San Lorenzo last week. It was deformed, weight about 14 pounds, and was five years old. It was marked in the spring of 1911 at the spawning beds at Scotts creek.

AN ENGLISH FANCIER ON AMERICAN DOGS.

R. Ward Binks, the noted animal painter, who returned to England after an extended visit to this country, has written a letter to Dogs' Monthly, published in England, on his views of the dogs seen while in America.

"The shows of America," says Mr. Binks, "are in nearly all respects carried out in the same manner. You see the same old faces, hear the same old barks, the usual surprises coming from the judging ring, and the same determination to try again—a characteristic feature which our American cousins possess in no small degree. One must remember that prize money at the majority of shows is an absent quantity, and a piece of ribbon or a rosette is the only reward; red for first, blue for second, yellow third and white reserve. Thus many owners of well-known kennels could easily provide themselves with coats of many colors which would have made the patriarchs of old envious. In detailing my impressions of the dogs I met I saw many familiar faces which previously ruled the roost at our leading shows in England, and with few exceptions they usually carry away the coveted piece of merchandise—a tribute which we in England ought to be proud of.

"I was particularly impressed by the interest shown in all classes of terriers, which I think hold popular favor at the present time, with wire-haired fox terriers leading the way. The team of which George W. Quintard is the owner and is so ably managed by Charlie Button, is really great. With Wire Boy of Paignton, Champion Raby Dazzler, Champion Holmbury Reve and that great bitch Champion Matford Vic, it constitutes a team almost impossible to beat. Other prominent kennels are very strong in this fascinating breed. To mention only the Vickery champions, with Champion Vickery Greenbank Selection and Champion Gypsy Moth, and a team of dogs owned by Mrs. Roy Rainey of Huntington, is sure proof that the future of the wire is certain for some considerable time, and history will no doubt be made in the world of wires by the collection of dogs which our American cousins have got together.

"Airedales are also very much to the fore at the present time. Many specimens I recognized, among them Champion Ryburn Swell, looking fit as ever. Many other fine dogs grace the boards, some of whom one would like to take home. Sealyham terriers are rising in public favor, coming on by leaps and bounds, and a great future is in store for this game and extremely active little terrier. Champion Ivo Caradoc and Temperance, a recently imported dog of great merit, share the laurels, and competition is very keen when these two meet.

"West White Highlands hold the hearts of many sportsmen in America, and the reason for this is obvious. There are many excellent specimens among W. W. Highland only exceeded by the good looks and sportsmanship of the ladies who own them, and who figure so prominently in this breed.

"Irish terriers, along with bull and Manchester terriers, are not so popular at the present time; nevertheless, they hold a firm place in all the leading shows.

"Coming to the larger bredes, Great Danes, old English sheepdogs and German sheepdogs stand most favorably in the estimation of fanciers and lovers of the larger breeds, and clases are usually very large and interesting.

"It was my privilege to be shown the kennel of Tyler Morse, which contains a most wonderful collection of old English sheepdogs. A large and unique trophy room is of special interest to the visitor, as well as a reminder to the owner of the prowess of the inmates of this up-to-date and wonderful kennel.

"One noticeable feature, to my mind, was the small classes of collies, St. Bernards and mastiffs, and the gentlemen judges usually have an easy time in disposing of the awards in these classes. English and Irish setters, with a possible mention of Gordons, are exceedingly strong, and some of them have no doubt come from our leading kennels in these breeds.

"Coming to bulldogs, my impressions are not quite so happy. The great dogs which have left these shores from time to time have failed to produce as American breds the type which we all long for. The bulldog must have something else other than head properties, or the ideal will never be reached. I saw many good-headed dogs, also bitches, who failed in body outline and balance. Irrespective of ownership, and giving here an unbiased opinion of the dogs I saw, Ch. Strathtay Prince Albert is the best all-around dog I met, he coming nearer to the type which is admittedly the one we are seeking.

A little dog that impressed me very much was Roslea Saxtone (American bred), modeled very much on the same lines as Prince Albert and incidentally came near to beating the Chicago dog at the great Westminster show, and which but for an unfortunate circumstance would probably have made history in American-bred dogs. In bitches they are very strong, with Champion Crissie Denton, Champion Oak Nana and many others with the coveted 'champion' prefix. I consider the first named the greatest bitch I have ever seen, possessing the most wonderful head extant, and she with Nana, her kennel companion, usually clears the boards. Credit is due in this kennel for the fine condition of all the inmates to the untiring efforts of Edgar Frowde, a one-time successful fancier in the old country. One could enumerate many pleasing instances of the same devotion given to this noble and faithful breed. One must not omit the keenness that exists in the smaller and very fashionable French bulldogs, which breed without doubt is stronger here than anywhere, and the specimens which several kennels contain are unbeatable for type, quality and character. A very smart and popular dog in America is the Boston terrier, and but for existing conditions I would surely have brought one back with me. It was not my privilege to visit many kennels of toys, nevertheless the country contains many stars of the first magnitude, especially in Pekes and Poms, and the classes in these breeds are usually large, and competition is very keen among the lady competitors, who often, by the way, are very numerous and often show tiptop dogs.

"In conclusion, a grateful recognition on my part is due to the generosity and hospitality shown me everywhere while in America, and for the encouragement of breeders on this side I would say that keeping the type, the production of first-class stock and dead straight business methods will always find a ready sale in the greatest market in the world."

QUEENSBORO KENNEL CLUB SHOW.

Repeating his victory at the Westminster Kennel Club Show last February, George W. Quintard's champion wirehaired fox terrier Wireboy of Paignton captured the highest award at the first open show of the Queensboro Kennel Club, held Oct. 23 at Schuetzen Park, Astoria, L. I., which marked the close of the open-air exhibition for 1915. The winning dog was in splendid coat and was shown to advantage. The award for the best in the opposite sex went to William M. Jones' Airedale terrier Crewe So Preferred, which had previously captured the blue ribbon in the regular Airedale class.

Although the show was not sanctioned by the American Kennel Club, it was one of the most successful of the season's open-air exhibitions, and the support given to the efforts of the members of the Executive Committee was such as to warrant an application for membership in the American Kennel Club. Nearly 300 dogs were benched in 457 classes. No points were to be allowed winners, and ribbons were the sole awards in the regular classes, although the silver medals went to the "winners," and a number of trophies were presented for the special and classified divisions.

The judging began early in the morning and dusk settled over the exhibition grounds before the last of the unclassified specials had been passed upon. Many of the classes were well filled, although a number of the dogs received awards without competitions owing to the limited number of entries in certain breeds. The judging was impartial, and, on the whole, satisfactory. Here and there were found disgruntled exhibitors who failed to secure blue ribbons for their pets, but in this respect the show was no different from the usual bench displays.

Airedales were among the most popular breeds shown, and in this competition the winner in dogs was M. S. Baldwin's Leed's Performer, an importation which was shown for the first time, although it has been in this country for two years. Mr. Baldwin purchased Leed's Performer two weeks ago, which scored easily in dogs and eventually beat the winning bitch Crewe So Preferred, the best bitch in the show. Crewe So Preferred was beaten by a dog which was not in as good condition, but was better in head and front.

The bull terriers were mostly of the old fighting type, being too short and thick in head. The best, however, was Dr. L. A. Van Kleeck's Lone Cedar Bill, and Charles Funk's Nala. The former was longer in head and cleaner in shoulder and had little difficulty in scoring first. There was plenty of quality in the French bulldog display. F. Gordon's Monsieur D'Aubry and Miss Alberdina Vieweg's Ninnette being the best in their respective classes. Both, however, were beaten for the prize for the best in the breed, as the judge selected Miss Elsie McCormack's Sir Dandy Pratt, which was entered in the breeder's class and could not compete in the "winners" of the regular classes. Monsieur D'Aubry is a nice French bulldog, but lacks the pronounced type of Sir Dandy Pratt. Quite a few of the onlookers favored the winner of the bitches' class for the best of the breed.

In the foxterrier class Ridgewood Envoy, exhibited by Robert F. McGinness, is a useful sort of terrier, but a trifle too big, although quite smart. There was little question as to the best of the breed where Wireboy of Paignton opposed Ridgewood Envoy. Mr. Quintard's entry was in wonderful shape. There was an excellent showing of Sealyham terriers and the success of the American-bred Locust Lane Cricket, from the Locust Lane Kennels, over the imported Hadley Nut which was first in dogs. After the victory Locust Lane Cricket, which was successful at the Philadelphia and Newport shows, was sold for a big price. The winner is short and deep in body and displayed plenty of power.

Bulldogs led both in general interest and numbers, nearly fifty dogs of this breed being benched. The choice in dogs fell to Reuben Clark's little fawn, Dallas Magnet, with Mrs. C. N. Platt's Baron Teesdale in reserve. Howard R. Slaight's Marchioness Temple and Newstone Kennel's Lady Seaton were first and second respectively in the winner's class. Marchioness Temple was beaten in a previous class by Mrs. Darwin S. Hudson's Flagon.

Drink Jackson's Napa Soda.

ROD AND GUN NOTES.

Northern ducks are beginning to arrive in th northern part of the State. Deputy Game Warde L. J. Warren of Taylorsville, in his report to the Fis and Game Commission states that all species ar coming in except the widgeon.

In the Sutter basin and in district 108 water fow are reported to be very scarce, according to Deput J. W. Williams.

Both quail and quail hunters are numerous in Yol county and back toward the hills, according to th advices forwarded to Sacramento by Deputy R. I Sinkey of Woodland. This officer reports one arres and fine of $50 imposed for killing a deer out o season.

W. J. Greene, deputy working out of Sacramento tells of numerous coveys of quail not far from town

T. W. Birmingham of Red Bluff also reports tha the little feathered dodgers are numerous, particu larly in the vicinity of Proberta. The deputy ha been devoting his time of late to watching for the illegal killing of deer, but so far has not had to make any arrests among the settlers, perhaps for the rea son that the animals are still high up in the hills out of reach of the hunters. Birmingham of late has had to make some arrests for illegal fishing. Othe deputies have been chasing fishermen who have been violating the law, particularly those catching salmon the season for which closed September 15. The ma jority of arrests reported, however, are for hunting without a license.

* * *

Round about the bay counties duck hunting marshes, generally speaking, the average of sport has been good. The birds, however, are beginning to get a bit wary and keep pretty well up in the air. During the recent pleasant days the bay waters were the refuge of big rafts of ducks. A rain and spell of stormy weather will improve conditions now quite a bit.

The Suisun marsh gunners have had a splendid average of good duck shooting so far this season. W. W. Richards, Horace Orear, George W. Emmons and Ben Woolner of Oakland have enjoyed limit trips every time out on the big overflow pond at Green Lodge preserve.

Frank Maskey, Captain A. W. Du Bray, John Bourdette, Judge Ellis Johnson and other visitors to the Sunrise preserve have found ducks numerous every trip. At the Jacksnipe preserve, W. C. Murdoch, Bob Murdoch and R. H. Gatley have enjoyed limit shoots. Quite a few canvasback ducks have been shot on the Suisun marshes thus early this season.

Over on Hammond island, in the Grizzly slough district, Chiquita Gun Club members—A. G. Hebgen, F. F. Finch, Fred Kewell and O. B. Drusick—have been located in blinds where limits of fat teal, sprig and mallard were easy to get. Members of a nearby gun club also had a cut-in on good shooting. Geese are coming into that district daily in big flocks. The bane of that section is millions of mosquitoes. H. C. Peet and George Thomas found limit possibilities during a recent trip to duck ponds in the marsh above Vallejo.

Fair duck shooting has prevailed in Tomales bay, sprig being most in evidence, with a few mallard and teal on the side. Near Marshall's and Inverness a number of independent hunters have gathered fair bags the past fortnight.

A. B. Leslie reports that splendid duck shooting has been in vogue on the Big Meadows lake in the vicinity of Prattville. The birds were there in thousands and everybody out has been getting easy limits.

English snipe have been numerous in the Point Reyes pasture lands recently. Dr. Otto Westerfeld, James Black and others have had limit shoots recently.

Alameda marsh gunners who have shot from blinds located on fresh-water ponds have had a general run of good luck since the season opened. Ed Quayle, Charles Cutter, Ed Armond and Charles Breidenstein have gathered generous tolls of fat sprig from the Hesse pond near Alvarado. The big Smith "mud ranch" pond near by has produced numerous limits before 9 o'clock for a squad of gunners. Just what the value of good duck-shooting grounds is nowadays is well illustrated in the Alvarado district, where the owner of one large tract is reputed to draw down an annual rental of $7000 from different gun clubs who rent ponds from year to year—and rates went up a bit this season, too, and were willingly paid.

* * *

The upland sportsman finds conditions in the quail-hunting grounds just a trifle too dry. In many of the quail districts the ground and cover are so dry that the dogs are baffled in scenting the birds. A rain will remedy matters, and then the sport will be improved materially.

Quail are reported to be very plentiful in many sections this season. In Butte, Yuba and Sutter counties, for instance, the birds are plentiful, but dry weather conditions have been a handicap. Near Shingle Springs, on the American river, Sacramento sportsmen have had fine shooting, the birds being exceedingly numerous.

Marin county quail hunters seem to fare rather well with the birds. Near Tocaloma, Harry Thomsen and R. Russell picked up a fair string of birds one trip, and afterward shot over the hills near Camp Taylor with satisfactory luck. Fred Butler has the entre to fine quail-hunting ground back of Marshalls, where limit strings are always on tap. Baldo Ivanco-

vich and Jake Abitz gathered full straps last Friday near Novato. Charles Pease put in two days in the Point Reyes territory last week, where both quail and English snipe were numerous enough for good sport. Fred Schmidt and friends found the quail coverts of the Point Reyes Sportsmen's Club well stocked a week ago. Al Hall knows good quail ground near Olema, where limit strings are possible.

For a far-away trip, Merry Springs, in Fresno county, is a district that is in good repute with quail hunters. W. B. Stadfeldt, Clarence A. Haight, Fred Willet, Swat Terrill and Roy Reed of this city, with George B. Smith of Los Banos and William Warswick of Fresno, spent several days in that section and returned with limit bags of quail.

Good quail-hunting ground was shot over down San Mateo coast way by William Little, at Waddell creek, and Dick Ring and friend at Tunitas.

Splendid quail shooting, since the season opened, has been the rule near Gilroy Hot Springs. Among the limit sportsmen in that section were W. H. Cameron, W. J. McDonald, Tony Serpa, Zach Shelton, and others.

* * *

Trout angling in districts 2, 3 and 23 was closed Tuesday, November 1. Fish and game district No. 23 includes the waters of Lake Tahoe and the Truckee river and all streams flowing into said lake and river and all lands within the drainage basin of said lake and river within the State of California. Districts Nos. 1 and 4 will not close until Dec. 1.

In district No. 2, however, the Coast streams will be open again for steelhead fishing from December 15 until February 14, the limit being two fish per day taken with hook and line only.

Word comes from Alfred Grunwaldt that good fishing is to be enjoyed near Bryan's Rest, a point forty miles this side of Eureka on the new extension of the Northwestern Pacific Railway.

* * *

Striped bass angling has had quite a pickup during the recent pleasant weather. Louis Gotthelf, Howard Vernon, Herman Cohn, Emil Accret and other local rodsters have made good catches recently of large sized striped bass at the Napa drawbridge. The Wingoite fishermen have also had fine fishing at Appleby bay and in Napa creek No. 2. Rodeo and South Vallejo have also yielded good returns.

* * *

There is no closed season on salmon fishermen who use hook and line tackle only, three fish per day being the limit. Good salmon fishing was the luck recently of Sacramento river rod devotees. Walter E. Neville of Chico landed a 46½-pounder one day. Miss M. A. Eames' big fish scaled 46 pounds. William Clark landed a 40-pounder.

FLY CASTING CONTESTS.

San Francisco Fly Casting Club medal contestants cleaned the slate Sunday afternoon and Saturday afternoon last at Stow lake when back scores in several events were cast off. This leaves the club schedule complete for the 1915 season of ten contests, saving a cast-off of ties, if any, after which the winners for this year will be announced. Charles H. Kewell made the very high score of 99.36 per cent for both days in event No. 1, light tackle accuracy percentage. C. H. Gardner and E. A. Rogers tied with 99.2 per cent in event No. 2, dry fly accuracy.

Harry Thomsen was high rod in event No. 3, ¼-ounce lure casting, 99.7 per cent. Kewell made the best average, 132 feet, in event No. 4, ¼-ounce lure distance casting. He also led in event No. 5, light tackle distance fly, 100 feet. E. A. Rogers put out his line 134 feet in event No. 6, salmon tackle distance casting.

The "slam" cast scores were: Kewell, 150 feet; Forbes, 150 feet; Gardner, 100 feet; Burgin, 115 feet.

The "in and out" scores were: Kewell 3, 3; Forbes 3, Gardner 1, Rogers 1. The scores follow:

Saturday Make-Up Casting—Medal contest, Stow lake, October 30, 1915. Wind, southwest. Weather, fair.

WHEN THE TEAL COME IN.

[Concluded from last week.]

But there is still some good teal shooting to be had along the streams of the coast in midwinter, even though one does not have the entree to any of the organizations which control the blinds and ponds of the Coast. I have found several little wet-weather ponds along the San Gabriel which are the feeding grounds for teal—green-wings, of course—in the winter and on which the little sixteen has gotten in its good work several days during the season.

One morning I boarded a Santa Ana car in Los Angeles, rolled out through the level fields of the mesa which slopes away from Los Angeles to the sea and then, turning sharply from the straightaway which would have led to the Pacific, sped across here a little water-filled gully, there the end of a reed-bordered pond, scaring up bands of coots almost from every pond after we left the city limits.

As we flashed across what appeared to be an arm of a stream, but was in reality only a blind canyon let down into the mesa and filled with rain water from the hills farther back, I saw three or four birds away out which did not seem to be mudhens. At the next crossroad I dropped off the car, slipped the .22 Winchester from its case and started back, walking up the opposite side of the railroad grade from that on which the pond lay.

Moving along slowly, making as little noise as possible, I came to a clump of willows, a bit out from the line and through which I could see dimly the sheen of water. I went over behind the willows, regretfully shaking the coals from my morning pipe as I did so, and, parting the leaves of the willows, saw a small band of ducks clear at the other end of the pond, possibly sixty yards away. I could not make out their species, but I selected the biggest, pulled down on his thickest part and pressed the trigger.

The crack of the little gun was followed immediately by the solid thud of the bullet on wood and an instant later by the shout of a very angry man standing up in a blind just back of the bunch of decoys into which I had fired. And if the man was mad so was I. First of all I had been fooled by wooden "ducks"; then I had wasted a shot, the noise of which might frighten real ducks in some other pond, and I had unintentionally butted in on another man's hunting. Besides all these, the duck I had hoped for was not to be had.

I went around the willows, however, and we patched up a very fair sort of friendship, so much so that he offered to go back to his house and let me shoot his blind for the rest of the morning.

While we were talking he glanced around, dropped down into the blind, pulled me with him, and a few moments later a band of sprigs swept in on the long slant by which every hunter knows them and alighted in the water a bit out beyond the decoys. The .22 cracked, a bird turned over in the water; and, as the band got up, the twelve-bore in the hands of my new-found friend cracked once and again and a bird fell just in the edge of the willows, while another sailed over to drop on the farther side.

We walked out and he waded into the pond, which was nowhere more than a foot deep, and retrieved the two we had killed, while I went around the willows, found his bird, returned it to him, said "good-bye," and went my way. Up at the little pond where I had first seen the ducks, I picked up one from a hiding place behind some tules and then had a fierce time getting him in. He was a greenwing and I shot him through the head, which helped a little to make up for the decoy I shot in the other pond.

I knew the river could not be far away, so I walked down the track till I came to it—the wet-weather river which has been dignified with such a high-sounding name—and then struck down in toward the sea. Nothing appeared on the stream except a band of mallards to which I could not get within range and so I drifted on down to the mudflat where the river empties into the sea, and almost fell over a band of fifteen or twenty curlews.

These curve-billed snipe are always tame in winter, but I never saw any quite so willing to be shot as these. I picked one at the first fire of the little gun, and, not being quite dead, the bird squawked some, luring the greater part of the band back. Three of them made the mistake of alighting near him and by the time they got ready to get up I had one of them also to add to my bag. This was before the new federal regulations were enacted, and statute, so far as curlew on the Coast are concerned, that was entirely unnecessary.

This gave me two ducks and two curlew, more birds than I really needed, and I passed up a bunch of yellow-legs from which I could easily have picked another. Enough has always been a great plenty with me in my hunting, and enough means just what the folks at home can eat with my help. If every hunter would adhere to this rule, year in and year out, there would be very little need for game laws, other than to protect species which from some inadaptability of their own are on the verge of extinction, and then the law would need to be enforced only during the breeding season.

After this I sat down on the beach, having walked some little distance and being tired. Nothing came along except a band of gulls and two or three scoters riding on the surf. Wanting one of the scoters for its skin, I shot it as it rode the first breaker, but instead of hitting the bird in the body as I had intended, the dip of the wave threw the scoter's head directly in line with the bullet, and the skin was ruined. This taught me a lesson and the next one of the birds I shot was well up on the sand. I shot him clean through the body at something like seventy feet, and running forward to pick him up, found a ruddy duck instead of a scoter I had thought I was shooting at. These ruddies are rather rare on the Coast and I was more pleased with this kill than any of those hitherto made.

From here I cut through a pasture which runs down almost to the sea, crossed a couple of wire fences, and, after a good long tramp, struck the car line again on the crossing of a county road. Inside of an hour I was again within the limits of the city, and very shortly thereafter was in my home. And dinner, a trifle after noon, meant ducks—well killed and with quite as much sport as though I had had a dog to help; with much more pleasure and an infinitely greater sense of conquest of the wily wild things than if I had lain in a blind all the forenoon, seeking with might and main to be "high gun" on some club grounds.

Shooting ducks in this manner, however, is usually harder than was this particular trip. I have tramped through the marshes and river bottoms of Southern California for many a wet morning and come home with nothing but a ravenous appetite to show for it. Still, I am as ardent an advocate of this kind of hunting as when I first took it up, and, when I get the price, I shall, I think, instead buying a share in a gun club, take a trip down the Rio Colorado; for that is the land of whose web-footed hordes that old-time California hunter, T. S. Van Dyke, has written so entertainingly and so often.

At the Traps

The Intercollegiate Shoot.—The first championship shoot to be held under the auspices of the recently organized Intercollegiate Trapshooting Association took place Saturday, October 23, over the traps of the Princeton Gun Club. Five-men teams from Cornell, Yale, Princeton and Dartmouth shot a 100-bird program. The match was closely contested, Cornell leading until the last event when Taylor of Yale, missing but one target of his 25, gave the Eli's the victory by a margin of 5 points. The final scores were, Yale 366, Cornell 361, Princeton 333, Dartmouth 284. Lewis and Chisholm of Yale were high men, each breaking 83 out of a possible 100. Caesar with a score of 78 was high man for the Tigers, while Ryan, with a total of 79, was high man for Cornell. The championship trophies awarded the members of the Yale team were solid gold watch fobs, the pendants of which were replicas of clay targets.

Interest in the shoot was unusually keen, it being the first meet in which Cornell has been represented. Though shooting conditions were ideal, a high gale, which tossed the targets about like feathers, prevented high scores. The summary:

Yale—Lynam 75, Lewis 83, Chisholm 83, Casselberry 53, Taylor 73. Total, 366.

Cornell—Von Lengerke 78, Ryan 79, Coleman 69, DeWitt 70, Walden 65. Total, 361.

Princeton—Reed 72, Turner 67, Shea 63, Hewett 53, Caesar 78. Total, 333.

Dartmouth—Melvin 60, Huntress 47, Campion 55, Hoard 77, Prendergast 45. Total 284.

* * *

Chinese Squad at Traps.—International warfare broke forth in Toledo the other day. Fifteen nationalities competed in the scrimmage, and although the result has not yet reached this paper, it is certain that there was a spirited contest. It all happened at the Edgewater Gun Club, where squads of five men each, representing fifteen over-seas countries, met at the traps for a trapshooting tourney. Among those present and shooting for their respective home lands were Germans, Irish, French, Hebrews, English, Hungarians, Italians, High Germans, Scotch, Chinese, Russians and Greeks. So far as could be learned up to the hour of going to press, the shooting was all confined to the regulation attacks upon clay targets, but the spectators, if not the contestants, must now and then have had in mind the possibility of an interchange of hostilities in imitation of the great all-comers' struggle abroad—but the influence of trapshooting is always toward peace and good fellowship.

The meet was unique in many respects. Perhaps the most noticeable feature was the presence of the first Chinese squad to shoot at the traps in this country, so far as known. The celestials, all young men, were quick to acquire the ways of the American sport. Three of the squad shot Remington guns, all used Nitro Club shells, and all were able to make initial scores varying from 8 to 16 out of a possible 25. The names of the men comprising the Chinese team are strange to the American eye—Henry Yee, Louie Quog, Henry Get, Ed Keota, John Sew.

The promoters of this many-nationalities shoot provided a novel attraction and undoubtedly drew the crowd, but the greatest thing they did was again to demonstrate the fundamental democracy of our republic and it may be that trapshooting will act always as a rallying point around which this democracy may continually be exemplified.

CATTLE SHOW CHAMPIONS.

Section 32—Premier Championship for Exhibitor: Awarded to B. P. Inman.

FROM A HORSEMAN AT THE DARDANELLES.

The following is taken from a letter received by Mr. George Wallace, of St. Kilda, Dunedin, and written by Angie Don, who left New Zealand with the main expeditionary force and who is at present fighting for our country's cause with our boys in Turkey.

"Sincere congratulations on landing a first at Forbury. What a pity the weather was so wretched. You should have some of our sunshine, for there is far too much of it here to be pleasant; in fact it is very trying, especially to those who cannot stand the extreme heat, and I am one of them. 'Manny' did not wo so well as I expected. Perhaps the heavy going was in no small measure responsible for his non-success in the big races. Say, George, what sort of a gee-gee is Silver Patch? I see by the papers that A.D.H. drove it in the first amateur. Clarkie has taken its mother, my mare, with him to Christchurch to be stinted to Denver. Ask A.D.H. what he thinks of it. You can also tell him that his brother-in-law, A. Gregory, is fit and well, and a real good man for this game. I read an article in an Australian paper written by a Vet. who had been buying horses for the war office. He deplored the fact that so many of the hacks available had a more or less trotting strain, saying that such horses were more than useless for military purposes. With this statement I cannot agree, for during the time we were training in Egypt I rode a mare by Geo. M. Patchen, bred on the Taieri, and I never wished to ride a better troop horse, and this horse with trotting blood in it was far from being the exception, for one of my principal jobs as Squadron Sergt.Major was to get the greatest number of fit men and fit horses on the morning's parade, so I had the best of opportunities of knowing what horses could not stand up to the work required of them. Now a little about the Joke? In the first place we are here and our horses are not. When we will see them again, goodness only knows. Of all the spots on the map, this is easily the best place to be out of, even supposing we were on a huge Sunday School picnic, which we are not. All the creepy, crawly things on God's earth have mobilized here, and our sleeping quarters being dug-outs, one never needs to complain of being short of company. We sleep with our clothes on, that is when we get the chance, and there is many an hour owing to us now. Fresh water is about as plentiful as free passes issued by the Forbury Park Trotting Club, and that's saying some. We get half a gallon a day per man, and with such a thirst as ours it vanishes in one act, then it's the long, long sigh for Thompson's soda water, or something equally strong. A wash in fresh water is only to be thought of when one is asleep, but we do manage to have a dip in the briny, only the blighters on the hills at the back have the range to a whisker, and every day one or more of our fellows gets punctured by the snipers. Now and again the enemy's shells burst above, or in amongst a group of 'sodgers,' then it's a sure change for some of them, but it is real wonderful to see the sang-froid of our A. and N. Z. troops. They go about their business heads up, and the white feather conspicuous by its absence. I can put up with rifle bullets, although I don't like them, but shrapnel and I will never be able to agree, unless it is fired from our side. I was walking up a gulley the other day when a shell burst away up near the top of the ridge. My mate, who was close alongside of me, drew a blank, but I stopped two, one on the arm, and one on the chest. Neither of them were serious, the bullets being what we call spent, but my arm was sore for a couple of days. The crack on the chest did not draw blood, it hit my haversack strap and glanced off. When the next shell burst, well, all the Billy Dunns this side of White Island could not have made me wait for my bell. My name was Dillon Bell or something faster than Octave. The flies here are the limit. Sleep during the day is out of the question. From our camp we can count about 60 dead Turks in the space of about half an acre, the nearest body about five yards away from our trench. These bodies have lain there for over a week, so you can imagine the awful stench, and the wounds inflicted by our people are indescribable, but still this is war, a fight to a finish. The smallest scratch festers, then the flies literally stand on one another's backs to have a dip in. Bandages are of little use, they only bring on profuse perspiration, and this of course keeps the sore from healing. The food we get is plain but good, and we are not by any means short on rations. Paper and envelopes, in fact all writing material, is 'hoff,' many of the troops are turning their envelopes inside out. I see by the papers that chaff is £3 10s a ton. No joke now to keep a horse for pleasure. Remember me to all the sports and inquiring friends. —New Zealand Trotting Journal.

TWENTY LEADING SIRES IN AMERICA IN 1915.

The racing of the month of September had the result of advancing Broomstick to first place in the sire list of 1915 and at the end of the month he was nearly $10,000 in front of Star Shoot. It thus appears that the fine son of Ben Brush and Elf is destined to figure as the premier sire of North America for the third year in succession, a distinction achieved by no stallion since Hanover led for four years, beginning with 1895. His trio of best winners, Thunderer, Regret and Bromo, have closed their accounts for this year, but Broomstick has other winning sons and daughters in active racing probably capable of maintaining his supremacy to the end of the year, says Daily Racing Form.

Star Shoot has much the greatest family running for him, seventy-one of his progeny having won more or less for him in this year's racing. It is well that it is so and it is probable that his many daughters will play a big part as brood mares of the future. His best winner this year is the two-year-old Ting-a-Ling, for which no great things can be claimed. If something like Star Charter, for instance, should crop up in next year's racing, Star Shoot might again go to the head of affairs. At any rate he has already played a big part in our breeding and racing and through him the blood of Isinglass is well diffused in this country. In money won he is practically as far in front of Ogden as Broomstick is in front of him. Quite probably the three leaders of the present will not be disturbed in the placings.

In The Finn, Star Jasmine and Tartar, Ogden has three excellent representatives, The Finn being clearly one of the front rank three-year-olds of the year. Gillies and Sir Vivian are also probably something more than useful two-year-olds, although we will have to look to England next year for confirmation of this, so far as Sir Vivian is concerned. Peep O' Day is next to Star Shoot in the number of his progeny in racing, having sixty winners in action this year. Of these Phosphor was undoubtedly one of the fleetest sprinters of the year, but was hurt and had to be retired. One of the pleasant features of the year was the return of his distinguished son, Cock o' the Walk, still able to run well and win in good company. McGee did well this year and Hastings assured his continuance in racing statistics for some time by sending a big band of winning two-year-olds out to represent him. One of these, Achievement, may do better things next year. It was due to the brothers, Borrow and Slumber II., that the now dead celebrity, Hamburg, was returned to the list of twenty leading sires of the year and right nobly they raced for his fame. The twenty leaders and the earnings of their progeny, up to and including September 30, are:

Sire	Performers.	Sts.	Races Won.	Am't.
Broomstick	41	466	92	$84,773
Star Shoot	71	947	131	75,321
Ogden	44	542	77	65,814
Peep O' Day	60	777	127	61,129
McGee	47	640	87	55,575
Hastings	34	534	78	48,419
Dick Welles	43	528	95	45,175

Transvaal	25	360	43	27,228
Celt	14	197	34	25,130
Stanhope II.	11	126	21	24,550
Totals (20)	655	8,481	1,357	$872,216

Broomstick, b h 1901, is by Ben Thrush—Elf, and his five largest winners are Thunderer, $17,385; Regret, $12,500; Bromo, $7,336; Pesky, $5,315 and Barnegat, $3,550.

Star Shoot, ch h, 1898, by Isinglass, dam Astrology: Ting-a-Ling, $4,760; Addie M., $4,055; Supreme, $4,035; Leo Skonly, $3,023, and Star Gift, $3,010.

Ogden, br h, 1894, by Kilwarlin, dam Oriole: The Finn, $12,550; Star Jasmine, $7,115; Tartar, $6,225; Gillies, $5,975, and Saratoga, $4,320.

Peep O' Day, b h, 1893, by Ayrshire, dam Sundown: Phosphor, $6,050; Wander, $3,315; Top o' th' Morning, $2,475; Wanda Pitzer, $2,445, and Helen Barbee, $2,419.

McGee, b h, 1900, by White Knight, dam Remorse: Swish, $6,365; Fountain Fay, $5,020; Kewessa, $4,515; Indolence, $4,294, and Sharpshooter, $3,950.

Hastings, br h, 1893, by Spendthrift, dam Cinderella: Tactics, $7,880; Achievement, $5,968; Thornhill, $3,150; Rash, $2,470; and Lochiel, $2,645.

Dick Welles, b h, 1900, by King Eric, dam Tea's Over: Kinney, $4,747; Gipsey George, $2,840; Roscoe Goose, $2,693; Scarlet Oaks, $2,525, and Droll, $2,455.

Marta Santa, b h., 1896, by Martley, dam Luxette: Doctor Larrick, $4,746; Viley, $3,635; Jessie Louise, $3,560; Rosemary, $2,575, and Briar Path, $1,655.

Yankee, b h, 1899, by Hanover, dam Correction: Conning Tower, $4,265; Yankee Notions, $3,720; Amazon, $3,568; Distant Shore, $2,405, and Tory Maid, $2,390.

Cunard, ch h, 1899, by Goldfinch, dam Lucania: Bayberry Candle, $6,986; Bradley's Choice, $4,265; Buzz Around, $3,605; Bac, $3,235, and Bushy Head, $2,890.

Plaudit, br h, 1895, by Himyar, dam Cinderella: Lady Curzon, $4,335; Goldcrest Boy, $4,049; Redland, $3,825; Little Sister, $3,245, and Mockery, $2,057.

Fair Play, ch h, 1905, by Hastings, dam Fairy Gold: Stromboli, $12,945; Norse King, $6,030; Trial by Jury, $4,280; Hanovia, $1,950, and For Fair, $1,665.

Disguise, b h, 1897, by Domino, dam Bonnie Gal: Bulse, $9,665; Prince of Como, $3,310; Seneca, $3,215; Lorac, $2,280, and Andrew, $2,160.

Hamburg, b h, 1895, by Hanover, dam Lady Reel: Borrow, $20,195; Slumber II., $9,200; Port Light, $1,195; Prince Eugene, $1,067, and Moisant, $785.

Rock Sand, br h, 1900, by Sainfoin, dam Roquebrune: Friar Rock, $5,090; Fernrock, $4,340; Fenmouse, $3,750; Mission, $3,480, and Tea Caddy, $3,165.

Waterboy, br h, 1899, by Watercress, dam Zealandia: Waterblossom, $9,303; Water Lady, $6,990; Waterbass, $6,330; Success, $2,225, and Greville, $2,205.

Stalwart, ch h, 1901, by Meddler, dam Melba: Brandywine, $4,235; Patty Regan, $2,315; Virile, $2,500; Father Riley, $1,990, and Margaret N., $1,687.

Transvaal, b h, 1905, by Commando, dam Royal Rose: Blackie Daw, $8,994; Resign, $2,508; Little Biller, $2,396; Transit, $2,185, and Burwood, $1,870.

Celt, ch h, 1905, by Commando, dam Maid of Erin: Coquette, $4,525; Paddy Whack, $3,400; Celandria, $3,240; Celto, $3,130, and Tralee, $2,980.

Stanhope II., br h, 1899, by Florizel II., dam King's Daughter: Kingly, $7,595; Tartarean, $6,730; Fair Montague, $4,745; Garish Sun, $1,745, and Little England, $1,245.—Thoroughbred Record.

THE FARM

MAKING THE MOST FROM A FEW COWS.

One of the many opportunities for beginners in farming is to keep only a few cows and sell cream, milk and butter to hotels and the private trade of their own and nearby towns. Some private dairies have animals which clear 30 cents a day per head for 300 of the 365 days in the year—a profit of $90 each every 12 months. All milch cows do not yield similar profits, for all dairymen and all cows are not alike. In most cases, though, it is the man and not the cow who makes or loses the dollars in dairying. Many a grand cow, well bred and worth a high place, has been ruined by having a careless owner. With better care the standard for each dairy in the country could be raised in a few years.

A dairyman aims to obtain a high quality of milk and lots of it at a minimum cost. Reliable statistics show that a cow that will not produce over 200 pounds of butter or an equivalent value in milk or cream is kept at a loss. The average good cow produces 400 pounds of butter, and still better cows produce between 800 and 900 pounds. Murne Cowan, the champion Guernsey, produced 1,373 pounds of butter in one year, and a Holstein-Friesian cow, Finderne Pride Johana Rue, the world's champion butter cow of all breeds, owing to her enormous milk-producing capabilities, produced butter fat in one year equivalent to 1,470 pounds of butter.

One o fthe main reasons why more people do not make a greater success of dairying is because they do not know the producing value of their individual cows. In no business other than agriculture do we find business men depending on their investment for a living, who do not know just exactly what it is paying them. The way to determine the standing of a herd is to test each member of it separately by means of weighing her milk on a pair of steel yard scales or spring balance, and testing with a Babcock centrifugal tester. The total cost of these appliances is less than $5. If shelter and sufficient feed, with good care, are given, these two methods are absolute in their correctness. Where only one cow is kept it is often not convenient to make this investment, but for a reasonable price, or for nothing, any creamery man will test a cow. The agricultural college of any state will also do this work, generally for nothing. The milk should be weighed after each milking and credited to each cow, and occasionally tested.

A breeder just starting should buy the best animals possible judging them by their performance, or milk-producing records, and by their pedigrees. It is a law of breeding that "like begets like." A cow whose ancestors have pedigrees that show that they were heavy milk-yielders is sure to be a good milk-producer herself. A large flow of milk is peculiar to some of the breeds; a smaller quantity of milk but of richer quality is characteristic of others. Quality of milk is inherent; that is, the percentage of butter fat cannot be increased in milk by care and feeding. The flow, however, can be increased.

The Jerseys and Guernseys are the best butter cows, but do not give as large yields as do the Holsteins, whose milk, on the other hand, does not contain as high a percentage of butter fat. The two former are best suited where butter and cream only are desired, and the latter is best where large quantities are offered for sale regardless of fat content. The Ayrshire breed comes in between these two types as a happy medium. Many large dairies are using Ayrshires entirely because of this reason. These four breeds have been bred for years along the lines indicated, and it is well for a beginner to study their special adaptation to his trade and environment before stocking up.

The problem of feeding the dairy cow is a most important one and perhaps the least understood. It is safe to say that nine-tenths of American farmers feed their cows only a little more than a maintenance ration. Sixty per cent of all a dairy cow eats goes to maintaining the heat waste of her body; everything above this goes to producing milk. A mixture composed of six pounds of bran, six pounds of gluten feed, 10 pounds of clover hay or alfalfa, 25 pounds of silage, and a small supply of turnips, say about 15 pounds, which should be fed after milking is finished, is a good ration for the average cow.

Feeding and milking should be done twice a day at regular hours.—Rural Press.

SHOEING THE FOUNDERED HORSE.

Founder leaves as an aftermath more or less deformity of hoof and foot. The congestion in the sensitive layers inside the hoof displaces the coffin bone from its normal position, and as a result the sole of the hoof, which is concave in health, becomes flat or even convex—"dropped sole." In some cases the sole extends beyond the wall. The wall accommodates itself to the new condition, so that the front of the wall is hollow, with a long toe. The coffin bone in a foundered foot is from one to two inches nearer the ground than it would be in health.

So in such a condition the sensitive structure of the foot is too near the ground and the horny sole usually too thin to afford protection. A shoer who does not understand the case may aggravate it by paring the sole thinner, in which condition the foot cannot stand contact with the hard ground. The toe being the principal seat of pain, the foundered horse puts the heels to the ground first, and if shod with high heels calks it will greatly add to the pain.

The only way to shoe a foundered horse is with a properly made and properly fitted bar shoe. The shoe should be wide in the web, so as to afford some cover to the margin of the sole, and thick enough to admit of plenty of concaving on the foot surface. It should be cut out like a saucer, so as to relieve the sole of pressure until it grows strong enough to carry some weight. If the frog projects high above weak, low heels, weld a steel lug on each heel of the shoe. Make the bar good and wide, so that it will not cut into the frog, in fitting it, and arch up the bar so that it throws but little weight on the frog at the first shoeing.

But as the frog sinks back into its normal position, as it will do if allowed gradually to perform its natural functions of weight bearing, bend the bar down, and you will observe the heels growing stronger, the frog slowly sinking back to its normal position and a marked improvement in the whole hoof. When the heels are level with the frog leave the lugs off, unless you need them for antislipping purposes. If the toe of the hoof is rolled up, as is often the case, fit the shoes rocker fashion. Foundered feet improve wonderfully if properly shod.

MILKING SHORTHORN BREEDERS ORGANIZED.

A movement of national importance was launched at the Minnesota State Fair when the American Milking Shorthorn Breeders' Association was organized. The advocates of the dual-purpose cow have been increasing very rapidly in recent years and they have felt the need of an association for registering these animals, that would guarantee them to be milking Shorthorns.

The meeting was called to order by T. A. Hoverstad and D. E. Willard acted as temporary secretary. The principal address was made by Mr. J. J. Hill, the empire builder, who for years has championed the cause of more and better live stock in the Northwest. Mr. Hill told of the records being made by his noted herd of imported milking Shorthorns, and urged the necessity of an association for recording and advancing the interests of the breed. Prof. Thomas Shaw, who has advocated the dual-purpose cow for 25 years and through whose efforts the meeting was called, spoke on the purpose of the association.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

FOR SALE OR TRADE—One imported registered draft stallion, weight 1800 lbs., sound and right. Would consider standard bred mares, draft mares, or thoroughbred mares. Address D.A. BAKER, Hill P. O., San Diego Co., Cal.

THOROUGHBRED COLT AT A SACRIFICE.

The death of my father compels me to seek a buyer for an excellent thoroughbred racing prospect, a colt by Maritius—Santa Lucia. I am unable to have him developed and will sell him at a proper figure. Interested parties may learn particulars from Chas. T. Boots, or address

MISS FLORENCE GAULT,
105 Bush St., San Jose.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.25

Breeder and Sportsman
One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly
Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

499 Ex 500 and 647 Ex 650 Targets, a New World's Record for Registered Tournament Shooting, Made by Lester S. German, With

L. S. GERMAN

WINCHESTER

"LEADER" LOADED SHELLS

THIS shooting, done at the Westy Hogan Tournament, speaks volumes for Mr. German's skill. It also emphasizes the wonderful shooting of Winchester Factory Loaded Shotgun Shells—the W brand. This new World's Record could not have been made by even such a wonderful shot as Mr. German if the shells he used had not been as perfect as it is possible to make them. Winchester shells **ARE** that kind. That's why they make such records, and that's why they were

The Winners of the Grand Prize at the Panama Exposition

TOM WILLIAMS ANSWERS SUMMONS.

"Tom Williams is dead," was the news that went the rounds of the gathering places of the sporting element in the bay cities Saturday morning, to be confirmed later by the announcements in the daily papers of his end, the tidings being received with various emotions in various quarters. The sanctimonious class pulled a moral from his passing, many horsemen heaved a sigh of relief, decently mingled with a tinge of regret, and marked the day as the first of a brand new chapter in racing annals, while a circle larger by far than either or both of the foregoing paid respectful tribute to a strong man gone—a fighter, a steadfast hater of his numerous enemies, a loyal friend to those he liked. Like many another man now gone, the dead turf magnate occupied a unique position in his day, one whose like shall not again be seen upon this coast, or in this land. "Man is a creature of environment," and the environment which made possible the creation of Williams and his power has passed away forever.

The story of Tom Williams, could it be told in full, would be accepted in most circles as a truly western "romance," and perhaps it is. His father, the first Thomas Hanford Williams, came to California in the early fifties and began the practice of law in El Dorado county, subsequently transferring the scene of activities to Nevada, where in 1859 he became attorney general. In settlement of a fee for legal services rendered a Nevada miner, the elder Williams accepted shares in a certain mining claim, thereby laying the foundation of the family fortune, as the claims proved to be none other than the nucleus of what eventually became famous as the Consolidated Virginia and Consolidated California mines of the Comstock lode. These shares he eventually cashed for six million dollars to the major stockholders, Messrs. Mackay, Fair, Flood and O'Brien, a portion of the proceeds being invested in extensive land holdings in the Sacramento and San Joaquin valleys. Thomas Hanford Williams Jr. was born December 9, 1859, in the city of Sacramento, and after the completion of his education in local institutions it was to the operation of these land holdings that his first business activity was directed.

In the later eighties, young Williams first manifested an active interest in horse racing, breaking into the game originally as a "gentleman rider." In those days the Pacific Coast Blood Horse Association was the premier organization fostering thoroughbred racing, and by his election to high office therein, Williams gained his first insight into the possibilities offered by the situation. Gradually he laid his plans, increasing his hold upon turf affairs steadily, eventually assuming the power of a dictator in his particular field—not merely assuming it in name, but wielding it in actuality. The Blood Horse Association, through a process of evolution, became in the end the New California Jockey Club, of which Williams was the head, and "whole show." In 1892 the winter racing center shifted to California, and Williams was launched upon the career which was to last for two decades. With the passing of Bay District track, Emeryville sprang into existence, to become the west's greatest course. Strange it is that the Emeryville track and its old ruler should have passed out almost together after all these years.

About 1894 was issued the manifesto which had long been under consideration, the declaration that all racing in this section would be under the sanction of the California Jockey Club, or, to be more specific, of Thomas Hanford Williams. That he "made it stick" is a rare tribute to the man's personality, and the downfall of racing in California may be tracked back to this day. Of the "turf wars" that ensued between Emeryville, Ingleside and Tanforan, little need be said save that Williams emerged the victor. Conditions under the Williams rule became intolerable, with the result that in 1909 the legislature put an end to open racetrack gambling. For two years racing was conducted with "jawbone" speculation, but could not be made to pay and was discontinued, there being no thoroughbred racing to speak of from 1911 until this season, when the Golden Gate Thoroughbred Breeders' Association staged their meeting at the exposition.

Tom Williams' policy was largely a "rule or ruin" one, and when it became evident to him that he could no longer rule racing, it has been plainly stated that he did not hesitate to use the considerable influence left him to obstruct every effort to re-establish it on a better basis. It has been a common saying that "while Williams lives, racing will not come back"—and Williams no longer lives. The Court of Last Resort has broken his power forever, and we shall now see how well or ill the prophecy applies in the hint it holds that with Williams' passing racing might be revived.

Mr. Williams had long been a sufferer from pulmonary trouble, to which in recent months complications were added involving the heart. For the last few years he had made his home across the bay, where he lived quietly with his family, the change being a decided contrast to the turbulent years during which he fought his way to the top of the ladder. In addition to his inheritance he amassed a considerable fortune through his racing operations, but lost heavily in Mexico when the Diaz government was overthrown. In private life he was a different person from the Tom Williams the racegoing public knew, devoted to home and family, and to a certain extent a patron of arts. His library is among the finest in the west, containing many works of rareness and value. His wife and two children, a boy and a girl, survive him.

DEATH OF GEO. D. CONNER.

It was not strictly with a shock that the death of Secretary Conner of the Detroit Driving Club and Michigan State Fair, was learned, for ill-health had been his for several months back, and it was known for some time that his case was practically hopeless. In the early days of 1915, Mr. Conner suffered a severe attack, the nature of which appeared to be paralytic, and from this he was slow to regain his normal condition. A southern trip and treatment by specialists gave some hope and considerable improvement for a time, so that his familiar form was seen at his regular duties during the Blue Ribbon meeting and the meetings conducted by the Detroit Driving Club on the halfmile track at Detroit, but gradually his naturally staunch constitution was beaten down by the insidious encroach of disease. His death occurred on October 28, at his home in Battle Creek, Mich., where he had been taken when his condition had been diagnosed as critical.

Mr. Conner's connection with the harness sport covered a lengthy period, and his years as an official have been active ones marked with progressive ideas in track management. His exact age is not given, but it is stated to have been about 56 years. In his earlier years he engaged for a time at the tailoring business in Saginaw, Mich., but his love for the trotter asserted itself at every opportunity, when business duties were not too strong to prevent the enjoyment of his favorite sport — harness racing. About twenty years ago his first connection as a racing official came, Mr. Conner then being a resident of Jackson, Mich. The sport, once strong and vigorous there, was retrograding when he was chosen for secretary of the local club. Soon his capacity as a capable manager was made manifest through some meetings in that city, which in contrast to former ones, were remarkable successes, and it was through his capable handling of affairs in Jackson that he assumed the secretaryship at Detroit. Changes in that office at the Strait City were frequent those days, but Mr. Conner proven then that he was an extraordinary official, and when he retired from the secretaryship to settle down at Battle Creek, he had made a splendid record.

In 1911 Mr. Conner took up active work again in track management, this time his connection being with the association at Marshall, Mich., where the light harness horse had gained a splendid hold. So successful was his meeting that year that he asked for, and was granted, dates the following year in the Great Western Circuit. Another successful meeting followed, and he was asked to again take charge of the track at Jackson, the scene of his first success. Notable meetings there in 1913 caused him to be engaged by the Detroit Driving Club, he succeeding Albert H. Moone, who had occupied the secretaryship for some time.

During Mr. Conner's occupancy of the secretary's chair at Jackson and Marshall he had been a strong worker in building up the Michigan Short Ship Circuit, and when he took up his new duties at Detroit, it was with the understanding that he would be allowed to continue his existing relations with the state organization. In 1914 and 1915, besides handling the Blue Ribbon meeting of the Grand Circuit, and the state fair meeting over the Detroit track, he supervised an earlier meeting on the halfmile track at the state fair grounds (which was in connection with the Short Ship Circuit), also acting as circuit secretary of the latter organization, and handling the meeting at Jackson. Always enterprising and alive to the demands of the public, he popularized racing in each instance where he managed affairs, and made his meetings successful ones, invariably.

As a forceful, energetic and progressive official, his passing will be regretted by numbers of horsemen, who will miss his genial, big-hearted presence. The deep sympathy of all who knew Mr. Conner and recognized the splendid qualities that he possessed, will go out to a widow and daughter who survive him.—Western Horseman.

Big Pacing Stake to be Raced Today

When the $20,000 event for 2:06 pacers was dated for the closing day of the November meeting, horsemen in many quarters advanced the opinion that it would never be raced, as rain was almost sure to interrupt a fortnight's program at this season. Nevertheless they made their entries and brought their horses—and what they predicted came to pass—it rained, the daily programs were scheduled to be carried forward, and the exposition people stated their intention of racing only such races as that arrangement permitted, doubling up no programs and declaring off events not reached by Saturday evening.

Under these conditions horsemen themselves took a hand in the proceedings and Messrs. Richard McMahon, Thomas W. Murphy and William G. Durfee met with the P.-P. I. E. officials and made them a proposition to take over the stake and the gate receipts at the track for the day and race it as originally scheduled, this afternoon. After considerable hemming and hawing this was acceded to, with the result that this afternoon, through the enterprise of three gentlemen of the class designated last spring by a high exposition official as "those greedy horsemen," there will be staged the most interesting event of the entire season. The three parties named take over the entrance money paid in and the receipts at the track only and guarantee the stake in full, the excess receipts at the main gates to the grounds going to the fair people as their "bit" for the deficit in the balance of the events raced today.

It is a matter of regret that the time intervening between the adoption of the plan and its culmination is so short, as not much publicity work can be done. The local papers announced some days ago that in all probability the big event would not take place, and though they have been generous in giving space to a correction of this impression there will probably be many people who will stay away, not knowing of the treat they are missing. Our own publication, going in the mails Friday afternoon, reaches only local readers in time for them to get ready to be on deck, much to our regret.

However, here's regards to those good sportsmen who have shouldered the stake, and here's hoping that they get a good gate and win the big money of the event. They have it coming to them.

Major Ong Sets Track Record

Fifth Day, Friday, Nov. 5.

Tommy Murphy, a fugitive from the wrath of a doctor at St. Luke's hospital, was the hero of the afternoon at the exposition track today, driving one winner and one second. The previous day he was operated upon owing to the bad after effects of the kick he received some days ago at Pleasanton, the presiding judge of the chloroform circuit putting him on the ground for not less than four days. Awakening this morning and feeling fairly fit he donned his duds and headed for the exposition race track, with the results just stated. His condition prevented him from being "Murphy at his best" when it came to strenuous driving, but his exhibition of nerve and gameness was remarkable. After the work was over he again hit the hospital and was put together a bit more stoutly, the only apparent ill effects of the day, at the moment, being the breaking of several stitches and the loss of quite a little blood.

The 2:13 trot was a present for Mirthful, there being nothing in the race to make her extend herself. Bon Courage was distanced the first heat and John Mack had a very narrow escape from the same fate in the first mile, trotting a much better race for the remaining heats of the event and being a consistent second, though not a dangerously close one. Future Tramp was hardly as good as yesterday, being inclined to leave his feet more often.

Allie Lou, winner of the Occident stake, fell into another soft spot in the State Fair futurity and won it in straight heats with lengths to spare and two or three seconds of speed in reserve, apparently. Byron and Carl trotted second and third, respectively, in each heat, May Alto and Winnie Bond getting the flag the first time out. There is a consolation purse of $400 for this division of the stake, and May and Winnie will race for this before the meeting closes.

The most interesting event of the day was the 2:25 pace, in which Mack Fitzsimmons and Jean were the foremost contenders. Mack was on the pole and took the field away nicely, Ben Corbett Jr. and Jean dropping into second and third positions. At the half the bay mare was on about even terms and the three leaders came into the stretch well bunched, Mack and Jean drawing away when the brush set in. Murphy teamed the Pittsburg lass nicely but Helman and the Portland gelding had the situation well in hand and won by a good length or over in 2:08½. Contention B. sprinted into third place and Zoetrix and Ben Corbett Jr. had a merry little race for the small money, the white-painted daughter of Zolock having the best of it.

They were harder to get away the second time, though no great amount of scoring was required at that. Zoetrix made a very bad break before getting out of the straightaway, and Fitzsimmons, Jean and Contention B. paraded Indian fashion to the quarter in thirty-one seconds and to the half in 1:04½. Ben Corbett moved up alongside down the back stretch and took the Chandler route over the short turn, Helman coming into the stretch at a two-minute gait. Both Murphy and Durfee started a drive that in no way worried Henry, William Gee deciding he had had enough when he clinched third place, while Tommy gave up at the club house after an unsuccessful effort to head the chestnut gelding. The last mile was much the same, Mack setting the pace to the wire with Jean's nose at Helman's shoulder. The final quarter of the race was reeled off in :29¾ on the end of a mile in 2:08¾, and as Fitzsimmons raced in front throughout the event he looks like a mighty handy wiggler. The summary:

Friday, Nov. 5.—2.13 trot, purse $2,000:

Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by George Simmons 2:28 (Murphy) 1 1 1
John Mack, b g by Geo. A. Fuller 2.08¾—Ida Purple 2.14½ by Cutting 2.10½.....(Tryon) 3 2 2
Future Tramp, b g by Trampfast (2) 2:12¼—Future Princess Ideal by Chimes ....(Sexton) 2 3 3
Bon Courage, ch g by Bon McKinney (3) 2:24¼—Helen Keyes by Sidney Dillon .....(Hayes) ds

Time—:32 , 1:06 , 1:39 , 2:13¼
:32¼, 1:05 , 1:38½, 2:10¼
:32 , 1:05¼, 1:38½, 2:09⅝

Distribution of purse—Mirthful $1,000, John Mack $450, Future Tramp $350, Association $200.

State Fair Futurity, three-year-old trotters, purse $1,500 ($1,100 to race, $100 to owner of sire of winner when dam was bred).

Allie Lou, br f by Kinney Lou 2:07¾—Lady Zombro 2.24¼ by Zombro 2.11....(C. L. DeRyder) 1 1 1
Byron, bl g by Tom Moko—Rita H. 2.12½ by McKinney 2:11¼ .....(W. G. Durfee) 2 2 2
Carl, bl c by Carlokin 2:07½—My Irene S. (2) 2:28¾, by Petigru.....(C. A. Durfee) 3 3 3
May Alto, bl f by Alto Express 2:22¼—Maymonio by Demonio 2:11¼ .....(Ivey) ds
Winnie Bond, b f by The Bondsman—La Moscovita by Guy Wilkes 2:15¼.....(Daniels)

Time—:33 , 1:06¼, 1:40½, 2:13¼
:33½, 1:06¾, 1:40¾, 2:13½
:33 , 1:07 , 1:41 , 2:14

Distribution of purse—Allie Lou $700, Byron $350, Carl $210, Association $140, Hemet Stock Farm $100.

2:25 pace, purse $2,000:

Mack Fitzsimmons, ch g by Bob Fitzsimmons 2:07¾—Jennie High Noon 2:18½ by High Noon. .....(Helman) 1 1 1
Jean, b m by Flosko—Jean Director by Director 2:17 .....(Murphy) 2 2 2
Contention B., b g by Copa de Oro 2:01—Bonnie Ailse 2:08½ by Faustino 2:12¼..(W. G. Durfee) 3 3 3
Ben Corbett Jr., b g by Ben Corbett 2:21—Miss Thompson by Thompson .....(Finley) 5 4 4
Dicto, b g by Dictatus Medium—Letter B. Jr. by Benton Boy 2:17½ .....(Will DeRyder) 6 5 5
Zoetrix, ch m by Zolock 2:05¼—Trix Marshall by Nutwood Wilkes 2:16½.....(Chadbourne) 4 ds

Time—:32 , 1:05¾, 1:37½, 2:08½
:31 , 1:04½, 1:37¾, 2:07¾
:32 , 1:06¼, 1:39 , 2:08¾

Distribution of purse—Mack Fitzsimmons $1000, Jean $500, Contention B. $300, Ben Corbett Jr. $150, Zoetrix $50.

Sixth Day, Saturday, Nov. 6.

The smallest Saturday crowd that the exposition meeting has ever had was treated to some nice exhibitions of speed and reinsmanship this afternoon, the weather being fairly pleasant and the footing about the best yet, though still plenty hard. Bondalean and Peter Scott had no difficulties in winning their respective events, as had been generally anticipated, but the 2:07 pace was a different matter, and its winner, the diminutive Major Ong, was duly acclaimed the boss of the exposition course to date, his second heat in 2:04¼ establishing a new mark for the nigger foot track by a full second. White Sox, Will Durfee's stake winner, carried the favor of the crowd from first to last, and while her friends remained loyal they were not so prejudiced in her favor but that they could spare hearty applause for the little horse that trimmed her. It was a great little horse race, with Sox not at her best, while the Major was as right as they come. To "add insult to injury" Murphy piloted him to victory over the Durfee mare hooked to a Durfee sulky, Ong's favorite wagon being in use behind Peter Scott.

MAJOR ONG.

[With apologies to Henry T. White.]

Major Ong
Wasn't long
Getting "right as rain,"
After he'd
Had a feed
Of California grain.

And the hay
Seemed to say:
"I'm the best you've found";
Suited him.
Gave him vim—
Also thirty pound.

Climate, too,
Helped him through
When he went to race;
Four n' a quarter,
Some rip snorter,
Gosh, how he could pace!

Beat by cracks
On the tracks
Of every eastern state,
He was best
Way out west—
Here he hit his gait.

Volunteer,
Lend an ear,
To this simple tale;
Major's sure
A "poor doer,"
But he copped the kale.

Moral is,
(Why, gee-whizz!
See it without eyes):
California,
Gosh-gol-darn-ya,
'S a real horse paradise!

The Major, displaying the true military geni that is the mark of all great strategists, had co mand of the situation at all times, conducting t engagement on lines most approved in modern wa fare. Commanding officers appear at the head their troops only in time to receive the "glory" pa of the battle, or in moments of dire distress. Beir a wily gentleman and realizing fully the havoc th is so often wreaked upon the advance guard, the M jor's system was to throw out skirmishers in suf cient strength to engage the troops of General A mospheric Pressure and Colonel Friction, whos strong array of seasoned veterans received assistanc from the naval forces of Admiral Sea Breeze, whos squadron was drawn up in a commanding positio just outside the heads, from which point a consi erable portion of the battle ground could be swe by the blasts from its largest high power rifle Under cover of this advance guard it was the Major system to make a steady but unpretentious approac until the final breastworks were reached, whereupo he would emerge from his protected position and g whooping to glory with a rush and a cheer. Thre times in a row these tactics were successful, and a the conclusion of the final charge the opposing force ran up the white flag and surrendered, being co voyed, under guard but with all the honors of wa to the concentration camp at Fort Lively (or For Deadly, according to one's point of view). Take i from us, Mabel, the sight of Major Ong leading thos final charges with a bowie knife in his teeth, the fir of battle in his eye and his long hair floating in th breeze was some spectacle, hon, some spectacle.

White Sox was awarded the pole when the judge juggled the leather jug for positions for the firs heat, and took 'em to the quarter in :31½, with On under her cover and Teddy Bear, Little Bernice an College Gent following as named. Bernice brok down the back stretch and Gent moved up to a goo fourth on the turn, passing Teddy in the sprint. Onc into the stretch the Major came out with a rush an headed Sox to the wire in 2:07¼, Durfee's mare no being squared away smoothly by any means. Bernice for whom the pace was a bit swift after her break seemed to most spectators near the wire to need a bit of assistance to beat the flag, receiving the same with thanks. The second heat was very similar t the first save that Sox was better and the time faster Both Murph and Durf were teaming for their las dollar when they straightened away in the last quar ter, reeling it off in 29½ seconds, Sox having he nose at Ong's flank at the wire. Most of those pres ent knew Murphy's physical condition, and when the time was hung out as 2:04¼ they gave the lank yank and the little bay horse a right warm welcome.

Save for a break by Sox early in the final heat there would undoubtedly have been another mile in 2:05 or better. They went away buzzing like a bunch of hornets and had gone but a few lengths when Durfee's mare left her feet, Will having to use a deal of skill to settle her without causing trouble. The Major, adverse to racing in front, waited a bit for a pacemaker going into the turn, the black horse from Winnipeg accommodating him but going to the half a second slower than Sox had done in the fast one. The latter mare, in the meantime, had settled and gone about her business as per usual, racing into third position in Ong's trail. In the stretch the bay ones passed the black 'un and hammered out another quarter in :29½, the Major having about as much the best of it as usual. The Winnipeg pacer went a good race, while Teddy Bear, as on his last appearance here, was not at his best.

Bondalean and Rayo de Oro were the most highly regarded of the futurity pacers, with Greatness reckoned as dangerous with Millard Sanders doing the teaming, and while the brown filly won a heat and second money the advance dope was about right on the other two. The Los Angeles pacer is a very fast colt but is inclined to hit his knees on the turns here, breaking frequently on the turns and pacing fast when squared away. In the first heat Daniels underestimated Greatness' brush, and under Sanders' skillful lifting she came down on the inside passage and nipped the winner's place in a pretty finish. In the second heat Bondalean made a procession of the bunch into the stretch, where Sanders again tried

ith the filly. This time, however, Daniels had his olt under way earlier in the game, Greatness giving p the contest almost before reaching the club house. his heat gave the local filly all she wanted of real acing apparently, and in the ensuing miles she was ontent to be third, Rayo de Oro being the second horse in each heat, making a strong but unsuccessful id for the third one. Dixon Boy, fourth each time, as a lot of speed and saved himself from the flag n the third by pacing an excellent final five-eighths. Sheldon B., who showed last spring that he had a ood lick when on his feet, was not steady enough to gure as a contender.

Peter Scott, headed for a season's record of over 50,000 winnings in stakes and purses, ran his total p to $49,760 when he annexed the 2:08 trot in traight heats. Virginia Barnette took 'em away andily, Peter dropping into his favorite place in he trail, Albaloma trotting up down the back stretch nd going into and around the turn in the lead, eter, Virginia and Electric Patch being well bunched s named. Virginia's feet flew up in the stretch and cott won by two lengths from Albaloma, the Patch orse a nice third. In the second heat Virginia was gain the pacemaker, Albaloma repeating as leader nto the stretch with Peter outside him. Virginia ept trotting and came with a rush that put Murphy o driving, the Poughkeepsie pair having vivid recol- ections of being frisked for a hundred and a quarter y the Los Angeles gangsters earlier in the week. As the official time of the last quarter was :29¾, Virginia herself must have stepped at about a 1:56 gait, or near it. In the third heat she broke at a critical moment heading into the stretch and Alba- oma couldn't force Peter out faster than 2:11. The ummary:

Saturday, Nov. 6.—Breeders' Futurity, three-year-old acers, purse $1,800 ($1,500 to race, $200 to nominator of am on whose original entry winner was named, $100 to wner of sire of winner when mare was bred):

:33½, 1:06¼, 1:40 , 2:11

Distribution of purse—Peter Scott $2,500, Albaloma $1,125, Virginia Barnette $750, Electric Patch $625.

Anselila, 1, 2:17 1-2

"Chickens come home to roost," and back to California has come again one of her pets that for the time had been wandering in strange lands—the yearling record for trotting fillies. Ever since the day in 1881 when Pride by Buccaneer and Hinda Rose by Electioneer became the first yearlings of any sex to trot below three minutes, their miles over a local course being negotiated in 2:44½ and 2:43 respectively, the Golden State has had a fondness for yearling records. Nine days later Hinda Rose cut her mark to 2:36½, and the following year Freedom, with Johnny Goldsmith driving, put the yearling record in the standard list. In subsequent seasons our farms produced such champions of the age as Bell Bird 2:26¼, Frou Frou 2:25¼, Adbell 2:23, Wilbur Lou 2:19½, Verbena Ansel 2:26 on a two-lap track, Anselot 2:28½ (the first standard yearling trotting gelding), and Anselila 2:17½, the world's champion filly of the age and gait. Of the numerous laurels won during the present season by the get of Prince Ansel, this latest one is the greatest and most highly prized.

ANSELILA (1) 2:17½

Prince Ansel (2) 2:20½

  - Medium's Last by Happy Medium 400

Fourth dam Susanne by Countersign 885.
Fifth dam by Inglis' Hambletonian.
Sixth dam by Harp' Halcorn.

Anselila, whose tabulated pedigree appears herewith, was the original "first choice" of the draft of seven weanlings sent last winter from Woodland Stock Farm to Lexington to be trained by Hunter Moody. Last fall, just after the weanling band had been well broken, the writer had the pleasure of spending a day at the Considine establishment, and of the many attractions there, Anselila was the brightest. Carefully broken by Walter Maben during Supt. Dowling's absence at the later race meetings, she had developed, at the time of my visit, all the attributes of an old horse so far as manners and gait were concerned, while as an individual she was pleasing in the extreme. She acted in harness like a campaigner, and had more lick and a cleaner, more natural, effortless trot than any baby I had seen to that time—or to this. I believe I may safely lay claim to having been a "rooter" for Anselila from the first, and it is pleasing to know that for once in my life I was "in right" in liking her.

Mr. Considine's faith in Anselila was such that many months ago he offered to wager one to three that she became the champion filly, so his jubilation over her success may well be imagined. At Lexington she furnished much interest for the railbirds and considerable matter for press comment during her early work, showing very fast. A bit later she seemed due to be shelved for the season from minor ailments, but a run for a few weeks in a paddock brought her around again, so that she was taken up late in the year and put to work. On very limited preparation she was put in the list with a mark of 2:27¾ as the Lexington trots came to a close, reducing these figures on October 27 to 2:22½, making Prince Ansel the sire of the season's two fastest yearling fillies. On Monday of the present week, with conditions none too favorable, Mr. Moody drove her in 2:20 so handily that he resolved to have another try for the championship mark. Wednesday the effort was made with most gratifying success, the phenomenal filly circling the Lexington course in 2:17½, a considerable reduction in the previous best time, the 2:19¼ of Miss Stokes, made in 1909 over the same track.

After such a climax to such a successful season, congratulations are in order all around, and horsemen in general join us in extending them most heartily to Mr. Considine and the gentlemen who shared in the development of the present crop of Prince Ansel yearlings—Messrs. Maben, Dowling and Moody.

The colt that keeps the "Silva Smile" fresh
BONDALEAN (3) 2:09¼
Winner of the pacing divisions of the Oregon and P. C. T. H. B. A. Futurities.

Seventh Day, Wednesday, Nov. 10.

It hardly seems necessary to tell it here, but after one week of uninterrupted racing, the exposition meeting was rudely broken into by rain. Sunday was a beautiful day, but Monday dawned sullenly, its general aspect early in the forenoon being that of an ungodly heathen who had strayed from the paths of righteousness in a week-end celebration and awakened on the first working day of the week the victim of a considerable hangover. If such was the case, the weather-man evidently harkened to the old adage concerning "the hair of the dog" and started in all over again, with the result that before lunch time the hangover had developed into a genuine weepy jag, the teardrops falling in copious quantities. A beating shower would have meant but little, but Monday's downpour was one of those gentle old sizzle-sozzles whose every drop was soaked in by the thirsty soil of the track—and when this track gets wet it is real wet. Monday and Tuesday were days of not a chance, so that Monday's card was carried forward to Wednesday.

The sun was bright all day, but the track showed no signs of emulating Arizona's example in going dry, and when the races were called at one o'clock the track manager had made no move to assist things along by applying the harrows. Finally, however, about 2:30, Starter Updegraff sounded the tocsin that caused the clans to gather, most of them coming to the wire by ferry and others by old-fashioned "stone-boats." Impromptu mud guards were much in evidence, but even these did not save the drivers from being bespattered with mud of the most clinging

kind. The owners of Spriggan, Miss Perfection and others entered in the 2:24 trot declined to risk their horses in such going, so that event was not raced, while Allie Lou's withdrawal from the Stanford stake left only two starters for that classic. The condition of the track was indescribable. Wheels skidded, mud hung to the driver's clothes in great gobs, and horses skittered around at first like kids on skates. Suffice it to say that Henry Atkinson, dismounting after two circuits of the course, weighed almost as much as a man.

So far as contests were concerned a most profound silence may be preserved, as there were no such things, the nearest approach to one developing in the Stanford stake, which was the best race of the two carded. Carl was a bit unsteady in the first round, the time of which was barely on the fast side of forty, but in the succeeding heats he trotted the best race of his career, going the longest mile and forcing Patterson to keep moving at all times to have any sort of a really comfortable margin of advantage at the wire. Both colts behaved excellently under the conditions prevailing and gave an admirable account of themselves, the average time of their three miles being only a second slower than that made by the aged trotters, most of whom have shown ability to go the route on good footing anywhere from 2:05 to 2:10.

The 2:16 trot was a gift for Mirthful, the only feature worthy of mention being that the track was probably the worst that she or her driver ever raced over. Seneca Boy had no opposition for second money, while Bon Courage, with Fred Ward up, outranked Columbia T., going a steadier race than before after once getting accustomed to the mud guard rigged over his hindquarters. The summary:

Wednesday, Nov. 10—Stanford Stake, three-year-old trotters, purse $1,320:

Geo. N. Patterson, bl c by On Voyage (3) 2:25¾—
Yu Tu by R. Ambush 2:09¼.....(Rutherford) 1 1 1
Carl, bl g by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(C. A. Durfee) 2 2 2
Time—2:39¾, 2:31½, 2:32¼

Distribution of purse—Geo. N. Patterson $880, Carl $440.

2:16 trot, purse $2,000:

Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by George Simmons 2:28 (Murphy) 1 1 1
Seneca Boy, ch g by King Entertainer 2:10¼—Seneca Maid 2:30 by John Adams.....(Dean) 2 2 2
Bon Courage, ch g by Bon McKinney (3) 2:24¼—Helen Keyes by Sidney Dillon.....(Ward) 4 3 3
Columbia T., b m by Bon Guy (3) 2:11¾—May T. 2:15 by Monterey 2:09¼.....(Daniels) 3 4 4
Matawan, br g by Athadon (1) 2:27—Cora Wickersham by Junio 2:22.....(Schwartz) ds
Time—2:29, 2:35, 2:36.

Distribution of purse—Mirthful $1000, Seneca Boy $500, Bon Courage $275, Columbia T. $225.

Eighth Day, Thursday, Nov. 11.

With the sunshine that had been doing duty for the previous day and the morning of Thursday, any any ordinary racetrack would have been in some sort of shape by afternoon, but not the nigger foot route at the P.-P. I. E. Like a periodic souse, having been dry a long time it is now balancing the score by being wet a long time, as the progress made yesterday in the drying-out process was almost imperceptible. Harrows had little effect on it, floats were out of the question entirely, and the going was a fright. There was no slushy stuff to spatter, but it was rutted and ridged like a miniature "contour map" of the Sierras, flanked by a few counties from the Cascade and Rocky mountain sections. When a horse stuck his foot in it it hung there, and sulkies bounced along like old-fashioned buckboards on a corduroy road.

Half a dozen two-year-old trotters came out for that division of the State Fair futurity, Natalday being the only one with any previous racing experience. It was pretty tough on the young 'uns to ask them to race in the mud, but they went at it with a will and went two very nice heats, Natalday, with Millard Sanders up, winning handily in each mile. Will DeRyder driving Frank Malcolm's filly, Miss Bond, to second money, the two leaders both going steady races. Charley DeRyder with Miss Axworthy Dillon and Will Durfee with Hermes took turns at third and fourth place, dividing those moneys, the latter making a wild break in the stretch in the final mile when right up with the leaders and in position to challenge for the heat. Sadie Ansel's breaks cost her ground in both heats, while Alesandro finished on the wrong side of the flag the first time out.

The 2:09 trot, with only Albaloma, Esperanza and Kid Cupid to start, was a joke race which would have been a serious affair had it been at a "betting meeting." Albaloma, on all previous performance, should have won in straight heats but only speared one, the others also taking one each. Esperanza went to the front around the turn in the first heat and opened up a lead that Quinn made no apparent effort to cut down, giving a lifelike imitation of a man whose mind was wandering far, far away. In the second he went into the lead and stayed there as he should, winning looking back, Kid Cupid breaking behind him. In the third they went away like a funeral but quickened after a hundred yards or so, Kid Cupid going out in front. Albaloma moved up down the inside passage of the back stretch, but Cupid headed him into the turn and before Quinn's alarm clock had gotten around to ringing time had stolen a lead of several lengths. Now when Cupid trots he trots fast, and this is one mile he refused to break. Along toward sundown Quinn began driving to catch him, with Durfee also shaking up the tiring Esperanza, but neither could bother Daniels, who won as he pleased. The event caused considerable amusement to those few present and set the judges to thinking, but no action was taken.

Hal Boy, favorite for the big pace on Saturday, won his event in straight heats and fair time, considering the going, but he had company at all times in the shape of a light chestnut gentleman from Denver—Red Rock. This handy sidewheeler, with the shipping soreness all worked out of his system, was the hero of the occasion and was not beaten until the race was over. On his last appearance he was still feeling the effects of his ride on the cars, but today he was there with the goods and gave the crowd a few genuine thrills.

Pointer's Daughter drew the pole and immediately elected to perform at her worst rather than at her best, taking an awful hold and going into her hobbles in approved O. U. C. fashion. When she did come down pacing something else was off, and after a few fruitless efforts to get them away by her, Starter Updegraff designated the better acting Red Rock as the guide horse, also cautioning drivers to be in shape to "leave there" on reaching the wire. One recall and one fine, fifty bucks for Dick McMahon, were the result, and then they went away, Pointer's Daughter being in a tantrum at the time and not settling until she had gone almost an eighth. Hal Boy led the procession to the back stretch, Red Rock, John Malcolm, Princess Patch and Soumise trailing as named, the Princess breaking at the half. Hal Boy, Malcolm and Red Rock came into the stretch well bunched and began what was, for the going, a mighty fast brush. McGuire and McMahon are both wily and artful Frenchmen, and at it they went. Past the paddock the former was a bit to the good and McMahon went to driving in real earnest, as evidenced by his leaning attitude—a sure sign. In front of the club house Dick imbued new life into Hal Boy and the game little fellow let out a link that landed him at the wire winner, but with not much to spare. Princess Patch, after settling at the half, beat out John Malcolm, while Soumise and Pointer's daughter both caught the flag.

With the bad actor out of the way the field was not a hard one to handle, Dick nodding for the word a bit back on an early score and going to the lead before the eighth was reached and staying there throughout the mile and winning much more easily than in the first heat, John Malcolm finishing strongly to beat Princess Patch for the lesser money. In the third the Boy again set the pace, with Red Rock trailing, Malcolm lapping outside and Princess some lengths back. In just such fashion they came into the stretch and past the paddock gate, Joe not being able to pull to the right on account of Malcolm's nearness and evidently not caring for the inside going, where there was room to spare. Gradually the Boy and the Red 'un drew away from Malcolm, and when the hole was big enough, McGuire and his horse popped out like a jack in the box and in the few remaining yards picked up over a length of ground, Hal Boy under a sting or two from Dick's whip, barely beating them. The details:

Thursday, Nov. 11.—State Fair Futurity, two-year-old trotters, purse $600.

Natalday, br c by Wilbur Lou (3) 2:10¼—Ella J. by Bob Mason 2:27¼.....(Sanders 1 1
Miss Bond, b f by The Bondsman—Miss Harris by Sidney Dillon .....(W. DeRyder) 2 2
Miss Axworthy Dillon, b f by Axworthy 2:15½—Cleo Dillon 2:13¾ by Sidney Dillon.....(C. DeRyder) 3 4
Hermes, br c by Carlokin 2:07½—Miss Quealey 2:26¾ by Moko.....(W. G. Durfee) 4 3
Sadie Ansel, ch f by Prince Ansel (2) 2:20½—Lauress by Mendocino 2:19½.....(Dowling) 5 5
Alesandro, b g by Barney Barnato — Ramona by Prince Robert .....(Alvord) ds
Time—:38¼, 1:14¼, 1:51¼, 2:32
:37½, 1:14½, 1:50½, 2:29½

Distribution of purse—Natalday $300, Miss Bond $150, Miss Axworthy Dillon $75, Hermes $75.

2:09 trot, purse $2,500:

Albaloma, b g by Almaden D. 2:16¼—Loma B. by Stam B. 2:11¼.....(Quinn) 2 1
Esperanza, b m by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(W. G. Durfee) 1 2
Kid Cupid, ch g by Cupid 2:18—Zarina 2:13¾ by Dexter Prince .....(Daniels) 3 3
Time—:35½, 1:10½, 1:45 , 2:23½
:36¼, 1:11½, 1:46½, 2:22
:37 , 1:12½, 1:49 , 2:25

Distribution of purse—Albaloma $937.50, Esperanza $718.75, Kid Cupid $593.75, Association $250.

2:11 pace, purse $2,000:

Hal Boy, b g by Hal B. 2:04½—Altalena by Altamont 2:26¾ .....(McMahon) 1 1
Red Rock, ch g by Louis Wilkes 2:15½—Red Bird by E. S. 2:11¼.....(McGuire) 2 2
John Malcolm, br g by Dan Logan 2:07¾—Susie Miller by Prince Ansel (2) 2:20½.....(Daniels) 4 3
Princess Patch, b m by Dan Patch 1:55¼—International Queen 2:13½ by Tom Exum 2:14½.....(Macey) 3 4
Soumise, b m by Billy Dunlap—Crickett Basler by Robert Basler .....(Leggett) ds
Pointer's Daughter, b m by Star Pointer 1:59¼—Banker's Daughter 2:13¾ by Arthur Wilkes 2:28½ .....(Finley) ds
Time—:34¼, 1:07 , 1:42 , 2:15¼
:34½, 1:09½, 1:44¾, 2:19
:33¼, 1:06 , 1:40 , 2:14½

Distribution of purse—Hal Boy $1,000, Red Rock $500, John Malcolm $275, Princess Patch $225.

200 WINNING RACES FOR GEORGE CASTLE.

When George Castle, the Chicago theater manager drove Dublin Lady 2:09½ to victory at the recent Beloit, Wis., meeting he was a sorry sight, as covered with mud, he "weighed in" and heard the judges proclaim his victory.

But Mr. Castle never noticed the mud decorations. On the contrary, he smiled a broad smile, for he had completed a score of 200 winning races, thereby placing himself at the head of all amateur drivers. All regular horse races, mind you, for purses—not a matinee performance in the lot—and they had been contested all over the land, some as far south as Georgia. The first victory was achieved at Waukegan, Ill., in 1892, and his mount was a big gray colt named Wooloomooloo, that later was picked up by a little tornado and dropped from such a height his neck was broken.

Since the Waukegan debut Mr. Castle has campaigned a stable of trotters and pacers every year. He trains them himself, for having a horse "fit" on race day is half the battle. When the season opens he is up and away, lighting wherever the purses are thickest. Mile tracks of the Grand Circuit type and country "bull rings" look alike to him.

The dangerous excitement of going around the turns of a halfmile track in the midst of a band of hoppled pacers, most of them driven by farmer boys, is water on the Castle wheels and, incidentally, he has paid out a small fortune every season for the last twenty-three years in pursuit of this joy. Of course, the 200 winning races and others in which smaller parts of the purses were secured helped to pay the bills, and now and then an assistant drove the horses. Since 1900 the Castle stable has won 312 races, been second 203 times, third 131 times, fourth 104 times and 171 times unplaced. Total starts, 921. Money won, $105,448.65.

Although horse racing is an expensive fad, Mr. Castle keeps just as strict account of the pastime as he does of his theaters, and his horses are his personal friends. A lot of them are pensioned, spending life's twilight in ease and luxury on a farm at Park Ridge, where they may easily be visited, and others are presented to men who will give them a good home for life.

Some of the string are: Gold Standard, trotter, 2:11¼, which won seventy-five races, making himself a champion in that respect, and was pensioned. One day another horse was turned into his pasture, whereupon Gold Standard attacked the newcomer but was beaten and so injured he had to be destroyed. William Mc was a 2:05¼ pacer He won sixty-two races, was presented to a Michigan man and died a little later.

The pacer Sherman Clay 2:05¾ won over fifty races after Castle bought him, and another good sidewheeler was Giles Noyes 2:05½. Rocker paced to a 2:11 mark and then was driven on the road by a woman. Dr. W. W. Z. 2:09¼ won thirteen races for Castle and then broke a shoulder playing in his stall. The vets said the injury was incurable, so Castle turned the horse out with other pensioners. Nature, however, effected the cure the vets said was impossible, and to show how good he was Dr. W. W. Z. went right on and won some more races, including a $5,000 purse at Indianapolis, the biggest one the Castle horses ever took down.

Miss Castle 2:09¼ was a very good pacer, won a string of races and then broke a hip bone and had to be killed. Among the other old timers are: Scapegoat 2:21 trotting, 2:11¼ pacing, a pupil of Ed

Geers, who did not like him and said, "That hoss has a face just like a convict." But Castle got along with the double gaited one and made him win. The trotters, Louis E. 2:15¼ on a halfmile track, and Dr. Price 2:16¼, are a pair Castle liked mighty well, and he bred the trotter, Marlinspike 2:15¼.

"Oh, yes," said Mr. Castle after he had given me these facts, "I'll be out again in the spring. Got some pretty fair horses, too. Tommy Finch 2:09¼, and that showed 2:06½ in a race, may start. Dublin Lady is good. Bessie Axtelle has been in 2:17¼ on a halfmile track. My three-year-old pacer Minnie N. 2:15¼ won seven races this year, and only one three-year-old beat her. Then I have a two-year-old pacer, The Aim, yearling record 2:18¼. He started five times against three-year-olds and was second or third four times. He's in all the futurities, and I'm going to send him South for wintering and let a high class trainer get him ready, because I certainly would love to win a futurity." C. K. G. Billings breeds trotters in a big way, but will not race a horse. He owns the fastest mare (Lou Dillon 1:58½), fastest gelding (Uhlan 1:58), and the fastest stallion (The Harvester 2:01), but sells all the foals from his farm as yearlings, driving only in matinees.—Chicago Racing Herald.

PACIFIC BREEDERS FUTURITY STAKE No. 15.

The following is a complete list of ninety-three third payments made on November 1st in Pacific Breeders Futurity Stake No. 15, for foals of 1915, as follows:

D. A. Allen's br c Leonid McKinney by Leonid, dam Almah McKinney by McKinney.
J. N. Anderson's foal by Peter the Great, dam Della Derby by Chas. Derby.
C. A. Arvedson's foal by Prince Ansel, dam Constancia by McKinney; foal by McAntara, dam Colusa Maid by Sutter.
E. T. Barnette's foal by Carlokin, dam Zephyr by Zombro; foal by Copa de Oro, dam Phyllis Barnette by The Director General.
C. J. Berry's foal by Carlokin, dam De Ora by Copa de Oro.
I. L. Borden's foal by Ed. McKinney, dam Ramona by Prince Robert; foal by Major's By Guy, dam C. D. K.; foal by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes; foal by Ed. McKinney, dam Miss Barney by Barney Barnato; foal by Ed. McKinney, dam Ella G. by Hamb. Wilkes; foal by Ed. McKinney, dam Cleopatra by Zolock; foal by Ed. McKinney, dam Directola by Direct; foal by Ed. McKinney, dam Maude Adams by Cresco Wilkes; foal by Ed. McKinney, dam Dolly B. by Welcome.
Robt. S. Brown's foal by Allen Jay, dam Mercedes by Dictatus.
J. J. Campbell's foal by Bon Cres, dam Silver Fir by Silver Bow.
S. Christenson's br c King Albert by The Bondsman, dam Reina Directum by Rey Direct.
John N. Colomb's b f Verna McKinney by Vernon McKinney, dam Mary Gordon by Gordon.
Chas. Cook's b f Goldie McGregor by Onward McGregor, dam Gypsy C. by Nutwood Wilkes.
S. H. Cowell's foal by Panama, dam Harvest Queen by Silver Arrow; foal by Panama, dam Zaza by Henry Nutwood.
Chas. L. DeRyder's foal by Joe Patchen II., dam Arawanna B. by Sidney Dillon.
Wm. C. DeRyder's b f by General Watts, dam Miss Douglas by Cochato.
Wm. E. Detels' foal by Geo. N. Patterson, dam Daphne McKinney by McKinney.
Dr. Wm. Dodge's b. c. Bon Rex by Bon McKinney, dam Johanna R. by Limonero.
Jas. F. Dunne's bl f by Tom Smith, dam Letter B. Jr. by Benton Boy; b f by General Watts, dam Native Bidwell by The Native.
V. K. Dunne's ch c The General Bond by General Watts, dam Bourbon Bond by The Bondsman.
W. G. Durfee's foal by Copa de Oro, dam Christianita by Zolock; b f by Carlokin, dam My Irene S. by Petigru; b f by Copa de Oro, dam Dixie W. by Zolock; foal by Carlokin, dam Honey Healey by Zombro.
Byron Erkenbrecher's foal by Copa de Oro, dam Reta H. by McKinney.
E. A. Gammon's b c The Meteor by Peter McKlyo, dam Cleo Dillon by Sidney Dillon.
Alex Grant's foal by Wilbur Lou, dam Sona by McKinney.
Hemet Stock Farm's foal by Wilbur Lou, dam Eradiate by Geo. W. McKinney; foal by Wilbur Lou, dam Fiesta Queen by On Stanley; foal by Wilbur Lou, dam Hemet Girl by Geo. W. McKinney; foal by Wilbur Lou, dam Nealy W. by Geo. W. McKinney; foal by Wilbur Lou, dam Stambia by Stam B.; foal by Wilbur Lou, dam Lady Zombro by Zombro; foal by Wilbur Lou, dam Little Louise A. by Boodle; foal by Wilbur Lou, dam Rosemary Lou by Kinney Lou; foal by Kinney de Lopez, dam Louise Carter by Chestnut Tom.
H. A. Hershey's b f Skye Ball by Jim Logan, dam by Falrose.
H. S. Hogoboom's ch f Beautiful Baby by Palo King, dam Beautiful Morn by Iran Alto; b c Bingen the Great by Robert Bingen, dam Beautiful Bird by Nutwood Wilkes.
Craig Hyde's foal by Jim Logan, dam by Demonio.
Abe W. Johnson's b c W. K. J. by Directum Penn, dam Belle Raymon by Raymon; br f by Directum Penn, dam Anna Elton by Elton.
Ed. Lavin's b c by George Hammett, dam Stella McKinney by Ed. McKinney.
Wm. Loftus' foal by Copa de Oro, dam Leonor McKay by McKinney; foal by Copa de Oro, dam Annabelle L. by Hamb. Wilkes; foal by Carlokin, dam Iran Belle by Iran Alto.
R. J. MacKenzie's foal by Zomblack, dam Martha Spy by The Spy; foal by Joe Patchen II., dam Merry Widow by Red Pac; foal by Joe Patchen II., dam Zombro Belle by Zombro; foal by Quintell, dam Eugenia B. by Zombro; foal by Joe Patchen II., dam Hawthorne by McKinney; foal by Quintell, dam Ava J. by Zombro; foal by Quintell, dam Greggie by Steinway; foal by Quintell, dam Madalca by Alcymont; foal by Vernon McKinney, dam by Carlokin.
Carey Montgomery's b c Tennessee Bill by Jim Logan, dam Lela H. L. by Nutwood Wilkes.
A. L. Nichols' foal by Robert Bingen, dam Silver Benton by Senator Boggs.
J. W. Pendleton's bl c Bertrey Bells by Derbertha Bells, dam Abbie McNutward by Guy McKinney; bl c Louiska Berbells by Rapallo, dam Beautiful Bertha by Moormont.
W. L. Scott's foal by Wilbur Lou, dam Lady Lou by Stanton Wilkes.
J. E. Short's foal by Skido Wilkes, dam Keno by Prismo; foal by Skido Wilkes, dam Honda Girl by Rubino.
Mrs. Jas. Stewart's b f Lady Eleanor by Copa de Oro, dam Easter D. by Diablo.
C. F. M. Stone's foal by Carlokin, dam Cora Jane by Del Coronado.
L. H. Todhunter's foal by Peter McKlyo, dam Zombowyette by Zombro; foal by Peter McKlyo, dam Osmuda by Bon Voyage.
Woodland Stock Farm's foal by Prince Ansel, dam Ila Moko by Moko; foal by Prince Ansel, dam Eocita by Moko; foal by Prince Ansel, dam Edna Saunders by Axworthy; foal by Prince Ansel, dam Alma McGregor by Jay McGregor; foal by Prince Ansel, dam Ella J. by Bob Mason; foal by Prince Ansel, dam Aleema by Nutwood Wilkes; b c by Prince Ansel, dam Mista Lockheart by Lockheart; foal by Prince Ansel, dam Silver Haw by Silver Bow; foal by Robert Bingen, dam Ruby Crellin by C. The Limit; foal by Robert Bingen, dam Nutflower by Nutwood Wilkes; foal by Robert Bingen, dam Fair Recluse by Moko; foal by Robert Bingen, dam Centerguy by McKinney; foal by Robert Bingen, dam Caritone by Antone; foal by True Kinney, dam The Attraction by Peter the Great; foal by True Kinney, dam Josie D. by Nutwood Wilkes.
M. L. Woy's br c Strathalie Hall by Black Hall, dam Strathalie by Strathway.
O. H. Wright's bl c Jake Mosier by Reflector, dam Rosie Wilkes by Falrose.

ARIZONA STATE FAIR.

The Arizona State Fair, which commences Monday, is experiencing considerable difficulties with its speed program, owing to various circumstances. The "foreign classes" in some instances failed to fill, and for those few remaining to be raced horsemen hardly think the long ship worth while. A number of horses entered have gone wrong, leaving the fields light, but the classes for Arizona horses have generous entry lists and promise good sport. Secretary Shaughnessy has wired to local parties guaranteeing the regular "Phoenix treatment" for all comers, as well as special purses up to the limit of his appropriation, but at the time we go to press the result is still in doubt. Whatever the outcome we will risk a prophecy that next season Mr. Shaughnessy has an appropriation that will enable him to prepare a program that will attract the west's best horses, as usual.

IOWA HORSES FOR THE WAR.

Wide fame has been achieved by Iowa's capital city as a war horse market in recent months. At the present time more than $1,000,000 is being paid out each month for horses purchased for use in the armies of the allies. This will represent a tidy sum of about $18,000,000 which Iowa horse breeders and dealers will receive. From present indications there is no sign of an early letup in the heavy demand for horses. In fact, it is believed that the demand for Iowa horses will continue for some months after the close of the war, because of the great number which have been lost in war service.

Horses are being brought to Des Moines at the rate of 1,500 a week. Large barns and corrals have been built in the southwest section of the city to care for them. The greater part of the buying is being done by Joe Nugent of St. Louis, who has large contracts with the English government. However, horses are being bought at these stables for the use of the French, Italian and Belgian governments, the British agents taking the pick of the lot.

Since the war began it is believed that more than 100,000 Iowa horses have been purchased by the governments at war. The Hawkeye State has been one of the heaviest contributors of horseflesh to the foreign armies, and will continue to be for some time to come, as Nugent and his corps of assistants are buying heavily.

The effect this tremendous business has had upon the horse business in Iowa is indicated by the jump which prices have taken in the last year. Horses which were disposed of at prices ranging from $80 to $100 before the opening of the war are bringing as high as $180, which is about the top price the English are paying for the select gunners—animals intended for the artillery service.

The prices paid by the English agents range from $165 to $180, while the French pay from $150 to $175. The prices paid by the Italians are even lower, ranging from $145 to $165. Belgium and England are buying heavily of gunners just now, while Italy is taking many four-year-olds and draft horses.

The local war business has been handled without the loss of a single animal from death, which is considered a remarkable record. The death rate in other buying centers in the west is reported to be heavy in some cases, averaging as high as 25 head per 1,000 horses handled.

As rapidly as the horses are inspected and approved they are turned over to the blacksmiths and branders. Each horse is branded for the government purchaser and its tail and mane are trimmed. It is turned over to the blacksmith shop, where its feet are properly cared for. A great deal of attention is given this feature of the work, and the result is that a small army of workers is kept busy five or six days a week. Western cowboys have been brought in to handle the horses and to ride them during the inspection. On busy days the concentration camp takes on the appearance of a huge wild west show, several hundred horses having been turned into the corrals to await inspection.

Des Moines is one of the two great horse-buying camps where there are four government inspections. Oklahoma City, where horses from the southwest territory are taken, is said to be carrying on a business almost as large as that in Des Moines, and each week these two camps send coastward nearly 3,000 horses destined for European war service.—Breeders' Gazette.

LOW PRICES RULE AT SALE.

Quite a good crowd gathered Wednesday evening at the Riding and Driving School, the occasion being Chas. L. DeRyder's annual fall sale of trotting horses, but if an old Enfield rifle loaded with birdshot had been turned loose on the assemblage at a fair range no "buyer" would have been injured. There were plenty of people on hand who were interested in the offerings, but folks who right down in their hearts wanted to buy a horse were scarcer than hensteeth around Petaluma. There were individuals given away that should have brought from three to ten times the price they did bring, the situation being summed up in six words: "No fairs, no racing, no breeding." There were stallions and mares fit for any country, young things bred to be fast and game, a few head ready to train for next year's races, but—they are all practically worthless in a section where there is no racing. Will Higginbottom, with all his resources, had a hard evening of it, but secured the last cent the crowd would go on each animal.

The sale was topped at $275 by a four-year-old Star Pointer gelding out of Miss Harris by Sidney Dillon, A. W. Longley being the purchaser. Washington McKinney Jr., a fine looking stallion with proven speed, was knocked down at $260 and was subsequently bought back by his consignor, F. E. Emlay. Not a horse brought anywhere near its real value, in many instances the high bid being less by far than the figures previously refused at private offer. All the consignors were sufferers, Charley DeRyder and Hi Hogoboom being the worst off. The figures are published herewith, accompanied by the suggestion that you take to heart the lesson they teach, and be ready to do your share when proposed concerted action is taken by horsemen to improve the local situation:

El Volante S. (5), b h by El Volante, V. K. Dunne	$220.00
Bay Filly (3) by Zombro, Mr. Townsend	150.00
Brown Filly (2) by The Bondsman, S. C. B. King	65.00
Blanka S. (5), ch m by Red McK., Sam Broillar	100.00
Katherine S. (11), ch m by Diablo, Cornett Bros	60.00
Rosemary, ch m by Raymon, H. Cohen	50.00
Dr. Dawson (7), b g by Del Coronado, E. T. Ayres	130.00
Black Mare (5), s.t.b. by Oh So, Cornett Bros	60.00
Yearling, bl g by Directly, M. C. Delano	50.00
Weanling by Vernon McKinney, T. D. Sexton	45.00
Valeen M. (5), b f by Bonaday, Frank Burton	140.00
Filagree (14), ch m by Beau B., H. Cohen	72.50
Bay Horse (3) by Copa de Oro, Joe Ryan	80.00
Bay Gelding (4) by Star Pointer, A. W. Longley	275.00
Prince Del Monte (9), ch g by Kinney Lou, Jas. Dunne	130.00
Leola Lou (9), gr m by Kinney Lou, Fred Ward	115.00
Crabtree's Gift (6), ch m by Hedgewood Boy, Fred Ward	170.00
Washington McKinney Jr. (7), bl h by Wash. McKinney, Joe Ryan	260.00
Palo King (13), b h by Marengo King, H. B. Calmes	65.00
High Head (3), ch g by Palo King, H. Cohen	77.50
Sun Up (2), b g by Palo King, Joe Ryan	40.00
Beautiful Bird (12), b m by Nutwood Wilkes, Elmo Montgomery	85.00
Woodland King (3), b c by Palo King, Millerick Bros.	75.00
Beautiful Morn (7), b m by Iran Alto, J. H. Nelson	70.00
Beautiful Girl (4), ch m by Iran Alto, Joe Ryan	80.00
Little Express (3), b f by Alto Express, Joe Carson	145.00
Marlin (4), b g by Dialect, Joe Carson	145.00

SOME TIMELY COMMENTS.

I have been reading the melancholy reports of the financial outcome of the 1915 baseball season, and cannot help but contrast it with the splendid season that harness racing has enjoyed. They call it one of the toughest years that baseball has ever experienced. Many of the smaller, or so-called "bush" leagues were broken up before mid-season, and even the major leagues have had hard sledding—and this with a sport that receives millions of dollars' worth of free advertising! Not only that—but in season and out of season it gets the backing and boosting of a host of inspired press agents and the unlimited favor of innumerable sporting editors and space writers.

I quote from an article written by a baseball scribe of prominence, and take it that he knows the facts:

"The Phillies (Nationals) won the pennant in their league, but their profits during the whole regular playing season did not reach $25,000."

Why, the North Randall meeting alone made more money than that, and it occupied but a single week—or rather, but five days!

"The Brooklyns," the writer pursues, "made money for the first time in many years, their profits being about $20,000. The Giants made but $15,000, mostly at home, for they lost money on the road. The Pirates (Pittsburghs) did well till mid-season, but ended up by losing a lot of money. The Cincinnati Reds lost $25,000; the St. Louis Cardinals between $25,000 and $40,000; the Chicago Cubs are said to be behind something like $25,000.

"The world's champions, the Boston Red Sox, cleared about $60,000, but this is not an adequate showing for a world's pennant-winning team. The Detroit club drew well and its profits were about $50,000, while the Chicago White Sox made $25,000, but fell behind on the season on account of spending $40,000 for new players. The Senators (Washington) lost $25,000 while the Browns (St. Louis) dropped from $35,000 to $50,000. The Yankees (New York) lost about $60,000, while the debit of the Athletics was around $50,000."

Now, these figures tell a sadly significant tale. It is one which does not, under the circumstances, show up well for baseball as a sport.

Let us assume that harness racing had received just one-tenth the boosting that baseball was favored with—you can easily imagine the outcome!

As it was, we did very well, thank you, especially in view of the fact that our sport is conducted sans specific, intelligible rules—such controlling bodies as we have being merely collecting agencies, that's all.

I traveled more widely the past season than ever before, deserting the Grand Circuit at Detroit in order to visit the Great Western and, later on, various halfmile track meetings, and I can conscientiously say that I never previously saw better attendances. In fact, with only two exceptions, the meetings that I covered were record-breakers from an attendance standpoint.

I am more than ever convinced that the American people have a true and ardent love for our sport as evidenced by the patronage we have received during the past three lean years of general business conditions. While the figures are not at hand, I judge that there was more harness racing in 1915 than there was in 1914, and that season was certainly a "whale." The number of tracks and associations that went out of business was very small, and was more than counterbalanced by the number of new meetings that were held, many of them, too, having newly constructed plants.

In my travels I met many secretaries and horsemen, and made it my business to inquire from them as to the attendance at the meetings which they either managed or visited, and the one observation covered it all: "Good crowds and lots of interest."

Then, too, it seemed to me that I never saw such large fields of horses. My co-worker, Grover Perrigo, was asked as to this feature, since he has general editorship of all the racing summaries that come into The Review office, and he replied: "I should say that there were many more horses racing. It seems to me that each race contains 30 to 50 per cent more horses than was the case a couple of years ago; and another feature that goes to prove the large number that are being raced is the way the fields have held up in the late fall when so many fairs are held."

I asked him, too, what he attributed as the cause of the increased number of horses, and he answered: "A general revival of interest, especially in the cases of the smaller meetings; but I believe that the liberality of the rules, which permit horses to race under time allowance clauses, and do not outclass them right away, did a lot to bring out the big fields."

Incidentally, "Perry" referred to his old home town, Oshkosh, Wis., when I called his attention to the slump in baseball.

"Oshkosh, during the seasons of 1912-'13-'14, had the pennant-winning team in the Wisconsin-Illinois League; but, in spite of the hurrah that went with a champion team, they lost so much money in 1914 that they could not even organize for this season. The park was rented for Sunday games, played by traveling "semi-pro" teams, but while the rental was only $25, they couldn't make it pay. But the fair held there drew the largest crowds that ever passed through the gates, showing that racing had added to its popularity, whereas baseball had lost favor." Continuing, he said: "Quite a number of the fair meetings added spring or early summer meetings in 1915, and all were successful."

There are some discouraging things about this business of ours, but so long as the general public shows a disposition to patronize it, we need not worry much about the future. It's the money that is paid at the gate to see the show that counts, and I believe that the time will come when associations can reduce entry fees to a minimum. In many sections of the country they have been materially lowered, and I know a number of places where non-money winners are not taxed at all for entrance.

But—if we could race without paying any entrance what a grand thing it would be!

Very often I hear it said that we are not attracting to the business the younger element, and that when the present veteran enthusiasts have passed away, interest will wane. Well, there is something in that claim; but not nearly so much as one unfamiliar with the conditions would think. It's true that the general use of automobiles has tended to divorce interest such as was inspired when Father drove good horses and Son followed his lead; but it's my belief that Son will ere long learn to regard his auto as only a convenient means of transport and not a sporting tool. Then, do not forget that horse love was not built up on one or two generations of ancestors. It traces back through many generations not only, but thousands of years, and cannot be wiped out or bred out in a short period. I have noted and others have told me of numerous men who bought horses just because they got into the habit of attending fairs in their autos. The sport attracted them, they became fond of it, and merely watching the racing was not enough to satisfy them. They are flocking to the races by the thousands, these automobilists, and it very easy to figure that plenty of them are going to be more than just sightseers.

The thing for us to do is to make our racing and its environment much more attractive—in other words, stage it like it should be, and pay more attention to beautifying our plants. The little expense incurred for paint and whitewash, for flower beds and lawns, would bring direct and indirect returns—splendid ones. Sometimes when I visit a dowdy, ill-kept track, where the racing is conducted in keeping with the surroundings, I wonder how it is possible to get anyone to come to see the show. What a wonderful sport it is!—to survive all its drawbacks and yet thrive! Just kick baseball around like our game has been booted, or cut down the free boosting that it receives, and where would it land?—Marque, in the Horse Review.

HORSE MARKET STRONGER.

The rapidly improving situation in the iron and steel trade, and in manufactures in general, has already been responsible for a marked improvement in the demand and prices for heavy horses. Good sound geldings, weighing over 1700 pounds, have averaged around $300 per head recently, even in lots numbering from six to ten head, and demand for the good ones is steadily increasing, writes Secretary Wayne Dinsmore of the Percheron Society of America.

Well informed market men estimate, from a knowledge of horses already exported, that approximately half a million horses have already been sold on war orders. The value of these is close to one hundred million dollars, and the demand seems greater than ever. Buyers are scouring the country in every conceivable district, in the United States, and even in northwest Canada. Every effort is being made to buy as cheaply as possible, but artillery horses promise to cost more before the war is over. Fully ninety per cent of the artillery horses are sired by draft stallions, out of small mares, and the demand for draft stallions is gaining in consequence, especially on the western ranges. Ranchmen have been able to obtain much higher prices there for their grade drafters, than for any of their light horses, and the lesson has been driven home in dollars and cents.

All breeds of draft horses in Europe have been heavily drawn on for war purposes, and the Belgian breed has been practically destroyed. Percherons have also suffered, for the need for horses on guns and transports has been so great that virtually all available horses have been taken by the army. M. Miteau, foreman for one of the America's importers, who is a very reliable observer, traveled all through the Perche district in July and August of this year, and reports that all horses three years old or over, except the most valuable stud stallions or mares nursing foals, have been commandeered, and that it would not be possible to find two hundred stallions suitable for export to America, even if exportation were allowed. This drives home, most forcefully, the fact that American horsemen must depend on the produce of American studs for draft sires, for many years to come. Exports to foreign countries will unquestionably occur before we have any more importations.

American bred horses have been brought forward this year as never before, exceeding in type and size those of previous years.

The champion mare at the Iowa State Fair, and the Grand Champion mare and Reserve Grand Champion stallion, at the Panama-Pacific Exposition, were all American bred, and came from three separate studs, located in Illinois, Iowa and Virginia respectively—again bearing testimony to the wide distribution of good Percherons in the United States..

More than seven thousand American bred Percherons have already been recorded by the Percheron Society of America, and the fiscal year is not yet closed. Transfers show an increasing activity in the sale of Percherons in all sections, especially in yearling and two-year-old stallions.

The most important development in the past eight months has been seen in the marked preference given to colts that have been so liberally fed as to permit of full development. Such colts have sold readily at prices that have left a handsome profit to the breeder. Half starved or stunted colts have met with slow sale and at low prices.

It is to be regretted that so few breeders feed their weanling, yearling and two-year-old Percherons enough of the right kind of feed. Many believe they feed enough, when as a matter of fact they are not furnishing half what the colts ought to have.

The horses already referred to as winners of championships in our largest shows, against the best of imported horses, never knew what it was to be hungry from the time they were foaled. Oats, bran, bluegrass pasture and alfalfa hay furnished most of the ration, and the colts had all they would eat clean.

Percheron breeders in America have the best of Percheron blood, and an opportunity never dreamed of. Those who meet it adequately will reap both fame and fortune.

GLANDERS NEAR HOLLISTER.

The Hollister Free Lance says that seven horses, tested within recent weeks by Dr. G. W. Lawson, county veterinarian, and proven to be infected with glanders, were shot Saturday in the Panoche district by Dr. J. Iverson, deputy state veterinarian. Six belonged to Strohn brothers and one to James Hannagan.

Twenty-one horses have been destroyed by the authorities in this county since May 1 because of the glanders. Of these, eleven belonged to the Hudner estate in the Bolsa district, eight to Strohn brothers of Panoche one to James Hannagan of Panoche and one to P. T. Brown, whose ranch is near the Cannon grade between Emmet and Llanada.

Dr. Lawson states that he believes that the disease has now been reduced to a point where it will soon be eradicated. Two suspicious cases are now under observation. The doctor has covered all suspected territory thoroughly and made all possible investigation and he thinks that when he has finished these two cases the work of stamping out the disease will be about completed.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

BEFORE THE MUIR TRAIL.

[Continued from last week.]

Over Muir Pass.—But to return to the trip. As we approached the critical Muir pass, over the Goddard divide, on which the success or failure of the trip apparently depended, we heard various reports from such mountain people as we met. These reports were unanimous in only one thing, and that was that the pass was impossible. We resolved, nevertheless, to undertake it, and in order to have the entire day, if necessary, for the attempt, we moved up the night before to Wanda lake at the head of Evolution creek, just at the base of the final pass. There are two lakes on the two sides of Muir pass, named Wanda and Helen, for Mr. Muir's two daughters. The way up to Muir pass from the South fork of the San Joaquin on Evolution creek had not been very difficult, even before there was a trail, and the forest service is now building an extremely good trail on that side—the only actual section of what is finally to be the Muir trail which we found. The difficult parts, both of Muir pass at the north end of Grouse valley and of Observation pass at the other extreme, are on the Grouse valley side. We therefore reached Lake Wanda, which is 11,500 feet high, and far above the tree line, without difficulty. There was enough "short hair" grass about the lake to furnish scant feed for our animals and we packed up from a lower lake enough firewood for cooking, omitting the usual camp fire. It was of course bitterly cold, and we were compelled to crawl into our blankets for the night almost immediately after sunset. The scenery, however, was of a wild magnificence that would more than compensate for the effort and discomfort, even if there had been nothing else to accomplish by it.

Early the next morning we hurried out from our frost-covered blankets, made our usual morning toilet by pulling on our boots and pulling off our sweaters, and started for the pass. The way to the top was without incident, and the way down on the other side as far as Lake Helen was not difficult enough to deter any one accustomed to mountain work in rough country without trails. Here, however, our difficuleies began. In LeConte's description of his trip, he speaks with especial vividness of the portion of it in which he was compelled to go down the bed of the stream, the banks on both sides being impassable.

Apparently we made a smaller portion of our trip in the actual stream than LeConte did, and this portion, except for the incidental wetting, was about the easiest going we had. Soon after leaving the lake we came to a steep slope of snow leading down to the stream. By rolling smaller stones among the big boulders on the other side we made what we thought was a passable way for the animals over the rock talus. The snow, however, proved too steep and the animals landed at another point higher up the stream, from which it required more trail building and much risk of broken legs to get them to the point which we had prepared for them. From here on we found a few monuments left by Le Conte, and remnants of some of their trail work in the way of rolling small stones among the larger ones. The rock talus, however, is so shifting that we found even these traces interrupted at many points by huge rock slides, which presented no foothold except a chaos of tumbled angular rocks ranging in magnitude from the size of a man's head to the size of a small house. Ronald Harris, as the most rapid walker, went ahead to prospect and mark a trail, while the rest of us stayed behind to build trail and help the animals. At one point an apparently easy way to the left by a small lake was blocked at the end by an impassable cliff. The other way, on which we found some traces of Le Conte's former trip, led down a steep chimney of loose rock, on which the animals found a precarious foothold, and then across a long sloping talus of broken rock, down which we made our way as best we could. We built as much trail as was necessary and marked the route so that any others who may attempt the pass before the permanent trail is built will find their task much easier than ours was. However, down this slope the constant rock slides are likely to make it difficult to maintain any trail in a permanent condition. We built a trail, such as it was, half way across one of these rock slides, and then managed to scramble the animals by main strength across the rest without a trail. Finally, at noon we reached a small lake at the bottom of a steep slope perhaps 2,000 feet lower than the summit of the pass, and here we ate a hasty but sustaining lunch of raw dried beef, uncooked dried peaches, hardtack, cold bacon and chocolate.

From here on the bed of the stream went down in frequent waterfalls and both banks were impassable to the animals. It was necessary, therefore, to climb high up the slope on one side or the other. As nearly as we could judge, Le Conte had taken the right side of the stream, but we could not find our way up it, and Ronald had monumented a way on the left side. We followed his marks until we were misled by what looked like blazes on some trees, but were probably made by porcupines or by flying rocks, to a point where there was apparently no going farther in any direction. We scouted in all directions, and finally just as one of the party had about made out Le Conte's route across the stream, another picked up Ronald's monuments high above us on the slope just at the base of the cliff at its summit. There seemed no way to these monuments except straight up, and straight up we went over slippery rocks, escaping serious accident largely by sheer good luck. The monumented route went across the sloping rocks to the top of another steep chimney of soft disintegrated granite, so steep that no animal could obtain standing hold upon it. The animals did manage, however, to keep a sort of slipping hold, or what might almost be called a steerage way, and thus steered themselves down to better footing on the rough rocks at the bottom.

We did not then realize it, but this was the end of our difficulties. The rest of the way, to be sure, was no park boulevard. There was no trail and part of the way the only thoroughfare was the bed of the stream, into which we and the animals plunged. There was thick underbrush on both sides and many intervals of rough piles of rock. Sometimes in the stream, sometimes on one side of it, and sometimes on the other, sometimes in the underbrush and at other times on the rocks, we made our way down constantly lessening slopes and into constantly opener country, until we finally reached Little Pete meadows, at which Le Conte had camped on his memorable pioneer trip. Above this point we saw no indications that any parties, except those of whom we already knew, had ever made their way over the pass, and we saw no indications of former life except traces of the old camps of the sheep men and cattle men who had come up in the other direction from the Mono country in former years. Even these faint traces of former visits, however, included the two inevitable footprints of civilization—beer and sardines. At one point where apparently no one had been since the early sheep days I found the neck of what had once been a beer bottle, and farther down I found the rusted remnants of what had once been a sardine can. It is one of the curious phenomena of the wilderness that the products of civilization which reach farthest into the unknown are Milwaukee beer and Italian sardines.

We had made better time than our predecessors and were still fresh, so we determined to push on to the final camp at Grouse meadows. At this point, at the foot of Dusy creek, the Bishop trail from the Mono country gets in, and there were no further difficulties except a certain number of additional miles to walk. There were more traces of life. One other party had preceded us this year—in fact we saw them just going over the Bishop trail—and it seems likely that Le Conte's estimate made seven years ago of one party of visitors in three years must now be increased to perhaps one party a year.

Arriving at Grouse meadows, we found that a huge avalanche had wiped out the place where we intended to camp, uprooted great trees, throwing them bodily across the stream, and left the whole place a chaos from tree trunks and rocks. So we moved on further to the camping place just vacated by our predecessors, on the banks of a little stream lined with columbines, larkspurs, golden rod, and coreopsis. The gentleness of the scene was a refreshing contrast to what we had just been through. We found we had traveled 15 miles horizontally and 4,000 feet vertically, over some of the roughest country in all the mountains, but a certain sense of triumph in having accomplished what had rarely been done before, and what we had been told was impossible, wiped out all sense of fatigue. In fact, by this time hard work and outdoor life had brought us all into a physical condition in which mere physical weariness was an unknown quantity. The only extra strain of a day like this was the nervous tension which came from a constant sense of danger to the animals, and this was of course relieved by our final success in bringing them through safely.

Grouse Valley.—The next day we rested in Grouse valley. One of the party climbed the side of the canyon and shot a deer, which provided us with fresh meat for the remainder of the trip. Others fished for golden trout in the meadow with a success that was actually embarrassing. The main problem was not to catch fish, but to avoid catching those which were not wanted. Clayton Chandler caught the prize fish of the whole trip in this valley. It was a magnificent golden trout of pure blood, over sixteen inches long. The fish in this portion of the middle fork of Kings river are the result of one of the errors made in the early days of planting golden trout. Both golden trout and rainbow trout were planted in the river, and they have since cross-bred. There are pure golden trout, pure rainbow trout and many hybrids in the stream. The golden trout here, as elsewhere, we found the more difficult to induce to take the flies, but much more game when once hooked.

Little known as it is, Grouse valley is the gem of all the high mountain valleys. Its only possible rival is the canyon of the Upper Kern, in the Whitney region. It is a very high valley, over 8,000 feet altitude at its lowest point, and is surrounded on all sides by precipitous granite walls. On the west side are six peaks in a row, any one of which would be wonderful anywhere, that in this region have not yet been even named. Running into the valley are the high canyons of Dusy creek and of Palisade creek, both of great wildness and beauty, and both showing from their upper portions magnificent panoramas of the chaotic masses of peaks of the Goddard region farther west. Curiously enough, this apparently remote region is in actual distance very close to an easily accessible region. It is only a few miles directly down the middle fork of the Kings river to Simpson's Meadows, on the lower part of the same fork, and a good trail is now being built by Fresno county and by the Forest Service up the river. The trail is, however, not yet complete and, inasmuch as most of it has to be blasted out of solid rock, this portion of the river is entirely impassable for pack animals until the trail is built. By sufficiently hard work it is just possible for a man on foot to go through.

Next Pass Impassable.—We were now at the end of all the Muir trail route, except the Kings river canyon portion of it, which all of us had already visited, and it would be impossible to follow the direct trail down the river until that is completed. We intended, however, to follow the Le Conte route up the Palisade and Cataract creeks, over Observation pass, and down Cartridge creek and Bubbs creek to the Kings river canyon country. Muir pass, which we had just finished, had been passed only a few times before, and never with a pack train of the size of ours, while Observation pass had been conquered at least a dozen times to our knowledge, twice by members of our own party. So we started out with considerable confidence in our ability to finish the trip as originally planned. We made a short trip the first day up Palisade creek to the mouth of Cataract creek and the next morning took the animals up to a high lake on Cataract creek just below Observation pass. Even up to this point it required some rough work, and some trail building, to get the animals up, but both we and they were used to rough country by this time. As soon as the animals were unpacked we started out to spend the rest of the day prospecting a way up. Until noon we had surprisingly good luck. The snow, which must be counted on to bridge the hardest places in all these high passes, had, to be sure, melted very low, but there was only one place which had thereby been rendered impassable and we found two ways of getting around that place, one by building a trail around it over the loose rock and the other by snubbing the animals up about twenty feet on the face of a cliff with crevasses into which we could have wedged stones for some sort of a partial foothold. Beyond that we scouted out a route by which, with not more than a few hours of trail building, it would be possible to bring the animals up to the foot of the final talus. But here we were confronted by a situation which made Harris, who had already been over the pass twice, wonder whether geological ages had not elapsed since his last visit. A great rock slide had entirely changed the face of the slope and made it many times higher and deeper, while at the bottom the snow slides of a temporary glacier had piled up a real moraine. Where on his former visit he had had to build about 100 feet of trail, we would have at least 1000 feet to build. We did not give way for this, however, but worked a way up the long, rough talus, which we concluded with hard enough work might be made at least not quite impossible, to the snow at the top. Here we found the greatest transformation of all. Where in former years had been a great slope of snow at least 200 feet deep, the snow was now confined to steep, narrow gorges, with an impassable talus of great rocks between. Water was running under this snow, making of it a precarious snow bridge through which we ourselves fell at one place and through which it was evident the animals would fall at more places. At the top was a long slope too steep for either men or animals to find a foothold, except by cutting steps, and too soft for the steps to be safe footholds for the animals. This slope was closed at the very top by a vertical wall of ice, through which Fred, the packer, proposed that we might cut a trench, until it was discovered that the ice wall was backed up by a core of solid granite. We held a council of war on the snow and unanimously decided that it would be foolhardy to risk animals up such a passageway. Our packer was of the opinion that with sufficient hard work there was a bare possibility of getting part of them over alive, but it was certain that part of them, and possibly all of them, would be killed in the attempt. So we reluctantly started on the return climb to camp.

[Concluded Next Week.]

—o—

Who Got Him?—James Parkington has shipped to California, on the St. Louis, which sailed on Saturday, September 11, a topping 12-months Airedale dog, by name Postmaster. Claiming as his sire Ch. Rebound Oorang. Apart from his value as a show specimen, he should prove a valuable asset to the breed on the west coast of America.—Our Dogs.

SYMPTOMS OF DISTEMPER.

In an ordinary attack of distemper, probably the first symptoms noticed by the general observer would be a slight dullness, together with loss of appetite and a gummy appearance of the edges of the eyelids. At this stage there is seldom a discharge from the eyes. The eye is sensitive to light, the nose is often dry, and the inside edges of the nostrils show a gummy appearance without any actual discharge. The upper, large molar teeth become furred with a dirty brown substance which, unlike tartar, can be easily removed with the finger nail. The gums and insides of the cheeks are often inflamed. A soft, short, husky cough may be heard. In young puppies, pustules may be noticed on the abdomen and inside the thighs; they seldom show themselves in adult animals. The temperature, if taken in the first stages of the disease, is usually two or three degrees above normal (viz.: 101 degrees Fahr. taken per rectum). It is common to find a temperature of 103 or 104 degrees for the first forty-eight or fifty-six hours, falling after this to normal or only showing from one-half to one degree above normal, remaining in this condition for perhaps two or three days. When past the initial stage the more pronounced symptoms make their appearance according to the form which the disease assumes.

When the eye symptoms develop, which is not always the case, a thin, watery discharge is often noticed in addition to the gummy appearance of the edges of the eyelids. There is an increased sensitiveness to light, and the conjunctiva becomes increasingly inflamed, as does the mucous membrane lining the eyelids. The discharge alters in character, first becoming creamlike in color and consistence, then getting slightly darker in color and of a very sticky nature, causing the eyelids to adhere to each other. At this stage the cornea will show a roughened surface (due to the presence of the pus and mucoid matter) which often becomes ulcerated; these ulcers may or may not perforate the corneal layer.

There is generally no appetite; and the animal is dull and sits on its haunches owing to the difficulty of breathing when lying down. If not arrested at this stage, pleurisy may follow, fluid forminng in one or both sides of the chest cavity, and death may follow from consolidation of the lungs.

The mouth is inflamed, the tongue being white and pasty or a dirty brown color, and the molar teeth show a dirty brown fur which, unlike tartar on the teeth, can easily be removed with the fingernail. A puppy having distemper during dentition and immediately before the permanent teeth are through nearly always shows a loss of enamel, in patches, on the second teeth, leaving the brown dentine exposed. This loss of enamel is the only proof, in later life, of a dog having had the disease. The gums also show special lesions in addition to their swollen and inflamed condition. They often bleed freely, and if not kept scrupulously clean, will ulcerate and even slough away in large patches, leaving the roots of the teeth and parts of the jaw bones exposed. This condition renders eating very painful, and may cause the patient to refuse food. There is also a discharge of slimy matter from the mouth. Foul breath is present, owing to the condition of the mouth and stomach. Sickness arises in some cases, food being vomited almost as soon as administered.

Diarrhoea is one of the most frequent symptoms and in some epidemics of distemper it is the only noticeable symptom when the temperature is not taken. In these epidemics, the diarrhoea continues for a week or ten days before the true nature of the disease is recognized by the average dog owner, when further and better symptoms arise. If the intestinal catarrh is serious the motions become very liquid and frequent; there is considerable straining, accompanied by pain and frequently resulting in dysentery. In bad cases large quantities of blood are passed, the anus being inflamed, sore and extremely sensitive. The motions may be odorless or very offensive, the latter condition being pronounced when the disease approximates the typhoid or enteric form.

Paralysis affecting the front limbs is usually of a more serious nature than that affecting the hind. Partial or complete paralysis of the bladder often accompanies loss of power in the hind limbs; and in some cases the lower bowel is affected, rendering the patient unable to pass a motion.

Convulsions appear in many forms. In mild cases the lips may be elevated and twitch. A very slight chattering of the teeth may be noticed without foaming at the mouth. The body may or may not be convulsed in these attacks. There is no loss of consciousness. In other cases the fit is much more pronounced. There is champing of the jaws, foaming at the mouth, great excitement and screaming. The animal may make wild rushes if not held under control, followed by convulsions of the body and limbs, then loss of consciousness and rigidity of the muscles. The bladder and lower bowel are emptied involuntarily. The fit may last a very short time, the animal looking up in a wondering stare, or the state of coma may continue for a considerable time. If convulsions recur frequently and continue for any length of time the consequences are generally serious; and when recovery takes place its progress is very much retarded. The same may be said in regard to chorea. When the animal recovers from distemper the chorea remains permanent, although in course of time there is generally a slight amelioration.

BULLDOG SHOW.

Bulldogs of assorted sizes and various shapes were on exhibition all day November 3 at the McAlpin Hotel, New York. The occasion was the annual show of the Joint Bulldog Clubs of America.

The winter garden of the hotel, where the show was held, was crowded throughout the day with admirers of this popular breed. The uglier the specimen the larger the crowd that surrounded its bench.

Over ninety dogs were judged, and while these represented a few of the best kennels in this part of the country, there was an absence of those topnotchers which are always so prominent at the Westminster Kennel Club exhibitions.

There were a number of new exhibitors, and the outstanding feature of the event was the fine showing made by the American-bred dogs. Charles Scardon's Beaming Belle, bred by its owner, took the reserve in the winners' class when she beat a number of prominent champion bitches.

The blue went to Rockliffe Kennels' Champion Oak Nana, which was adjudged the best dog in the show. This is no new title for Oak Nana, as it has frequently had this honor thrust upon it before, as the Rockcliffe Kennels' entry has numerous times been adjudged the best of any breed at many important shows. This makes the third championship for Oak Nana.

The bitch is pure white, beautifully bodied, with a very short face, good wide flat skull and a big sweep of under jaw. She is owned by John T. Minburn. Baron Beaming, the father of Beaming Belle, was adjudged the best dog of the opposite sex. This prize winner is owned by Allison Lederer of East Williston, Long Island. He is a large heavyweight, with a splendid body, but a slight defect in the face and poor legs.

Many of the spectators were of the opinion that the "best dog in the show" should have gone to the Rockcliffe Kennels' entry, Rockcliffe Lord Brilliant, which has been in this country only eighteen months, but has never been shown before; but the judge, in placing Champion Baron Beaming first, did not do so before a careful and thorough examination of the two dogs. Lord Brilliant has bad eyes and is swaybacked and has very poor teeth. The awards:

American Bred Dogs (under 45 pounds)—First, E. P. Hinds' Ashland Little Nipper; second, Mrs. W. Hillebrandt's Deodora Billy; third, W. T. Drew's Buttons 2d; fourth, Walter Murray's Rajah.

American Bred Dogs (45 pounds and over)—First, Mrs. C. N. Platt's Astoria Baron; second, Dr. Roy H. Peck's Daddy Dial; third, Fernbrook Farm's Fernbrook Bully; fourth, Thomas J. Marvin's Magnet Mahomet.

Limit, Dogs (under 45 pounds)—First, Mrs. C. N. Platt's Duke of Plaza Toro; second, Reuben Clarke's Dollar Mgaent; third, E. P. Hinds' Ashland Little Nipper; fourth, Ernest Truslow's Boola's Aldrich Rex.

Open, Dogs (under 45 pounds)—First, Mrs. C. N. Platt's Duke of Plaza Toro; second, Reuben Clarke's Dollar Magnet; third, Fernbrook Farm's Fernbrook Chiron; fourth, E. P. Hinds' Ashland Little Nipper.

Limit, Dogs (45 pounds and over)—First, Rockliffe Kennels' Rockliffe Lord Brilliant; second, W. N. G. Clark's Ricardo Model 2d; third, Fernbrook Farm's Woodcraft Bishop; fourth, Mrs. C. N. Platt's Wroxham Silent Marquis.

Open, Dogs (45 pounds and over)—First, Inwall Kennels' Ch. Baron Beaming; second, Rockliffe Kennels' Rockliffe Lord Brilliant; third, Mrs. C. N. Platt's Baron Teasdale; fourth, Fernbrook Farm's Woodcraft Bishop.

Winners, Dogs—First, Inwall Kennels' Ch. Baron Beaming; reserve, Rockliffe Kennels' Rockliffe Lord Brilliant.

Junior Dogs (under 2 years)—First, Mrs. C. N. Platt's Astoria Baron; second, Reuben Clarke's Dollar Magnet; third, Thomas J. Parvin's Magnet Mahomet; fourth, Ernest Truslow's Boola Aldrich Rex.

Green Dogs (American bred, previous non-winners)—First, Dr. Roy H. Peck's Blooming Buster Dial; second, John J. Mullen's Renwar Bylyn.

Open, Dogs (bred by exhibitor)—First, E. P. Hinds' Ashland Little Nipper.

Veteran Dogs (over 6 years)—First, Fernbrook Farm's Woodcraft Bishop.

American Bred Bitches (under 40 pounds)—First, W. T. Drew's Gabys Delys; second, E. T. Churchman's Lady Supreme; third, Dr. Roy H. Peck's Sally Ann Oial; fourth, Howard R. Slaght's Marchioness Temple.

American Bred Bitches (40 pounds and over)—First, John Dunc's Lednem Countess; second, Mrs. C. N. Platt's Astoria Molly; third, Inwall Kennels' Alice Sit by the Fire.

Limit Bitches (under 40 pounds)—First, Oakwall Kennels' Oakwall Firty Westall; second, E. G. Churchman's Lady Supreme; third, Howard R. Slaght's Marchioness Temple; fourth, James Conway's Verity Verax.

Open, Bitches (under 40 pounds)—First, Rockliffe Kennels' Oak Nana; second, Oakwall Kennels' Oakwall Flirty Westall; third, James Conway's Verity Verax; fourth, F. P. Hinds' Ashland Little Mary.

Limit, Bitches (40 pounds and over)—First, John Duno's Lednem Countess; second, Rockliffe Kennels' Nora Rosetta; third, Mrs. Darwin S. Hudson's Flagon; fourth, Alexander Bodgan's Drewstone Lady Seaton.

Open, Bitches (40 pounds and over)—First, Paul Scardon's Ch. Beaming Belle; second, Inwall Kennels' Ch. Florence Bhunda; third, Rockliffe Kennels' Nora Rosetta; fourth, Mrs. Darwin S. Hudson's Flagon.

Winners, Bitches—First, Rockliffe Kennels' Ch. Oak Nana; reserve, Paul Scardon's Ch. Beaming Belle.

Green, Bitches (American bred, previous non-winners)—First, Joseph Jackson's Yeawood Princess; second, Mrs. C. N. Platt's Astoria Scrappy; third, Mrs. Walter Sickle's Sunshine; fourth, Godlub Kennels' Godlub Hyphen.

Open, Bitches (bred by exhibitor)—First, John Duno's Lednem Countess.

Veteran, Bitches (over 6 years old)—First, Rockliffe Kennels' Ch. Dundee Thalia.

American Bred Bitches—First, Mrs. C. N. Platt's brace.

Open Braces—First, Rockliffe Kennels' brace; second, Fernbrook Farm's brace.

Teams—First, Rockliffe Kennels' team; second, Mrs. C. N. Platt's tetm.

GUN AND ROD NOTES.

The duck-hunting sportsmen know that the broadbills are here in big flocks, but during the recent sunshiny days the webfeet stayed out on the bay waters taking a siesta and safe from the chilled shot welcomes awaiting them in hundreds of duck blinds. But few northern birds made an appearance at the nerby salt marshes until the stormy and rainy weather this week in the northern part of the State. The home-bred birds had a good pummeling since the opening day of the season and became somewhat wise to the situation—they patronized the baited ponds at night and kept out of harm's way in the day time. Better hunting conditions will ensue now since the winter rains and storms have set in.

Northern ducks were beginning to arrive in the northern part of the State early last week, which means that the birds will be down this way now in quick order. In the Butte creek overflow district both wild ducks and geese have been plentiful. In the Sutter basin and in reclamation district 108, wild fowl were scarce owing to prevailing dry conditions.

The long dry spell has had its effect on the duck hunting districts and also on the upland quail coverts. The wild fowlers, except in most favorably located shooting grounds, around the bay counties resorts, have had a big cut down on results until the past week. Stormy weather in the north has brought down big flocks of northern birds and the rainfall this week in Central California was needed to start vegetation.

There has been one notable exception, however, and that is in Butte, Colusa and Glenn counties, where wild ducks, it is reported, have been more numerous than for many years previous. Furthermore, the birds are claimed to be fatter and more palatable than the ducks shot in other sections. It is believed that a rice diet is responsible for that. The rice fed duck, so it is claimed, has lost much of the wild taste.

Colonel J. W. Dorsey and William Sharp were the guests of Fred K. Burnham at the latter's Live Oak preserve when mallard and wild geese limits were bagged. Mrs. Burnham was in the limit class also.

Suisun marsh gun clubs have had good, bad and indifferent luck the past fortnight, dry weather conditions accounting for a scarcity of birds in some parts of the marsh. Last Sunday a six-foot tide converted the marsh into an inland lake and consequently the birds scattered everywhere.

At Green Lodge preserve, near Cygnus, midweek gunners were: W. W. Richards, F. V. Bell, Judge Thompson and M. J. Geary. Fair bags of large birds were shot.

On an adjoining snipe patch, near Jacksnipe station, Germain Carp, Fritz Carp and H. Ootmon bagged two dozen English snipe Tuesday a week ago. A strong sou'wester and dry ground conditions cut out limit possibilities.

Alameda marsh gun clubs, located where fresh water ponds tempted the birds to come in, have been doing well up to last week, particularly so on the Oliver tract. Further south poor results have rewarded hunters. The southeaster this week will liven matters.

Along the Marin and Sonoma shores and marshes the trigger pullers have done poorly, nor is better shooting expected until stormy weather drives the ducks into that district. What few ducks have been shot in that section recently have been principally butterballs and wiretails.

From Russian river down to Tomales bay there has been more hunters than ducks in evidence. Here again wet weather was needed to bring the birds into the rivers and lagoons where the sport is best.

Reports have been widely circulated for some time past to the effect that wild ducks in the Tulare lake region were again dying from some unknown causes, disease or otherwise. Investigation of conditions by Deputy State Fish and Game Commissioner Andy Ferguson of Fresno, showed that while there were many carcasses of ducks in the vicinity of the lake—the dead birds had been there from six weeks to four months, there was no indication of recent deaths. There has been much shooting in that region and as a result there were many wounded birds. These ducks, it is believed, led to the report about sick ducks. There was much sickness among the

ducks around the lake last summer, but all the birds are said to be healthy at the present time and the broadbills of different varieties are in that vicinity in flocks of thousands.

Quail hunters, despite dry ground conditions, had been getting a fair share of birds. Both quail and quail hunters have been numerous in Yolo county. Sacramento hunters have found plenty of coveys not far from town. Near Red Bluff the feathered dodgers are numerous, particularly in the vicinity of Proberta. Numerous arrests have been made up that way recently for hunting without a license.

The Contra Costa hills beyond Pleasanton were visited by Sam Wells and party recently. Nearly three dozen quail was the combined bag.

San Benito county seems to be well stocked with quail, but heavy cover and steep hills maks the sport hard work.

According to reports forwarded by deputies from various points to the Fish and Game Commission, game is numerous. In Tehama county quail abound in countless numbers, but the birds are hard to get at in the heavy cover. There is only an average crop in Calaveras county, and the birds are exceedingly wild. Along the Klamath river country both mountain and valley quail are said to be thicker than ever before, and excellent sport has been the rule.

In Butte, Yuba and Sutter counties quail are also plentiful, but cover conditions have been a handicap to the hunter. The foregoing hints are for the benefit of the automobile contingent, for anything like good quail hunting ground near this city is hard to find. Most of the ranches are posted, and practically all of the good shooting ground is leased or closed to the independent fusiliers.

Among the local hunters who have enjoyed lucky quail shooting trips recently have been Dr. L. T. Cranz, who shot over limit covers back of Napa a week ago. C. L. Thompson hunted in Wooden valley, about nine miles above Napa. He had the somewhat unusual experience of finding a bevy made up of both valley and mountain quail. The latter birds laid as close as their valley cousins, and he drew toll from both varieties.

In the hills back of Tracy on a Monday and Tuesday trip Fred Tobelman, Charles Cutter and Charley Breidenstein found excellent quail-hunting grounds a fortnight ago. The following Monday they had but fair luck near Hayward.

Near Marshalls, in Marin county, Clarence Nauman and Henry Fishbeck have had the entree to a fairly well stocked quail ground that yielded near the limit last Sunday.

A limit trip, near San Gregorio, was that of Hugh Jones a week ago.

War has been declared between the Last Chance and Wild Goose Gun Clubs over the possession of a small tract of unpatented land found in the center of the preserve and filed upon by Oroville men, states the Sacramento Union. The Wild Goose Club is composed of Sacramentans and San Franciscans who purchased the land from the Gridley Gun Club.

The members of the Last Chance Club are called "squatters" by the members of the Wild Goose Club, who declare they will fight the claims of the former to the last ditch. Attorney A. R. Taber of Sacramento has been in Oroville looking over records and maps of the tract in dispute. Neither Taber nor President Inman of the Wild Goose Club will give out any details about the coming fight in the courts.

J. F. Quigley, who negotiated for the sale of the land of the Gridley Gun Club, declares the great-grandchildren of the members of the Last Chance Club may shoot on the land they have filed upon, but none of the members ever will.

After the sale of the preserve to the Wild Goose Club an old story about some unpatented land in the preserve was revived and an investigation made with the result that fifteen acres was found to which there was no title. W. W. Baldwin of Oroville filed on the land under the swamp and overflow act.

County Surveyor M. C. Polk sent his field notes and survey to the surveyor general's office last week. The survey has not been approved as yet, and it is deemed possible that this survey will be attacked. The survey shows approximately fifteen acres in the tract filed on by the Last Chance people.

The Sacramento and San Francisco capitalists by purchase and lease have obtained a monopoly of the duck hunting grounds. The Last Chance members are confident their filing will be approved and they will have a right to shoot on the fifteen acres which contains two famous shooting spots.

* * *

The Siskiyou county supervisors Nov. 5 unanimously adopted a resolution asking the Shasta county supervisors to make the McCloud river a public highway for fishing purposes, which it is said the Shasta supervisors favor. Following is the resolution:

"Whereas, the people of Siskiyou and Shasta counties are being deprived of what they believe to be their rights by not being allowed to fish in various streams of the State and particularly in that portion of McCloud river which is within the county of Shasta; and

"Whereas, the State Legislature has made it possible for boards of supervisors to declare unnavigable streams public highways for the purpose of fishing, now therefore be in

"Resolved, that the board of supervisors of Siskiyou county respectfully petition the board of supervisors of Shasta county to take such action as will give to the people the privilege of fishing in the McCloud river."

This action is the aftermath of injunction proceedings brought against a Shasta county resident who fished the McCloud on land owned by the Bend Land Company, a Nevada incorporation, but it is claimed is composed of San Francisco residents.

Permission has been given by the State Board of Control for the hiring of a patrol of three men to break up the gang of aliens which annually has been shooting the deer of the Yosemite valley, as they have been driven out of the valley by the cold. Experience has proven that the deputies in Fresno county are powerless to break up the gang, hence the need of incurring, by the Fish and Game Commission, the extra expense for the patrol. The patrol at the mouth of the valley, where the alien hunters work, will be maintained for two months, by which time it is thought the danger will be past.

* * *

There seems to be a great deal of uncertainty among southern anglers regarding the exact date of the closing of the trout season. To put this at rest and settle the matter, let it be said that the new trout law, passed this year, extends the season to December 1 in District No. 4, which includes San Bernardino, Riverside, Imperial, San Diego, Los Angeles, Orange, Ventura and Santa Barbara counties. The trouting is just as good now, so it is claimed, as it has been at any time during the season, but few seem to be taking advantage of their privilege.

* * *

The high mark for large salmon caught in the Sacramento river near Chico continues to climb. The record now is claimed for Benjamin Thompson of Nord, who caught a fifty-five pounder last week.

* * *

Striped bass activities are indicated by a number of large sized fish caught by the Sunday outing delegation at the Napa and Santa Rosa drawbridge over Napa creek, a fortnight ago. Emil Accret's largest bass scaled 19 pounds. Among the other more or less luck anglers were Ed Winters, Howard Vernon, Louis Gotthelf, Walter McCarthy, "Whitey" and others. Several good catches were made last Sunday, Howard Vernon's two bass scaling about 18 pounds each.

The Wingo visitors also had a fair share of luck. Charles Urfer's catch numbered five nice sized bass. Last Sunday a cold north wind put the sport on the tobog. San Antone slough apparently caught the fever to a slight extent, for Frank Billington landed two 10-pounders. Bob Sangster and Jake Christianson caught five bass. Other rodsters in the slough were also luckier than has been the rule. Several good catches were made last Sunday, however.

The Port Costa waters drew blank for several anglers who made the trip to that point Sunday.

Sheriff J. J. Keating of San Rafael did some tall salmon fishing near Redding one day recently. Having several hours to spare while waiting for a down train, in company with Sheriff Al Ross and Richard Collins of the State Board of Equalization, the trio meandered down to the Sacramento river to fish for salmon. Keating landed three fine large fish, the limit for one day, in short order. He put in the balance of the time teaching his companions how to fish. Among other things he told them that it was an everyday matter for San Rafaelians to go out on the bay and return with half a ton o fsalmon in a few hours. His friends swallowed Keating's fish stories and gazed upon the Marin county official with wonderment.

A story came out afterwards, it is stated, that Keating, who fished around a bend of the river by his lonely, purchased the salmon from an Italian fisherman and that possibly accounted for the bad luck of Ross and Collins and the marvelous good luck of the San Rafael fisherman.

Splendid black bass fishing has been enjoyed recently by Mr. and Mrs. Herbert Rose, who fished in Bass lake, Madera county. Both the bass and trout in the lake are of large size and numerous. The bass will take a fly after the first cold snap.

—o—

Peters Points.

Added to the "P" brand wins already noted at the recent Westy Hogan shoot may be mentioned two other wins:

Mr. W. S. Hoon, the well known amateur from Jewell, Iowa, tied for fourth amateur average, 484 ex 500; second in the Du Pont 18 yard championship, 96 ex 100.

In the team race, Mr. F. B. Stephenson of New York City made high score on the wining team, 98 ex 100, and in the Bull Durham Handicap, J. A. Depew was third, 93 ex 100. The 16 yard prize was won by Mr. J. P. McKean of Philadelphia, 91 ex 100. Surely a great list of achievements for users of the "P" brand.

—o—

FIXTURES.

Registered Tournaments — Pacific States and Territories:

November 15, 16, 17—The Arizona State Tournament, scheduled for Tucson, Ariz., November 5, 6, 7, has been transferred to Phoenix, Ariz., under the auspices of the Phoenix Gun Club, and the dates changed to November 15, 16, 17. Sunday, November 14, practice day.

CLUB WINNERS OF BEGINNERS' TROPHIES.

Wilmington, Del.—Enclosed find list of gun clubs winning the 100 special Du Pont trophies offered the clubs having the greatest number of beginners participating in their Beginners' Day shoot. The list contains the names of 105 clubs, having a total of 2,913 participants, and an average of 28, which I think, is remarkable, and incidentally emphasizes the success of the affair:

Clubs which received beginners' cups and the number of contestants:

Arizona—Williams Gun Club, Williams, 21.

California—Big Time Gun Club, Sacramento, 27; Los Angeles Gun Club, Venice, 22.

Canada—Alberta: Red Deer Gun Club, Red Deer, 24. Saskatchewan: Viscount Gun Club, 32.

Connecticut—Pahquioque Gun Club, Danbury, 138; Saybrook Point Gun Club, Saybrook Point, 26.

Delaware—Du Pont Trapshooting Club, Wilmington, 63.

Florida—New Duval Gun Club, Jacksonville, 28.

Georgia—Gate City Gun Club, Atlanta, 18; Gainesville Gun Club, Gainesville, 19.

Illinois—Ashton Gun Club, Ashton, 30; Charlotte Gun Club, Charlotte, 40; Metropolitan Gun Club, Chicago, 36; Alta Sita Gun Club, E. St. Louis, 24; Eldorado Rifle Club, Eldorado, 27; Galesburg Gun Club, Galesburg, 31; Mt. Carmel Gun Club, Mt. Carmel, 20; Naperville Gun Club, Naperville, 17.

Indiana—Gary Gun Club, Gary, 20; New Salem Gun Club, New Salem, 19; North Salem Gun Club, North Salem, 31; Warsaw Gun Club, Warsaw, 19.

Iowa—Bedford Gun Club, Bedford, 18; Corley Gun Club, Corley, 24; Jerome Gun Club, Jerome, 25; Sewal Gun Club, Sewal, 18; Varina Gun Club, Varina, 54; Vinton Gun Club, Vinton, 32.

Kansas—Chapman Gun Club, Chapman, 49; Ellis Gun Club, Ellis, 25; Wellington Gun Club, Wellington, 32.

Kentucky—Corbin Gun Club, Corbin, 24; Danville Gun Club, Danville, 19.

Maine—Gardiner Gun Club, Gardiner, 30.

Massachusetts—Lawrence Fish and Game Protective Association, Lawrence, 22; Waltham Gun Club, Waltham, 48.

Michigan—C. & H. Rod and Gun Club, Calumet, 29; Ludington Gun and Rifle Club, Ludington, 27.

Minnesota—Cuyuna Gun Club, Cuyuna, 19; Hutchinson Gun Club, Hutchinson, 20; Red Wing Gun Club, Red Wing, 39; Intercity Gun Club, St. Cloud, 18, Virginia Gun Club, Virginia, 17; Winona Sportsmen's Club, Winona, 32.

Missouri—Milan Gun Club, Milan, 20; Carondelet Heights Rod and Gun Club, St. Louis, 26.

Nebraska—Nettle Bend Gun Club, Blair, 26; New Columbus Gun Club, Columbus, 39; Freemont Trapshooting Club, Freemont, 29; Loup City Gun Club, Loup City, 25; Nelson Gun Club, Nelson, 19; Omaha Gun Club, Omaha, 27; Ravenna Gun Club, Ravenna, 26.

New Jersey—Mohegan Gun Club, Granton, 30.

New York—Bay View Gun Club, Brooklyn, 22; Bensonhurst Yacht Club, Brooklyn, 22; Hertelwood Gun Club, Buffalo, 35; Corning Gun Club, Corning, 28; Geneva Sportsman's Gun Club, Geneva, 27; Long Point Athletic Club, Greece, 39; Chenango County Fish, Game and Gun Club, Norwich, 37; Orlean Gun Olean, 17; Riverside Gun Club, Rochester, 27; Pleasant Bay Gun Club, Westchester, N. Y. C., 19; Staten Island: Robin Hood Gun Club, 28.

North Carolina—Brown Rifle Range and Gun Club, Concord, 28; Southport Gun Club, Southport, 30.

North Dakota—La Moure Gun Club, La Moure, 23; Mandan Gun Club, Mandan, 23.

Ohio—Akron Gun Club, Akron, 21; Brighton Gun Club, Cincinnati, 25; Erie Gun Club, Marion, 18; Mahoning Valley Gun Club, Niles, 18; Edgewater Gun Club, Toledo, 35.

Oklahoma—Fairfax Gun Club, Fairfax, 35; Miami Gun Club, Miami, 20; Capital Gun Club, Oklahoma City, 24.

Oregon—Portland Gun Club, Portland, 63; Independence Gun Club, Independence, 17.

Pennsylvania—The Pioneer City Gun Club, Carbondale, 18; Denver Rod and Gun Club, Denver, 22; Millersburg Gun Club, Millersburg, 45; Nanticoke Gun Club, Nanticoke, 17; Canoe Gun Club, Port Allegheny, 23; Independent Gun Club, Reading, 26; Rutherford Gun Club, Rutherford, 25; Bear Valley Gun Club, Shamokin, 26; State College Gun Club, State College, 24; New England Gun Club, Tamaqua, 20; Thornburg Gun Club, Thornburg, 21; Throop Trapshooting Club, Throop, 19; Laurel Run Gun Club, Wiles-Barre, 17; Winburne Rod and Gun Club, Winburne, 31; Wyoming Rod and Gun Club, Wyoming, 18.

Virginia — Berryville Gun Club, Berryville, 22; North Side Gun Club, Richmond, 23.

West Virginia—Elkins Gun Club, Elkins, 25; Huntington Gun Club, Huntington, 47; Richwood Rod and Gun Club, Richwood, 19.

Wisconsin—Lake Hallie Gun Club, Eau Claire, 33; Winnebago Gun Club, Oshkosh, 25; Richland Center Rod and Gun Club, Richland Center, 20; Shullsburg Gun Club, Shullsburg, 17; Whitewater Rod and Gun Club, Whitewater, 28.

T. E. DOREMUS,

Manager, Sporting Powder Division.

Drink Jackson's Napa Soda.

GOVERNMENT AUTHORITY SPEAKS ON HORSES AND CARRIAGES.

G. Arthur Bell, of the Bureau of Animal Industry, Washington, D. C., in an address before the Carriage Builders' National Association, at Cleveland, last month, said that "up to June, 1915, the estimated number of automobiles and trucks in the United States was 1,707,009. These figures were taken from State registration accounts for 1914, and included machines licensed in more than one state. We will assume, however," said Mr. Bell, "that that number is approximately correct. Let us for a liberal estimate add 300,000 to this number for the additional machines of 1915. This makes a total of 2,000,000 automobiles and motor trucks in the United States. This means that there are twelve horses for every automobile and motor truck in this country. This certainly does not indicate that we have reached the horseless stage, about which we hear so much. Now, I am not saying this in disparagement of the automobile at all, because we all realize the great value of the automobile, both for pleasure and for business purposes, but merely to point out the fact that we have not reached the horseless stage.

"Now, let us turn to a consideration of the relationship of the horse to agricultural production. There is, in my estimation, no factor of greater importance in the production of agricultural products than getting efficient horse power. Without good, efficient work horses farming cannot be done as economically as it can be with them, and these horses are needed to offset the increased cost of labor. We have in the United States more than 6,000,000 farms, which means that there is on an average not more than four mature working animals per farm.

"We hear a great deal of the displacement of horses by motor trucks. You will realize that there is not much danger of displacing any large number of these horses by motor trucks when the average farm has not over four work horses. The motor truck, to be an economical factor in agricultural production, must displace more than four horses. If the average farm does not have more than four horses, how is the motor truck to displace them? There is always some kind of work on every farm for which it is necessary to have horses. Much of our farming land is wet, low land, and it is, therefore, necessary to have horses.

"The Agricultural Department made a very careful survey of the motor truck, and found that in most cases it had not displaced horses to any extent.

"It is estimated that there are approximately 100,000,000 horses in the world. Of this 100,000,000, the United States possesses 24,000,000 or practically one-fourth. The United States and Russia together possess over fifty per cent of all the horses in the world, Russia being the only country which has more horses than we have. It can readily be seen, therefore, that, with the exception of Russia, the other countries now at war are bound to be short of horses for work purposes. Russia will probably have enough for her own use, but on account of the great number that are being killed in Russia today, she will probably not have any for export.

"That means that the other countries will have to turn to the only other big horse producing country, the United States. I think, however, that we should be able to meet this export demand. We are producing more than 1,500,000 colts. If this demand continues it will, of course, mean that the prices of horses will increase, but I do not think they will go abnormally high. As soon as horses become much higher than they are today, it will simply mean that there will be greater use made of motor power in the cities, and the city horses will be thrown upon the market. It will, however, mean that the farmer will get a good price for his horses for several years.

"The demand for horses for city use, however, takes on another aspect. We will have to look the situation straight in the face and admit that the automobile has hurt the demand for pleasure horses for city use. It will probably also hurt the demand among the farmers for horses for road purposes, for, as our roads get better and better, our wealthier class of farmers will make greater and greater use of automobiles. But the average farmer will have to depend on the horse for a great many years, not only for road purposes, but for general purposes.

"There is a certain class of horses in cities for which I think there will be a slightly increased demand, and that is the high-class carriage horse. Among people who can afford both automobiles and horses, the high-class carriage horse has an individuality that cannot be given to the automobile, and for those people who wish to attract attention of that sort, the demand for high-class horses will probably increase. The demand, however, will necessarily always be limited. Another class of horses for which there is likely to be an increased demand is the saddle horse. So far as the demand for carriages and buggies and saddles and things of that kind is concerned, you doubtless know the conditions much better than I do, but it is not likely that there will be any greatly increased demand for them. There will be, probably, a slight increase for the real high-class carriage, but I believe the carriage builders will have to depend largely on the small farmer who demands a medium priced buggy.

"I have endeavored to show that our horses have not reached the place where there is not a demand for them; that our horses have increased in number, and that we are not likely in the near future to say 'good-bye, horse,' or to think that we have reached the 'horseless age.'"

TARIFF COMMISSION LEAGUE.

A movement has been recently launched in Chicago that is both timely and important. It is the Tariff Commission League of which Mr. Howard H. Gross of that city is president and prime mover. Mr. Gross will be remembered as president of the National Soil Fertility League, an organization that did so much to help carry through the Smith-Lever Agricultural Extension enactment. The Tariff Commission League began a propaganda about the first of August, the purpose of which was to secure the establishment of a permanent, nonpartisan Tariff Commission with broad powers, to conduct a thorough investigation that will disclose all the facts, strip the tariff of all subterfuge and bring the truth to light, so that tariff enactments hereafter shall be made upon definite information in the interests of all the people and from the standpoint of sound economics, rather than from political party expediency.

The League has a strong directorate and an advisory committee carrying some of the most distinguished names in the country. It is distinctively a popular movement in which agriculture, labor, manufactures, commerce and transportation are represented. Among the distinguished names are James J. Hill of St. Paul; Thomas A. Edison of New Jersey; Cyrus H. K. Curtis of Philadelphia, head of the Curtis Publishing Company; John Mitchell, Chairman of the New York State Industrial Commission, and a well-known labor leader; Warren S. Stone of Cleveland, head of the Brotherhood of Locomotive Engineers; F. D. Coburn, Ex-Commissioner of Agriculture of Kansas, called the "Father of Alfalfa"; Ex-Gov. W. D. Hoard of Wisconsin; John V. Farwell, Chicago; J. M. Studebaker, South Bend, Indiana; Mrs. Percy V. Pennybacker, president of the General Federation of Women's Clubs, and others.

It is the purpose of the League to bring all possible pressure to bear upon Congress to create such a Tariff Commission, and it is receiving the co-operation of some of the most influential organizations in the country, notably the United States Chamber of Commerce and organized labor. The agricultural organizations and publishers of farm papers, so far as heard from, are practically a unit for the general plan. The League insists that tariffs shall be made upon facts instead of fancies, that log-rolling, trading and lobbying shall cease, and that the tariff shall be made for all the people instead of some of the people. One of the most significant features is that the bill that is proposed requires that the President shall recognize both agriculture and labor in the creation of the proposed Commission. Hitherto manufacturers have felt that the tariff was their especial province and that it was a "business proposition," in which their advice should be followed. The League insists that the tariff shall take into account every interest and that those of agriculture and labor should receive as careful consideration as manufactures.

It was recently announced from the headquarters of the League that the movement is gaining ground all over the land, and much faster than those back of it ever expected or thought possible. Pamphlets explaining the plan were broadcasted over the land with postcards inclosed, asking the recipient to give his judgment upon it and whether he was willing to help. These went to organizations and to various publications. Returns show that more than nine-tenths are enthusiastically for the movement and suggest that a tariff commission of this type is what has been needed for many years, and if the nation had supported one, hundreds of millions of economic waste might have been avoided and the people would have been happier and more prosperous.

Far-seeing men agree that the country is facing mighty industrial changes, that when fifteen millions of men in the trenches go into workshops the whole world must readjust itself to new industrial condition and that the United States, with other nations, is facing the most serious situation in all history. For this reason the necessity of a tariff commission to study this question and aid the Government and the people to readjust themselves to the new conditions is immediate and imperative. That this is a movement of the greatest import is shown by the fact that the publishers of practically all the leading magazines in New York, together with a score of business men, met at a dinner called for the purpose of hearing the plan and purpose of the tariff commission explained to them in detail. This is said to be the first time that these publishers have ever met to hear anyone discuss a public question.

This movement contemplates giving agriculture and labor the proper representation in the consideration of tariff legislation. It is distinctly a people's movement and there is practically a country-wide demand that everyone should get back of it and insist that members of congress shall promptly enact the necessary legislation.

THE RISING TIDE.

The tide of commercial activity is rising, and rising rapidly. The bottom of trade paralysis was evidently struck soon after the war broke out, but the upbound was not immediate. It could not be. Men sat still and shuddered, or groped feebly and blindly amid conditions wholly without precedent, like mariners sailing an uncharted sea without compass. The instinctive initial demand for war provisions brought visions of a broad market for our stores, but shipping was demoralized, and on catching the first breath after the surprise of the declaration of war the commissariats of foreign nations realized that they were well stocked for a brief campaign, and purchasing almost ceased. Its renewal in the light of the prolongation of the combat and the resultant demand on our provisions are matters of too recent history to need rehearsing. The exhaustion of the stores of arms and ammunition in equipping the constantly enlarging armies has resulted in orders in this country that have produced an altogether unheard-of activity in manufacturing circles. However great the paralysis of our industries, and the uncertainties of trade, such demands must galvanize them into bounding life and intense action. The east is seething with industrial activity and the results have been quickly translated into enlarged profits for transportation companies.

The unprecedented harvests are playing a great part in this restoration of railroad activities, and in turn the profits of the carriers have been promptly invested in betterments of all kinds—rails and rolling stock. These domestic demands superimposed on the foreign requirements have swamped the steel mills. Never before has the iron industry been so quickly and so completely submerged by demands. Prices have advanced in consequence of the situation and the activity in this trade is at the highest tide yet attained.

Every condition conjoined to this great and growing commercial awakening. Bare shelves, the rebound from apprehension and conservation of finances, huge harvests and strong prices and the rising values of cotton, and perhaps above all the psychological effect of it, have stirred the domestic fire until the kettle begins to boil and sing. The east is the present center of industrial and commercial turmoil, but wholesalers in Chicago are beginning to report that it is just a matter of supplying the goods, and on the Pacific slope merchants declare that an amazing forward leap in retail sales has recently been recorded.

Beyond cavil things have begun to hum. To the ear of the tiller of the soil that hum has a sweet and reassuring sound. He knows it means a broad, sustained demand for all his products. He must feed a domestic industrial population hungrier than ever before from the exhaustion of daily toil, and only prophecy dare set bounds to the foreign demands that may yet be made on our storehouses of provisions.—Breeders' Gazette.

THE FARM

KEEPING THE RANCH ACCOUNTS.

The greatest trouble with the average farmer is that he knows little or nothing about bookkeeping. He imagines that it requires from three to six large books, a bunch of specially printed paper and reports on which to keep his records, and in this way he is making the mistake that many others do. It is possible to keep a complete set of books, that is, so as to know just what this or that crop has cost, which kind of livestock has paid best; which piece of land has been the most productive, breeding records, expenses, and produce sales, etc., on nothing but an ordinary ten o rtwenty cent plainly ruled book.

Here is the idea: Take one or more pages—double pages—for a ten-acre plot, twenty-five acre plot, etc., horses, cattle, chickens, crop expenses, living expenses, and for each item that is to be recorded. Now on one of these double pages, we will put down, say "horses," and take an inventory, putting it on the left side of the double page. When you buy more put it there too with the price, and when you sell just write the amount received on the right hand side page of this book. At the end of the year you can balance the sheet or sheets, and take an inventory to see just ho wmuch these horses have cost and the gain they have made.

Supposing you wanted to charge the grain to them, which you should do. This will go on the left side of the book and when you have done a day's work with two or four horses, give them credit for same on the opposite side of page—just what these horses' work was worth. You must figure your own labor and that of the horses if you want to get at what a certain piece of land has cost to put it into crop. Treat all livestock the same way.

Now we will take one certain piece of land. Charge all labor taht you have done or hired done on it to the left side of the book and separate it so you will know what the plowing, seed, seeding, irrigating and harvesting has cost. After you get this total figure the interest on your money invested in this land and charge it also to the left side and you will have the cost of this crop. All sales are to be credited on the right side and the balance or difference will certainly show just what you have cleared or lost on that one certain piece of land. —Field and Farm.

VETCH AND BARLEY.

Vetch and barley as a winter growing silage crop have proved a great crop for R. E. Watson, manager of the Rancho Dos Rios, Modesto. The combination of 50 pounds Oregon vetch and 50 pounds bearless barley is sown in the fall about the lrst of November, and harvested for silage the following spring when the barley is rather far along, so that it will shell out a little going through the silage cutter.

A yield of about eight tons per acre is secured, green, and when cut in the right stage it heats up quickly in the silo and makes a silage that his pure-bred Jersey cows go crazy over. Then after the crop is off the same land can be planted to corn and another crop of silage taken off in the fall. In this way there is silage for the stock all the year long.

The vetch gathers nitrogen and improves the soil. Being a winter grower in California and a fine feed, there is a strong reason for a much more extensive planting than is practiced at present.

An experienced horseman gives this hint: To make a new horse collar come to a perfect fit, soak it over night in a tub of water, buckle it on the horse next morning and go to work. It will soon adjust itself to every part of the shoulder and thereafter be as comfortable as an old shoe.

RURAL ROAD WORK.

That full value may be received for the money appropriated for road purposes and that the best results obtainable may be secured it is essential that the right man shall be placed in charge of the road work. He should be selected not only because he actually knows more about good roads than any other person in the community, but also because he can ge the best results from the money furnished. It is not sufficient, however, to let the matter rest with the appointment of a road overseer. He should receive the whole-hearted support of the community in the work. It should be seen to that under the conditions and with the money furnished the community is getting what it has a right to expect in the way of road improvement. It is well to remember that if for any reason an incompetent man is placed in charge of the work the responsibility for failure rests upon the community. There should be no other consideration, therefore, in selecting a road overseer than that of securing a man with the ability to perform the duties required. It should be realized that good roads have much to do with the prosperity of a community and that united action in the right direction is the surest and quickest way to secure them.

Department Will Assist.

Where the road overseer has had but little experience in road work, or where some new and difficult problem is presented to the experienced man, the Office of Public Roads and Rural Engineering of the department, when requested, will offer advice and suggestions for carrying on the work and how best to overcome the difficulties.

To secure a satisfactory road of any type, it is absolutely necessary to remember: First, drainage; second, drainage; and third, drainage. The earth road, properly cared for, will answer satisfactorily for the traffic of many rural sections that can not afford the better types of roads; but the earth road must be well drained. After this fact is well understood, two other requirements may be taken up—the location of the road and the reduction of grades to a general average of 5 per cent.

With the exception of sandy roads, which are easiest for traveling when damp, all roads must have proper side ditches to carry away the surface water. In order to lead this surface water to the ditch, the road surface must have a crown, or rounded roof, highest in the center and sloping toward the ditches. A very easy and satisfactory way to keep earth, clay, and gravel roads crowned, by the use of the split-log drag, is explained in Farmers' Bulletin 597, copies of which may be obtained upon application to the department.

After the road has been crowned and the crown is kept in condition by the wise use of the road drag, it should be seen to that ditches are kept free from weeds, etc., and that they are deep enough to carry off the water which runs into them. In most cases a wide, shallow ditch is best. Deep ditches are dangerous to traffic. At spaces of every few hundred feet along the roadway a culvert of some kind should be placed to carry away the water which has gathered in the ditches.

A road properly built generally will not have an average grade of more than 5 per cent. By "per cent of grade" is meant the number of feet the road rises or "climbs" for every 100 feet of its length. On a road of 1 per cent grade the horses need pull the load up a rise of only 1 foot for every 100 feet they travel. It has been found that where a horse can pull a full load on level ground, he is able to pull only one-half that load on a 5 per cent grade and only one-fourth that load on a 10 per cent grade. More trips must be made to and from market on a road with just one bad hill in order to haul the same amount that can be hauled at one trip on a level road.

Bulletin 220 of the Department of Agriculture contains pictures of small models of good roads, some of which might be very helpful in understanding the construction of a road. One model illustrates the uses of the different kinds of ditches, culverts, etc. Another model shows the relocation of a road. A steep hill on the old road has been avoided by relocating the road around the foot of the hill, saving the horses many a hard pull. Relocating the road may be expensive at first cost, but very often repays the community many times over in the saving of labor, time, horses, and equipment.

MANURE ADDS TO YIELD.

That the use of manure as a top dressing in preparing land for wheat increases the yield materially, has been shown by experiments made by the department of agronomy in the Kansas State Agricultural College. These experiments cover a period of five years.

Two fields on the agronomy farm are used continuously for growing wheat. These fields have the same kind of soil, are always plowed and cultivated in the same way, and are seeded at the same rate and time. One field, however, receives 2½ tons of manure each year as a top dressing while the other receives no manure whatever.

The first yield was obtained from these fields in 1911, when the manured field made a yield of 29.39 bushels an acre, and the unmanured a yield of 25.84 bushels an acre, showing an increase of 3.55 bushels an ecre through the use of manure.

This difference was not so great as during later years because the greatest increase in yield of wheat from manure does not come the first season after the application.

In 1912 the yield was low because of poor wheat conditions. The yield from the manured field was only 6.68 bushels an acre, while the unmanured tract yielded but 5.68 bushels. A noticeable factor in these figures is that as the yield decreased the effect of the manure also decreased. This indicates that during a poor season for wheat the effect of manure will be less than in a favorable season.

In 1913, 1914 and 1915, the increase resulting from the use of manure became more pronounced, ranging from six to nearly 11 bushels. This marked difference is no doubt due to a number of causes. The field which had received no manure is becoming less productive while the one receiving manure is apparently becoming more productive and the cumulative effect of the manure is becoming more noticeable.

"The average result for a period of five years proves beyond a doubt that the use of manure as a top dressing on wheat is a most profitable practice," says R. I. Throckmorton, expert in soils. "The average yield for the unmanured field was 17.20 bushels, while the manured field yielded 23.47 bushels an acre, or an average for five years of 6.27 bushels an acre due to the annual application of 2½ tons of manure applied during the winter as a top dressing."

HEAVES OF HORSES.

Caused by Faulty Feeding and Working—Complete Cure Impossible—Symptoms May Be Relieved.

Heaves is a very common and annoying disease of horses, interfering seriously with the usefulness of the animal, and consequently detracting from its value. Mainly a disease of old horses, it is essentially the result of faulty feeding and working, especially hard pulling or fast driving when the stomach is overloaded. Gross feeders are frequently subjects of heaves.

While in old, established case there may be alterations in structure of the heart and stomach, the principal changes are observed in the lungs. These consist first in an enlargement of the capacity of the air cells through dilation of their walls, followed by a passage of the air into the lung tissue between the air cells. Owing to such structural changes, it is impossible to prevent progressive development of the disease, which, however, under proper care, may go on slowly, the animal remaining serviceable for certain kinds of work for years.

Except in the very early stages the disease is readily detected. The symptoms are those which would naturally

1915 WINRACE

—and—

ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

THE BREEDER AND SPORTSMAN

P. O. Drawer 447, San Francisco

be manifested in a condition where the lungs are involved. A peculiar short, grunt-like cough is usually present, and when the animal is exerted a wheezing noise accompanies the breathing. The principal and characteristic symptom, however, is the jerky or double movement of the abdomen in an effort to force air from the lungs. The air passes into them freely, but the power to expel it is lost to a great extent; therefore the abdominal muscles are brought into play.

Indigestion is frequently observed in these cases, and the horse may have a depraved appetite, as shown by a desire to eat dirt and soiled bedding; and there is a tendency to the condition commonly termed "pot-bellied." The animal, though a heavy feeder, becomes unthrifty and emaciated.

A poorly ventilated stable, humid weather, severe work, and overfeeding with coarse, dry feeds tend to aggravate the trouble.

As in this condition structural changes have taken place in the lungs, treatment, as a rule, can only be directed to the relief of the symptoms, and it is not possible to effect a complete cure after the disease is established.

In the case of an affected horse it will be an advantage to dampen the food with a mixture of one part of molasses to three parts of water, so that no dust may arise while the animal is eating. It is also desirable to restrict the amount of hay or forage, as large quantities of bulky feed which distend the abdomen increase the difficulty, and an animal with heaves should never be driven or worked when full of such material.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Price: Paper $1.00, Cloth $1.50. Sent Postpaid

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

Harpers Weekly and The Breeder and Sportsman

$5.50 worth for $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

Repeating Rifles For Hunting

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

Every Good Gun Store is a Headquarters for Winchester Guns and Ammunition

Two Favorite Shotguns and the *Steel Lined* "Speed Shells"

"DOPE" on shooting is plentiful. And shooters know where ***the right dope*** comes from—and that it leads straight to ***Remington-UMC***.

The Remington-UMC Pump Gun and Autoloading Gun—these are the shotguns of **today.** Adopted everywhere, for use in the field and over the traps—shot by more of the men who are setting the pace in the sport than any other make of guns in the world.

In the matter of Shells—where is the sportsman who does not know the Remington-UMC "Speed Shells," **Steel Lined**—all the drive of the powder kept back of the shot, and showing results that flatter any make of gun?

For the right dope—see the Remington-UMC Dealer. He displays the **Red Ball Mark of Remington-UMC**—the sign that his store is Sportsmen's Headquarters of the town.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

PACIFIC COAST FAIR ASSOCIATION.

Coming to the decision that the matter of looking o the future welfare of district fairs and harness acing in California was squarely up to them, horsemen in attendance at the P.-P. I. E. races held two meetings last week at the Palace Hotel in this city. The preliminary round on Tuesday evening started the ball to rolling, those present gained a general idea of the course they wished to pursue, so that the gathering on Friday night was for the purpose of making a definite start toward providing a circuit of fairs, with racing, for the season of 1916 and all subsequent seasons.

Fifty or sixty persons were present, all of whom are directly interested in the project under consideration, and all imbued with the one idea that only by prompt and organized effort could a much needed change in the local situation be effected. Numerous brief talks were made by representatives of various sections of the state, reciting the possibilities offered by conditions in their localities, and in response to a call from the temporary chairman it was demonstrated that a considerable sum of money could be raised for the "fathering" of a chain of fairs, with harness racing as their principal adjunct.

It was the consensus of opinion that a permanent organization be effected, the resultant body being designated as the Pacific Coast Fair Association. J. L. Borden of this city, long a "wheel horse" of the P. C. T. H. B. A. and the California State Agricultural Society, was unanimously chosen, under his personal protests, to head the organization, and Robert A. Smith of Los Angeles was chosen secretary-treasurer by a similar vote. First and second vice-presidents were elected in the persons of George J. Giannini of this city and Charles F. Silva of Sacramento, respectively, and a board of directors was drawn from the ranks of the "livest" and most influential horsemen of the state's various breeding and training centers. Forty-two persons signed the roll as members, and the executive officers have in their hands the work of increasing the membership and effecting a permanent organization through incorporation under the laws of California.

Owing to the scant time at our disposal this week no further mention of the new organization and its field of endeavor will be attempted at this time, but a comprehensive review of the situation, from our standpoint, will be made in an early issue. Meanwhile, we urge horsemen to become members of the Pacific Coast Fair Association and boost for it in every way possible.

C. B. WOOD DIES IN FIRE.

Early in the progress of the exposition meeting horsemen had their attention arrested by brief telegraphis reports in the dailies telling of the death of C. B. Wood in a ranch house fire near Phoenix, but it was hard to realize that it was "our C. B.,"—"Woodsie," as many horsemen knew him. Such, however, proved to be the case, the following paragraphs concerning the tragedy being taken from the Arizona Republican of November first:

Overwhelmed by the fumes of an exploding lamp, C. B. Wood, postmaster of Phoenix, died, and his body was partially consumed in the ruins of his country house on the Black Canyon road, near the grand canal last evening.

Warned by Mr. Wood's last words "Look out," and by the sight of fire bursting out of the window of the frail wood structure, C. L. Madison, renter of the ranch, was able to rescue his bedridden son from the room next that in which the tragedy occurred. Madison dragged the young man a short distance from the house, placed him on a cot, and rushed back into the house, screaming to men on the other side of a canal near by. As he opened the door, smoke and flames billowed out, and he was driven from the place, blinded, stunned, and compelled to stand aside and watch the fire rapidly spread throughout the building. At this time he had no idea the unfortunate man had not succeeded in escaping from the house. It was not until he had, with a half score of neighbors, attempted to form a bucket brigade to throw water on the fire, that Mr. Wood was missed, and the horrible possibility occurred to the group.

Madison, in his overwrought mind, had formed no coherent ideas, when neighbors, and later officers of the Phoenix fire department and reporters questioned him. His stories about what actually occurred were as varied almost as his hearers. The one to which the most credence was given, however, is this:

Although Mr. Wood had moved to a home in the city, he maintained two rooms at the ranch house, where he kept a great quantity of private papers and his desks. He was in the habit of visiting the ranch house frequently, to spend considerable time in his study. He had been in his room for some time yesterday afternoon. At about five-fifteen he had called Madison, and had asked him for a lamp. Madison filled a lamp in the rear of the house and took it to Wood's room, leaving there immediately thereafter to attend to some chores outside.

Five minutes after he left the room, Madison heard the soft explosion that indicated the bursting of a coal oil lamp. He heard the cry "Look out." Turning, he saw the glare of fire through a window in the room the postmaster was using. His first thought was to save his son, who was not able to rise from his bed.

Telephonic information from nearby ranch houses brought Assistant Fire Chief Simmons. About the time he arrived, C. E. Tannehill, who lives near by, and others, commenced to search the ruins, which had cooled sufficiently—by reason of the fact that the light frame building had burned clear to the ground—to permit the men to approach quite closely. Buckets of water were thrown into the heaps of ashes, and soon, the bones of a human hand were identified. By this means, then, it became known beyond a doubt that a frightful tragedy had taken place. Even until this fact was established, the frantic neighbors had continued to entertain the hope that Mr. Wood had escaped.

Friends of the dead man last night told of his trouble with his heart, and the surmise that he had fallen under the shock of the explosion, and had therefore failed to get out, was strengthened.

Chalmers Barbour Wood was about forty-five years of age and had been a resident of Maricopa county for fifteen years. He was born in the "Kingdom of Callo," Missouri, and was educated at Westminster College. Almost since attaining his majority he had taken an active part in democratic politics and he quickly became an active figure in politics after arriving in Arizona. He held various positions in the county and was elected to the first state senate in which he served with distinction. He was chairman of several important committees and was a member of every important committee. Mr. Wood was appointed postmaster about a year ago, resigning the secretaryship of the Arizona State Fair to take up the duties of that office, which he discharged in a most efficient manner.

Mr. Wood was an old friend of Speaker Champ Clark. Mrs. Clark had been one of his earliest instructors and he was therefore a supporter of the speaker in the contest for the delegation from this state to the Baltimore convention. It was supposed that that fact militated against him somewhat in the contest for the appointment of the postoffice.

Though he was strongly aggressive, he made many friends for he himself was a faithful friend both in his social and his political relations. His tragic death will be widely mourned. He leaves beside a widow, three children, a son and two daughters.

In the passing of C. B. Wood, thousands of people in Arizona, and horsemen and livestock breeders of many other sections, have lost a valued friend. His aggressive and progressive policy had much to do with establishing the Arizona State Fair on its present high plane, and he was always busy during the fair making things pleasant for visiting horsemen and exhibitors, as well as looking carefully to the efficient working of every department under his supervision. He was a big man—physically, mentally and at heart—and our readers will join with us in expressions of sorrow over his untimely death, and of ready and sincere condolence to the surviving members of his family.

NEW TRACK FOR TACOMA.

According to recent reports from the Pacific Northwest, Tacoma horsemen are to have a new halfmile track in the near future. J. V. Huntamer, a well known Tacoman from whom the news comes, states that a number of horsemen have organized a company and purchased from Mrs. Haydon, of the Haydon-Watson Company of that city, an ample tract of land situated at Eighteenth Street N. W. and Railroad Avenue, where a two-lap track will be constructed, together with all necessary accommodations. The plant will serve as a wintering and training headquarters for horsemen of that section and a number of stables will begin their work there just as soon as the plant is in running order.

WINTER RACING FOR THOROUGHBREDS.

Thoroughbred campaigners apparently have a fair winter season before them, better than usual from present indications. The meeting of the Southern Maryland Agricultural Association now on at Bowie comes to a close on November 30, while Juarez opens on Thanksgiving for a run of one hundred days. Some weeks ago all sorts of wild and woolly rumors from the latter city put horsemen up in the air, but all the bumps seem to have been smoothed out and racing is scheduled to hold sway there as usual.

Next in order comes the opening at Curley Brown's plant near Havana, under the auspices of the Cuba-American Jockey Club, the meeting being slated to run eighty-two days from December 16, while the Business Men's Racing Association of New Orleans, which promoted such a successful turf revival in the old Southern racing center last winter, will inaugurate its second meeting on New Year's Day, to continue until March 6, the interim providing for fifty-six days of actual racing. Both Havana and New Orleans, especially New Orleans, did nicely last season for a starter, and the outlook at each place is most auspicious for this year. Brown and his associates have the Cuban situation well in hand, while a bit of anti-racing agitation in New Orleans has met with successful opposition on the part of by far the greater portion of the city's adult population.

Here on the coast the situation yet seems to be a bit in doubt owing to a conflict between General Carranza and Governor Estaban Cantu of lower California, but the prevailing opinion is that the latter gentleman is acting within his rights and will be able to protect the holders of the Tia Juana concession, a group of American and Mexican horsemen and promoters associated as the Baja California Trading Company. Shortly after the work of establishing the plant was begun some weeks ago, adverse advices from General Carranza caused the same to be discontinued temporarily. Investigation by the holders of the concession convinced them of the soundness of their permits and work was resumed with but slight delay. Since that time conflicting reports have been numerous, so numerous that horsemen have been undecided as to the situation really existing.

Recent visitors to southern California state that plans to begin racing on Christmas day will go through as originally announced, these opinions being strengthened by statements from members of the B. C. T. C. George Crowley, a hotel proprietor of this city who holds an extensive concession for hotel and resort purposes just below the line on the coast and who was largely instrumental in getting rival concessionaires together on the Tia Juana proposition, stated in a recent letter to the editor of this publication that everything was progressing most favorably and that the sponsors of the project had every confidence that their plans would carry through safely and successfully. The foundation of the track is practically completed and the work of surfacing it is under way. Stabling accommodations are already prepared for over a hundred head of horses, and additional stables are rapidly going up, the plans calling for fifteen units of forty stalls each. Construction on the grandstand has also begun, and Mr. Crowley's advice is to the effect that an opening on Christmas day will be accomplished.

GOOD CONSIGNMENT FOR CHICAGO.

Robert A. Smith of Los Angeles, who for some time has been gathering a shipment of California horses to go to the December sale of the Chicago Horse Sale Company, drops us a line from Bakersfield to the effect that he will have about fifty high class individuals to take east with him, crediting the receipt of many of the consignments to a judicious use of the advertising pages of the Breeder and Sportsman. California horses have always been in demand throughout the east and central west, and as "Bob" is a horseman who knows the kind that salegoers want, it is an odds-on bet that the band he has gathered will average up well in price with the tops of the sale.

Getting his shipments together and making the round trip to the Windy City will take up most of Mr. Smith's time until the holidays, and with the first of the year he will be in shape to devote his attention to his new duties as secretary of the Pacific Coast Fair Association, and accomplish some real results towards bringing back district fairs and harness racing.

Peter Scott Rolls up $50,635

Ninth Day, Friday, Nov. 12.

By going a race which many horsemen consider practically the equal of any of his entire career, Peter Scott annexed the big end of the 2:19 trot this afternoon, his share of the purse, $875, bringing his total winnings for the season well over the fifty-thousand-dollar-mark for which he has been striving since the season opened. Only $240 were needed from today's event to bring him up to the round figures, but simply to clinch matters he won the race and made the total $50,635. He might have made the sum a hundred and a quarter larger save for the fact that Virginia Barnette repeated her old trick of going through his clothes for that amount, and also tried hard to go deeper.

It was the third meeting of Peter and Virginia, the most spirited one and the best one all around. The track had not yet reached a point where harrows and floats could be used to any advantage and for a considerable portion presented the appearance of a cobblestone street, a roller having been called into service and the larger humps and ridges somewhat subdued thereby. The best going was about midway from fence to fence, so all the miles were long ones. No sane person after once taking a trip over it would expect miles better than ten or eleven by pacers or thirteen or fourteen by trotters, so the afternoon's performances were, in most instances, truly remarkable.

Matawan, considerably out of place in such company, drew the pole but quickly surrendered it to Scott, Virginia lapping in second position. Down the back stretch Future Tramp went to a break, while Virginia ranged up alongside Peter and had her nose a bit in advance at the half. The second quarter was a bit merrier than the first, and just after passing the halfway house Peter left his feet, probably owing to the bad footing. Virginia had things better and Durfee kept her spinning along, trotting the third quarter in thirty-two seconds and opening up a considerable lead over Peter, who was in turn some lengths in advance of Matawan, behind whom was yet to come Future Tramp. In the stretch Durfee slowed down to let everyone in, winning by about three lengths in 2:12½, an excellent mile for the track. In the second Virginia went away in front, with Scott lapping in second position into the back stretch, where he assumed the pace maker's job, going to the half in 1:05. Virginia trailed him very closely into the stretch, coming through on the pole when Scott swung wide on the better footing and making a sturdy challenge for the heat. With her friends pulling for her vociferously the slight filly trotted up to even terms and seemed about to forge ahead when a little skip caused Durfee to take her up, coming on again with a rush that kept Murphy lifting the Scott horse till the wire was passed, the time being 2:09¾. In the third Virginia raced wide into the back stretch, then dropped into Scott's trail until into the stretch where she squared away in a manner that forced the brown horse to trot the final quarter in :31½ to win. At the distance she was about on even terms, but Peter had something left and drew away to finish in a flat 2:10. Had the day and track been favorable a mile in 2:05 would have been no more worthy of note than were these in 2:09¾ and 2:10 under the existing conditions.

The next most interesting of the day's five events was the 2:20 pace, in which Henry Helman and Mack Fitzsimmons scored their second victory over Tommy Murphy and Jean, the western pair having things their own way throughout. One heat was much like another, the lanky westerner showing the way to the lanky yankee each trip, setting the pace and outbrushing him in the stretch, A. B. C. finishing third and Dicto fourth each time, Oro Mo catching the flag in the second. In the final heat Murphy jumped Jean to even terms at the long distance but the lass lost her feet in the drive, Fitzsimmons winning alone. The average time for the three heats was 2:09.58, while that of their first meeting, on very much faster footing, was 2:08.33, so both have improved in the meantime.

Rico, Will Durfee's chestnut son of Manrico, was the boss of the baby pacers in the junior division of the State Fair futurity, winning from wire to wire in each heat, the field following him in similar array both trips—Julia M., Fiesta Lou and Verna McKinney, Fresno Bond being distanced the first time out. Julia M. outranked the other girls as handily as Rico outclassed her, Fiesta Lou making an unsuccessful effort to catch her in the final drive. Verna McKinney, winner of the similar division of the Breeders' futurity in much faster time, was unsteady in the bad going and escaped the flag in the first heat only through Durfee slackening his pace towards the end of the mile.

Sadie Ansel straight-heated Alesandro for the consolation money of the State Fair classic for two-year-old trotters, but a like purse for three-year-olds threatened for a time to go five heats. May Alto and Winnie Bond took turns in breaking and winning heats and at the conclusion of the third mile the score stood two to one in Winnie's favor. No sooner had Ivey and Daniels dismounted than one of them proposed going another heat at once, so the caretakers en route to the paddock with the fillies were recalled and the fourth and deciding mile raced off, Winnie winning owing to a break in front of the club house by May Alto, right when the latter seemed due to even up the score. Both are much better

Dem Doggoned Dangerous "D's"
DeRYDER, DOBLE, DURFEE
Snapped along the fence just before the 3-year-old trot, Breeders' Futurity, on getaway day.

than their performances here would indicate and should mature into useful trotters. The day's results:

Friday, Nov. 12.—State Fair Futurity, two-year-old trotters, consolation purse, $350:

Sadie Ansel, ch f by Prince Ansel (2) 2:20½—Lauress by Mendocino 2:19½.....(Dowling) 1 1

May Alto, bl f by Alto Express 2:22¼—Maymonio by Demonio 2:11¼ .....(Ivey) 2 1 2 2
Time—2:32¾, 2:28½, 2:38½, 2:31
Distribution of purse—Winnie Bond $200, May Alto $100, State Fair $100.

Last Day, Saturday, Nov. 13.

With a very slim attendance, pleasant weather and footing much better than that of the last several days, though far from good, the closing program of the exposition meeting was staged this afternoon, four of the seven events being interesting from start to finish. The crowd might have been larger, but it made up in appreciation what it lacked in size, and close finishes and clever drives were well rewarded by generous applause.

The feature event of the day was, of course, the 2:06 pace in which there were ten starters. The similar stake at the June meeting drew a crowd both large and enthusiastic and developed into a great race, but through the announcements earlier in the week to the effect that the present event would probably not be raced very many people gained the idea that it was "all off" and stayed away from the course this afternoon. Only a comparatively few hours of notice was given that the stake had been taken over and guaranteed by Messrs. Will Durfee, Dick McMahon and Tom Murphy, and practically no announcements were made of this move save through the local dailies.

At the spring meeting the outcome of the stake was in doubt to a much greater degree than was the one of today, for at that early date there were a number of entrants concerning whose real capacities the public was more or less in the dark. Dr. Burns loomed for a time as an overwhelming favorite, but his elimination left several very closely matched pacers to compete for the rich prize. Today, however, Hal Boy, the real hero of the June stake and the "runner up" in many of the season's Grand Circuit classics, was conceded to be the logical choice and his victory was confidently predicted in most quarters. It was rather a toss-up for second pick, White Sox and Major Ong both having numerous followers, but conditions being such as to prevent them being regarded as formidable rivals of the favorite. Sox has not been quite right during the meeting, and while the lilliputian military gentleman was as right as they come, he has a most pronounced preference for a very hard track, while Saturday's was still heavy. The Beaver, had Will Fleming been driving, would have been regarded with much more respect, for while Charley Dean is a handy young teamster the Canadian pacer is not "everybody's horse." Red Rock was accorded recognition as dangerous but the balance of the field, on past performance and condition shown of late, was not regarded as formidable to any part of the purse above the five-hundred-dollar cuts. Under all the circumstances, the main interest in the event hinged upon whether the stake's new sponsors, Murphy, Durfee and McMahon, would be able to protect their hole card by drawing first, second and third in the final summary as well as in most of the heats.

Loch Lomond, in no condition whatever to take advantage of the position, was allotted the pole, with Impetuous Palmer laying beside him. The Beaver, White Sox, Hal Boy and Hemet also occupied places in the first tier, Major Ong trailing on the pole and flanked by College Gent, Princess Patch and Red Rock. There was none of the long "sustained interest" which was evidenced through the five heats of the June event, as Hal Boy never left the result in doubt in this one. After a few ragged scores the field came down none too well bunched but all pacing and Starter Updegraff took advantage of the latter feature and gave them the word. McMahon, outside, was well under way at the wire, in a commanding position, and set sail for the pole, Impetuous Palmer,

Hal Boy Wins Stake

Major Ong, White Sox and College Gent being the closest to him around the turn. The Beaver broke early, and down the back stretch Princess Patch closed up a bit, while the Impetuous gentleman lost his chance through a break. The Boy led Ong and Sox into the stretch and the three pulled away to finish a length or so apart at the wire, Sox passing Ong in the stretch and the Boy pacing the final quarter in 29½ seconds. Red Rock came from a bit back to grab fourth place, while Princess Patch just missed getting a piece of the heat money.

So far, all was well in the ranks of the three gamboliers, but early in the second heat a catastrophe impended momentarily—but only momentarily. Hal Boy went away buzzing, as before (only this time he had the pole without racing an extra few yards for it) and just as they were going into the turn Sox broke, her jumpup causing Red Rock and The Beaver to lock wheels in a dangerous manner, the pilots managing to come clear without damage. The Beaver was the first out of the mill, White Sox being sixth and Red Rock last when they settled to pacing again, Hal Boy and Ong going up to the half in 1:03½, with College Gent and The Beaver not far away. It looks like a hard winter in Los Angeles, and William Gee Durfee, facing a double loss, set sail for a piece of that mazuma. Just as in that final heat in June, Sox paced fast and steadily after settling, and by the time the short turn was reached she was well up with The Beaver. The Gent faded in the sprint and Durfee raced safely into third place, with Ong second and The Beaver fourth. McGuire hadn't asked anything of Red Rock save that he finish inside the flag, in last place. The final heat was nuts for the underwriters, Hal Boy, Sox and Ong finishing a handy one-two-three in a nice mile, the last half in 1:02½ and the last quarter in :30 flat, Red Rock racing into fourth place. For an event that offered so many possibilities of some off-color driving it was a most exceptionally good race, and in the writer's opinion there would have been absolutely no change in the money-winners had the drivers had absolutely no interest in the staging of the race. Hal Boy, Sox, Ong and Red Rock "figured" on all dope sheets to finish just as they did in that sort of footing.

One Mr. Charles L. DeRyder of Pleasanton had a most enjoyable afternoon, thank you, being a three time winner, two of his mounts coming under the "prohibitive favorite" category. With the two-year-old pacer Fresno Bond he walked-over for the consolation purse of that division of the State Fair futurity, and with Allie Lou he took the Breeders' three-year-old trot in straight heats. The Hemet Stock Farm filly has not lost a race over the exposition course and reduced her record today to 2:12¾. It seems rather a shame that some of her engagements could not have been raced under truly favorable conditions, as there is no doubt that over a good track, with good racing weather, she would have taken a race record of 2:10 or better. She is a high-class filly in any country, and the many friends of Messrs. Whittier, Doble and Blackwell have derived much pleasure from her winning campaign. Carl, who has been improving with every race he went, was at his best today and was a consistent second throughout the race, though lacking the steam to make him dangerous to the winner. Byron, who outranked him in other starts, was unsteady and could finish no better than third, while George N. Patterson was not at his best by any means. The black fellow has a lot of speed and did some good racing during the summer after recovering from a very severe illness, but was not "on the trot" today, breaks causing him to finish fourth in the first two heats and to be declared distanced in the last one. The colt classics of the season have been raced under disadvantages, and the youngsters participating in them will all bear watching.

Much as Charley enjoyed his "sensational mile" with Fresno Bond—the time being 3:05—and his third victory for Hemet Stock Farm, the performance that really warmed his heart was that of Miss Perfection in the 2:14 trot, the brown filly taking two out of three from the redoubtable Mirthful in finishes that delighted her many friends in the grandstand. Mirthful drew the pole and went to the front with Perfection in the trail, Bonnie Ansel breaking on the turn. Down through the narrows DeRyder began moving up on the big mare, taking the lead around the turn and into the stretch, maintaining the advantage to the wire in a spiritedly contested drive, Mirthful getting no closer than DeRyder's shoulder. Bonnie Ansel trotted well after settling and passed Matawan and Bon Courage to finish third. Mirthful made one of "them things" early in the second mile and was last at the eighth pole, from which point she took up the long stern chase after the leaders. At the half she was third and on the turn second, trotting fast and steadily in a game but unsuccessful effort to land the heat. Inch by inch she cut down the lost ground as the spectators implored Perfection to keep coming, but the best she could do was to finish well lapped up on the winner. In the third Mirthful was on the trot all the way and assumed the lead past the eighth never to relinquish it, Perfection giving up the drive a few yars from the wire after responding gamely to DeRyder's requests in the stretch. Bon Courage went a nice race for Fred Ward and looks to be a good trotter in light hands.

"The best matched bunch of two-year-olds that ever faced a starter on this coast," was the opinion generally prevalent concerning the field in the junior trotting division of the Breeders' futurity, and in the final heat they certainly gave the judges and clerk a task to place them. No better bred band of seven ever came together out here, and they trotted a memorable race. Virginia Humbug, the filly from the Alaska Stables of Ed Dunne, was well thought of by all who were familiar with her season's work, but she had corded badly a couple of days previously and all of Tommy Murphy's skill was required to land her a winner from the half dozen that were hard after her.

Will Durfee and Hermes speared the pole and the field was sent away after a few ragged scores, Hermes breaking in the straightaway and Miss Bond doing an Art Smith stunt on the turn. Millard Sanders took Natalday out to set the pace for Virginia Humbug and The Expense, bringing them into the stretch well in the lead of the others. Once squared away Virginia came through to win by over two lengths from Natalday, who had about the same advantage over The Expense, the latter having left her feet in the stretch when well up in the contention. Charley DeRyder brought Miss Axworthy Dillon into fourth place over Lula B., Miss Bond and Hermes, the time of 2:16¾ being first class for the day and track.

The Stormy Petrel of the Trotting Turf
DICK McMAHON
Going just a little bad gaited, folks, but able to be about—about $12,000 dollars' worth!

Coming out for the second heat Virginia showed a bit lame, the affliction becoming more and more pronounced with each recall, as the babies were a bit bad to get away. Murphy nursed her as best he could, dropping into the windbreak behind Natalday when the word was given, Sanders setting the pace into the stretch with the field occupying relatively similar positions to that point, Virginia, Miss Axworthy Dillon and The Expense being the nearest to him. In the stretch Murphy came through with the tiring Virginia, with the whole track full of colts. Hermes challenged outside but broke, The Expense also leaving her feet, and the whole seven came down together. It looked like too much for Virginia, but she is a real trotter and game to the core. Tommy searched her for every ounce of trot she had and she stuck to her gait like the true-hearted lass her breeding gives her a right to be. As a last resort Tommy took her up in his lap, then straightened out those long legs of his and turned her loose, the slide giving her just enough of a shoot to send her across the wire a winner—dead game and dying on a trot. Right at her in the order named were Natalday (whom Sanders had also given a strenuous teaming), Miss Axworthy Dillon, Hermes, The Expense, Lula B. and Miss Bond, the finish creating the most enthusiasm of any of the day. The winner's time was 2:18 and not a colt was over two or three lengths away from her.

The three-year-old pacing division of the State Fair futurity had only two starters, I. L. Borden's Sheldon B. and D. W. Wallis' Bondholder. Both colts showed more or less unsteadiness but Sheldon B. had the most lick when on a pace and won in straight heats, his victory being the first of the meeting for that good fried of the trotter, his owner. Mr. Wallis' colt worked his home track much better than the time in today's race, but like other members of the stable trained off when changed to Pleasanton and then down here.

The last race of the meeting, the 2:17 pace, had only three starters and was pickings for Henry Helman, the one trainer present who had the Indian sign on Tommy Murphy whenever they came together, defeating Jean twice with Mack Fitzsimmons and Hal S. twice with Prince Zolock, the Salinas-Oregon-Washington combination having a clean score of four wins out of four starts. The roan gelding is a notorious front runner, and in the opening heat Murphy kept him behind Zolock until well down the back stretch when he let him go, winning more on account of a break on Zolock's part than on Hal's finishing ability. The program was reversed in the second and Helman won easily in a stretch drive, Murphy going back to his first plan in the final heat. Hal pulled as hard as ever in behind and when let out went into the lead only to break in the stretch and be passed by both Zolock and Zoetrix, even making a dive for the paddock when that point was reached. Tom straightened him out with line and whip, gave him one extra for luck as they went under the wire—and the exposition meeting was over. The day in detail follows:

Saturday, Nov. 13—State Fair Futurity, two-year-old pacers, consolation purse $250:
Fresno Bond, b c by The Bondsman—Fresno Girl 2:10½
by Seymour Wilkes 2:08½.....(C. L. DeRyder) 1
Time—3:05.

Distribution of purse—Fresno Bond $125, State Fair $125.

Breeders Futurity, three-year-old trotters, purse $2800 ($2500 to race, $200 to nominator of dam on whose original entry is named the winner of this division of the stake, and $100 to owner of stallion, sire of winner, when mare was bred):
Allie Lou, br f by Kinney Lou 2:07¾—Lady Zombro 2:24¼ by Zombro 2:11 (C. L DeRyder) 1 1 1
Carl, bl g by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(C. A. Durfee) 2 2 2
Byron, bl c by Tom Moko 2:13—Rita H. 2:12½ by McKinney 2:11¼ .....(W. G. Durfee) 3 3 3
Geo. N. Patterson, bl c by On Voyage (3) 2:25¾—Yu Tu by R. Ambush 2:09¼.....(Rutherford) 4 4 ds
Time—:33½, 1:06 , 1:39½, 2:14¼
:33½, 1:05 , 1:39 , 2:12¾
:33¾, 1:07 , 1:40¾, 2:14½

Distribution of purse—Allie Lou $1,500, Carl $625, Byron $375, Hemet Stock Farm $200, Budd Doble $100.

Breeders Futurity, two-year-old trotters, purse $1400 ($1300 to race and $100 to nominator of dam on whose original entry is named the winner of this division of the stake):
Virginia Humbug, b f by Cochato 2:11½—Baroness Maid by Baron Wilkes 2:18.....(Murphy) 1 1
Natalday, b c by Wilbur Lou (3) 2:10¼—Ella J. by Bob Mason 2:27¼ .....(Sanders) 2 2
Miss Axworthy Dillon, b f by Axworthy 2:15½—Cleo Dillon 2:13¾ by Sidney Dillon (C. L. DeRyder) 4 3
The Expense, br f by The Proof 2:10¾—Nusta 2:23½

by Nushagak .....(Spencer) 3 5
Hermes, br c by Carlokin 2:07½—Miss Quealey 2:26¾ by Moko .....(W. G. Durfee) 7 4
Lulu B., b f by The Bondsman—Loma B. by Stam B. 2:11¼ .....(Clark) 5 6
Miss Bond, b f by The Bondsman—Miss Harris by Sidney Dillon .....(W. C. DeRyder) 6 7

Time—:34½, 1:08 , 1:42 , 2:16¾
:34½, 1:08 , 1:42½, 2:18

Distribution of purse—Virginia Humbug $650, Natalday $325, Miss Axworthy Dillon $195, The Expense $130, I. L. Borden, owner of original nomination, $100.

State Fair Futurity, three-year-old pacers, purse $1100 ($1000 to race and $100 to owner of stallion, sire of winner when mare was bred):

Sheldon B., ch g by Barney Barnato 2:19½—Ramona by Prince Robert.....(Alvord) 1 1 1
Bondholder, b c by The Bondsman—Corinne Sidmoor 2:17¾ .....(Allen) 2 2 2

Time—:36¾, 1:12 , 1:45¾, 2:20¾
:35½, 1:08½, 1:44 , 2:21
:35 , 1:10½, 1:47¼, 2:25½

Division of purse—Sheldon B. $550, Bondholder $275, State Fair $275, I. L. Borden $100.

2:06 pace, purse $20,000:

Hal Boy, b g by Hal B. 2:04½—Altalena by Altamont 2:26¾ .....(McMahon) 1 1 1
White Sox, b m by Del Coronado 2:09½—Subito by Steinway (3) 2:25¾.....(W. G. Durfee) 2 3 2
Major Ong, b g by Major Gantz 2:08½—Bessie J. by Iowa Sentinel 2:29¾ .....(Murphy) 3 2 3
Red Rock, ch g by Louis Wilkes 2:15½—Red Bird by E. S. 2:11¾ .....(McGuire) 4 7 4
The Beaver, br h by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook .....(Dean) 8 4 6
Princess Patch, b m by Dan Patch 1:55¼—International Queen 2:13½ by Tom Exum 2:15½.... .....(Macey) 5 6 5
College Gent, bl h by Kentucky Patterson—Belle H. by Senator Crisp.....(Barnes) 6 5 7
Loch Lomond, b g by Zolock 2:05¾—Daisy McKinney by McKinney 2:11¼.....(Alvord) 7 dr
Hemet, br g by Geo. W. McKinney 2:14½—Lady Zombro 2:24¼ by Zombro 2:11.....(Walker) ds
Impetuous Palmer, b h by Impetuous Devil 2:21¾—Lilee Palmer by Norval King 2:12¾... .....(Frank) ds

Time—:31½, 1:04¼, 1:38½, 2:08
:31½, 1:03½, 1:36 , 2:06
:31½, 1:04 , 1:36½, 2:06½

Distribution of purse—Hay Boy $10,000, White Sox $4,500, Major Ong $3,500, Red Rock $1,500, The Beaver $500.

2:14 trot, purse $2,000:

Miss Perfection, br m by Gen. Watts (3) 2:06¾—Sue Fletcher by Tregantle 2:09¼(C. L. DeRyder)1 1 2
Mirthful, b m by The Star of Patchen—Lizzie Belle Smith by George Simmons 2:28 (Murphy) 2 2 1
Bon Courage, ch g by Bon McKinney (3) 2:24¼—Helen Keyes by Sidney Dillon.....(Ward) 4 4 3
Bonnie Ansel, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20.. .....(Spencer) 3 3 dr
Matawan, br g by Athadon (1) 2:27—Cora Wickersham by Junio 2:22.....(Schwartz) ds

Time—:33¼, 1:06¾, 1:39 , 2:10½
:32½, 1:05½, 1:39 , 2:10½
:32½, 1:04½, 1:38 , 2:09¼

Distribution of purse—Miss Perfection $875, Mirthful $625, Bon Courage $250, Bonnie Ansel $150, Association $100.

2:17 pace, purse $2000:

Prince Zolock, bl h by Zolock 2:05¼—Princess Direct 2:28¼ by Teddy A.....(Helman) 2 1 1
Hal S., rn g by Hal Chaffin 2:05¾—Bessie Hal by Red Hal 2:13¾.....(Murphy) 1 2 3
Zoetrix, ch m by Zolock 2:05¼—Trix Marshall by Nutwood Wilkes 2:16.....(Chadbourne) 3 3 2

Time—:34½, 1:06½, 1:40 , 2:13¾
:31¾, 1:03½, 1:37¾, 2:10
:34¼, 1:07¾, 1:42 , 2:14

Distribution of purse—Prince Zolock $875, Hal S. $575, Zoetrix $350, Association $200.

Aside from the discomforts occasioned by the few rainy hours—discomforts no more pronounced than usual at any track under similar weather conditions—and the numerous unaccustomed restrictions of an "e-x-p-o-s-i-t-i-o-n," the meeting passed off smoothly, especially insofar as the actual racing was concerned. There were no long scores and no delays. Starter Updegraff had his fields well in hand at all times and Tom McInerney, in the paddock, had the next bunch walking toward the gate as the ones just raced were headed back from the wire. Magnus Flaws, as presiding judge, and Messrs. John A. McKerron and Robert S. Brown, as associates, saw to the enforcement of the rules and regulations of racing, while Jack Dinue haunted the back stretch and turns as patrol judge. George B. Kelley handled the work of clerk of the course, I. B. Dalziel officiated as marshal, Sandy Smith did the dirty work with the red bunting, and the time was taken by S. Christenson, Dan Hoffman and Earnest Doyle. The patrol judge reported clean racing throughout during the time the fields were in his territory, and the time never varied over a slight fraction from that caught by the clockers in the stand.

With the close of the P.-P. I. E. meeting, most horsemen went into winter quarters, though a few had further engagements. Will Durfee, Chas. Silva, John Quinn, Charley Spencer and J. N. Jones sent certain members of their stables to Phoenix to take part in the Arizona State Fair, which closes today, while local breeders having colts engaged in the Pleasanton futurities shipped there to await the racing of those events on Saturday, Nov. 27. All of our visitors from afar pulled for home with the exception of the horses of the International 1:55 Farm, which Railey Macey will winter at Los Angeles, being convinced that the City of Angels offers excellent opportunities for getting ready for next year. Those having the longest rides before them were Tommy Murphy, to Poughkeepsie; Dick McMahon, to Libertyville; Sam Harris, to Plymouth, and the Canadian contingent composed of Barney Barnes and Will Fleming, to Winnipeg. The shipments of the latter trainers were augmented by the presence of Joe Patchen II. 2:03¼ and Quintell 2:12¼, who will do stud duty in the dominion, and a few others recently purchased, including Little Express (2) 2:20, Jim Hill 2:09¼ and Marlin trial 2:08¼ pacing. Mr. Fleming was improving steadily prior to his departure and Barney Barnes was almost as good as new, so we hope to have them back with us in the future.

Messrs. Magnus Flaws and O. P. Updegraff, the ruling spirits of the judges' stand, stopped at Phoenix enroute home to fill engagements at the Arizona State Fair, where Updegraff will start the harness horses while Magnus handles the barrier for the runners. They have had a long and successful season and will no doubt relish an evening or so by the home fireside when the opportunity rolls around.

STONY FORD FARM BUYS WOODLAND MARES.

C. A. Harrison of Seattle, who has been under the weather for some time with an injured back, made a hurried trip to Woodland Stock Farm late last week and made a veritable "cleanup sale" of a number of the choicest mares and fillies on the farm, some of them the property of the incorporation and the remainder, the most select, the property of Mr. Harrison himself, according to our advices. Mr. Louis Titus of Stony Ford Farm, Stony Ford, New York, was the purchaser and the sales were made largely through the medium of S. Christenson of this city. The individuals sold to Mr. Titus for the account of Woodland Stock Farm are as follows:

Ruby Crellin, bay mare by C. the Limit 2:03¼, dam La Moscovita by Guy Wilkes 2:15¼; in foal to Robert Bingen 2:11¼.

Sonoma Queen, chestnut mare by Sonoma King, dam Olive Dillon by Sidney Dillon; in foal to Robert Bingen.

Bay filly, weanling, by True Kinney 2:12¼, dam The Attraction by Peter the Great 2:07¼.

Bay filly, weanling, by Robert Bingen 2:11¼, dam Fair Recluse by Moko.

Bay filly, weanling, by Prince Ansel (2) 2:20½, dam Goldie McKinney by Prince McKinney 45079.

Bay filly, weanling, by Robert Bingen 2:11¼, dam Ruby Crellin by C. the Limit 2:03¼.

These two mares and four weanlings constitute the draft from Woodland Stock Farm, while the following individuals, previously understood by the public in general to belong to the farm but in reality owned by Mr. Harrison, according to latest reports, were sold to Mr. Titus for the personal account of the Seattle horseman:

Carrietta 2:18 (dam of four standard yearling trotters, etc.) by Directman, dam Black Bird by Stranger; in foal to Robert Bingen.

Chestnut filly, weanling, by Peter the Great 2:07¼, dam Carrietta 2:18.

Ila Moko (dam of Anselila (1) 2:17½) by Moko, dam Dictator's Last by Dictator 113; in foal to Robert Bingen.

Verbena Mc (dam of Verbena Ansel (1) 2:22½) by Directum Spier 2:11¼, dam Baroness Lavinia by Baron Wilkes 2:17; in foal to Prince Ansel.

Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow 2:16, dam Torser by Hawthorne; in foal to True Kinney.

Ella J. T. (dam of Honey Healey 2:08¼, San Felipe 2:09¾, etc.) by Bob Mason 2:27¼, dam Miss Taylor by A. W. Richmond; in foal to True Kinney.

Eocita by Moko, dam Mendocita by Mendocino 2:19½; in foal to Prince Ansel.

Fair Recluse by Moko, dam Menrosa by Mendocino 2:19½; in foal to Robert Bingen.

Bonhilda by Moko, dam Bonilla by Adbell (1) 2:23; in foal to Robert Bingen.

Alma V. McGregor by Jay McGregor 2:07¼, dam East Morn by Baron Wilkes 2:18; in foal to Robert Bingen.

Goldie McKinney by Prince McKinney, dam Kitty Todd by Todd; in foal to Prince Ansel.

Baroness Spier by Directum Spier 2:11¼, dam Baroness Hester by Baron Wilkes; in foal to Prince Ansel.

Mr. Titus has also secured a few other mares through S. Christenson and the entire band will be taken east by "Red" MacDonald, who formerly looked after the shipping of the MacKenzie horses, so that they should go through in excellent condition. With this sale, the most select band of mares that has been assembled in late years on this coast is broken up, and Mr. Harrison expresses regret that they were not bought by California breeders. Prince Ansel, the performance of whose yearlings has been such a source of pleasure this season to Mr. Considine, may also leave California, as it is reported that eastern parties are negotiating for his purchase.

PROTEST AGAINST CHARLES BECKER NOT SUSTAINED.

During the progress of the June meeting at the P.-P. I. E. protest was made by W. J. Kenney of this city against Charles Becker as an amateur driver, the particular race involved being the 2:15 pace for amateurs, in which Mr. Becker drove the chestnut mare Mabel Dillon, owned by Ben Cohen, Mr. Kenney having contested in the same event with the b gelding W. J. K.

On Friday night of last week, November 12, t case was heard in this city by Messrs. B. F. Ru of Suisun, California, and J. H. Booth of Rosebu Oregon, these gentlemen constituting a quorum the Pacific District Board of Appeals of the Nation Trotting Association, under whose rules the meeti was conducted. Messrs. Geo. J. Giannini, Ben Coh and Charles Becker were questioned under oat while Mr. Kenney's testimony was incorporated his original affidavit, supported by letters whi lacked legal certification. After reviewing all tes mony submitted, verbal and written, the board he that the protest was not sustained and found for M Becker, thus clearing the way for the payment purse money which had been held up pending th hearing.

M. W. JOHNSON DIES IN ILLINOIS.

Tuesday morning Associated Press dispatches bor tidings of the death of M. W. Johnson at his hom near Assumption, Illinois, the news being a surpris to local acquaintances of the Illinois breeder. He wa missing from some of the meetings during the seaso at which he is generally a "fixture," but the gravit of his condition was not realized until the end wa neared. Mr. Johnson owned the good race horse an sire Colonel Cochran 2:10½ and for many year raced an extensive stable of both trotters and pacer many of them of his own breeding. His activitie in this line were confined largely to the tracks of th central west, but many people who never met hir knew him well through many able contributions t the press concerning the horse, as well as throug numerous ideas conceived by him and carried int practical everyday use "in the business." To th work he best loved he devoted much time and energ and the resources of an inventive mind. Many horse men are not "good business men," but Mr. Johnson' office system, of his own devising, was a thing o perfection and the basis of those at present in vogu in many large establishments. He was one of th most progressive men of his state, and the vacanc left by his demise will not easily be filled.

PHOENIX SUMMARIES.

Monday, Nov. 5.—2:25 trot, Arizona horses, purse $1000

Naboth Jr., ch g, untraced.....(McEuen) 1 2

Belzabola, b f by Redlac.....(Carman) 2
Dr. Davidson, b c by Dr. Clark.....(Clark) 3
Della Patch, b m by Patchlock.....(Owens) 4

Time—2:34, 2:27¼.

Tuesday, Nov. 16.—Two-year-old pace, Arizona horses purse $500:

Marguerite, b f by Airault.....(Enfield) 1
Vic, b g by Director.....(Clark) 2
Lelia Mac, b f by Leland D.....(Wheat) 4
Dama, bl c by Directly.....(Selman) 3

Time—2:35, 2:37½.

2:12 trot, purse $1,000:

The Proof, b h by The Exponent.....(Daniels) 2 2 1
Mabel Van, b m by On Stanley.....(Best) 3 1 2
Sadie View, br m by Direct View.....(Wheat) 4 4 3
Sargo, b g by Keeler.....(Durfee) 1 3 dr

Time—2:11½, 2:11½, 2:14¼.

2:04 pace, purse $1,000:

White Sox, b m by Del Coronado.....(Durfee) 1 3 1
Potrero Boy, b g by Demonio.....(Daniels) 2 1 2
Leata J., b m by Royal McKinney.....(Jones) 3 2 3

Time—2:06½, 2:06¼, 2:06¼.

Wednesday, Nov. 17.—Three-year-old trot, Arizona horses, purse $500:

Otis Jr., b c by James Otis.....(Wheat) 1 1
Irene Strathmore, ch f by Knight of Strathmore.. .....(Carman) 2 2
Navajo, b f by Dr. Clark.....(Bunch) 3 4
Dr. Davidson, b c by Dr. Clark.....(Clark) 4 3
Miss Emily, b f by Knight of Strathmore (Selman) 5 5
Baby Joy, ch c by Direct So.....(McEuen) 6 6

Time—2:22¼, 2:22¼.

2:15 pace, purse $1,000:

Contention B., b g by Copa de Oro.....(Durfee) 1 3 1
Gay Tommie, b g by Tom Ferguson...(McNab) 3 1 3
Zombrino, bl h by Prince Zombro.....(Bunch) 2 2 2

Time—2:18¼, 2:16¼, 2:23¼.

Three-year-old pace, Arizona horses, purse $500:

Roxie D., b f by Leland D.....(Enfield) 1 1
May Della, bl f by Lou Kinney.....(Carman) 2 2
Vinie B., b f by Leland D.....(Clark) 3 3
Marguerite, b f by Airault.....(Yore) 4 4

Time—2:23½, 2:20¼.

R. J. MacKenzie, of whom Californians have seen but little during the present season owing to the press of business of affairs in Canada, returned early in the week to his northern strongholds after taking in the exposition races.

Statistics of Fall Meeting at Exposition

COMPILED BY WILL M. NEAL

The Winners by Classes with the Time and the Purse

TROTTING EVENTS.

Class.	Winner and Driver.	No. of Heats.	Fastest Heat.	Slowest Heat.	Value.
2:20	Virginia Barnette (W. G. Durfee)	3	2:09¾	2.12	$2,000
2:15	Mirthful (T. W. Murphy)	3	2:10¼	2:10¾	2,000
3-y-o	(Occident) Allie Lou (C. L. DeRyder)	3	2:15½	2:16	2,885
2:10	Peter Scott (T. W. Murphy)	3	2:07¼	2:09½	20,000
2:30	Peter Scott (T. W. Murphy)	3	2:08¼	2:09¼	2,000
2:17	The Proof (C. A. Spencer)	3	2:17½	2:20	2,000
f-f-a	(Amateur) Maymack (R. A. Smith)	3	2:09¼	2:11¼	2,000
2:13	Mirthful (T. W. Murphy)	3	2:09½	2:13½	2,000
3-y-o	(State Fair) Allie Lou (C. L. DeRyder)	3	2:13¼	2:14	1,400
2:08	Peter Scott (T. W. Murphy)	3	2:08¾	2:11	5,000
3-y-o	(Stanford) Geo. N. Patterson (Homer Rutherford)	3	2:31½	2:39¾	1,320
2:16	Mirthful (T. W. Murphy)	3	2:29	2:36	2,000
2-y-o	(State Fair) Natalday (Millard Sanders)	2	2:29½	2:32	600
2:09	Albaloma (J. P. Quinn)	3	2:22	2:25	2,500
2-y-o	(S. F. Consolation) Sadie Ansel (H. S. Dowling)	2	2:29¼	2:32	350
2:19	Peter Scott (T. W. Murphy)	3	2:09¾	2:12½	2,000
3-y-o	(S. F. Consolation) Winnie Bond (L. B. Daniels)	4	2:28½	2:38½	400
3-y-o	(Breeders') Allie Lou (C. L. DeRyder)	3	2:12¾	2:14½	2,500
2-y-o	(Breeders') Virginia Humbug (T. W. Murphy)	2	2:16¾	2:18	1,200
2:14	Miss Perfection (C. L. DeRyder)	3	2:09¼	2:10½	2,000

Total trotting purses.....$56,155

PACING EVENTS.

Class.	Winner and Driver.	No. of Heats.	Fastest Heat.	Slowest Heat.	Value.
2:09	Major Ong (T. W. Murphy)	3	2:06½	2:09½	$2,500
2:12	Hal Boy (Dick McMahon)	3	2:06¾	2:08¼	2,000
2:15	Prince Zolock (Henry Helman)	3	2:07¼	2:08¼	2,000

2:20	Mack Fitzsimmons (Henry Helman)	3	2:08¾	2:10½	2,000
2-y-o	S. F. Consolation) Fresno Bond (C. L. DeRyder)	1	3:05	3:05	250
3-y-o	(State Fair) Sheldon B. (W. Alvord)	3	2:20¾	2:25½	1,100
2:06	Hal Boy (Dick McMahon) (Entrance paid in taken over and event raced and guaranteed by Dick McMahon, T. W. Murphy and W. G. Durfee)	3	2:06	2:08	20,000
2:17	Prince Zolock (Henry Helman)	3	2:10	2:14	2,000

Total pacing purses.....$42,250

Specials for Breeders and Stallion Owners

In addition to the above purses the sum of One Thousand Dollars was distributed through the medium of the State Fair and Breeders' Futurities to the nominators on whose original entries were named the winners of these events, and to the owners of the sires of the winners at the time mares were bred. This sum was allotted as follows: In the State Fair Futurity for 3-yr.-old trotters Allie Lou won $100 for Budd Doble; in the State Fair Futurity for 3-yr-old pacers, Sheldon B. won $100 for I. L. Borden; in the Breeders' Futurity for 3-yr-old trotters Allie Lou won $200 for Hemet Stock Farm and $100 for Budd Doble; in the Breeders' Futurity for 3-yr.-old pacers Bondalean won $200 for the Estate of W. J. Miller and $100 for C. P. McCan; in the Breeders' Futurity for 2-yr.-old trotters Virginia Humbug won $100 for I. L. Borden, and in the Breeders' Futurity for 2-yr.-old pacers Verna McKinney won $100 for A. L. Scott.

The Way the Money Went Among the Drivers

Name and Address.	Number races in which won money.	Amount won.
Thomas W. Murphy, Poughkeepsie, New York	16	$25,743.75
William G. Durfee, Los Angeles, California	17	13,197.75
Richard McMahon, Libertyville, Illinois	4	12,562.50
Charles L. DeRyder, Pleasanton, California	9	10,412.50
Henry Helman, Salinas, California	4	3,750.00
Loren B. Daniels, Sacramento, California	10	3,433.75
John P. Quinn, Sacramento, California	3	3,312.50
William C. DeRyder, Pleasanton, California	3	2,600.00

Recent Innovations at Successful Fairs

New Ideas that Appeal to Boys and Girls

Three bronzed farmers sat in the shade of a large exhibit building at one of the leading American state fairs the past fall fanning themselves with their hat brims, and wiping the sweat from their brows as they rested. They had spent the entire day walking from one part of the grounds to the other, and gained a wholesome respect for the educational value and immense scope of the exposition. But apparently none of them had peeped behind the scenes that day, and stopped to think. At that very moment, within a stone's throw, an interesting contest was in progress. Fifty-two boys and girls from all parts of the state, gathered in the school exhibits building, were competing for the state spelling championship. The contestants were the pick of the best spellers in the commonwealth, and so much interest had been aroused in the contest that there was a lack of room for all the visitors and many had to be turned away. During the previous winter and spring thousands of children, large and small, filled with a desire to spell well, had attended hundreds of spelling contests, in country and city, in rural schoolhouses and high school auditoriums, to compete for the honor of representing their counties in the final event at the state fair. Months before, it had been announced in every school in the state that each county would be entitled to two representatives.

The trip not only cost them nothing, but the premiums won by successful contestants gave the best spellers some extra spending money. The expense of the visit was paid by a 10-cent admission fee, taken in at the final county contest. A written test in which 100 words were given was held in the morning, while an oral competition in which three spelling books and three hours of time were needed to pick the winners was held in the afternoon. The proficiency of the children was a revelation even to the judges.

Only a few paces away, in the same building, two other contests were being conducted that were quite as interesting. In one of them 59 girls were competing for the state bread-making championship; in the other 53 boys and girls were trying for the state canning championship. These two contests had attracted thousands of visitors the entire week, and caused the school exhibits building to become one of the principal centers of interest on the grounds.

This contest was the climax of a great movement for better bread that had been stirring the state from one end to the other. During the previous winter, spring, and summer, scores of breadmaking contests had been held in nearly every county, under supervision of the county superintendents of schools, weeding out the poorer breadmakers. More than 2,500 girls, some with domestic science training, but most of them with none but home training, had taken part. What was the incentive? The goal was a visit to the state fair, with part or all expenses paid by the fair management and a chance to win the prizes offered the best bakers. The girls were divided into groups of a dozen each. Every day one of these groups, in full view, competed for honors. Four long benches placed before the platform upon which the girls worked were occupied by spectators from early morning until late afternoon, watching a few girls doing nothing more exciting than mixing flour, kneading dough, rolling loaves, and strolling to and fro with their eyes on the oven as the bread turned a delicious brown. Yet some would say that a ballyhoo dancer is needed to make a fair a success.

There was keen interest in the canning contest, conducted under the supervision of a specialist of the United States Department of Agriculture, primarily to demonstrate the different kinds of canners best suited for home use in that part of the country. Some of the girls in the bread-making contest competed, but the bulk of the boys and girls was made up of garden club members from different parts of the state.

What a time all those girls in the bread-making and canning contests had that week! Eighty girls slept in one of the big dormitories for young women at the state school of agriculture, near the fair grounds. Under the supervision of the woman leader of boys' and girls' club work, and several capable assistants, the girls were taken on visits of inspection each day. Alternately they played and worked, and the impressions of that vacation upon their young minds will exert a helpful influence all through their lives.

In the swine barn thousands of visitors were being entertained by a novel exhibit. It consisted of a number of pens containing pigs. Each pig seemed to lose its similarity to other pigs and become an individual pig with a personality. It had been tended for months by a boy keenly bent upon producing the best hog in the state. To assist in feeding the animal economically, each entrant had been required to grow at least one-third of an acre of some forage crop. This condition had been imposed to emphasize the value of green forage in the production of pork. The cost of all feed used in raising the pig, and the ultimate cost of each pound of gain, had to be estimated in the four months' growing season. Each pig shown at the state fair was the winner of a county contest. It had been shipped to the fair at the expense of the fair management to compete for generous prizes in both the lard and bacon classes. The judges judged each pig in a comparative conformation test, which, combined with economy of production, determined the distribution of the prize money. More than 400 boys had competed in the state contest, and 37 pigs were at the fair. It is doubtful whether anyone at the state fair was more popular than the winner of this pig club contest.

The boys' acre-yield corn contest show, open to boys who had competed the year before and saved samples of their corn, contained more corn than the one for men. Not only that, but the judges found that the sweepstakes 10-ear sample in the boys' show was better than any 19-ear sample exhibited by adults, and only the fact that it was ineligible to competition in the open classes kept the big silver trophy for the sweepstakes corn of the fair from going to the boys. The keen interest shown by the 2,500 boys who took part in the 1914 acre-yield contest could not have been established in a more effective way.

Quartered in a big building at the tip of the grounds, were 100 farm boys in a farm boys' camp. Only four counties in the state were unrepresented. These boys had gained admission to the camp because of their ability to write the best essays in their counties on either "Corn," "Clover," "Alfalfa" or "Live Stock." All the previous year they had been studying these subjects to enable them to excel in writing about them. Hundreds had competed. During the week at the fair the boys were taken by competent instructors to see the different exhibits. Their expenses were paid by the fair, and the only return was some ushering required in the grandstand and at the evening horse show.

The school exhibits display of more than 5,000 entries from rural, graded, semi-graded, consolidated and agricultural schools of the state filled the building to the roof with the products of thousands of little minds and hands, all anxious to establish a superiority in the world of drawing, sewing, cooking, carpentry, and penmanship. For months the children had been at work upon these things, their interest stirred by the stories told by the teacher about what would be done with the work at the big state fair.

We now turn back to the three men in the shade. Was the first one right when he expressed regret that the state fair was not an institution that lasted throughout the year? Had it only occurred to him that it is not the mere use of exhibit buildings and extensive fair grounds one week in the year that weighs the worth of a state fair, but the influence which it is exerting out and away from it as an educational institution, perhaps he would not have said what he did. One of the leading state fair secretaries publicly stated not long ago that the only justification for a state fair was its management as an educational institution. Most persons now think he is right; that a state fair justifies its existence only by stimulating thousands of boys and girls in every walk of life to spell better, raise better pigs, grow better corn, make better bread; encouraging men to raise better stock and keep their farms in better shape; urging women to improve their cooking and sewing, take better care of their children, and make their homes more pleasant. The state fair must reach out in all directions, imparting knowledge by concrete example, gripping the boys and girls with a permanent interest in useful things, advancing reasons for the raising of better farm products, and urging the necessity of better homes and families. The state fair is an organization that is intended to assist all classes of persons who support and attend it in leading more efficient lives.

There is no question that there has been a revolution in the purpose of state fairs in the last few years. More and more of their attention is being given to educational work. Some are doing more than others, but the tendency is to move ahead all along the line. Nor does the movement stop here for thousands of county and district fairs, always emulating and imitating the larger ones, are also doing the same thing, increasing their premiums for better stock and farm products, adopting uniform classifications for their premium lists, holding baby shows, children's corn, potato, poultry, calf, swine colt and vegetable shows, all intended to educate as well as amuse.

The West Michigan State Fair at Grand Rapids Mich., is making its influence felt in all the 40 counties of western Michigan. Free transportation and admission to the fair were given this year to the boy or girl who passed the highest eighth grade examination in a competitive test in each county. A second prize in each of the forty instances was given in the shape of an admission ticket to the fair. In addition, a large premium list for children's sewing, cooking, manual training, knife work, penmanship, and essay work was offered. Special prizes for exhibits of grain and vegetables by boys' and girls' clubs, and a canning demonstration for girls were added features.

Milking is an art that merits more than passing attention. The girl who is able to milk possesses an added charm and winsomeness. In proof of it, the milking contests at the Vermont and Michigan state fairs this year may be cited. In both instances the contests were limited to girls under 21 years of age. The Vermont board of managers prefaced its announcement with this statement: "Now that butter is no longer made on the farm but at the creamery, and the making of butter no longer falls upon the farm women, it is our belief that the daughters and mothers on the farm can help their brothers and fathers lift the farm mortgage by learning how to milk." Both contests were a success.

The Galesburg District Fair at Galesburg, Ill., held a boys' corn and stockraising contest this year that might be put on by other fairs to good advantage in the future. Competition was restricted to boys under 21 living in the 7 counties in the fair district. There were classes for a stallion foal, filly foal, boar, sow, and a bull calf and heifer calf of both the beef and dairy breeds. The provision was made that each animal shown had to be raised and cared for by the exhibitor, and that all animals entered had to be less than a year old. There were classes for both yellow and white corn.

There are few of the state fairs that have not adopted the farm boys' camp feature. A boys' and girls' camp was held by the Montana State Fair this year that was rather unusual. Its purpose was to encourage the growing of corn and potatoes by the boys and the canning of vegetables by the girls. In some of the counties admirably suited to potatoes exhibits of 12 potatoes were required; while in the other counties, which were more suited to corn, 10-ear samples of corn were asked for. The girls submitted pints of canned peas. All entries were sent to the fair at Helena and judged, the leading boy and girl from each county being given free trips to the state fair. Only children between 12 and 18 years of age were allowed to compete. Throughout the south practically all the state fairs are assisting the United States Department of Agriculture and the state agricultural colleges in their demonstration work for children. Liberal prizes are offered in all branches of contest work by most of the southern fairs. The corn, potato, tomato, cotton, live stock and pig club work in the south is being aided to a considerable degree. The excellent work of the Louisiana State Fair, one of the leading fairs in the world in its support of children's contests in agriculture and home management, deserves more than passing notice. Members of the boys' corn clubs, pig clubs, baby beef clubs, and poultry clubs, and the girls' canning clubs, are all cared for by a liberal premium list. Individual 10-ear samples of corn of all the approved varieties are acceptable in the boys' corn club show. All the different breed divisions are recognized in the pig club show, in which any pig club member may

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

WILD TURKEYS HERE AND THERE.

Efforts made to propagate the wild turkey in California during the past decade have not met with anything in the nature of a sensational success. The birds, in some congenial habitats, have been credited with making fair progress. In some other sections where they have been liberated, there has been, it is claimed, a strong predilection on the part of the captivity bred wild (?) turkeys to fraternize with the nearest barnyard denizens. Nothing has developed, however, up to date in liberated wild turkey circles, to lead up to anything in the future for our sportsmen on the lines indicated in the following story:

Not only has the wild turkey the reputation of being the shyest of all game birds, but he deserves it. Lucky indeed is the man who can say that one of those splendid birds has fallen to the crack of his gun. At one time the wild turkey was quite numerous in the United States, but civilization, more guns and more hunting have steadily thinned out his kind. Now, in many places, the turkey is but a memory, and oldtimers sit about the fire on a winter's night and tell the younger generation of the sport they used to have calling up a smart old gobbler.

When the noble red man roamed the forest primeval, the wild turkey made many meals for the wily savage, for against the cunning and stealth of the bird were matched the same qualities of the Indian. In fact, it was from the friendly Indians that the Pilgrim Fathers learned how to hunt the turkey. There is an old story that when the choice of some bird to be the emblem of American freedom was being discussed, it was Benjamin Franklin who held out first, last and all the time in favor of the wild turkey. He wanted the proud and beautiful bird that came up about the door of a pilgrim's cabin, extended a greeting of "tut, tut, tut," then scampered off to the dark recesses of the forest of which it was undisputed king of birds. The turkey finally lost to the eagle, but although beaten in this race, the proud bird was not disgraced. Next Thursday, at any rate, it is supreme.

Like the Indian, the wild turkey has given steadily away before the advance of civilization. Unlike the Bob White, the wild turkey likes to be just as far from the haunts of man as he can get. Find the roughest mountain sides, the most impenetrable thickets and cane brakes, the most impassable swamps, and you will have located the proper places in which to look for the turkey.

There are many ways to hunt this beautiful bird. The most fascinating, without doubt, is that of calling up the old gobblers and the hens in what is termed the "yelping" or mating season. This method is also employed in the fall when a young flock has been badly scattered. Another method is that of locating the birds by learning where they feed, by means of watching for turkey signs. An old turkey hunter will know where turkeys have been scratching when a novice or even an ordinary woodsman would find nothing to attract his attention. Not only this, but the old-time hunter can tell how old are the signs and which way the birds are ranging.

Many hunters prefer to go after turkeys with a dog, for the reason that a dog scatters the birds better than can be done by any other method, and the better they are scattered the easier it is to call them up and kill them. Then, too, a dog is invaluable in trailing a wounded bird. Still hunting, just tipping along, watching and listening, will get turkey meat sometimes. It is good sport to track a drove through the snow. Sometimes a hunter locates a roost, waits for day to break and then picks a few of them off. This is a questionable method, however, and hardly gives the bird a fair chance.

But calling with the "yelper" is the thrilling way to pull down a big gobbler and match the skill of the hunter against the rare cunning of the bird. It is in the mating season that turkeys—that is gobblers—do most of their yelping, and the man who would bag one must have a good caller and know just how to use it too. Calling turkeys was handed down from the Indians. They employed many methods. Most of them survive and a few good ones have been added.

A hollow cedar box, with resin rubbed on it, and the noise made by drawing a piece of shale or slate on the edge of the box, was and still is a successful method of calling. A short piece of cane tightly fitted into one a little larger is good. Callers can be made by inserting the smaller bone of the turkey wing into the larger one. A blade of grass or a leaf can be made to "talk" just like a turkey in the hands of an expert. Some callers use nothing artificial at all, but do the calling with their throats. Occasionally one hears of a live gobbler from the barnyard being used for a decoy in the gobbling season. An old turkey hunter in a Southern State had a famous live decoy by means of which he had killed many a fine gobbler. He would carry the big fellow to the woods in a sack, tie him out to a bush, and then make him gobble. Time and again wild gobblers would slip up to "trim" the intruder, only to get a place in the sack as their reward.

But one day the hunter, it is told, did not get there soon enough. "Old Pete," the live decoy, was tied out as usual. He gobbled vaingloriously and in a jiffy there was a flopping and rustling of wings. The hunter sped to the scene of the fight as swiftly as possible, but with all his speed was too late. The wild turkey had put out both of Pete's eyes and then made off like lightning at the first glimpse of the hunter. Old Pete was wrecked and ruined and he soon died.

Extreme caution and rare skill must be employed in calling up a turkey. The caller must be an expert. The wild turkey is not only wary, but is very intelligent. He can detect a single false and unnatural note, and on hearing it he will race off as fast as he can. The caller must remain absolutely motionless after a turkey comes in sight. The slightest movement can be detected by the sharp eyes of the bird. Again, it is important to keep still because there is no telling on which side of the caller the bird may appear. The sly old fellow may answer on one side of a hunter and then circle him and slip around behind.

The three senses of sight, hearing and smelling are acutely developed in a turkey. Not only this, but the bird flies swiftly and can outrun the average dog. A wounded turkey—and the hardy bird can stand a lot of shooting—will run for miles and miles. If the shot is a close one, best results are obtained by shooting the bird in its long neck. No. 4's in the body, with plenty of powder behind them, will do the work well. Some turkey hunters use small buckshot altogether. An old hunter in West Tennessee employed a peculiar method of shooting buckshot at turkey and deer from a full choked gun. It was a No. 10 gauge, with a 32-inch barrel. The old man would split his buckshot as though he would use them for fishing, and then string them on a piece of flax or silk, each one-half an inch apart. After putting them in the shell, he would pour melted tallow until it filled the shell. With five drams of black powder behind this charge of "chain buckshot" all of them would find lodgment in a spot one's hat might cover, and deep lodgment, too.

Every turkey hunter will declare that the most beautiful picture in Nature is furnished by a great bronze gobbler strutting in a clearing in the woods, the sun revealing the green and purplish tints of the handsome plumage, and reflecting their copper and bronze. In calling a gobbler a favorite plan is to beat in the leaves with a hat or a cap, while yelping. The gobbler thinks a rival is there strutting or that a fight is on. In the first event, he comes to make fight; in the latter, to take a hand in the battle of the forest.

Many a turkey-caller has had the experience of a bird slipping right up to him ere aware of his presence. One turkey hunter sat and watched a spot where some turkeys had been eating corn. As he kept vigil a turkey clipped by and was swallowing the corn without the hunter ever having seen the bird get there. This shows how silent and stealthy is a wild turkey. The birds have a wide range and one never knows just where he will run up on them, so he must be ready. In the summer and fall they go in droves. In late winter the gobblers sometimes go together. An expert can scatter a drove and frequently call up eight or ten and kill them.

A fact not generally known about turkeys is that the wild ones can swim. The birds never take to water unless crippled, but a wounded one will swim a small river, a creek or a bayou to escape capture. One hunter relates an instance of a gobbler's swimming down a stream for a quarter of a mile. The bird was wounded and the hunter chased it to the stream. He ran along the bank thinking the turkey would land each moment, but to no avail.

Wild turkeys are trimmer and more racy in build than their domestic cousins, but some of them grow to a great size. Gobblers have been killed weighing 26½ pounds.

Many amusing stories are related of turkey hunting. A certain Mississippi planter was very fond of turkey hunting. His boy was too, far better than he knew. One day the old gentleman took his gun and yelper and slipped out down the river. As soon as he was well lost to view in the woods the boy concluded he would try his luck too. He got his gun and yelper and went down the opposite side of the river. Presently the old gentleman began calling. Then came an answering call across the stream. His hopes were high. Turkey meat was in sight. Again he yelped. Again came the answer. The dialogue in turkey talk continued on down stream for some distance, when finally a form arose from the undergrowth across the stream and a voice said: "Dad, ain't it about time I was flyin' over?" "Was that you, sir, you little devil?" roared the outraged old man. "I've a great mind to shoot you, anyhow."

WITHHOLD WINNERS FROM INFERIOR DOGS.

The following pertinent criticism by "Fox Hills" in the New York Herald hits the situation on the Coast circuit right in the bull's eye. When it is taken into consideration that some of our Coast shows in and around the bay counties zone, have had as many as two and three hundred one dog classes the writer has taken the correct view of the matter.

"Should a judge withhold the ribbon in the winners' class, when it is his opinion that the dog which would receive it does not sufficiently meet the requirements of the standard? Since ribbon shows became a vogue it seems to have become an accepted practice to give first in winners' classes, irrespective of the palpable demerits of the aspirants. This abuse of the principle upon which the winners' class is based has grown out of the feeling that it was only a 'ribbon' which was being handed out, and therefore it would be a distinctly ungenerous act to withhold such a trumpery token. Such a sentiment might be indorsed were the winners' class an unrestricted competition, obligatory upon a bench show committee as to the efficacy of recognizing it or not; also if the 'winners' class carried with it an entrance fee.

As it stands, however, the 'winner's' class is obligatory whenever it is included in a show's classification, and no entrance fee can be charged. More than this, the 'winner's' class is the only medium by which a dog can become a champion. It is this which makes the award in a 'winner's' class an all important factor at all shows, and it is this which our all too generous judges overlook when they distribute 'winner's' ribbons.

It is in this lack of discrimination that ribbon shows have been responsible for many undesirable features in connection with dog shows, but the laxity of judges in adorning commonplace specimens with 'winner's' ribbons, has borne and is still bearing most unhealthy fruit.

This fact has seriously affected the American Kennel Club, insomuch that it has tainted the title of championship to such an extent that it has become a by-word.

Yet if any one were to ask our present day all-round judges, after they had finished their classes at a show, if ninety per cent of the specimens they had decorated with 'winner's' ribbons were worthy of the A. K. C.'s title of champion, they would deride the idea.

Ask them why they did not withhold such ribbons and they will reply, "One must not take these ribbon shows too seriously, you know,' and they will add, 'they are more in the light of tuning-up the novice for greater things.' Yet these shows are treated as seriously by the A. K. C. as are the Westminster K. C. and the Boston shows. They also contribute 'pro rata' as much toward what should be regarded as an honor and a distinction—an A. K. C. championship.

When ribbon shows were first introduced, the writer regarded them as a stepping stone toward bigger things, and in that light beneficial to the doggy fraternity. So, for a time, the writer was as generous in his ribbon distributions as are the most lavish judges of today.

It is some seven years ago, however, that the writer, after judging his classes, was taking a look around. An exhibitor, wreathed in smiles, said, 'I'm so glad you gave my dog winners. He only needed the points to make him a champion.' There stood the dog on his perch, wagging his tail, a plain second rate specimen, henceforth to be paraded as a champion, a living testimony and rebuke to my reputation as a judge. I, who considered this dog only worthy of 'three letters' in average company, had not only contributed but put the final touches in the machinery which gave him a rank equal to that of the greatest of his breed.

'Horrors!' To how many more ordinary creatures have I committed myself?' As I thought this over in the train the number staggered me and I felt, by way of atonement, I should go to the American Kennel Club and say: 'Please give me several good kicks.'

From that day the writer became convinced that it is every judge's duty not to award a 'winner's' unless, in his estimation, a dog is worthy to be accepted as a real champion of his breed, only qualified according to the standard of merit prevailing in the territories where the A. K. C. differentiates in its scale of points.

If our present day judges consider that for every 'winner's' award they make they are committing themselves to the acknowledgment that a dog is of championship merit they will perhaps realize the serious obligations entailed. Also that distinctive honors, such as 'first winners,' have a bearinng on the future of a breed. This, surely, should be of far more consideration than the desire not to give offense by to an exhibitor. In truth, the latter is a false sentiment and calculated to do more harm than good. This is shown by the number of exhibitors who are content to go on winning with moderate specimens, because as long as these commonplace animals win there is no incentive to own better. The real harm, however, lies in the fact that this class of exhibitor breeds from the poor stock and so perpetuates it.

Not so long ago, a judge of a breed separated by varieties and therefore rich in winners' classes, had the courage to take the bull by the horns and withhold the ribbons in a big percentage of winners' classes. Such drastic measures, in these days when

scores are tumbling over one another for the privilege of seeing their names in the list of judges and would never dream of such an 'unfriendly' act, brought forth a storm of protests; this despite the fact that the judge was justified. The breed long has been in a decadent stage, and one of the contributors to this condition has been the recognition of unworthy specimens in the winners' classes. If other judges only will display the same backbone and so discourage, not encourage, exhibitors to parade in public specimens whose questionable beauty had best be left to the seclusion of private life, exhibitors of such specimens might be imbued with a desire to get simething approaching the semblance of a champion."

EXPOSITION DOG SHOW.

One of the largest dog shows held in this city for years past will take place November 29 to December 1 at the Exposition. The show will be staged in the old Vienna Cafe building on the Zone, under the auspices of the Exposition Department of Live Stock.

Dog fanciers from all sections of the State and Coast as well as from many parts of the United States have entered choice specimens of various breeds.

Entries closed November 13 with about 350 dogs and the mail entries to come. The Exposition has appropriated $5,000 for cash prizes. In addition the National Dog Breeders' Association has offered $500 in prizes (for members only).

Mrs. Anita M. Baldwin, of Los Angeles, has reserved a large space for her dogs. Mrs. Baldwin will bring a special car filled with decorations for her exhibit. One of her special features is a completely furnished dog-house, containing beds and separate rooms for all of her dogs.

Coincidently with the dog show, a cat show will be held in the Marine Cafe building on the Zone, and a pet stock show in the New England Cafe building, also on the Zone.

There is no entry fee, but a nominal charge will be made to cover cost of benching, showing, feeding and returning the cats to express company.

The dog judges will be W. M. Coats, of Vancouver, B. C., for terriers, and Joseph W. Burrells, of Broomall, Pa., for all other breeds. Mrs. Helen Brayton, of Brighton, Mass., will judge cats and Charles S. Gibson, Detroit, Mich., pet stock.

CALIFORNIA LEADS IN BIRD LIFE.

Director Joseph Grinnell of the University of California Museum of Vertebrate Zoology reports that there are already more different species of birds in California than in any other State in the Union, and more kinds coming all the time. Convincing proof has been found of the great intelligence of birds.

This is no mere question of size. The vast State of Texas is two-thirds as large again as California, but it has nowhere nearly as many kinds of birds, though it does come second.

What's more, the 541 species of birds already living here are not going to be permitted to enjoy a monopoly. Every kind of bird in the country is trying to move to California. There are fifty more known species of birds in California today than thirteen years ago.

A large share of these additions are unquestionably newcomers. One such "straggler," as the bird-men call such cases of a pioneer seeking to lead the way for his tribe into a new land, was a Mother Cary's chicken (a Wilson stormy petrel), which has no business away from the Atlantic ocean, but which was captured off Monterey.

Another venturesome explorer was an Anhinga, or water turkey, which belongs in Florida and the Mexican tropics, but which joined the rush of new settlers in the Imperial valley. The Tennessee warbler and the Louisiana water thrush both grew restless in their Southern homes and made their way to California, one being found at Pasadena and the other at Mecca, on the Colorado desert.

Sooner or later, predicts Professor Grinnell, practically every species known in North America will be found occurring, at one time or another, in California.

The great advance made in recent years in knowledge of California birds is indicated by the fact that Professor Grinnell's new 217-page book, "A Distributional List of the Birds of California," just published by the Cooper Ornithological Club as a contribution from the California Museum of Vertebrate Zoology, lists 541 species of birds as now known in California, as compared with the 353 species catalogued in 1868 by the pioneer ornithologist, Dr. G. G. Cooper, of the Geological Survey, the 445 species catalogued in 1892, the 491 known in 1902, and the total of 530 listed in 1912. Widespread search and the gathering and careful study of great series of museum specimens, through generous provision made by Miss Annie M. Alexander for the maintenance of the California Museum of Vertebrate Zoology, are responsible for this increase, as well as the constant new immigration of birds.

Professor Grinnell reports that of the 541 species of which he tells the local status, 168 are water birds, 373 land birds, and 108 game birds. Among these are six species of hummingbirds and 23 species of hawks. While the prolific sparrow is represented by 96 species, there are only 19 different kinds of owls in California.

BEFORE THE MUIR TRAIL.

[Concluded from last week.]

There was a curious relief in climbing down the talus without the intellectual burden of trying to think with a mule's mind. A man can go anywhere, and can go most easily over precisely the sort of huge rock chaos which is impassable to an animal. Going up, we had had to test each step upon the assumption that we were mules, but coming down we had the easier task of being men, so we scrambled down whichever way was shortest, regardless of the trail monument we had made going up.

The World in the Making.—On both Muir and Observation passes the geological structure was extremely interesting . Muir pass is evidently located at the immediate fault line between the granite and the metamorphic rock, and at its immediate head is a huge mountain, mingled like an enormous marble cake of both rocks. Evidently in the primitive ages great masses of the two sorts of rocks were thrown into the fault between them and were then afterward re-cemented and upheaved into one homogeneous structure, which the glaciers later carved as if it were a single rock. I do not remember any other peak in which the entire history of the Sierras is so plainly recorded on its surface. On Observation pass we noted, better than anywhere else, all the various stages in the formation of rock talus. "Talus," it will be remembered, is a pile of broken rock which has fallen off the present cliffs, while a "moraine" is a pile of worn rock deposited by a glacier. At the top of Observation pass we found the rocks deeply cracked with the glaciel polish on the top. Just below would be similar rocks with the corresponding cleavage facing each other, but more widely separated, and the original glacier polish still on the upper side. Below that, the rocks were heaped without form or order in inconceivable chaos.

These records of the history of the mountains are among the chief attractions of a mountain trip. It is in the mountains, especially in the very high mountains, that the process of world-making is still going on, with all its steps and stages visibly recorded. In the valleys, the history of the world must be guessed by remote inference, and in the lower mountains its marks are largely covered with soil and vegetation, and therefore require some attention and training to read. But in the highest mountains nothing is ever obliterated. The original formation of the rocks in the primitive ages; their upheavals, contortions and metamorphoses; the extrusions of ancient asphalt and modern lava; the giant canyon-carvings of the glaciers, and the polish and the scratches in which the glacier has written its autograph on its work—all these things make of the mountain not so much a fixed, dead fact as an almost living creature with its life history plainly recorded for anyone to read. Even the loose stones scattered about were all placed there by some natural force, and by their shape and distribution, whether in piles or rock slides, in lateral or terminal moraines, or in the beds of water-worn ravines, they have all their story to tell. In the mountains a stone is not a stone. It is a landmark in the history of the world, and that whole history, in its largest and smallest aspects, from the first solidification of the molten rock to the final formation of soil and the growth of vegetation, lies unrolled and visible before the eye.

The Bishop Trail.—Observation pass being out of the question, the next proposal was to go out of Grouse valley, over its only trail up Dusy creek, over Bishop pass into the Mono country, and from there down the desert to Kearsarge pass and back over Kings river canyon. On examination of the geological survey map, however, we discovered that the Bishop trail went at least twenty miles northward from where we were before any route southward opened from it, and that the proposed route would then involve several days, hot tramping across the desert before reaching the foot of Kearsarge pass. The younger members of the party objected to the hot desert, and the time necessary was beyond that at the disposal of the older members, who had already made engagements in the outside world, so it became necessary to change our plan entirely. We then vividly realized that we were in a place so secluded that the shortest way into the outside world involved a six days' walk, with no method of transportation faster than a walk, in existence. So we changed our plans, went out toward the Mono country, over the Bishop pass, down to a point on the other side, where a trail back over the Piute pass could be reached. We then came directly across the entire range of the Sierras from the Great Basin on the other side to Hunting Lodge on this side, and found the trip so interesting that all of us were really glad that we had made the detour, which we otherwise would not have been likely to take. The omitted part of the trip as originally planned we had all already seen, while the slope down into the desert across the mountain crest is not often visited from this side. We went, to be sure, down only to the 8,000-foot level before turning back, but even in those high altitudes the vegetation and the structure of the desert penetrate. For the gray granite and the red and black slate of the Sierras are now substituted the parti colored rock of the volcanic region beyond. Going down the Bishop trail there was a great slope of red, purple, chocolate brown, yellow, green, black and brilliant white rock, all arranged in huge and picturesque masses. If some futurist painter were to represent this mountain exactly as it is, his painting would be rejected by any hanging committee as impossible and unreal. Over the slope we were for two days in a new and different world. But interesting as the experience was, it was like a return home to find ourselves the following day once more amid the tamaracks, granite cliffs and rushing waters of the high Sierras.

The Only Tragedy.—On the return trip occurred our only tragedy. Just over the Piute pass "Old Blue," the bell horse, died. He was apparently well enough the night before, but in the morning we found him lying in the meadow, dead. Old mountaineers whom we met the next day diagnosed it as a case of wild hemlock, a wild mountain weed which they say kills horses. Let us hope so, for then "Old Blue" will have died the death of Socrates. His flesh is already the food of the mountain creatures, and his bones will bleach in the rains and snows of one of the most beautiful spots in the world. What better end could a bell-horse wish?

Plunge to Civilization.—Coming out after a month in the wilderness, the first plunge into civilization is always a curious experience and ours was particularly sudden. Our first civilization was at Huntington Lodge, which is situated at the last extremity of the last wagon road on this side, and has nothing but wilderness beyond, on the side from which we came. Within three miles of civilization we lost our trail for the first time, and got down nearly to Shaver before discovering our mistake. The forest service signs on the trails back of Huntington Lodge are not yet in place, and the country is overrun with cattle in a way that makes it exceedingly difficult to find one's way without these signs. However, with a few extra miles walk we came suddenly on the hotel. At one moment we were mountain tramps, fitted to our environment and unconscious of the roughness and the grime by which we were a part of it. Crossing a threshold, the next moment we were in the midst of high civilization, with all its soft superfluities around us. Standards of cleanliness which would have been ludicrous an hour ago suddenly became imperative. The great boots, which we had unhesitatingly stood on our own table-cloth while eating that very morning, now seemed like the hoofs of a rough shod mule on the smooth floor. Shaggy whiskers which had been a matter of course a moment before, were now embarrassing, and our cleanest clothing, which we had put on that morning for the occasion, was spectacularly dirty.

There is nothing quite so startling as the unfamiliarity of the familiar. When one goes from civilization into the wilderness, the unfamiliarity of the new environment seems natural enough. But when one makes the return plunge, there is a period of confusion in readjusting one's self to the use of familiar things, now grown strange. Even the people seemed strangely pale and soft, though they themselves felt that they were sunburned and rugged. The first civilization meal, served at a table, with chairs to sit on, was almost a sensation, and the first night in bed was a task. We had been sleeping ten hours a night when the cook's yell awakened us in the morning for breakfast. Probably not one of us succeeded in sleeping as much as six hours the first night in bed, and we were almost tempted to resort to the old soldier's device of rolling up in a blanket and sleeping on the floor. When we closed our eyes there was a strange softness which seemed like floating; when we opened them, instead of the pines and the cliffs and the stars, there was a flat wall and a prosaic dresser, and in place of the music of moving waters, there was someone somewhere grinding lame ragtime out of a crippled piano player.

Call of the Wild.—The trip which we had finished is destined to be the best known, as it is the finest high mountain trip in America. We had gone down the crest of the southern Sierras, over their most scenic portion. He had traced Tuolumne river up to one of its sources; passed above all the sources of the Merced; traced to their sources two each of the three forks of the San Joaquin and the Kings, and of several of their tributaries, and had passed above the sources of the remaining forks, thus being at or above the sources of the entire river system of central California. We had personally had a magnificent outing. For a whole month we had not known whether the Germans had taken Paris or the Russians had taken Berlin. We did not know whether the United States was at peace or at war with the world. We had not seen a house, a road, or an inhabitant, and had met only a few scattered mountaineers traveling like ourselves. It had been a month in the absolute wilderness, so separated from all the ordinary concerns of life that the outside world seemed distant by thousands of miles and many years, instead of a few days' ride and a few weeks' time. Physically, we were tougher than our own mules, and we were quite as devoid of nerves or of any interest except in the immediate problems of mountain life. Our minds, instead of active working tools, had become mere receptive, assimilative organs, storing up impressions for the future. We had seen one of the finest countries in the world, and had seen it under circumstances of isolation and the need of personal conquest which it will never show again. We had worked hard, lived rough, and were now quite as glad to return to civilization as we had been to escape from it.

Drink Jackson's Napa Soda.

GOSSIP FOR SPORTSMEN.

Beaver Increasing.—The beaver is increasing in California, according to Dr. H. C. Bryant, special assistant in publicity and research work of the State Fish and Game Commission. In the recent issue of the Commission's publication he says:

"The total protection given the golden beaver in 1911 seems to have allowed these animals to increase greatly. Near Mendota, Fresno county, there are now at least a dozen colonies. The largest colony is to be found on Belle Island just above the large dam constructed by the Miller & Lux Company. Here is to be found a beaver house 16 feet long, 10 feet wide and 6 feet high. This is inhabited by between thirty and forty individuals, according to a man who lived until recently within 25 feet of this house. Several smaller colonies are reported as existing on one of the Miller & Lux canals a short distance below the dam. There are also three or four colonies on the San Joaquin river some distance above the dam.

"According to all reports there were not more than two or three pairs of beavers in this vicinity five years ago when a close season was instituted. At the present time there are certainly over fifty individuals within a radius of five miles, and the mammals seem to be increasing rapidly.

"Reports from Eastern States show that wherever the beaver has been properly protected increase always follows. Apparently we are demonstrating the same thing here in California, and if the increase continues we can expect that this valuable fur bearing mammal will again become important commercially."

* * *

Eastern Striped Bass Protection.—At the recent meeting of the United Anglers' League in New York, its legislative committee was authorized to introduce at the next meeting of the State Legislature an amendment to the fish and game laws which will make the month from May 15 to June 15 a closed season on striped bass, prohibit the taking of any bass less than 12 inches in length at any time, and prohibit the netting of striped bass in the Hudson river at any time of the year. At present there is no closed season, and the limit of length of bass which may be caught is fixed at 10 inches.

The proposition to prohibit netting of striped bass in the Hudson looks like a joke on the face of it. There have been no such bass worth while caught in the Hudson for years either with the hook or the net, so completely is the river exhausted of these splendid game fish. But the members of the league desire to get such a prohibition on the books as an entering wedge to other legislation which may follow in later years as to other rivers and which may help to preserve this rapidly disappearing fish. They anticipate a hard fight from the baymen, of course, as even the proposed change of a closed season of a single month would restrict the activities of these fishermen, even though it would give the fish a chance in their spawning season, and ultimately result in benefit to the commercial fisherman as well as the angler who looks only to the sporting side of fishing.

* * *

Nesting Colony of American Egrets.—Reports during the last few years have established the fact that the American egret (Herodius egretta) has been slowly increasing since protection was given it several years ago in this State. Some definite information regarding a nesting colony located near Crows Landing, Stanislaus county, is here given:

"During the last part of July J. E. Newsome located a nesting colony of egrets and great blue herons. The place was visited on August 3. During the three hours spent in the vicinity about a dozen egrets were seen. Six were frightened away on our arrival. It was immediately evident that we were too late to take a census of the breeding birds, for the young had already flown. P. F. Crow, on whose ranch the birds had nested, estimated the number this year at from fifty to seventy-five. A much larger number, he said, nested in the same vicinity two years ago.

Nests were placed in the tops of large oak trees which grew along a small creek. Nests of the great blue heron, two of which still contained young, could be distinguished from those of the egret by their larger size. On the ground beneath the trees three small, downy egrets and one of larger size, which had evidently tumbled out of the nests, were found. Although people living in the vicinity had picked up most of the molted aigrettes, yet we were able to find over fifteen. A colony of black crowned night herons was located in some nearby oak trees, but no nests were located close to those of the egrets.

That certain people are still willing to kill white herons in order to secure the plumes, was evidenced by two birds which had evidently been shot and their plumes removed."

Sacramento Valley Notes.—"Not for five years," declare Sacramento hunters who were afield Sunday, "has the quail shooting been so good as it was this week." Upland sportsmen agree that they found birds everywhere and it was no trouble to get the limit in almost any of the foothill districts. The reason for the activity of the feathered skyrockets is attributed to the rain last week, which caused them to move about more freely. Further, the moisture causes the scent to lie better so that the dogs can pick it up more readily than was the case during the drouth. Also the dampness softens the leaves and vegetation so that the progress of the hunter is not quite so noisy as formerly.

From the duck grounds also came reports of good hunting, although the sport was limited to the areas of the preserves, there being no water elsewhere in which the waterfowl may congregate. All of the Butte slough gunners Sunday returned with the limit. They reported that the waterfowl were arriving from the north in countless thousands, due to the recent cold weather, and that with a little more rain there will be shooting for everyone.

Strange to report, most of the northern arrivals are geese and mallards. This is somewhat out of the ordinary, as the geese usually are early arrivals, while the mallards are the last of the ducks to leave the feeding grounds of the far north. In the Alaska marshes where they breed the sprig starts south first, followed by the widgeon. The teal remains a little longer, while the mallard stays on after freezing weather. This year, however, the green heads are leading the procession, at least to California grounds.

* * *

Swamp Land Claimants.—The hostilities between the Wild Goose Gun Club and the Last Chance Gun Club will for the time being be confined to proceedings within the court.

Five of the Last Chancers visited their club grounds last Sunday. They met and talked with President J. H. Inmann of the Wild Goose Club. Inmann stated that Wild Goose members had no ill feeling toward the members of the Last Chance Club.

The Wild Goosers, of course, want the land that the Last Chance Gun Club now has and probably will put up a fight for it if they can find any method for attack in the courts.

* * *

A Big Salmon.—Floyd Smith holds the record for the heaviest salmon taken from the Sacramento river this season, having caught a 65-pounder Sunday, states the Chico Record.

* * *

Ducks Plentiful.—One of the best duck shoots on the Suisun marsh for many years past was enjoyed last Sunday. Everybody out, who could point a gun properly, had no difficulty in getting limit bags. Northern sprig and mallard with a sprinkling of teal, widgeon and canvasback, kept the trigger-pullers busy during the morning flight.

* * *

Rice Diet For Wildfowl.—Just how the ducks manage to get full craws of rice is a bit of a puzzle to some observers. The rice heads are too high from the surface of the water for the birds to pick the kernels off when it is growing and it is unheard of, if not an impossible trick, for wild ducks to feed while on the wing. The birds just wait until the crop is harvested and then glean the rice stubble-fields. Simple enough—and that without damage to the crop.

HOW TO RAISE WILD DUCKS ON THE FARM.

"Why not grow wild birds on the farm, both for pleasure and for profit?" inquires Fred L. Holmes in Country Gentleman, and proceeds to give a few hints, thusly:

"Prof. J. C. Halpin, of the Wisconsin Experiment Station, has demonstrated that the wild mallard is readily domesticated and may easily be raised by farmers who have small ponds or streams. Professor Halpin started about five years ago with a single pair. Although he sold many last year, he now has a flock of more than 200. The bird propagates so rapidly—from thirty to forty eggs a season—and shows the inherent ability to shift for itself at so early an age that the plan has evidences of being a good commercial proposition.

Naturally the first question asked is how these birds may be kept in captivity. The original stock was bagged by hunters. When turned over to Professor Halpin he clipped one wing of each bird to the first joint. The following spring the thirty-odd eggs laid were divided between the incubator and the mother. The little ones became so domesticated from handling after hatching that they were even greater pets than the domesticated ducks on the farm. Their rapid increase in numbers has not changed this condition.

It is a sight worth seeing to behold these 200 mallards start on their exercise flights about four o'clock in the morning and just before sundown, sometimes in groups, then in an unbroken straight line. At times during the day they may take a spin, but when the weather is hot they prefer to lie in some shady place and quack family gossip. Sometimes they will go miles away or alight in pastures long distances from the yards that have been fenced off for them. A word to the farm dog with whom they have been raised and he is after them. As if they understood the message they rise and circle to the yards.

Occasionally one or more pairs of these mallards may leave, but this happens too seldom to be considered of importance. On the leg of each duck, a few weeks after hatching, is placed a registration seal. This gives an opportunity to keep an exact record of each bird as to laying and breeding qualities.

Not unlike guineas, these domesticated mallards retain many of the instincts peculiar to their wild nature. When mother and baby ducks are out in the field, let a strange object approach and with one quack the little brown birds hide in the grass close to the earth. Moreover, these wild ducks are habitual imitators. Let one mallard start limping and in ten minutes, unless there is something to attract attention elsewhere, a majority will be limping. A strange noise, the appearance of the dog, and all of them will again be walking naturally.

Little feed is given these mallards because they fatten quickly and become logy. The 200 are given fourteen quarts of cracked grains each morning. Without any feeding, five mallards that were hatched on October 12, 1914, weighed three pounds apiece on Thanksgiving Day. At four to five pounds the birds give up their regular flights.

No special houses are demanded for them, even in winter. A shed is provided where they can get grain and drink, but during the daytime they sit on the snowbanks with their feet tucked in their feathers.

On the market these birds sell for twenty to twenty-five cents each more than the domestic ducks."

INDOOR LEAGUE MATCHES, 1915-16.

Arrangements are being made by the National Rifle Association for the indoor league matches to be shot by civilian, college, university, school and military school rifle clubs during the winter of 1915-16. Letters notifying the clubs that the matches will be shot, together with entry blanks and the conditions for the matches, have been sent to the secretaries of the clubs, and the N. R. A. is now making up the classes for the different leagues and preparing the targets for shipment to the clubs. After they have been shot on these targets will be returned to Washington where the scores will be determined and announcement made of the results each week.

Entries for the civilian inter-club gallery league matches will close December 1, as will also those for the Inter-collegiate matches. Entries for the Inter-high school matches and the Inter-military school matches clase December 11. Indications are that there will be a large entry in all of the matches, as for some weeks past a number of clubs have inquired as to the indoor matches. The conditions governing the college and school clubs will be the same as those of last year with the exception that the one and one-half inch sighting bulls-eye target will be used. The shooting will be done from the prone position in the college matches. For college teams the entry fee is $5 and for the school clubs it is $3. For the civilian club matches the entry fee will be $10 per team, one team to a club. There will be no change in the conditions of the match from last year. As many as ten men will shoot each week and the five highest scores will count for the record of the team. Each man will shoot 20 shots prone at 75 feet and any kind of a sight but telescopic can be used, placed on any part of the rifle. The offcial N. R. A. gallery target for 75 feet having 5 counting bulls of 2-inch diameter will be used. To certify to the scores the clubs have been invited to recommend a judge to supervise the shooting. It is hoped to have four leagues of 12 clubs each in this series of matches, the winning club in each league to receive medals. Clubs have been notified that the N. R. A. has no longer for sale the targets with the one bulls-eye at $2.50 per thousand, but the 5 bull targets can be purchased for practice at $3.50.

ARIZONA STATE SHOOT.

J. F. Dodds, of the Pastime Gun Club, San Diego, won high average at the annual shoot of the Arizona Sportsmen's Association, which closed Wednesday at the State Fair grounds, Phoenix, Ariz. Dodds scored 620 out of a possible 645. C. H. Nash of San Jose and H. P. Demund of Phoenix were tied for second place with 611 points.

Rem-UMC Notes.

H. J. Rebhausen won a two day shoot staged recently by the Buffalo Bill Gun Club, of North Platte, Nebr. Shooting Nitro Club shells, he scored 387 x 400.

Along comes Louisiana to add to the total of 19 out of 36 State Championships won by Red Ball shooters. J. E. Ribb of Shreveport, shooting Nitro Club shells, won this event with a score of 94x100. J. B. Tisdale and W. G. Wadley captured second and third, respectively, shooting the perfect shooting combination of Remington-UMC guns and ammunition. They scored 93x100 and 92x100.

R. A. Hall, besides tieing with W. D. Rumells for first place, at a shoot of the Ft. Royal (Va.) Gun Club, won the special event of 25 targets, defeating L. W. Puffenbarger, W. B. Anderson, and W. D. Rumells in the miss-and-out shot-off. All these shooters used Nitro Club shells. Hall, in extras and on all targets broke 185x188, making runs of 106 and 57.

At a two-day shoot held by the Paragould (Ark.) Gun Club, recently, H. N. Billinger, of Memphis, Tenn., shooting a Remington pump gun and Arrow shells scored 369x400, winning the high amateur average.

Seventy-five shooters faced the traps of the Chicago Gun Club July 25. E. H. Powell and R. C. Millen tied for first place in the Interurban League event, scoring 48x50. Both men shot Nitro Club shells, the former also shooting a Remington auto gun.

RECENT INNOVATIONS AT SUCCESSFUL FAIRS.

[Continued from page 8.]

enter a pig. Canned fruits, vegetables, and pickles are acceptable in the girls' canning club contest. A commendable 1915 feature was a plowing contest for boys in which a strip of ground 15 by 100 feet was plowed by each entrant. Walking and riding plows were allowed. To cap the climax, the Louisiana State Fair had a liberal classification for children's work in home economics, manual training, and agriculture.

The Mississippi-Alabama fair, held at Meridian, Miss., this year offered handsome prizes for exhibits by girls' canning clubs and tomato clubs. The germ of assistance to boys' corn club work was planted in an offer of large cash prizes to members of the Lauderdale county boys' corn club who exhibited 10-ear and 20-ear samples of corn. The Tri-State Fair at Memphis, Tenn., paid much attention this year to girls' canning club and boys' corn club work, and offered an excellent school exhibit classification. The same was true of the Tennessee State Fair. The Texas State Fair not only extended aid to boys' corn clubs but boys' peanut, cotton, milo, kafir, and feterita clubs. The baby beef show for children, in which children exhibited animals raised in the baby beef club work of Texas, necessitating feeding and care of stock all through the year, was a noted 1915 feature.

A new type of children's contest work that has sprung up in the middle west, and is spreading rapidly to all the fairs, is the boys' live stock judging school. At the Iowa, Illinois, Indiana, Kansas, and several other state fairs this year the boys' stock judging contests attracted wide attention. The contest at the Iowa fair was typical of them all. In it four scholarships to the Iowa Agricultural College, valued at $200, $150, $125, and $100, were awarded to the four best judges of cattle, swine, horses, and corn. The contest was open to any Iowa boy under 21 years of age. The contest in Kansas was similar, save that the age limit was placed at 25 years, and sheep were substituted for corn. The Illinois State Fair had a classification for cattle, sheep, swine, horses, and corn. There were three scholarships to the Illinois Agricultural College offered, valued at $200, $150, and $100. At the Indiana State Fair the age limit was placed at 16 to 20 years, and the judging of dairy cattle, beef cattle, horses, sheep, swine, white corn, yellow corn, and wheat was required. Four scholarships to the Purdue School of Agriculture, valued at $100, $75, $50, and $25, were offered.

Recognizing that there is no greater asset than a healthy, well-developed childhood, so far as the nation is concerned, and that it is just as necessary to rear good babies as good live stock, practically all the state fairs have introduced the baby show feature. At the Rochester Exposition, Rochester, N. Y., the number of babies examined this year reached 500. Most of the state fairs limit the entry to from 100 to 200 babies, because of the detailed work required in judging them. A feature of the Minnesota State Fair this year, declared by many to be the most interesting one on the grounds, was the physical examination of all babies in the open. A large glass cage in the center of the woman's building accommodated the judging, and there, during the entire week, a staff of nurses and physicians judged the 250 babies. Standing room about the three sides of the cage was at a premium during the entire week. The Iowa State Fair added an improvement show to its regular baby show this year, and it is said that many of the state fairs will adopt the plan next year. In the improvement show only babies that were entered in the 1914 state fair baby show were allowed to compete. Prizes were offered on the basis of improvement during the year. Most of the winners were babies that had scored comparatively low the year before.

The attention paid by all the state fairs to children's school work is a feature that is only a few years old, yet in this short time it has become one of the biggest attractions at many of the principal expositions. Typical of the growth of school exhibit work at the different fairs is that the Minnesota State Fair. Last year the number of entries was twice as large as in 1913, and this year individual entries approximated 5,000, which was twice as much as in 1914. Four distinct premium lists in this class of work are to be issued this year, and hundreds of schools are now at work upon the exhibits which will be made at the 1916 state fair.

When it is considered that practically all this progress has been achieved in the last five years, and that it is yet in its infancy, some conception of the advancement of the state fairs and expositions of America as educational institutions working the year around may be obtained. State fairs are showing that they merit as much state aid as the universities and colleges, the departments of agriculture and education, and other state departments. Furthermore they are getting financial assistance from the state, in most instances.—Ray P. Speer, in Breeders' Gazette.

WINNIPEG HORSEMEN LINE UP FOR 1916.

One of the very best "horse towns" in the west is the Canadian city of Winnipeg, its driving club being one of the largest in the country in point of membership, and its horsemen being sportsmen of a very high order. All horsemen, alas, are not sportsmen, but the Winnipeg bunch grades pretty high to the ton and have kept up their end of the game steadfastly throughout the period of depression that has existed since the Dominion became embroiled in the great battle for race supremacy which is being waged on European soil.

During the season of 1915 the club held twenty meetings, and as its members own and race half a hundred horses there were never less than twenty starters in the various events of each day's program. They race good horses, as the performance tables prove most emphatically. Their course is a halfmile affair, yet the one time around heat that took the cup for the fastest performance of the season was done in 1:02. Pacers went the two rounds in 2:10¼, trotters in 2:14, with halfmile heats in 1:04, while three-year-olds did the trick in 2:21. Winnipeg horsemen not only race at home and throughout Canada, but cross over to take in the major circuits of this country as well. They are represented annually on our tracks by good horses, pleasant owners and capable reinsmen, the exposition meetings having attracted the presence and participation of such welcome visitors as E. J. Rochon, M. Savage, Joe Carson, Will Fleming and Barney Barnes, the horses brought over and raced by these gentlemen giving good accounts of themselves in select company.

Undaunted by adverse conditions the Winnipeg organization is laying plans for an aggressive campaign during the winter and the ensuing season, the following excerpt from a recent story in the Telegram, of that city, giving an excellent idea of the hold the trotter has upon the affections of our Canadian cousins:

The annual meeting of the Winnipeg Driving Association was held last evening in the offices of Wallace & Aikins, and the quarters were filled to overflowing. It was an assembly of enthusiastic sportsmen, all proud of the successful year of the association and awaiting with patience the opening of the ice racing season when they can again look forward to the Saturday afternoon speed trials at their River park plant which will be especially prepared for the winter contests. The track will be flooded as soon as the ice-making weather arrives, and the stables will be arranged to provide all the comforts for the horses and their followers that have characterized the racing over the turf.

Dr. Orr Graham, the president, occupied the chair, and was surrounded by all the executive officers. With the summer season over there was but little routine work, the chief matter of the closing term being the final statements of the year which the treasurer, H. A. Argue, has been working overtime on for the last week in order to submit a complete report at the final meeting. The report had been signed by the auditors of the association and Mr. Argue was energetically applauded on the performance of his final obligation of the 1915 racing season of the association.

Fred Haight, the popular and untiring secretary, who has so ably filled this important office, was given much credit by the treasurer in reply to a vote of thanks, the combination working so harmoniously that what might have been complicating and burdensome was alleviated by the co-operation.

Business over, the president announced that nominations for all the executive and honorary offices of the club were now in order, and in doing so, referred to the pleasure and honor he had enjoyed while holding the premier office of such a mammoth sporting organization. Dr. Graham then called for nominations for honorary president, and H. A. Dangerfield proposed the name of A. A. Gilroy, and when the name of the first president of the Winnipeg Driving Club was announced, the reception was so unanimous that no other proposals were asked for. Mr. Dangerfield referred in feeling terms to the interest of Mr. Gilroy in the association and his regret that health would not permit further participation was shared by all.

The next office nominations were called for was that of president, and A. Stewart nominated George Ford, who during the past year had so capably filled the office of vice-president. The members were surprised to learn from Mr. Ford when he arose that he was about to leave Winnipeg, and while he regretted that he must decline the honor he did so feeling it was in the best interests of the club, as the presence of the president was essential on all occasions. Mr. Ford suggested Rupert S. Hamilton as eminently fitted for the post, and as there were no other nominations the new president was loudly applauded as he relieved Dr. Graham of his obligations. Mr. Hamilton modestly replied to the kind remarks of the past president, stating as he did that in the position of president of the Winnipeg Driving Club he felt that he occupied the premier office of the greatest sporting organization in western Canada.

T. R. Edwards was elected to the vice-presidency of the association without a dissenting voice and spoke at length on the pleasure of participating in the sport of the club.

The names of H. A. Argue, treasurer, and Fred Haight, secretary, practically went before the meeting together. These two offices are inseparable and they have been filled by Messrs. Argue and Haight to such satisfaction that they were both nominated and elected before they had an opportunity to refuse.

The veteran starter, "Dick" Roche, was again appointed official starter, and will be assisted by George Ford, while the latter is in the city. The chairman paid a glowing tribute to the long services of Mr. Roche in the most difficult position in the club. An executive was appointed, consisting of E. N. Perry, D. C. Halliday, H. A. Dangerfield, R. Vincent, Dr. Graham, D. J. McDonald, A. F. Pigott, C. Wright, R. W. Sutherland, A. Gunn and R. Roche. The classifying committee will be Messrs. Graham, Roche, Sutherland, Halladay and Stewart, of which A. Stewart will be chairman. The timers for the year will be J. W. Harris, Fred Johnston, A. Stewart and D. C. Halladay, and the judges, J. Corwin, Dr. Graham, W. D. Mace and D. Gunn.

Following the election of officers, considerable business was transacted by the new executive, and with the ice racing season not far distant a glance forward revealed a field for operations. They were not long in getting into the harness and a motion was put through to accept the proposition of the Electric Street Railway and take over the entire park enclosure next year. A ticket selling campaign was also organized for the ice racing season, and a meeting of progress in this connection will be held next Tuesday evening in the Builders' Exchange. Sam Finklestein, always willing to serve the club, was appointed track manager for the year, and a representative of an outside athletic association was also entertained regarding leasing the infield of the track.

E. N. Perry, one of the most optimistic members of the executive, advanced some brilliant ideas for the purchasing of a site for the association on the sale of stock to the members, and being in the financial and realty business he was assigned to appoint a committee to go into the matter and report later.

PLEASANTON FUTURITIES NEXT SATURDAY.

While a few horsemen present at the P.-P. I. E. meeting shipped on to Phoenix to participate in the Arizona State Fair and a still greater number made the direct trip to home and winter quarters, the owners of baby trotters and pacers sent their youngsters to Pleasanton, where the final curtain will be rung down next Saturday after the staging of the Pleasanton futurities.

Colt races came rather thick and fast at the meeting here, and the rest and change to Pleasanton was welcomed by owners, trainers, and, no doubt, by the colts themselves. The weather there is much pleasanter, the stabling accommodations more convenient and comfortable, and the footing eminently more suitable for baby racers' feet and muscles. Also, unless something has gone radically wrong, Superintendent Charley DeRyder has a bit of green stuff of some sort for them to nibble at occasionally, so that they find it much better all around.

Owing to the lateness of the date and the lack of any "fair" attractions, no effort will be made to race other than the colt stakes next Saturday, Nov. 27, but these are ample for a program of an afternoon of real sport. There are four events in all, a trot and a pace for both two- and three-year-olds, so there will be plenty of entertainment for those in attendance. There is ample and convenient train service from bay points and quite a number of horse lovers will make the round trip to the MacKenzie plant for the day. Given good weather the winners should make a reduction in records gained over the exposition course, and the change may also cause a reversal of form that will bring out some new summary headers.

Drink Jackson's Napa Soda.

THE FARM

HEREFORDS THE UTILITY BREED

An example of the prepotency of the Hereford, and not an exceptional one by any means, is related by W. E. Campbell, one of the pioneer cattlemen of Kansas. He says:

"One of my first Hereford purchases was the bull Prince Royal 1794. I used him on a herd of grade cows, and six little $12 southern Texas cows whose colors represented every hue of the rainbow. None of these Texac cows exceeded 700 pounds in weight. The following spring I had a magnificent group of whitefaced calves, to which the six little Texans contributed five steers and one heifer. From these I selected the heifer and three steers to feed for exhibition. Unfortunately an accident caused the death of the best steer.

"These half breeds were quite successfully shown as yearlings in company with my pure bred Herefords at the leading western fairs and afterwards at the Chicago fat stock show, where they attracted much attention and were greatly admired. Although there were no classes for such an exhibit they were highly complimented by the judges and managers of that great show. The heifer was christened Texas Jane, and the steers Texas Bill and Texas Jack in honor of their maternal ancestry. Texas Jane tipped the beam at 1260 pounds in her yearling form and was sold to A. A. Crane & Son for $150. These gentlemen kept this heifer on exhibition at the Kansas City stock yards for three years and she did much in calling the attention of ranchmen to the Herefords as superior range animals. Texas Bill weighed 1682 pounds in his two year old form and was sold on a special order at 8c per pound to be served on the banquet table at the ice carnival of the twin cities—Minneapolis and St. Paul.

"Texas Jack weighed 1920 pounds as a three year old, when he was exhibited at the Kansas City fat stock show in competition with all breeds open to the world. The class was not only large but of unusual merit. It contained not only phenomenal steers from Kentucky, Illinois, Missouri and other states that had never met defeat in the show ring, but there was also one imported from Scotland that had but a few weeks previous been awarded champion honors over all breeds at the New Orleans exposition. But when put to the severest of all tests, on the butcher's block, all went down in defeat before my half Hereford, half Texan, range bred steer Texas Jack, which was declared the winner and the champion bullock. He was sold for 10c per pound live weight or $192, and his choice cuts were retailed as premium beef in Kansas City at 50c per pound."

The experience of range cattlemen has been that the Hereford is the only beef breed that can be used continuously in a grade herd without eventual deterioration in size, quality and constitution. Experience has demonstrated that with other breeds the point is reached where fresh blood of the same breed is frequently introduced into the herd when improvement ceases and a decline begins, and the introduction of alien blood is necessary to check the tendency to retrogression. That Hereford blood can be used continuously in the same herd and the improvement of that herd continued, always providing fresh and vigorous pure blood Hereford sires are employed, is due t othe great vitality of the breed, the vigor of constitution implanted in it at its inception and carefully developed and preserved through successive generations. McConnell & Wood, extensive cattle growers in Australia, wrote in 1885:

"We have had a great opportunity of observing the development of the Hereford cross. In years past we owned a very well bred herd of Shorthorn cattle, the direct descendants of imported stock. They were very superior cattle, of splendid quality, rich color, with big bodies on short legs. In a few years the constitution gave way, the cattle became sickly, light in the forerib, narrow and persistently lighter in color, and this came about in spite of the spaying, culling, changing the bulls often and taking care to get pure bulls. In 1872 it was decided that Hereford bulls should be introduced altogether and the breed adhered to. This momentous resolve has been more than satisfactory. We now own about 7,000 head of well bred cattle with capital constitution and handsome appearance.

"We hand wean a greater per cent than of old, the cattle are quieter and we can keep a greater number on our freehold. It has been very interesting to notice the steady improvement of the herd as each successive draft of pure sires has been introduced. At the second cross a good number of the females were ill-shaped, of a bad color and of a generally nondescript appearance. The pure bull corrected all that and now we have reached a stage in which 80 per cent of the calves are properly marked with the characteristic colors and appearance of Hereford cattle. The cattle are vigorous, hardy and fat from the start, and we are confident there is no breed like them for making, entirely on grass, prime bullocks at three and a half years old, weighing 750 pounds dressed weight, and to this we add there is no breed like them for acommodating themselves to the changes and chances that grazing cattle are exposed to in this capricious and uncertain and often rainless Australian climate."

Discussing the prospects for British live stock in Brazil, the Journal of the Board of Agriculture, England, says: "Among numerous Shorthorn bulls imported, a few, which have been able to resist the climate, have produced offspring by crossing to which they they have transmitted many of their characteristics, increasing the production of meat and milk. The examples of crossing are at the present time too few to permit of an acurate judgment being passed as to their value for improving the native cattle. Similar observations are made as to the Hereford, but the crosses are more numerous and the several breeds who are satisfied with the results so far obtained are continuing their experiments on a larger scale. In particular the Brazil Land, Cattle & Packing Co. have decided that the Hereford stock is best suited to local conditions and are credited with the intention of importing large numbers of this breed."

Many instances might be cited in proof of the claim that the Hereford, because of its prepotency, will with fewer crosses than any other beef breed eliminate alien blood and impart the outstanding characteristics of the breed on the offspring. On April 18, 1912, Leon Wheeler, a shipper of Osborne, Mo., market at St. Joseph, Mo., a load of butcher stuff which included one heifer that weighed 1980 pounds and sold for $8 per hundred, the highest price ever paid on that market for a heifer. She was sired by a registered Hereford bull, and her dam was the product of the crossing of a registered Hereford bull and a pure bred Jersey cow. Although one-fourth Jersey this heifer was perfectly marked and exhibited all the characteristics of a pure bred Hereford. The two crosses eliminated practically all the Jersey characteristics.

One of the last shipments of Mexican cows, the old time yellow longhorns of the Texas range, was received at Kansas City in the fall of 1910. The cows had been mated with a pure bred Hereford bull and had white-faced calves at their sides. The cows averaged slightly under 700 pounds each and brought $17.45 a head. The calves averaged 200 pounds and sold at 08 per hundred, or $16 per head. In this instance the first cross of a Hereford sire returned nearly 100 per cent on the investment in the dams. The prepotency of the Hereford appears to be as much a fixed characteristic of the breed as the red and white markings or the tendency to fatten with exceptional ease. This characteristics prepotency seems not to be affected by high feeding any more than it is by hardship on the range. For this reason the Hereford is held in as high esteem as a geef producing animal in the corn belt as it is in the range country.

For crossing with the grade cows on the average farm, many of which contain a considerable proportion of the blood of some beef breed, the pure bred Hereford sire is now admitted to give the best results. The product of such a cross is a beef animal of good type and conformation possessing the highly desirable quality of fattening easily and at an early age and giving a good account of grass and forage. The ease with which females containing an infusion of Hereford blood can be carried through the winter is one of the strong points in favor of the breed. The Hereford cow carried through the winter on forage alone comes out in the spring in fair flesh and vigorous constitution, produces a good, strong, healthy calf and takes good care of it on grass until it is ready to be placed in the feedlot, thus reducing the cost of growing beef on the farm to the minimum.

The secret of the superior prepotency of the Hereford is the be found in its greater heart girth which provides an abundance of room for the full development and free action of the vital organs. All authorities agree on this point, that the Hereford as a breed has a better heart girth and a stronger constitution than other breeds and as a consequence is more industrious, a better feeder, a surer breeder, can withstand adverse conditions better and transmit its characteristics more surely and in a larger degree to its offspring when mated with common grade cattle than other breeds.—American Hereford Journal.

DESCENDANTS OF THE SMUGGLED BUCK.

I in the year 1881 the sultan of Turkey prohibited, under the death penalty, any exportation of Angora goats from his country. Some years later Dr. G. Bailey, of Southern California, became deeply interested in goats and determined to go to Turkey to secure some stock. He secured a man to accompany him, and his reminiscence of the very hazardous adventure is told in his own concise statement.

"We had no difficulty in buying four of the very choicest specimens and would have bought more but for the terrific difficulty in getting them out of the country and the sure death to us if what we were doing was discovered. It means transportation on mule back for days and more days on camel backs and in a close carriage. Then Then carried for miles in sacks on men's backs, we reached the Bosphorus and stowed them under the deckload of hay on one of the flat-boat. We got them into Constantinople and round to the steamer wharf in an open wagon—the best we could do. But before that we sheared them, although the weather was very cold, but that incriminating wool had to comé off. Then we rolled them in coal dust to further hide their identity, and after being stopped three times by police, whom we blinded with a little money, and by customs officers whom we managed to hoodwink, we got them out."

The descendants of these four goats are to be found on several ranches in the Western country, but it is stated that the Glenn and Gagon Company of Utah has the largest number of such breed.

Their ranch is at Oray, close to the great Uinta Indian Reservation, and it consists of over 700 acres of good pasture and edible brush. The herd was started eight years ago with 100 registered does and two registered bucks—one of which was sired by one of those Turkish bucks smuggled out by Dr. Bailey. From that start the herd now numbers over 700 of very high-grade goats. The first 100 does, of South African stock, cost $1,250, and the bucks which have been purchased cost $75 to $100 each. The Turkish buck ran into figures which I was not able to learn, as Mr. Glenn smiled, shrugged his shoulders and said evasively, when asked as to the price he paid: "Well, he was worth every dollar we paid, and that's going some!"

In an interview with that gentleman at Vernal he gave some information on the management of the herd:

Warranted to give satisfaction.

GOMBAULT'S

CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FOR SALE OR TRADE—One imported registered draft stallion, weight 1800 lbs., sound and right. Would consider standard bred mares, draft mares, or thoroughbred mares. Address D.A. BAKER, Hill P. O., San Diego Co., Cal.

FOR SALE.

Three-year-old bay filly by Arner (brother to Diablo 2:09¼), dam Alberta by Diablo 2:09¼; second dam Sister to Little Albert 2:10, etc. This filly is a natural pacer and one of the most elegant individuals ever foaled. She has size, a splendid conformation, and is without a blemish. She traces twice to Bertha, the greatest broodmare matron in the world. For particulars address
MRS. W. B. BRADBURY,
Corte Madera, Cal.

THOROUGHBRED COLT AT A SACRIFICE.

The death of my father compels me to seek a buyer for an excellent thoroughbred racing prospect, a colt by Maritius—Santa Lucia. I am unable to have him developed and will sell him at a proper figure. Interested parties may learn particulars from Chas. T. Boots, or address
MISS FLORENCE GAULT,
105 Bush St., San Jose.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,
I. F. EATON, Chico, Cal.

"The greatest trouble with the goats is that we have to shear during the kidding season. The kids begin coming the first of April until the middle of May, and the shearing must be done during April. After the shearing they are driven to the Rock Cliff mountains among the pines, qacken-asps and brush and are herded there by a couple of Ute Indians until September. Then they are driven back to the home ranch and feed on the wild grasses and brush until the next kidding season. The feed is always sufficient to keep them in fine condition except when a heavy snow comes and covers it too deep for them to get at. Then we throw out coarse hay."

The labor of herding goats is less even than that of sheep. Herders are needed chiefly to watch for mountain lions and coyotes, and on fenced winter range one man can tend a couple of thousand goats by opening a gate into the hay corrals when necessary. No shelters are needed, as these mohair producers are more hardy than any sheep.

The man in charge at the ranch is the partner, W. H. Gagon, and his policy from the start has been to continually upbreed. He said: "We never sell a doe except those which show some defect in build or constitution or do not come true to type. The bucks are sold at prices ranging from $25 to $75 each. Surplus buck kids are often killed for the meat, which is preferred by many to mutton or beef. In the slaughter houses it is called Angora venison. The flesh is a little darker than mutton, but not so dark as beef, and the flavor is sweeter than either."

"I suppose that the hair is where the chief profit lies?" I inquired.

"It's where we look for the chief profit," he laughed. "But we're not getting the best that we could. Open summer range is fine as far as feed is concerned, but it hurts the hair badly, because of the burrs. This season we took $1.38 per head, averaging six pounds apiece. If we had good sheds for winter and clean pasture for summer the clip would be heavier and clean and would fetch 40 cents per pound, at least; and perhaps more."—G. F. Stratton, Farm and Ranch.

KEEP GREASE ON THE PLOW.

The best tools go soon enough.

Ounces of grease save dollars in repairs of loss to the farmer.

If machinery displaces men and horses it demands more care than ever.

Keeping the polish on a moldboard of a plow may be better than shining in society.

Simplicity, reliability, durability,and accessibility should be sought when you buy tools.

We get good results from a mixture of whiting and hard oil. First make a thick paste then thin it by adding more oil. Apply to the moldboard with a brush and rub off with a gunnysack just before using the implements in the spring.—M. A. R. Kelley, Missouri College of Agriculture.

WHAT WATER DOES.

From the Washington State College the following comes regarding the reasons for having fresh, clean water continually before the fowls, particularly the growing chicks. By actual analysis water makes up a little over one-half of the body of the chick. Moreover, it serves the following purposes in the chick's ration:

1. To soften the food in the crop.
2. To dilute concentrated food.
3. To carry nourishment throughout the body.
4. To aid in digestion and assimilation of food.
5. To carry waste out of the system.
6. To regulate the temperature of the body.

Under-feeding stunts less than lack ofwater in warm weather. Dirty, stale or stagnant water makes an ideal and speedy carrier of disease germs and poisons throughout the entire system of the fowl. In view of these facts no one can afford to stint the water supply.

There has been a good deal of interest in lentile as a winter and spring crop for various parts of California. Lentils are not grown to any extent and the amound used is small, but there is possibly a good opening for them. Prof. P. B. Kennedy of the University of California states that lentils make very palatable hay, and if allowed to go to seed it is highly prized when made into what is called lentil or split pea soup. They are as nutritious as beans, both for man and animals.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before December 1st, 1915, whether for extension of subscription, renewal of subscription or a new subscription. Address:

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types or English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

Repeating Rifles For Hunting

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

Every Good Gun Store is a Headquarters for Winchester Guns and Ammunition

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

NEWCOMERS TO OUR LIBRARY.

"The Horse in Health and Disease" — Hadley.

Some weeks ago we received through courtesy of the publishers, the W. B. Saunders Company of Philadelphia, a two-hundred-and-fifty page volume from the pen of Frederick V. Hadley entitled "The Horse in Health and Disease." Going to the races daily throughout the early portion of November cut our reading time to a minimum and no more than a hurried glance was accorded the work until recently, when a more leisurely inspection revealed the book as one well printed, well illustrated, and well written. Intended primarily as an introductory text for the student of veterinary science in colleges and agricultural schools, it is moreover a useful adjunct to the library of the progressive farmer and horsebreeder, though for the latter use it serves no better purpose than many works previously published. Separated into two parts, one devoted to the anatomy and physiology of the horse and the other to the diseases common to him, the subject is covered in a comprehensive and practical manner. Professor Hadley, who is veterinarian of the Wisconsin Agricultural Experiment Station, is well qualified to write authoritatively upon his chosen subject and the new work serves its purpose most admirably.

"Modern Horse Management" — Timmis.

Much more pretentious and much more appealing in its general scope than Professor Hadley's strictly professional work is another recent arrival from a far country, "Modern Horse Management" from the press of Cassell & Company of London (F. A. Stokes Co., New York). The latter publication serves a much wider field in an entirely different manner and will be found a valued addition to any horseman's library, no matter how well stocked its shelves may be. Additional interest accrues to its pages through the fact that its author, Captain R. S. Timmis of the Royal Canadian Dragoons, is now on active service in France with the British Expeditionary Forces. Indeed, it was from the front that we received our first advices concerning the work under discussion. Captain Timmis brought to the preparation of this work not only a genuine love for the horse, but a wealth of practical experience gained in various fields of activity in both the old and new worlds. While his home is in Kent and the book is from a London press, a great part of the manuscript of Modern Horse Management was prepared during Captain Timmis' sojourn in the Dominion of Canada, many pages both of text and illustrations possessing a distinctively North American flavor.

Beginning with a history of the horse from the earliest date concerning which we have information, the author presents a world of practical and therefore highly valuable information under the following chapter headings: Psychology of the Horse; Foods and Feeding, Exercise and Transport; Grooming and Stable Management; Driving and Harness; Riding and Saddles; Stable Construction and Circulatory System; Surgical Diseases, Lameness, Teeth and Conformation; Pharmacopœia and Uses of Medicine; General Diseases, Organic, Functional and Contagious; Anatomy and Use of the Horse's Tail; The Crime of Docking; Opinions of Eminent Men, Books and the Press on Docking; Humane Education, the Law; Anaesthetics and Anaesthesia, Humane Destruction; Bacteriology, Antiseptics and the Theory of Disease; On Shoeing and the Care of Feet, and the Use and Abuse of Bearing Reins.

The work is well printed in easily read type and is most profusely illustrated, nearly five hundred photographic engravings, plans and drawings being used to supplement the text, the halftones being printed on plate paper and covering a very wide range, many American thoroughbreds, standardbreds and utility horses being represented with faithful likenesses. It is a great work well done.

CURLES NECK FARM.

While most of the large farms of the west devoted to the production of the light harness horse have passed out of existence, the eastern establishments have held their own in better shape, and occasionally a new one is established. Chief among the latter class—and for that matter, chief among all similar farms on many scores—is Curles Neck Farm, the Virginia estate of C. K. G. Billings which is the home of such equine kings and queens as The Harvester 2:01, William 1:58½, Lou Dillon 1:58½, and many others whose names are familiar wherever great horses are talked of. Not one of us but would eagerly welcome the opportunity to visit Curles Neck, but Curles Neck is a long ways from California, and the only way most of us may view it is through the eyes of others. More fortunate is Joe Markey, who made a pilgrimage to the farm after the close of the Lexington trots, and in another portion of this issue we have reproduced the story of Joe's trip as told in a recent number of the Horse Review, offering herewith the suggestion that you turn to it, forget your troubles, and "look 'em over with Joe." You will find the time well spent, and will renew your acquaintance with a number of former Californians.

Since the article was written we regret to state that Harvester Dillon, the weanling foal thrown by Lou Dillon to the cover of The Harvester, suffered a fatal attack of bowel trouble, dying suddenly on November 11 at the farm. Only a short time before Mr. Billings and a party of friends had found him in most promising condition, and the loss is a severe one not only to Mr. Billings but to the trotting world in general. The offspring of the greatest trotting mare and the greatest trotting stallion, he should under ordinary conditions have exerted a considerable influence upon the trotting horse of the future, and his career would have been watched with more interest than that of any other youngster of his day.

POWER PATCH (5) 2:03½.

On our cover page this week we take pleasure in presenting Trainer Railey Macey of the International 1:55 Horse Farm and the five-year-old bay stallion Power Patch 2:03½, whose mile in that notch constitutes the fastest recorded performance of the season of 1915 on the Pacific Coast. He comes rightly by his speed and his name and general qualifications as well, being a son of that unrivalled pacing king, Dan Patch 1:55¼ and the glorious old "Queen of the Bullrings," "Aunt" Effie Powers 2:08¼, a pair who have forgotten more about winning races than many a trainer ever knew. Effie Powers, had she left no history save that made by herself on the race courses of the eastern states, would have remained famous for many a long year, but from all indications she is to secure still further fame through the sons she left behind at the Savage Farm when she answered the final "paddock call" some months ago, Power Patch 2:03½ and Liberty Patch 2:07½. The former, brought to California last spring by Mr. Macey, has progressed steadily during the summer in speed, manners, and physical condition, maturing into a nice big horse, clean cut and powerful. So well has the California environment agreed with him that he will be wintered at Los Angeles, with others from the Savage establishment, and if he continues to do well will probably be staked down the big line next season. He has developed about as much speed as any of the crop of stake pacers in sight, and if he does make good to a point in accord with present indications he will start down the line with the best wishes of the countless friends of that good sportsman, M. W. Savage, his owner.

Our Water Troughs in San Francisco

BY WM. K. GUTZKOW

Editor's Note.—Mr. Gutzkow, while a stranger to some of our readers, needs no introduction to many of them, having been active for years in furthering the welfare of our dumb friends. He is the youngest member of the Board of Trustees of the S. P. C. A., a former Park Commissioner, and a prominent figure in the city's social and business life.

San Francisco is one of the few large cities in the United States in which the needs of animals have been sadly neglected, from the standpoint of providing them with public drinking facilities. Although the city is well provided with statuary and other structures designed to ornament and beautify the city, it has been noticeably barren of fountains that offer refreshment to beasts. Few cities have shown a greater indifference to the needs of their animal inhabitants. When the writer visited Milwaukee some time ago, he was deeply impressed by the magnificent fountain erected there in honor of Henry Bergh, the great humanitarian whose name is revered throughout the civilized world as the founder of humane work in America. This beautiful and massive fountain was erected in City Hall Square, Milwaukee, in 1891. It is one of the largest and most elaborate pieces of architecture designed to afford refreshment to beasts ever erected in this country. The fountain is circular in shape, with drinking accommodations for both large and small animals. Small receptacles on the sides or provided for dogs and other small animals, while horses and the larger beasts drink from the main basin, which may be approached from all sides and affords accommodations for a great number of animals at one time. The entire structure is surmounted by a handsome bronze statue of Henry Bergh.

Up to the year 1910, San Francisco did not own or maintain a single drinking trough for animals. A number of years ago, the San Francisco Society for the Prevention of Cruelty to Animals installed several troughs throughout the city and paid the water bills, which amounted to quite an item. Through the kindness of the Draymen's Association, four hundred dollars was subscribed to install four water troughs in the busy teaming district of the city and for years they defrayed the expense of water and upkeep.

The San Francisco society later prevailed upon the team owners of the city to pay the water bills for the troughs. At least the burden of paying for water for the nineteen troughs became too great and the Board of Supervisors in 1910 were induced to assume payment of all future water bills. The nineteen drinking stations (including the handsome granite memorial fountain at Mission and 13th streets) are located at the following places: Kentucky and Fourth, Market and Valencia, Otis and Twelfth, San Bruno and and Dwight, Lincoln Way and 18th Ave., Oak and Masonic, Fifteenth and Dolores, California, Market and Drumm, Van Ness and Bay, Cornwall and Sixth, Mission and West Mission, Market and Battery, Townsend and Second, Embarcadero and Vallejo, Embarcadero and Howard, Embarcadero and Commercial, Sixth and Berry, Eighth and Townsend, Sixteenth and Alabama.

Knowing that the few troughs maintained were in no wise sufficient to accommodate the nineteen thousand work horses in this city and believing that we should stand as an example to other cities in humane progress and consideration for the needs of other creatures, the writer recently undertook to secure by public subscription a fund for the erection of a fountain for animals; and it is my hope and earnest desire to see erected in this city within a few years a fountain as beautiful, magnificent and useful as the one erected in Milwaukee—a fountain which shall be dedicated to the Work Horse and be commemorative of the noble work performed by that animal in this city after the calamity of 1906, in carting away debris and hauling building materials which made possible the rehabilitation of our city in such a remarkably short time.

At present several thousand dollars have been promised, and by conscientious effort the writer hopes to swell this sum to at least $20,000, in order that we may erect a monument to the HORSE that will stand as a lasting tribute to this faithful animal and his work.

Arizona State Fair

REPORT THROUGH COURTESY OF MAGNUS LAWS

Phoenix, Monday, Nov. 15.—"Arizona horses only" was the qualifying phrase for the classes which formed the light harness program for opening day at the Arizona State Fair, and while the time was not extremely fast there were a number of good contests and one new state record was established.

Naboth Jr., the untraced chestnut gelding from Tucson, was the unexpected winner of the 2:25 trot, his consistent performance placing him at the head of the summary with only one winning heat to his credit. Sadie View, who drove him out in the first heat and won the third, might have beaten him for first money save for an unlucky break in the second. She swerved into another sulky on leaving her feet, giving Lester Selman a rough tumble and going on alone, the judges placing her. Teddy Bunch also had a spill in the final heat but was unhurt, Lady Leco stumbling and falling just after passing the wire.

Zombrino and Gay Tommie put up a closely contested race in the event for 2:20 pacers, the former taking two out of the three heats by narrow margins and was barely nosed out in the second. Navajo had practically a walkover in the two-year-old trot, setting the record for Arizona bred youngsters of the age and gait at 2:27¼ in the second heat. A neat little contest developed for place, Dr. Davidson forcing Belzabola to let out a notch or so in the final brushes to make the position.

Save in the 2:20 pace the fields were rather hard to handle and Starter Updegraff had to resort to a heart to heart talk with the drivers before any satisfactory scoring was obtained. Ted Bunch was the Murphy of the day, his mounts heading the summaries in two out of the three events and winning five out of the eight heats raced. The details:

Monday, Nov. 5.—2:25 trot, Arizona horses, purse $1000:

Naboth Jr., ch g, untraced.....(McEuen)	1	2	2
Sadie View, br m by Direct View.....(Selman)	2	5	1
Lady Leco, bl m by Cochise.....(Bunch)	5	1	
Meridian Jr., bl g by Meridian.....(Mooney)	3	3	3
Delano, bl m by Oh So.....(Lopez)	4	4	4

Time—2:14½, 2:15½, 2:14¼.

2:20 pace, Arizona horses, purse $1,000:

Zombrino, bl h by Prince Zombro.....(Bunch)	1	2	1
Gay Tommie, b g by Tom Ferguson.....(McNab)	2	1	2
Queen T., b m by Oh So.....(J. McEuen)	3	4	3
Direct So, br h by Direct View.....(L. McEuen)	4	3	4
MacLeland, br g by Leland D.....(Wheat)	5	6	5
Kuropatkin, br h by Gambetta Wilkes..(Barkley)	6	5	6

Time—2:21¼, 2:25¼, 2:21½.

Two-year-old trot, Arizona horses, purse $500:

Navajo, b f by Dr. Clark.....(Bunch)	1	1	
Belzabola, b f by Redlac.....(Carman)	2	2	
Dr. Davidson, b c by Dr. Clark.....(Clark)	3	3	
Della Patch, b m by Patchlock.....(Owens)	4	4	

Time—2:34, 2:27¼.

Tuesday, Nov. 10.—With the arrival of a few stables of horses from the exposition track at San Francisco and their participation in today's races things began to be a little livelier at the local course, Will Durfee, Lon Daniels, Joe Jones and Billy Best all figuring in some warm finishes.

The best race of the day was the 2:04 pace, in which Durfee had named both White Sox and Clara Mac, the crowd being much pleased when he elected to start the former, California's largest money winning pacer of the present season. Potrero Boy, the big gelding from the Silva stable, and the ever-reliable Leata J. were the other starters, the resultant contest being a pretty one. Close pressed by the others Sox won the first heat in 2:06½ and then spoiled her chances for the next by a break in the first quarter. Durfee then treated the spectators to a real thrill by setting her down for a middle half in a minute flat and forcing Potrero Boy and Leata to pace in 2:06¼ to head her to the wire, this being as fast a heat as the winner has to his credit in a public performance. Again in the final mile the bay mare broke but caught handily and came on to win by a safe margin in 2:06¼.

Durfee's luck in the 2:12 trot was not so good, as Sargo, after winning the first heat just like a horse that had the race at his command, though well driven out by The Proof and Mabel Van, went a bit wrong and was third in the second heat and distanced in the last one. Mabel Van annexed the second nicely and Daniels drove The Proof to the front in the third, his standing of second in both previous attempts putting him at the head of the summary.

The two-year-old pace for Arizona bred horses was a call for the filly Marguerite, who failed to pace within some seconds of the time made in the same class last year by Maydella. Vic was a sturdy contender most of the time, the two named having considerable advantage over Lelia Mack and Dama. The summary:

Tuesday, Nov. 16.—Two-year-old pace, Arizona horses, purse $500:

Marguerite, b f by Airault.....(Enfield)	1	1	
Vic, b g by Director.....(Clark)	2	3	
Lelia Mac, b f by Leland D.....(Wheat)	4	2	
Dama, bl c by Directly.....(Selman)	3	4	

Time—2:35, 2:37½.

2:12 trot, purse $1,000:

The Proof, b h by The Exponent.....(Daniels)	2	2	1
Mabel Van, b m by On Stanley.....(Best)	3	1	2
Sadie View, br m by Direct View.....(Wheat)	4	4	3
Sargo, b g by Keeler.....(Durfee)	1	3	dr

Time—2:11½, 2:11½, 2:14¼.

2:04 pace, purse $1,000:

White Sox, b m by Del Coronado.....(Durfee)	1	3	1
Potrero Boy, b g by Demonio.....(Daniels)	2	1	2
Leata J., b m by Royal McKinney.....(Jones)	3	2	3

Time—2:06½, 2:06¼, 2:06¼.

Wednesday, Nov. 17.—The most creditable performances of today were those of Otis Jr. and Roxie D., winners respectively of the three-year-old trot and three-year-old pace for Arizona colts. Otis Jr., with Tom Pollock's nice filly, Irene Strathmore, closely following him, trotted both heats in the state record time of 2:22¼, third and fourth money being divided between the two-year-olds Navajo and Dr. Davidson. Roxie D.'s performance in 2:20¼ also constitutes a state record, she being driven out in each heat by Maydella, the filly who won this class last year as a two-year-old.

The 2:15 pace was expected to materialize into a fairly fast affair but failed to do so. Contention B. took the first heat handily in 2:16¼ but went away a bit back in the second, Durfee nodding for the word. Gay Tommie went to the front for a win in 2:16¼, which was too much for Contention after the distance lost on the start. It evidently was a sufficiency for Tommie, also, the Durfee entry taking the third mile in much slower time. The summary:

Wednesday, Nov. 17.—Three-year-old trot, Arizona horses, purse $500:

Otis Jr., b c by James Otis.....(Wheat)	1	1	
Irene Strathmore, ch f by Knight of Strathmore.. .....(Carman)	2	2	
Navajo, b f by Dr. Clark.....(Bunch)	3	4	
Dr. Davidson, b c by Dr. Clark.....(Clark)	4	3	
Miss Emily, b f by Knight of Strathmore (Selman)	5	5	
Baby Joy, ch c by Direct So.....(McEuen)	6	6	

Time—2:22¼, 2:22¼.

2:15 pace, purse $1,000:

Contention B., b g by Copa de Oro.....(Durfee)	1	3	1
Gay Tommie, b g by Tom Ferguson...(McNab)	3	1	3
Zombrino, bl h by Prince Zombro.....(Bunch)	2	2	2

Time—2:18½, 2:16¼, 2:23¼.

Three-year-old pace, Arizona horses, purse $500:

Roxie D., b f by Leland D.....(Enfield)	1	1	
May Della, bl f by Lou Kinney.....(Carman)	2	2	
Vinie B., b f by Leland D.....(Clark)	3	3	
Marguerite, b f by Airault.....(Yore)	4	4	

Time—2:23½, 2:20¼.

Thursday, Nov. 18.—"The best sport of the meeting" was the verdict of the spectators at the fair today, the contests being good and the time more on the genuine Phoenix order. For the second time during the week White Sox, Potrero Boy and Leata J. went to the mat for three falls, and for the second time they stood in the summary as named. There was this difference, however: Sox grabbed all three decisions and paced each mile in the same notch, 2:05¼, the race being the fastest ever contested at this season of the year. She went into the lead as soon as the word was given the first time out, Leata J. wresting the position from her a bit later only to lose it again, Potrero Boy also passing Leata before the wire was reached. In the next trip Sox went away slightly at a disadvantage and Potrero Boy set the pace to the head of the stretch, where Durfee started a drive that landed him winner over the Boy for the second time. For the final trip Sox cut out the pace and won all the way, stepping the last half in 1:00½ and the last quarter in :28¼, the crowd giving her a royal send-off. Her opponents were both fast and game but couldn't handle her in the form she displayed.

Columbia T., The Lark and Kildare all drew a heat in the 2:18 trot, The Lark's mile in 2:12¼ being the fastest. In the first the Durfee mare broke early and lost much ground, though she trotted a good-hearted mile after settling and raced Columbia T. for the second, the Silva mare being so close that the judge's decision as to the winner was necessary before the spectators could be sure who had led the way. A break in the third cost Columbia T. her chance and Kildare romped home in front with Sadie View keeping him company. The latter lass, incidentally, was the most consistent race of any of the money winners.

The 2:09 trot was a hot fight between Albaloma, Kid Cupid and Esperanza, Mabel Van being a trifle back of the leaders. Albaloma took two heats in 2:09¼ with Esperanza crowding him very closely, the daughter of Carlokin losing her chance to win the first by a break when near the wire. The third was anybody's heat until a few lengths from the wire when that famous bean spiller, Kid Cupid, drew away to win from Esperanza in 2:10¼, Albaloma tailing off a trifle. The summary:

Thursday, Nov. 18—2:18 trot, purse $1,000:

Columbia T., b m by Bon Guy.....(Daniels)	1	2	2
The Lark, b m by Carlokin.....(Durfee)	6	1	1
Kildare, bl g by Zombro.....(Bunch)	4	5	3
Sadie View, br m by Direct View.....(Wheat)	2	3	4
Naboth Jr., ch g untraced.....(McEuen)	3	6	5
Larry K., b g by Larry Kinney.....(Best)	5	4	6

Time—2:13¼, 2:12¼, 2:14¼.

2:09 trot, purse $1,000:

Albaloma, b g by Almaden D.....(Quinn)	1	1	3
Kid Cupid, ch g by Cupid.....(Daniels)	3	3	1
Esperanza, b m by Carlokin.....(Durfee)	2	2	2
Mabel Van, b m by On Stanley.....(Best)	4	4	4

Time—2:09¼, 2:09¼, 2:10¼.

Free-for-all pace, purse $1,000:

White Sox, b m by Del Coronado.....(Durfee)	1	1	1
Potrero Boy, b g by Demonio.....(Daniels)	2	2	2
Leata J., br m by Royal McKinney.....(Jones)	3	3	3

Time—2:05¼, 2:05¼, 2:05¼.

Friday, Nov. 19.—Owing to the fact that several classes originally announced failed to fill, the regular program of harness races was cleaned up yesterday, so Secretary Shaughnessy arranged three special events for today, each one of them resulting in an interesting race for blood. The 2:05 pace was the occasion for the third meeting of those two good three-year-old pacers, Bondalean and Rayo de Oro, the two colts going after each other's hide from the jump. Bondalean was in strange hands and in the first heat was third when Rayo de Oro romped home barely front of Potrero Boy in 2:07¼. In the second, however, the Silva colt went to the front for a mile in 2:06¼ with Potrero Boy again the contender. This put a quietus on both the youngsters and the big Demonio gelding took the last heat (and the race) with a mile in 2:09½, Billy Best getting Clara Mac under way to drive him out. These are the fastest miles ever paced here by three-year-olds and the performances of the youngsters pleased the spectators very much.

Albaloma won his second race in two days but had to surrender the last heat to Sargo, the white faced gelding from the Durfee stable. Esperanza, with Henry Atkinson doing the teaming, drove out the winner in each heat, Albaloma dropping to third place when the time was cut from 2:10 to 2:07½. Earlier in the week Sargo hit himself and was eventually distanced after winning one heat, but today was in good shape and improved as the race progressed.

The Proof won his second race of the week handily by taking the first and third heats and being second in the other, won by the Durfee trotter, Old Folks. The Lark went a good race for Henry Atkinson and Columbia T. had small difficulty in outranking Larry K. for the small end of the money. The summary:

Friday, Nov. 19—2:05 pace, purse $1,000:

Potrero Boy, b g by Demonio.....(Daniels)	2	2	1
Bondalean, b c (3) by The Bondsman....(Quinn)	3	1	5
Rayo de Oro, ch c by Copa de Oro.....(Durfee)	1	5	4
Contention B., b g by Copa de Oro....(Atkinson)	4	3	3
Clara Mac, br m by Expressive Mac.....(Best)	5	4	2

Time—2:07¼, 2:06¼, 2:09½.

2:09 trot, purse $1,000:

Albaloma, b g by Almaden D.....(Quinn)	1	1	2
Sargo, b g by Keeler.....(Durfee)	4	4	1
Esperanza, b m by Carlokin.....(Atkinson)	2	2	2
Kid Cupic, ch g by Cupid.....(Daniels)	3	3	4

Time—2:11¾, 2:10, 2:07½.

2:13 trot, purse $1,000:

The Proof, b h by The Exponent.....(Daniels)	1	2	1
Old Folks, b g by Del Coronado..... ..(Durfee)	3	1	3
The Lark, b m by Carlokin.....(Atkinson)	2	5	2
Columbia T., b m by Bon Guy.....(Quinn)	5	3	4
Larry K., b g by Larry Kinney.....(Best)	4	4	5

Time—2:13½, 2:11¾, 2:12¼.

—o—

During the season just past four yearlings by The Exponent 2:11¾, and three by Trampfast (2) 2:12¼ entered the standard list. All have been driven to their records by Alex Wishart over the Springfield, Ill., track. Two of these trotters, both by Trampfast, received their training at the hands of C. Ed Coffman, Sullivan, Ind., and were the only trotters of their age by either of the sires named to be worked by Mr. Coffman in 1915. Aside from the pair mentioned, Wishart had only five yearlings in training, but placed them all to the credit of their sires. These were: Princess Robey (1) 2:25, The Design (1) 2:27¼, The Combination (1) 2:29¼, Flashfast (1) 2:30, Tripfast (1) 2:30, The Sign (1) 2:21¾, and Treadfast (1) 2:23¼.—Western Horseman.

District Fairs and The Trotter

AS VIEWED BY THE EDITOR

In writing of the situation in California concerning the future of the county or district fair there are so many different angles from which the matter not only may but must be viewed that, once started, there is no telling where this article, screed or spasm—according to how your views and mine coincide, or to how widely they differ—will end up. Only by threshing things over, however, can the good be gleaned from the bad in every crop of ideas, and the time for that threshing has arrived. Our fairs have practically ceased to exist save in a few exceptional localities; our breeding industry has fallen away until Peter the Great could scarcely earn his keep here, and the local market for light harness horses has simply ceased to exist. Betting we do not have nor will we soon have it in my opinion; state aid for district fairs by legislative appropriation we do not have but may obtain if properly sought, I believe, and it lies with horsemen themselves to make the fight for the re-establishment of the subsidized fair and the rehabilitation of light harness racing in general favor purely and simply as a commercialized sport. Pledged to this course we now have with us the Pacific Coast Fair Association, and as its activities are soon to be under way, and as it is distinctly a horseman's organization in its original inception, it is most fitting that horsemen should devote considerable thought as to how its campaign may best be conducted to insure its successful culmination. Our breeders have given much thought, much time, and expended much money in laying the foundations for the production of speed, breeding colts and preparing to have speed on tap in future years, but their energies have been one-sided—while making every safeguard for the production of race horses in days to come, they have absolutely neglected the equally important task of providing means of utilizing the speed they produce. A marketless product is a minus quantity. The horsebreeder must make his market or cease breeding, and the most assured speed market is that provided by the established fair with harness racing as one of its major adjuncts.

Right off the jump I have run crosswise of the man—whose name is legion—whose opinion is that the sole route to prosperity in the racing industry lies through the medium of legalized speculation. I am, personally, a warm supporter of the pari-mutuel system of wagering, through state license, at short meetings. I do not believe such a practice detrimental to public morals, nor do I believe that morality can be legislated into a community by "blue laws" or any of the countless "reform" measures we are so fond of inflicting—so ineffectually—upon ourselves. The establishment of the pari-mutuel machine in California would without doubt be a wonderful stimulus to the harness horse industry and bring to it a great wave of prosperity, but not a prosperity so assured, so permanent, so generally contributed to by the public as that which would accrue to it from the part it would play in district or county fairs.

My principal objection to speculation as the medium for rehabilitating the horse business lies in the unstable existence of "legalized" wagering. Whether or not we believe betting on our favorites is really wrong or really detrimental to the public good, we are forced to confess that it is contrary to the spirit if not to the letter of the law, and as such is always open to attack and censure on the part of a large portion of the general public. In certain states of the union we now have horseracing under commission regulation, with betting, and while there are statutes on the books of these states giving such methods of procedure a certain measure of legality they exist only at the pleasure of the people and are not really constitutional, as in almost every state there is an anti-gambling clause in the basic laws upon which the entire superstructure of its legal machinery is founded.

Any legislation which might be passed in the state of California permitting racetrack speculation must always be under fire from the fanatic and the "reformer," and with its repeal possible at any and every session of the legislature the prosperity created by it would not be a true prosperity. Under the first well organized attack the "law" creating it would go down in defeat, and breeders would find themselves just as badly off as they are at present. We might have three, five, ten or even more years of healthy activity in breeding and racing before the crash came; it is even remotely possible (though not probable) that the situation might be so pleasingly shaped that it would become enduring, but I doubt it. Any public operation contrary to the spirit of the law is afflicted with an inherent weakness that is liable to develop into a disease with fatal complications upon very slight provocation.

It has been thoroughly demonstrated in numerous other communities in America that speculation is not vital to the welfare of the harness horse industry, though running racing without betting has never proven sufficiently attractive to make it pay. The harness horse exerts a much stronger drawing power purely on his merits as a provider of entertainment, and nowhere does he to truly come into his own as at the county, district and state fairs. There are many people who attend fairs and occupy grandstand seats who would not go near a straight race meeting. At the fairs in most sections there is no open betting and very little handbook betting, speculation being confined almost exclusively to small wagers between friends and acquaintances. I venture to state that in certain sections of the central west the fairs, with betless harness racing, have returned a certain measure of profit year in and year out for the last two or three decades, the races given being of sufficient number and value to maintain the industry of breeding and racing trotters on a fairly decent basis. Year in and year out, these fairs draw good attendance because of the appeal their features exert upon the public mind, and because persons unalterably opposed to gambling may attend and enjoy the speed contests with no feeling of offense to their beliefs. Racing without betting should prove conducive of better real sport than racing with betting, as with only the purse as a reward there will be more real "leveling" and less inducement to dishonest practice. Reports from various state and county fairs of the east and central west for the season just passed are of a most satisfactory nature — good racing with plenty of interest, and good attendance.

Here in California we have had very many adverse conditions to combat in recent years, so that our own fairs have passed out of existence or are experimenting along strange lines. State aid was withdrawn some seasons ago as a result of several circumstances—one being the opposition of parties vitally interested in the running tracks, and another being lax and, in some instances, dishonest conduct. The racing deteriorated in quality and attractiveness at many meetings, premium lists, for which the state provided a goodly portion of the money, were framed largely for the benefit of certain interested and influential parties, and under these circumstances it is not a matter of wonderment that the fairs "petered out." Nor is it strange that they are hard to revive, or that the public refuses to display a widespread and enthusiastic interest in racing. The inherent love of the horse is instilled in the hearts of a great majority of the American people, but in too many sections it has suffered from bad racing. Given properly managed fairs with real horseracing—not hippodroming—and people take to them like a duck to water.

The season we have just gone through has been an unusual one on account of the exposition, the state fair and a number of smaller organizations according it the right of way and failing to stage either fair or races. A few fairs were given as usual, and Fresno, an old standby, gave a so-called fair without horse racing. The results at the various places shed interesting light on the general situation.

The Humboldt County Fair Association put on its twentieth annual event early in September at Ferndale and, as usual, the venture was attended with considerable success. The speed program at Ferndale is not pretentious, and is confined to horses owned in Humboldt county for a certain period prior to the staging of the fair, but real horse races develop and the people like them. Both the harness horses and the runners are provided for, and the premium list for the other features furnishes awards for the principal products of the county, as well as for the household arts, and other customary features. This season there were eight harness events, one of which went six heats to a decision, one heat being a dead one. The fair paid its way as usual—and this in a county which until a few months ago had no railway communication with outside points. Given a bit of appropriation from the state, with certain races open to all comers and others restricted to horses from the county or district, the opportunities offered by Humboldt county for the building up of a truly great fair are most excellent.

Having seen what has been accomplished in Northern California under many restrictions, let us turn to the other end of the state. There the fairs were dead until one or two venturesome towns made an attempt at a revival a year or so ago. These attempts form the brightest chapters in present day county fair history in California, for they have been successful, they have proven beyond doubt the opportunities California's settled sections present for the promotion of properly conducted fairs.

Down on the coast in the snug little city of Ventura a number of business men got together a couple of years ago and decided to put on a modest little fair, the effort being blessed with much more success than they had anticipated. Last summer they went at it a little stronger, but still modestly. Their premium list was a comprehensive one and a modern one though the awards were not high in figure; the speed program was a small one and the purses moderate but here is the result: The exhibits were good, the spirit of neighborhood rivalry ran high, the people turned out well every day and everybody saw the horse races, which were real contests, in the afternoon; the association cleared in the neighborhood of $2,500 and next year they are going at it early in the season and have a bigger, better event in every way, especially in the speed department. Two hundred and fifty to five hundred dollars has been about Ventura's limit for a harness race, with very few of them, but last advices from there are to the effect that for 1916 they will hang up larger purses and more of them.

Down in Ventura they have the true "fair idea" that will guarantee a successful fair every year. From a statement made last summer by the leading executives of the association, President Camarillo and Secretary Hathaway, we take the following proofs of this assertion: "The fair of 1914 was purely experimental in its entirety. No one connected with the management had had recent experience in the conduct of amusements on a similar scale, and some of those more intimately connected with the detailed work had never had such experience. Therefore, looking at the fair of 1914 and the great success which attended it one wonders that such a thing was possible. Here is the key to the whole thing—there was wholesome co-operation and everybody worked. The heads of departments last year frequently heard the remark from visitors: 'I hope there'll be a fair in 1915, for I have some things at home that will beat anything I have seen here.' That is why we have a fair in 1915 and why we will continue to have fairs; the competitive instinct will keep the fair spirit alive as long as calendars are published, beans grow and cocks crow."

Lusty as is the young fair at Ventura, there is yet another in the Southland that is even more robust—that at Riverside. In 1913 Riverside gave an experimental fair under all sorts of handicaps, but it met with such favor that the association went at it in earnest. New grounds were equipped, a new half-mile track was built and in 1914 they gave a real fair. It was a hummer and the harness races were a big card, eight three-hundred-dollar purses and a few individual performances. The fair proved that it was on the right track, and this year the premium list was more pretentious and there were more races, some of them for larger purses than in 1914. The races were good hot ones, one event between White Sox and Vera Hal being contested in world's record time, and the public simply couldn't stay away. The association spent several thousand dollars on further improvements of its fair grounds during the summer and made it all back and quite a tidy bit over. This is not guesswork, but actual fact, and the association's officers can prove it with the cash on hand.

Success, like many other less desirable things, is

sometimes contagious, and this seems to be the case with fairs in Southern California. Santa Ana, viewing with envious eye the stimulus to Riverside's trade effected by her fair, decided to cut in on the good thing. She didn't decide "very hard," as her racetrack and grounds had lain idle for so many years that it seemed like asking a miracle to demand that they come to life, but she did indulge in a little experimental fair, under difficulties. The first day was rather dull, folks couldn't get it in their heads that there was really "anything doing" at the start, but before the week was over everybody was going, mostly to see the races. They raced right in the trail of the track record while the crowds cheered; the experiment paid its way, and now Santa Ana is in line, from all late reports, for a new fair ground with a first class halfmile track.

Ferndale, Ventura, Riverside and Santa Ana, the four California towns in which financially successful fairs were held in 1915, each gives the speed department credit for drawing the bulk of the attendance, and consequently paying the profit. Concerning the case of Fresno, the follower after strange gods, and of the field of endeavor open to the Pacific Coast Fair Association, we will go into detail next week.

WAR HORSE TRAFFIC IN OHIO.

It's a far cry from Shady Ohio pasture land to the firing lines of Europe's battlefields.

Plain Bill-hoss, accustomed to nothing more militant than a pestiferous fly or hornet, is an Ohio product that is proving a mighty big factor in the current unpleasantness across the seas.

Of course there are Bill-hosses from other states, but the good old Buckeye red barn belt has furnished through one firm alone no less than one-fifth of the entire exportation of horses made by the United States to the warring nations abroad.

Within the past few months B. F. Smythe & Sons of Alliance, Stark county, have shipped to France, England and Belgium 53,000 horses, a large percentage of which were bred within the state. France is the heaviest buyer, ordering 30,000 from the Alliance firm, while England put in her order for 20,000.

There is rather a pathetic note in little Belgium's plea for 2,000, indicating that she is making a brave attempt to restore some of her impoverished agricultural resources. "Send us farm horses," King Albert's country asked, "we want the kind that can pull plows rather than cannon."

The Smythe firm, which consists of the father, Frank Smythe, known over the state as an expert judge of horses for nearly half a century, and three sons: Thomas A., who supervises the shipments at the eastern ports; James C., in Chicago, who deals with the western trade, and William A., who with the father, maintains headquarters at Alliance. At present they are shipping more than 1,000 horses a week, and hundreds of these are straight from Ohio farms. After being loaded at various shipping points, principally at Alliance, the car loads of horses go to Richmond, Va., where the Smythes have extensive stock yards.

"More than 250,000 horses have been sent abroad since the war began," said W. A. Smythe, after he had finished judging the good, bad and indifferent points of a sprightly stepping bay, recently. "We have handled, I should say, about one-fifth of that number ourselves, with more orders coming all the time. But when one considers that the average life of a war horse does not exceed ten days, these demands are not surprising. An inspector told me recently that he knew of one instance where it took just seventy-four horses to place one cannon.

"The foreign governments are very particular about the animals they purchase," he continued. Each country sends its own inspectors and veterinarians over here, and each horse must pass muster, just as if he were a soldier. They double-cinch the proposition by requiring the o.k.'s of both the inspector and veterinarian.

"Most of these inspections take place at our stockyards at Richmond, because it is more convenient for the foreign officials as well as ourselves."

Mr. Scott's poetic lament over the loss of his charger, "Woe worth the chase, Woe worth the day, that cost thy life, my gallant gray!" doesn't fit in at all with modern military tactics. Grays, nowadays, be they ever so gallant, will never hear the call to arms these days. Neither will white horses be called upon to help remake the map of Europe. They are too conspicuous, that's all.

"Any other color but white and light gray will do," said Mr. Smythe. "Strength and endurance are the chief qualities demanded of a modern war steed. Each government specifies 'strong, rugged horses,' and in order to get by the inspector they must be pretty nearly sound.

"There are three kinds of horses which the allies find acceptable, each classified according to weight. One ranges from 1,000 to 1,150 pounds, used for cavalry purposes; another from 1,150 to 1,300, used for light artillery, and the third class includes those weighing from 1,300 to 1,500, for heavy artillery.

"As soon as a horse is thoroughly examined and approved by the foreign representatives, it next undergoes a branding process. All of them are branded on the hoof with the special mark of the government to which they are to be shipped. The inspector's individual mark is also burned on the hoof as well as the number of the horse and the letter showing to what branch of service it is intended. The cavalry horses each show the letter 'C,' the light artillery 'A' and the heavy artillery 'AA.' They are also branded occasionally on the hip and soulder.

"From 1,000 to 1,250 constitute a shipload, and we've averaged more than a shipload a week since the war began."

Mr. Smythe said that the average price ranged from $175 to $185. "I have not found any noticeable scarcity, as some persons not familiar with conditions might suspect. On the contrary, horses in Ohio are plentiful. I assume the automobile and the rapid increase in the use of motor trucks for delivery purposes are largely responsible. In the cities one does not see so many horses as formerly, but there are plenty on the farms."

Mr. Smythe thinks that when the war has ceased in Europe the foreign demand will be greater than ever.

"According to figures of the department of commerce, the United States is the great horse producing country. There are in the world about 50,000,000 horses, and one-half of this total number is in Uncle Sam's country," he said. "Until the war broke out there was but little exportation of horses annually. Then came these enormous demands and more than 125,000 have been sent the past year.

"When peace is restored there will be an appalling shortage of horses in Europe and they will be needed most of all for agricultural purposes. So many millions of farmers and farm laborers will have been killed off or disabled by maiming that much more animal power will be required than heretofore.

"Buying and selling horses for the European war market isn't all strictly business. With the horse so closely associated with humankind there's bound to be a bit of sentiment crop out occasionally.

"When I am on a scouting trip through the country for horses," Mr. Smythe continued, "I usually make my headquarters at the village livery, and by means of handbills and advertisements in the country papers let the farmers know when I'll be in the market for their horses. On one of these occasions a man and woman drove up and explained that their horse was for sale. I looked the animal over and decided to buy him. The woman, in the meantime had heard something of the ultimate purpose for which the horse, evidently a family pet, was to be used. She called a halt on the proceedings at once. 'Send Bill over there to be shot?' she said. 'I should say not!' And she and her husband climbed into the buggy and drove Bill back home.

"Another time a man brought a horse to me that had been in the family for some time. 'Is it true that you are sending them to Europe?' he asked. I told him it was. 'Well, I guess I'll have to let him go. I hate to part with him, but I need the money worse than I need him."

There were tears in his eyes as he took a farewell look at the big fellow and patted him on the nose. "If he's killed over there I don't suppose I'll ever hear about it anyway!"—Cleveland Leader.

A SUGGESTION ON ENTRANCE FEES.

Unquestionably free entrance for harness horses would be a most desirable condition of affairs, and every little while we see an article from the staff, or a letter from a casual contributor, appear in the various horse journals dealing with this subject.

Theoretically the idea is a beautiful one, but as yet the practicality of it has not been shown by such attendance as would justify the attempt by many associations to carry out such a meeting.

The last few years, however, have seen a very material reduction in the entrance fees and many meetings have been held at which the fees have been placed as low as two and a half per cent, while three per cent charges, especially for early closing events, have become quite common.

When one looks back to the days when all entrants paid ten per cent of the purse, the reduction of expense to the average campaigner has been great indeed, especially when we consider that during these years of reduction in fees the harness horse sport has each season discovered the introduction and popularizing of new sports, whose competition has to be met.

The great majority of race meetings held in the United States are not conspicuously successful from a financial standpoint at the present time; as a matter of fact, as horsemen very often discover to their sorrow and the turf journals are continually learning to their loss, each year finds some associations that are either unable or unwilling to carry out their preseason promises.

Consequently, we think we are safe in saying that the greater number of the meetings held very seldom do better than to pay all expenses and leave a little for upkeep of their grounds.

During the past year the attendance at the different points we visited was very good indeed, better at almost every racing point where we stopped than in former years, but harness horse racing gets little free advertising and there is no possibility of average associations dispensing with entrance fees and expecting to make up the deficit by an increased ga

The nature of the sport is such that exhibitio are given for less than half a year and the publici given the horse, during what might be termed t dormant season, is confined almost entirely to t exclusively harness horse publications.

If it were possible that the sport could receive ev a small amount of the free boosting given by t daily press for baseball and kindred forms of ent tainment, we could readily understand that free e trance could become an actuality and not a visio but at present we can count upon the fingers of o two hands the prominent dailies of the country th devote any amount of time or money to the doings the standard bred horse during the months in whi there is no active racing.

There is no reason why we can anticipate ar change in the policy of the daily press in the ne future, hence we conclude that the remedy for a improvement of conditions lies entirely in the han of the managers and secretaries of the racing ass ciations.

By our statements above, we have apparently mad out a case whereby the managers of the racir associations are absolved of all charges of person greed in their present system of conducting rac meetings, as we admit the present necessity of e trance fees, yet, we wish to call attention to way and means which would to a certain extent impro present conditions.

Not long ago we had occasion, at the request a horseman friend of ours, to examine a bill rendere by a trainer for a season's activities.

The horse in question, for which the bill was re dered, had been a consistent winner and had race at points from which we had regularly received r ports. In consequence we had data for each start the horse and it only involved a few minutes of ca culation to discover that the amount charged fo entrance fees was covered by the actual starts mad and that no charge was made for engagements tha the horse had at points where no start was made.

Needless to say, the trainer was given a check fo the bill he rendered but the owner asked him to ca at our office at a certain time to meet him.

On that occasion both trainer and owner met an the question was asked, how in the face of the fac that other engagements had been entered into fo which the owner considered himself liable, the trai er was able to render a bill for only the actual start

His answer was that in these instances "he talke the secretary out of the entrance fees."

From the standpoint of the owner in question, thi was a very desirable condition, but the idea immed ately forced itself upon us that the leniency shown i the particular instance must necessarily have bee at the expense of other owners who made no effor to be released from their entrance fees and had ac cepted a certain definite charge for each time the named a horse.

We realized that this particular case was no unique in itself and quietly began an investigatio into the matter, only to discover that it was a com mon thing for owners or trainers, who had mad several entries at a meeting, to be absolved fro payment except in cases where an actual start wa made.

This seems all right at the first view, but whe we discovered that this practice prevailed only where a personal request was made for such a ruling an that fees were charged on all horses named in case where the horsemen personally did not ask for con cessions, we were immediately forced to the conclu sion that it was a case where all were not being treated alike. In such instances a practical penalty was imposed upon those owners who regarded ar entry as necessarily an agreement to pay a certain sum of money, regardless of a start, and a reward was tendered to the others who tried to get out of their agreement.

This, we submit, is not fair dealing, as no concession should be made to one person at the expense of others. The practice is particularly bad because the associations publicly advertise their conditions are supposed to be on the same footing.

If associations can afford in this manner to remit fees, if their receipts are such that they do not find it necessary to charge all horsemen the amount they advertise as being required from each starter, the proper thing to do would be to reduce the fees of all entrants in proportion and not "make fish of one and flesh of another."

Let each association, that has been able to remit certain sums in the past in this manner, adopt the practice of reducing their charge of entrance to all, to the extent that would be warranted by such concessions, and insist upon each nomination being paid for, and we would find a very material reduction could be made.—American Sportsman.

Graham Bellini 2:11¼, after being here on the coast for a few seasons without distinguishing himself, has passed back into familiar hands, George Giannini having sold him during the exposition races to his old owner, Mr. Young of Tulsa, Oklahoma. He went from here to Libertyville, Ill., and goes into the hands of John McQuaig, who had him in charge as a colt. He is a fast and well bred horse but not a pleasant one for matinee purposes.

Drink Jackson's Napa Soda.

NOTES and NEWS

Sargo 2:07½.
Bondalean (3) 2:06¼.
Rayo de Oro (3) 2:07¼.
White Sox three times in 2:05¼.
Potrero Boy 2:06¼, equaling his best record.
Evidently that Phoenix track is not so slow even in mid-winter.

◈◈◈

We really shouldn't mention it, perhaps, but while these "lizardly displays" were going on, that beloved climatic paradise which is the seat of our e. s. s. C. c. was being visited by a slight downfall of "the beautiful."

◈◈◈

Last week when we opined that Magnus Flaws would "relish an evening by the home fireside" we really "builded better than we knew." Some change after Phoenix.

◈◈◈

Old Folks won a heat in 2:11¾ at the Arizona State Fair, so Del Coronado's 2:10 list seems due for another boost next season unless the Durfee trotter has another run of hard luck.

◈◈◈

Providing weather conditions are agreeable—and they probably will be so—ice racing will commence the second week of January at Toronto. This is one brand of sport denied to residents of Sunny California, but Los Angeles may have a harness matinee on the afternoon of Christmas day.

◈◈◈

Jack London continues to increase his holdings of Shire horses, having recently purchased from Henry Wheatley of Napa a pair of young things and a 2,200-pound matron, the latter a prizewinner at the P.-P. I. E. Mr. Wheatley's Salvator Stock Farm boasts one of the choicest collections of Shires in the country, and London has made several selections from its best individuals.

◈◈◈

A story is going the rounds to the effect that Peter Horrocks and Dave Duffy of Cleveland have turned down a ten-thousand dollar offer for the Peter the Great colt Peter Duffy, a candidate for next season's futurities. Ten thousand dollars is, in the words of Colonel Updegraff, "a lot of money." Tommy Murphy is coupled with the herein mentioned gentlemen as the prospective purchaser.

◈◈◈

Lizzie C. 2:20½, the dam of William 1:58½, will be bred to Abe J. 2:10 again next spring by A. E. Van Atta, presumably in hope of getting another champion pacer. He has our best wishes, but this kind do not run in bunches. We recall that the dam of Dan Patch 1:55¼ was bred back to Joe Patchen, too, but that is all we can recall without assisting memory by a search of the Register and Year Book.

◈◈◈

Alonzo McDonald, who wintered last season at Phoenix and Los Angeles and participated in the June meeting at the exposition, will spend the coming winter at Memphis, where Billings Park and Tennessee weather offer many inducements to speed manufacturers. Some days ago Lon made E. D. Gould a fancy offer for the good two-year-old trotter, Bingen Silk (2) 2:08¾, but without success. An Indianapolis syndicate were the would-be purchasers.

◈◈◈

Miss Loula Long of Kansas City, whose saddle horses were such good winners and prime favorites at the exposition horse show here in October, was the stellar feature of the National show just held at Madison Square Garden, New York. Miss Long handled her own entries in almost all events in which they competed, and her horsemanship and sportsmanship made her the spectators' favorite from the first. In some instances she was made the victim of rough tactics on the part of competitors but continued her showing unconcernedly, the crowd's approval being vehement when her entries were awarded the honors. Altogether the show was a brilliant success.

◈◈◈

San Jose horsemen are having a lot of fun just prior to the season's close, in the matinee line, putting on a good program last Sunday and arranging for another to be held on Sunday, December 5, by which time a few horses that have been away from the track of late will be back in their old stalls. Last Sunday there were five races and two events against time, Evergreen Maid and The Demon, both by T. W. Barstow's good speed sire Nearest McKinney 2:13¼, performing in 2:20 and 2:16 respectively. In the competitive events Lady Barstow (Salazar) defeated Loma Logan (Cecil) and Tralee Boy (Locicero) in 2:24½, 2:26½; Mysterious McKinney (Hubbard) won from Juan (McCrackin) in 3:02, 3:00; Jane C. (Campbell) defeated Kiss Ka Dee (Terri) and Salina (Silvera) in 2:31 and 2:34 after losing the first heat to Kiss Ka Dee in 2:36; Texas Tommy (Orlando) trounced Lady Rea (Whitehead) one dash in 2:38, while Dan Stewart (Stewart) put two halfmile heats over Big Jim (Welborn) in 1:10, 1:09½. The matinees are being well received by the San Jose folks and the attendance and interest has been above expectations.

Pleasanton.
This afternoon.
Four futurity races.
Then welcome to winter quarters.

◈◈◈

The starters in the Pleasanton futurities this afternoon are as follows: two-year-old pace, Julia M., Rico, Surety, Verna McKinney, and Fiesta Lou; two-year-old trot, Lulu B., Hermes, Miss Axworthy Dillon, Alesandro, Don de Lopez, Miss Bond, The Expense, and Natalday; three-year-old trot, Carl, Byron and Allie Lou; three-year-old pace, The Bondholder, Rayo de Oro, Bondalean and Sheldon B. If this is not a nice card for one day's sport, lead us to one that is.

◈◈◈

Hal Boy had no more enthusiastic friend among the spectators on getaway day at the exposition than George A. Westgate of Portland, who arrived just in time to see the race he won from White Sox and Major Ong. George sold the little fellow once and has known him since his foaling day, so he loses no opportunity to proclaim to all in hearing that the grand old Willamette Valley, and especially that portion of it in the vicinity of Oregon Slough, does produce a real race horse every now and then. Mr. Westgate for the first time in a good many years has no board bill to pay for horses and no longer has a direct connection with "the game," being associated in a much more weighty manner with Albers & Co., but he cannot shake off the old love and enjoys a good race as much as ever, while if things ever "get good" again, look for him.

◈◈◈

A Seattle trained and owned trotting mare did wonders in the North Pacific trotting circuit in 1915. Floro Dora Z. is her name and she is owned by Ed Cudahie and Peter McCormack, of Broadway Stables. She was wintered and trained by Peter Brennan at the Madison Park halfmile track. One week before the Vancouver, B. C., fair and race meeting Floro Dora Z. was turned over by Trainer Brennan to Driver Charles Guion, who took her to Vancouver, B. C., and in a big field of trotters and pacers Floro Dora Z. won her first race. From Vancouver Mr. Guion took Floro Dora Z. to Centralia, where she was beaten by Novela in 2:15¼. Floro Dora won two races at Baker, Ore., two races at Walla Walla, a race at Spokane, two races at North Yakima, two races at the Oregon State Fair at Salem, making ten winning races out of eleven starts. This is a real record for a North Pacific raised, trained and owned trotter. Floro Dora Z. finished up with a record of 2:11¼ and is back in her winter stall at Madison Park halfmile track, all sound and fresh and, barring accidents, she should be a 2:06 trotter in 1916.—Rural Spirit.

ANSELILA (1) 2:17½, YEARLING CHAMPION.

It is extremely seldom that record breaking is indulged in after the month of October has run its course, but last week saw an exception to this rule. On Wednesday at Lexington the yearling filly, Anselila, by Prince Ansel (2) 2:20½, stepped a mile in 2:17½, lowering the record for her age, gait and sex held for six years by Miss Stokes. Four days previous, Anselila had trotted to a record of 2:20, and Hunter Moody, who has given the remarkable filly all of her work, was quoted as saying that he considered her capable of beating the record of Miss Stokes. How well she bore out his confidence in her is proved by the summary of her attempt last Wednesday.

Anselila is a filly of excellent blood lines. She was sired by Prince Ansel (2) 2:20½, and her dam, Ila Moko, is also the dam of Wila, a daughter of Walnut Hall 2:08¼, that took a four-year-old trotting record of 2:21¼ on a half-mile track in 1914; her grandam, Dictator's Lost, is the dam of five performers, while her third dam is the famous matron, Medium's Last, dam of seven, including the sensational trotter and sire, Trampfast (2) 2:12¼, the leading ten-year-old sire.

This filly was bred by John W. Considine of Woodland Stock Farm, Woodland, Cal., who still owns her. A few months ago Mr. Considine sent to Mr. Moody eight yearlings, four of which now have records—three of them world's records. While opportunity does not always present itself the same to all persons, it is by the achievements of men that their ability is judged, and truly from the standpoint of accomplishment must this Kentucky trainer be accorded full credit for his remarkable versatility with juvenile performers.—Western Horseman.

* * *

November is rapidly passing, vegetation is "in the sere and yellow leaf" as the poet expresses it, yet Kentucky blue grass and training still keeps up bringing to the fore a notable array of young trotters, products of the breeding operations of that commonwealth and foals from other states that have been shipped there for development under the ideal conditions that prevail in the country that Daniel Boone, the noted frontiersman, first brought into the limelight.

The most remarkable performance at the recent record meeting at Lexington was the result of the effort of a California product, a yearling trotting filly, known as Anselila by Prince Ansel (2) 2:20½, dam Ila Moko by Moko, grandam Dictator's Last by Dictator 113. Prior to her effort on Wednesday, November 10, this filly had trotted to a standard record during the Lexington trots and on November 8 had negotiated a mile in 2:20, just three-quarters of a second slower than the world's record for a yearling trotting filly, 2:19¼, established by Miss Stokes by Peter the Great, in 1909.

The speed displayed by Anselila was such as to convince her trainer, Hunter C. Moody, that she was of championship calibre, and accordingly she was started again on Wednesday, November 10, and her effort on this occasion resulted in the establishment of a new record, 2:17½, for yearling trotting fillies, a lowering of the former world's record, held by Miss Stokes, of nearly two seconds.

Prince Ansel (2) 2:20½ is by Kentucky Prince, and a product of the breeding operations of the famous Palo Alto Stock Farm. He is the property of J. W. Considine, the Pacific Coast theatrical magnate who owns Woodland Stock Farm, Woodland, Cal., and that gentleman is also the owner of the new champion trotting filly, Anselila.

In addition to being the sire of Anselila, Prince Ansel was credited this year with the yearling champion trotting gelding, Anselot (1) 2:28½, the yearling champion trotting filly on a half-mile track, Verbena Ansel (1) 2:26, as well as Bonnie Ansel (5) 2:09¼, an entrant to the 2:10 list of trotters at the Panama-Pacific Exposition.—American Sportsman.

* * *

The trotting record for yearling fillies, set at 2:19¼, by Miss Stokes in 1909, was placed at new figures at Lexington last week when the filly, Anselila, by Prince Ansel (2) 2:20½, took a record of 2:17½. For the first time since the yearling record was first placed below 2:30, the record for either sex is held by a youngster not descended from Hambletonian 10 in the direct male line. Anselila is a direct male-line descendant of Mambrino Chief 11, through Clark Chief 89, Kentucky Prince 2470, Dexter Prince 11363, and Prince Ansel 2:20½. The new champion filly, however, gets plenty of Hambletonian blood, tracing to that horse no less than seven times, once through Dictator 113 and once through his own sister, Lady Dexter.—Horse World.

* * *

Another record was lowered last week when the yearling filly, Anselila, trotted a mile in 2:17½ over the Lexington track, driven by Hunter C. Moody, who now has the distinction of having given to yearlings of both sexes their championship marks. This young mare is a very high-class trotter, one sure to be heard from if all goes well with her, for the manner in which she finished her mile proved that she can carry her great flight of speed from one end of the journey to the other, and, as she is well gaited, thoroughly reliable and apparently sound, there is no reason why she should not hold her own in the best of company in her two and three-year-old engagements. Anselila is by Prince Ansel 2:20½, out of Ila Moko, by Moko, and was bred at Woodland Farm in California, the property of John W. Considine. She has had all her training at Lexington, and closes her yearling form the undisputed champion of her age and sex.—American Horse Breeder.

DISASTROUS FIRE AT EASTERN TRACK.

Fire on the night of Nov. 16 at Bennings track, near Washington, D. C., cremated one man, seriously burned two and a third narrowly escaped; also burned to death about twelve horses, and caused $35,000 damages by the destruction of fourteen stables and their equipment.

Several other horses were shot by the police or killed while running at large on the railroad tracks. They had been turned loose to save them from the flames. The horses burnt to death were: Talecarrier, Joe Deibold, Frog, Coy and Anconian, a training pony, all owned by G. J. Day; Pride of Greenway, Doctor Sullivan and Lillian Kripp, all owned by E. J. Crawford; Mrs. Jack, owned by George Swain; Rolling Stone, owned by C. C. Smithson; Merry Day, owned by James Arthur of Baltimore, and an unnamed yearling, owned by Ben Pope of New York.

The following horses were shot by policemen or accidentally killed after they fled from the burning track; Miss Clara, owned by Louis Weiss, and Good Day, owned by F. J. Coleman; and Harry, owned by W. T. Anderson of St. Louis.

Capt. H. H. Emmons' good handicap horse Rudolfo is said to have been destroyed. Battling Nelson, Dancing Master and a hunter, Borgian, are also said to have been killed.

John Bayliss, colored, was burned to death. John Williams, white, of Memphis, Tenn., and John Smith, colored, were taken to the casualty hospital, severely burned.

G. H. Morton, colored, in charge of the G. J. Day stable, when the fire started, was asleep in the stable when the fire was discovered. He managed to get out ofter a close call. He said he lost $500 in cash and his diamond ring. The ring was recovered after the fire.

Representatives of the R. F. Carman stable said tonight that all of his twenty-two horses, except three exercising ponies, had been found. The Carman stable was directly opposite the Day stable, and was saved by a bucket brigade.

Among the losers in the fire were Perry Belmont and Thomas Fortune Ryan, whose entire stable equipment was consumed, but neither of them lost any horses.

Marque Pays Visit to Curles Neck Farm

FROM THE HORSE REVIEW

Ever since Mr. Billings purchased Curles Neck Farm I have had a great desire to visit it, but until recently had to forego the pleasure. In all my traveling I had never been in Virginia, had never seen the historic city of Richmond, and the James river, with its memorable Colonial and Civil War associations, I knew only through the pages of history and romance. Since Curles Neck is near Richmond, and on the James, the trip combined much that was interesting aside from the farm and its famous horses. I wanted, too, to renew acquaintance with that mare of all mares, Lou Dillon 1:58½; with The Harvester 2:01, and many others that I had known in their "salad days" upon the turf; so, you see, it was a trip to me altogether worth while.

CURLES NECK AS AN ESTATE

I scarcely know how to begin the story of Curles Neck, and it will be just as difficult to find a "leaving-off place," for such is the wealth of material at hand that a great deal more than I have space to write would be necessary in order to give an adequate description of this wonderful place.

The farm is well named, being a "neck" of land around which the James describes a huge curve or "curl." There is no less than seven miles of water front along the historic stream, and nearly all of it is wooded with oaks, elms and other splendid trees. Like others who were, or are, unfamiliar with the topography of the farm, I assumed, from certain things I had heard, that it was low and marshy, but this is not the case. While there are about 1,000 acres of marsh land, the balance — thousands of acres—is well above the river's high-water mark and perfectly drained at all seasons. Many miles of tiling were laid before Mr. Billings purchased the estate, but this was necessary on account of the subsoil, which held the water—not because the land was low. The entire Curles Neck tract is one integral body, and the roads (splendid ones they are), running through its vast extent are all strictly private, with the exception of the one which cuts across a single narrow corner of the farm.

Approaching the farm from Richmond one passes through the timbered section of which there is 1,000 acres. This timber is practically in its primitive state, and is the habitat of all manner of wild game native to Virginia. Deer are frequently seen grazing with the mares, and one of the boys told me that the day previous to my visit a flock of wild turkeys had flown across the road some fifty yards in front of his auto. Between the timber and the marsh lies the farm, proper, its 3,000 acres of pasture and cultivated land being under one's vision when viewed from either the marsh or the timber. It reminded me of the prairies of Illinois or Iowa, and were it not for the groups of splendid buildings which dot the landscape, this impression would be still more complete. However, no western farm was ever equipped with such superb housing for both man and beast.

Curles Neck's former owner was lavish in his expenditure, while since the farm became Mr. Billings' property, a great many improvements have been made, old buildings giving way to new ones; the entire farm being refenced, etc., etc. It is today truly a "picture place," cared for and kept up like a city park, and after I had viewed it all I said to myself, "Aside from Walnut Hall, that gem of the Blue Grass, I have seen no horse farm so beautiful." Mr. J. E. Colenso, a graduate of the noted Wisconsin Agricultural College, and one of the most thorough and practical agriculturists that I have ever had the luck to meet, is at the head of the farm proper, while Thad Logan, who was so long "Doc" Tanner's able "second," has charge of the horse affairs. I may state, by the way, that Ed A Tipton, owing to his many other business cares, recently resigned his position with Curles Neck, which he had filled so ably, and "Doc" Tanner is again the farm's chief. I doubt if Mr. Billings could have selected for his purposes a better team than Messrs. Colenso and Logan. I call them a team, for while their work is dissimilar, they are in thorough accord, there being no such thing as friction or jealousy between them. "It's my office to produce the provender for the horses and Thad's to deal it out to them," remarked Mr. Colenso, "and after we get through showing you around you will agree that there is plenty of feed for the horses, for aside from our work animals and a dozen cows, everything we raise belongs to them."

ITS WEALTH OF GRASS AND GRAIN.

Long ago every one familiar with the matter learned that horses could not be advantageously raised without plenty of grass, and that the more range provided for them the better they will develop. Well, Curles Neck certainly has a plentitude of grass; while so far as range goes, I found the mares separated in small bands, each of which had 150 acres to graze over. I had an idea previous to my visit that the native, or natural, grass was of the Bermuda type or species, but speedily found that I was in error. Bermuda grass is well enough in its way, but it has one drawback, viz.: it starts very late in the spring and is not ready for pasture when the mares and their foals most need it. Hay and oats are not calculated to produce a flow of milk, and in the early spring there is no feed so essential as good grass. Orchard grass is native to this section, and of this there is an abundance. Mr. Colenso told me that this grass came early and that the mares and colts seemed to thrive on it.

In referring to Curles Neck, some of my Kentucky friends have discussed the fact (?) that blue grass could not be grown there; for that reason (?) they couldn't figure out how Mr. Billings was "ever going to raise trotters." As very often happens, we assume that a thing is true simply because someone has told us that it is—either that, or because we never endeavor to prove it. Well—Curles Neck gives the "show me" answer to the blue grass proposition. In the spring of 1914 200 acres were seeded down to blue grass and the tangible evidence of its thrift is here for anyone who is dubious on the subject and wishes proof to their satisfaction. A good stand was immediately obtained, and I doubt if there can be found in any section (including Kentucky), thicker blue grass of a year's growth. I noted, too, that it has spread along the road sides and sprung up in fields where it was not sown, giving additional evidence that it will thrive and multiply in this region. While in 1915 practically all other parts of the country had an excessive rainfall, in this part of Virginia it was dry and yet the young blue grass did just what it was claimed it would not do—withstood the summer heat without being burnt out. I am not advised as to what previous attempts have been made to start blue grass in other sections of Virginia, but I can attest that the experiment here was most successful.

Standing in a field of alfalfa with Mr. Colenso, he said to me: "We cut five crops off this field this season, and, as you see, there is now over eight inches of new growth. In my experience with alfalfa I never saw it do better."

Later I saw it after it was in the mows and found it to be bright, quite green and crisp.

"We raised forty-three bushels of oats to the acre and good hard oats they were," continued Mr. Colenso, "but I am sorry to say that the wild onions got into them, leaving an odor which unfitted them for horse feed. However, we shipped them down the James to Richmond and disposed of them, meantime buying A1 northern oats, the balance against us in the deal being only eight cents per bushel. I am after the wild onions now, and expect to stamp out the pest within another year, using crude petroleum for the purpose."

I saw in shock what appeared to be a splendid crop of corn, and while the ears were not so large as we grow in the west, the crop seemed to be of good quality.

Before dismissing the subject of Curles Neck Farm crops, I want to say that the estate is located in a very old section of America, relative to our civilization, and that much of the land adjacent to it has been worn out by many years of bad farming methods. Taking everything from the soil and putting nothing back has been a ruinous policy, but Curles Neck provides an excellent example of what may be done in strengthening the soil and bringing it back to a high pitch of productiveness. The farm's supply of water comes from artesian wells, and is pumped from a depth of 700 feet and sent all over the place. Numerous tanks are located in the fields and paddocks, and the supply is amplpe at all times; also it is splendid water, pure, clear and tasteless.

THE HARVESTER 2:01 AND THE BROOD MARES

"I will show you," said Thad, "the finest trotting stallion that you ever laid your eyes on"—and forthwith he led me to The Harvester's box. I am not going to go into extasies or attempt a word painting of the world's champion entire trotter, but will just say that in my opinion Thad spoke well within the truth. I always made the claim that Walnut Hall 2:08½, the Harvester's sire, is, to my way of thinking, the choicest type of trotting stallion I have encountered, and I haven't yet had reason to change my mind. So what higher praise can I accord The Harvester than to dub him, on a larger pattern, a son worthy of his sire? He is almost a perfect model of what a 16-hand, 1,200-pound horse (he weighs 1,215), should be. His neck is superbly crested, giving added beauty to his head, which was always admirable; his body has filled out and he is altogether one grand, big horse, and one that we may be proud to call the champion of his sex. Reproductions of some of my photographs, taken during this visit, will appear in the Christmas Review, and you can then judge for yourself as to whether I have described him accurately. "He is as sound as the day he was foaled and not a pimple on him," remarked Thad, "and while all of you newspaper scriber were going to have Peter Volo 2:02 and Etawah 2:03 shoot holes in his record, there it is, and let them help themselves to it! And don't forget, too, that he has a third-heat race record of 2:02, made over the slow, deep running track at Fort Erie."

I never had the pleasure to see a lot of brood mares in better fall condition than the forty-five which I examined at Curles Neck. They are "fat and saucy," and Thad told me that not a single one o them has been fed an oat or a wisp of hay sinc they were turned out last spring. Her majesty, Lo Dillon, is treated like the balance of the band, an it evidently suits her, for she is looking at her best

Many additions have been made to the brood mare since I saw them when they were quartered at Cas tleton Farm, near Lexington, and I was informed tha five more will be added, making the number an ever fifty. Mr. Tipton was responsible for the selectio of the majority of the mares, and as this gentlema has had a wealth of experience in that line, and i very critical, both as to blood lines and individuality you will appreciate the fact that they are a grand, yes, a wonderful lot. With but two exceptions there is not a coarsely made one, or one possessing unsoundness that is likely to breed on, in the whole lot. As a rule, they are not above medium size, the type aimed at being smooth turned, full made ones, long and deep bodied on short legs—The Harvester is a large horse, well off the ground, and it was deemed preferable to select this type of mates for him rather than the leggy, rangy sort.

THE WEANLINGS

It took us a half-day to inspect the weanlings, of which there are twenty by The Harvester and five by other sires. At Lexington, Messrs. Tanner and Tipton, who had recently seen these Harvester weanlings, proclaimed that no sire ever had a finer lot to show as a season's produce—which claim surely has a firm foundation. I examined them critically and found but one with crooked hind legs—a curb had already developed—and only one that showed an inclination to toe out, and this was not a bad case of "nigger-heel." There isn't what you could cull, a weed or a weakling in the whole bunch, while only one has had a sick moment. After I had gone over them thoroughly I thought to myself: "Here is the answer to the question, Can high-class trotters be raised at Curles Neck, in Virginia?" They can—for before me is the living evidence of the fact.

When we came to Lou Dillon's "latest edition," Thad and several of the caretakers gathered around, and from their eager looks I saw that a quick way to get into a scrap would be to make some disparaging remark about this scion of the blood royal of trotterdom. So I kept very still and let them do the talking while I feasted my eyes on the youngster. The colt is a blood bay, with a star and white pasterns. He is made right at every point, and if he grows according to present promise, will be the best individual of the seven which Lou has brought into the world. He has a lot of character, too, and I always thought that that went with a good horse. The boys say that he can handle his legs like a light-weight fighter does his fists, but, of course, like all the other weanlings, he is just being halter broken. Whenever I see a young aristocrat like this (but, of course, there was never another just like him in respect to trotting speed inheritance), I wonder if it will be my pleasure to witness him or her in great turf triumphs? In this case I am confident that I shall.

Gretchen B., Lou's daughter by John A. McKerron 2:04½, is represented by a bay colt and a nice one it is, although not so attractive as the queen's own. Nevertheless, I'd take it away if allowed to!

When we reached the bay colt (her first), out of Zarrine (4) 2:07¼, daughter of Silent Brook 2:16½, and the renowned matron, Lady Brussells, by Wilton 2:19¼, the boys volunteered the prophecy that this one would be a real star. "He is gaited like his dam," they said, "and is a born trotter." I couldn't call him so highly finished as some of the others, but he is very muscular.

The only over-sized one among the weanlings is a roal colt whose dam is Baroness Evelyn p. 2:12¾, by Baron Review 2:21¼—she is an own sister of that memorable Kentucky futurity winner, Baroness Virginia (3) 2:08¼—but the little fellow trots fast in the paddock and there is a lot of things about him that made me like him. Another roan colt (and another one that I would like to own!) is out of Nelly Worthy 2:25¾, by Axworthy 2:15¼; next dam that most celebrated speed producer, Nell, by Estill Eric. The way extreme speed crops out of the "Nell family" is something astounding (Bingen Silk (2) 2:08¾ is the latest example), and that is one reason why I like this roan colt.

I was especially interested in the bay filly out of Bernice R. 2:07¼, by Dexter Prince, and running back to old Jenny, dam of the peerless Hulda 2:08½, for the reason that I personally purchased the dam for Mr. Billings. She is muscled like an athlete, and is as quick on her feet as a cat. Three sensationally fast trotting mares figure in this filly's pedigree, namely—Bernice R. 2:07¼, her dam, Dione 2:07¼, and the next dam, as stated, Jenny, dam of Hulda 2:08½, who is accounted one of the most perfect mares of all time. I can not recall another one bred for speed anything like this filly.

For beauty and finish I hung the blue ribbon on the bay filly from Violet A. 2:18¼, by Red Medium 2:23¼, and here Thad agreed with me. She has the head, neck and general cameo cut of a Kentucky saddler, but with it a wealth of substance. Another very toppy one is a bay colt whose dam is The May Guy, by Guy Axworthy (4) 2:08¾; next dam Kinglyne, dam of that grand young sire, Morgan Axworthy

[Continued on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

CALIFORNIA'S GARDEN OF THE WILDS.

When our party climbed the last stretch of trail that wound up Sucker Creek and came to a halt on the crest of the mountain range, we had a magnificent view of the Siskiyous—"California's Garden of the Wilds." As Joaquin Miller, the poet of the Sierras, has said, "the bigness and the wideness of this land surpasses man's imagination." We were at an elevation of 6,000 feet. It was late summer, and though the lowlands and the valleys were scorched and blistered, up here the horses waded knee-deep in succulent grass, while acres of columbines waved their plumes of gorgeous crimson. It was as if we looked out over a world of mountains—range piled on range, purple and pine-clad.

And here we were in the midst of one of America's leading big game hunting grounds—in the midst of a territory haunted only by the wild things—a territory so large that the man from the crowded east cannot comprehend it. Those who believe that California has all "been taken up," that it has been "fenced," or crowded into cities and towns, needs only to visit this "Garden of the Wilds" in order to be convinced of their error.

We made camp that first night on the summit of the range, close under the shadow of Emigrant Peak. One of the junior members of the party, who carried a shotgun, had killed a half-dozen mountain "pheasants" during the day, and these made an evening feast fit for a king. As it had been a long, hard climb, we cut short the after-supper smoke and chat, spread our blankets and in a short time were lulled to sleep by the yapping of a coyote on a distant mountainside.

The "boss hunter" was the first man up next morning, waking everybody as he clattered the tin dishes and iron pans in his work of getting breakfast. He had said the evening before that we must be on the big game trail by sunrise, and the "boss hunter" is a man who means what he says; also, he knows why. So we took our hot coffee standing, and before Old Sol had peeped his eyebrow over the eastern range. Our party divided, one portion going east, the other west, and all keeping to the backbone of the range. The timber up in these altitudes is not thick, and the game can be "spotted" long distances; in truth, most shots are at long range. The deer are largely black-tail—"Columbia black-tail" being the local name. Before ten o'clock one portion of the party sighted a herd of four clambering up the mountainside, almost a half-mile away. There were two bucks—just half enough to "go round." The first two men fired a "clean miss." The deer merely increased their jog, the bucks halting now and then and looking toward the ridge as if wondering what it meant. Then the other two came in for a turn, and one buck dropped. The other trotted on with the does. He did not go far, however, for four rifles were talking by this time, and he had no chance to get away.

When we came back to camp late that afternoon, we discovered that the two bucks were the only game secured for the first day. The other party had brought down a "bob-cat," but refused to let it "count." The "boss hunter" was pleased, however, for this was a good start. Anyhow, those two bucks made us all happy when eating time came that night.

Hunting up here on the Siskiyou is considerably different from what it is farther north in the Oregon country. As already stated, most shots must be made from long range, and as the growth is not so dense as that of the Coast and Cascade ranges in Oregon, the hunter has good opportunity to "bring 'em down." The black-tailed deer, though more shy than the common white-tail, has a way of halting on prominences where he makes himself a very conspicuous target. He is a vain fellow, taking delight in holding his crest on high, much like an elk stag. His vanity often proves his downfall. So it proved with over half the number bagged by our party while on the Siskiyous.

Our second day's hunt was much like the first, except we bunched off in "pairs," hoping by this plan to cover a wider territory. This necessitated greater caution, that no accidents might occur. It was agreed at the start—and the "boss hunter" placed especial emphasis on this important rule—that no shot must be fired at any moving thing till it had come plainly into view and could be absolutely identified. If this rule were strictly followed by all hunters there would be no accidental killing of men. The "boss hunter" declared that if any of our party shot another "for a deer," that the guilty one would himself be shot on sight by the first man who got within range. This may have been a bluff, but there was a blaze of earnestness in the old fellow's eyes when he said it. Anyhow, we paid strict attention to the rule, and no accidents occurred to mar the pleasure of the trip.

We found camp the evening of the second day with three more bucks to our credit. The junior member of the crowd, a fourteen year old lad, brought down the biggest black-tail for the day—an eight-point, and a beauty. The boy dropped it with a single shot from a 22-25 special, again proving to the satisfaction of some of us that a big bore is not absolutely necessary, even for big game in the Siskiyous.

But two of us had an experience the next day in which the big bore gun of the "hard hitting" sort proved its worth. The writer, with a single companion, dropped down a gentle slope to cross the bottom of a gulch, intent upon taking to the crest of the ridge on the opposite side. We were half way through a hemlock grove when my companion, who was in the lead, stopped suddenly, his eyes fixed aloft. His face turned pale with terror, and though he spoke no word I guessed that some monster stood in the way.

I looked up, and there, not ten feet away, crouched on a low-hanging limb, a full grown cougar, or "California mountain lion" was revealed. The big cat was ready to spring, with his long, yellowish-white belly lying close against the limb, his ears pricked forward, his nostrils quivering, and his tail swishing slowly to and fro. It is said by those who should know, that the puma, or cougar, will seldom attack a man; but Jim Davis and myself are both ready to swear that the big cat we met that morning would have required very little urging to make the "grand pounce" on us.

The whole affair was over in a short time, and did not contain action or "thrill" enough to have made us a good scene for a moving picture show. Neither Jim nor myself desired to make it dramatic. He was in the lead, and also in better range; so I let him have first chance. Slowly he raised his rifle, and the lion crouched there motionless while Jim took careful aim. It was not one-tenth as lively as a hand-to-hand mix-up with a bear would have been, for the reason that a bear would have been getting busy early in the game. Not so with Mr. Cougar.

The rifle spoke. The lion's body quivered a moment, then rolled off the limb and dropped a lifeless heap close at our feet. Then both of us wished, for the sake of the great cat, that it had put up some sort of a fight. Observe, however, that this wish was expressed after Jim fired the shot. The lion was a beauty, but we lost most of the day's hunt peeling the skin and getting it back to camp.

That day was filled with varied experiences. Two members of the party found a bee tree, and supplied the camp with all the wild honey the crowd could use; two others got on the trail of a bear, came upon an old mother Bruin with two squalling cubs. The old lady was not fat enough to kill, in truth, her cubs would have prevented that anyhow, but the pair of bold hunters were determined to have something for their trouble.

The old bear was busy eating dinner when the hunters approached. She did not wish to be disturbed or interrupted, so gave her cubs a sound spanking which sent them up a tree straightway. Then she raised up on her haunches, opened wide her jaws, and snapping her long white teeth, invited the two men up "for theirs."

"Did you go up and get it?" asked one of the party, when the two were relating their experience at camp that night.

"We started to," one of them admitted. "I took off my hat, and making a dash toward her, thought I would scare the old woman away."

"Did she scare?"

"None to speak of," the hunter said.

Then his companion finished the story: "When he ran toward her flopping his hat, old Mother Bruin dropped to her all-fours, gave a yowl of rage, and came forward on a run."

"We couldn't shoot her, of course—not with them two cubs squallin' their eyes out," both the bold hunters told us, almost tearfully.

"So you left her?" the crowd asked.

"Yes, we left her," they admitted.

That was the only day during our camp on the Siskiyous which passed without at least one black-tail being added to the bag. Obeying the instructions of the "boss hunter," we "laid up" the day following and let the "hoodoo" pass over; then took to the woods again and found luck in plenty, for five more were added to the list within twelve hours.

That was slaughter enough; and what with the jerking, the jaunts here and there, time flew by on swift-purring wings. It came time to pack up for the return home before any of us were aware that ten days had been spent on the Oregon-California divide.

Before closing this epistle from the shadow of Emigrant Peak, let the writer state just a few things "pro and con" about the Siskiyou country. The man who first called it "California's Garden of the Wilds" certainly knew his subject. It is a big, big garden, and the wild things of the forest are about the sole reapers of the harvest. Much of the country is within the broad limits of the Siskiyou National Forests, owned and protected by Uncle Sam. So far as the big game hunter is concerned, this condition is favorable. It is also to the advantage of the homesteader and settler. There is timber enough in these forests to build a hundred cities, and were the ground put in cultivation it would grow enough stuff to feed the armies of the world. The forest rangers estimate that there are at least 30,000 deer in the Siskiyous. Properly protected they will remain in numbers as great as this for many years.

But there is one peculiar thing about the Siskiyous, both as a hunting region and as a mining or prospecting district. While it is a part of California it practically belongs to Oregon, for the simple reason that the only way it can be reached is from the Oregon side. Our party went in by Holland, from Grant's Pass, ascending the Sucker Creek trail to the summit. Another way is to go up from Grant's Pass by Waldo, then by the Diamond Creek trail into the Preston Peak region. Still another way is to go from Medford by Blue Ledge, reaching the hunting grounds from the latter camp. Blue Ledge is forty-five miles from Medford, and reached by a good wagon road; in truth, a daily stage runs from Medford to this California mining camp, which is located on the summit. Most parties prefer to go this way, as it is the most direct, and the easiest, as well as the least expensive.

The disadvantage offered by this country is the fact that the county seat of Siskiyou—Yreka—is on the opposite side of the range, and separated from the big game by an impassable barrier, with no road leading over. Thus if one takes out hunting license, or finds it necessary to call upon the county officials, he must first make a trip by train to Yreka, then go on to Medford or Grant's Pass, and make the real start from either of these places.

Our party was comprised almost entirely of California men. With the genuine pride of Californians, they wanted to hunt on native soil; so they attended to securing licenses before leaving home, and were all ready for outfitting when they reached Grant's Pass. This is the better way. A movement is under way, in fact has been for several years, by which a wagon road will be built from Yreka to Blue Ledge, by which this camp can be reached without going round by Medford. When this is built, Californians can then visit their "Garden of the Wilds" without passing through the "Oregon gateway."

EAR AFFECTIONS OF SPORTING DOGS.

Unfortunately, young dogs are rather liable to suffer from various ear affections, either implicating the flap of the ears or else the middle ear, and not infrequently the internal ear. Nearly all shooting-men are familiar with an inflammation affecting the middle ear, and known as internal canker of the ear—a trouble which exists in a variable degree of severity—and it is only by a just appreciation of this degree of inflammatory action that any prognosis can be given.

It is all very well for the empiric to sell his so-called cures for canker of the ear, but it is quite another matter to effect a cure. Thus, for instance, the middle ear may merely be the seat of a very mild inflammation, with perhaps a sooty-like deposit at the bottom of it, in which case the probability is that the trouble arises through the presence of minute acari — Symbiopes auricularis canis — which causes a great deal of irritation, but not, as a rule, much suppuration; in fact, this dry form of the disease with the sooty-like deposit is significant of this infectious form of ear canker. On the other hand, the middle ear may be severely inflamed, its surface abraded, and a profuse discharge issue from the ear. It is a very foetid form of suppuration, and, without a shadow of doubt, its existence causes the animal a great deal of suffering—more so when both ears are implicated.

The longer the disease exists, the worse the trouble becomes, and it may finally lead to destruction of the internal ear. The animal becomes either partially or completely deaf, and its suffering is intensified as the disease advances. It carries its head slightly to one side, in order to relieve the pain; but shaking the flap of the ear does not usually exist in advanced forms of the disease, as it would cause far too much pain. The writer believes that a considerable proportion of dogs that are affected with canker of the ear are of an eczematous diathesis, or in other words, the animals have a predisposition to eczema, which is a very common disease in dogs—much more so than parasitic mange.

There is something in the theory that when particles of mud and water gain access to the ears such are very liable to set up inflammation, resulting in the production of the disease now in consideration. Any sportsman who has an interest in his dog should pay particular attention to the ears, and directly any signs of ear trouble are observed at once consult a veterinary surgeon, who will advise as to what can be done. Astringent and antiseptic remedies are usually employed, but these are not always successful, simply because they are not applicable to the stage at which the disease has arrived. As a rule, it is a good plan to syringe the ear with equal parts of methylated spirits of wine and water—say twice or three times a week—in order to thoroughly cleanse the ear; but when there is much suppuration it will be better to wash the ear out first with spirits and then with an antiseptic.

Drink Jackson's Napa Soda.

SOUTH AMERICAN SEA OTTER SHOOTING.

We arrived at Punta Arenas on December 4, after a rough passage from Montevideo, much pleased and anxious to get away to the Smith Channel. We had been told of the wonderful shooting to be had there and had made plans all the way from New York. Before leaving, Mr. Kariger, our second mate, had bought two rifles, an army Krag and a .45-70 Winchester, and many arguments we had as to the shooting qualities of the two. I was using a .30-30 Winchester and was quite satisfied with it.

Our first disappointment came in the evening, when Captain Trott came aboard with the news that Captain Smitz, the channel pilot, was unable to go, but that Captain Pritchard, a retired sealer and pilot, had been engaged to take the Ameria through to Coronel. He came abroad Thursday evening, so that we might get an early start the next morning. Two-thirty found us with anchor on the bow, headed for Cape Forward, which we could see some forty miles away, its snow-capped peak showing plainly in the clear morning air. We saw many ducks and geese, but not wishing to stop to secure them we saved our powder for a more favorable time, which came that afternoon.

Not being able to make the next anchorage before dark, we anchored at two-thirty in Glacier Bay. Eating a hasty lunch, we called away the cutter, Yates, Kariger and myself, with two sailors to pull. The bay at the point was about a half-mile wide, dotted with small islands, and ran seven miles to the Field's Glacier.

The kelp surrounding these islands was a favorite feeding ground for the sea-otter which we were told by Captain Pritchard were plentiful here. We determined that each should land on an island and the cutter go on to the mainland shore for a load of mussels for fish bait.

About a mile from the ship I landed on a small island, made my way carefully to the other side and found a little cove, some twenty yards wide and fifty to the bay. It was fairly red with kelp and the shore was lined with fish bones and empty mussel shells.

I had hardly got in position when I heard the sharp report of Kariger's rifle. It seemed I was there an hour before I saw the slightest move, and then I saw a small line of bubbles breaking the water at the edge of a large kelp leaf. The bubbles were quickly followed by the small brown head of an otter, but down it went again, slowly moving through the kelp, and then once more it came up for the last time, being met by a .30-30. I soon saw another, but much farther away and got it with the second shot. A drizzling rain had now set in and I was glad to see the boat returning, Kariger standing in the stern with coat outspread, making good time before the wind.

We picked up my two otter; the first was quite small, but the fur was in prime condition. They had seen no otter but had three fine geese and one seal, together with a couple of bushels of fine black mussels.

We spent the evening listening to the yarns of Captain Pritchard, who had been a pioneer sealer and trapper, and had had many hard fights with the Channel Indians. We got away the next morning at three, and just at noon passed a small island completely covered with young seals. We fired into them and got five. The pilot said these were the last we would see, as the Indians would be working south through the Channel on their summer hunt. We anchored in Muleneux Bay and landed on the mainland shore, taking with us our hound, brought from New York. We expected nothing from her, but had not gone three hundred yards before she had taken a scent and was gone. Up the hill she went, then down by the shore and again up the hill; we made for cover, hoping she would drive her find to us.

We waited some time and presently heard her coming toward us again. They were soon in sight, and before her was the largest gray fox we had ever seen. Kariger fired at about fifty yards; the fox turned on an angle and I fired, bringing it to the ground with one jump. Each taking a leg we carried it to the boat and went aboard, well satisfied for the day. We found the fox to measure five feet and six inches from tip to tip, with fine prime fur. It was tanned in a Santa Clara tannery and made a fine rug. Loud and long were the praises for "Nell," our tramp dog, that evening.

We arrived at Icy Reach the next day at noon and were forced to await the fair tide through English Narrows. Here we found a camp of Indians. Captain Pritchard made arrangements with two of the bucks to take us to a bay the other side of the island, noted for the number of otter to be found. We left the ship at two o'clock and an hour's hard paddling brought us to the bay. Here, by great good luck, we got seven otter and four geese. As it was now six o'clock, although quite light, we launched the canoe and started back, this time with a good four-kuot tide with us. Arrived at the ship, we found all ready to proceed with a fair tide through the Narrows. We gave the Indians all our old coats, blankets and underwear, and as we steamed away could see their chief, attired in an American Line frock coat, a pair of pink underdrawers, and, to top off, an opera hat presented to him by Captain Trott. The next morning we were on the broad Pacific, sorry to have left the quiet waters of the Channel, but glad to be so much nearer the Golden Gate and the end of our voyage.

THE BIG RAINBOWS OF NEW ZEALAND.

Now that our anglers have generally put away their tackle for the season—with the exception of the Waltonians who propose to be ready for steelhead trout in the coast streams beginning December 15, it may be of passing interest to know that the brothers of the angle in far away New Zealand are about to get in touch with their angling season. In that respect we give some wise gossip by "Iron Blue" in a January number of the Weekly Express:

"When angling affairs are in their present state, and the fisherman is handicapped by such conditions as lowest clear water, and a vigorous growth of "green weed," the ordinary method of "wet-fly" may sometimes fail to provide the usual sport; and if a basket of trout is necessary to our happiness, we are driven to a consideration of ways and means. First, of course, there is the scientific way of dry-fly; and if the angler is in possession of a lure fitting the occasion, and is clever enough to put it properly in front of a rising trout, he may in most cases command a measure of success. However, the rising trout is not always evident, and not all of us are clever as those others; those dry-fly exclusives, who, hall-marked by india-rubber knee-pads, walk and stalk, or kneel, and steal upon their quarry, according to the rules of the art. The position is this: Except in the dusk or at night, we cannot catch the desired number of trout with wet-fly. We are not skillful enough to manage "a floater," and under the circumstances "minnow" is beside the question; therefore bait-fishing of some kind becomes the only way.

Now comes the consideration of bait. And putting aside the loathsome, vicious-looking centipde, which they call a "creeper," as unspeakably horrible, there are three baits that we may use in a sufficiently sporting water manner. Such baits are the clear-water worm, the grasshopper, and the locust or cicada. Dragon-fly fishing, with the small red dragon-fly "Xanthagrion Zealandica"—heaven save us, what a name—is a thing apart. But, by the way, it may be said that this also is a sporting sort of method; and akin to the blow-line fishing with a Mayfly, which is customary on the Irish lakes. In this way, one must use a light line, with a 3X or 4X cast, and about a No. 2 hook—by the new numbering—and get the wind behind you in casting. The proper place for this method is a lagoon or a big backwater, where the dragon-fly nymphs are crawling up the grass or rushes at the edge, and hatching into their perfect form. Recent experience has shown me that it is easy to distinguish the rise of a trout at a dragon-fly, from his usual pursuit of a dun or a spinner. Instead of a quiet ring where he has taken the fly, there is a wild splash, and perhaps a trout leaping from the surface, in a desperate endeavor to get on terms with Xanthag—h'm, I give that dreadful name a rest. Given the lagoon, and trout rising at dragon-flies, one proceeds to search among the rushes at the water's edge, and to surprise—as little as possible, I trust, for the sake of humanity—some of the "nymphs" which are hatching out. Afterwards the proceedings must necessarily be more forcible; but carefully placed upon the hook, the luckless nymph is cast across the lagoon. The breeze will help the ensuing drift among the ripples, and presently a heavy plunge will make the angler acquainted with some worthy trout.

The "clear-water worm" is quite a scientific way, and widely apart from the worming in flooded rivers, where a solid cast and a "sinker" are the most important portions of the kit. When rivers are at their lowest, and the trout are sly, then is the opportunity for using a worm almost in the manner of a fly; and for casting it upstream upon the lightest tackle, in momentary expectation of the gentle pull which may mean a fish. For this way a rather long, whippy rod is the best, and after an upstream cast the bait is allowed to drift back to the angler, passing by the other side of some big rock or snag, or under the shelter of an overhanging bank. A bag of properly prepared worms must be included in the outfit, and by keeping them in moss or grass for a few days before using them, these worms are made much tougher, and less likely to flick off the hook. Many people use a Stewart flight of three hooks; or as an alternative, a "Thompson tackle"; but all considered, a single middle-sized "sneck" bent hook is the most suited to the purpose. More fish may be missed when a single hook is used, but again more fish will take hold of a bait that is less evidently armed than the "Stewart" arrangement, which is far more killing in colored water, and the usual upstream casting, after the line has been extended to the required length. The rod point is kept as much as possible over the traveling bait, and occasionally the line is lifted or lowered while it goes down. A previous knowledge of the water, and the favorite haunts of the trout, is a very great help when the angler is using the clear-water worm.

Said a "musterer" of my acquaintance: "Last week when we were away up the Rangitata gorge, we saw a great fish behind some rocks, and we managed to get him out." The "managed to get him out" part leaves a whole wide space for conjecture, but no matter, only I am betting they did not get him with a fly. Still, in spite of that, the fish weighed fourteen pounds, and "inside him was a lump of grasshoppers nearly as big as my fist." If it was required, this was "proof positive" that grasshoppers are esteemed by Rangitata trout, and the rule holds good elsewhere; in this case, not only in low, clear water, but in any sort of a stream which is not actually in flood. Here is a way of bait fishing that is more sporting than the rest, for "first catch your hare," in other words, capture the wily "hopper" who has an excellent idea of looking after himself. You may hear him chirruping among the grass by the riverside, but if—having rigged up a tackle specially designed for his reception—you go to look for him, it is almost a certainty that he has removed himself to some less frequented spot. Then he is heard chirrupping again in a new place, and haply while going in quest of him, you may rouse and contrive to capture one of his friends. The easiest and surest way of landing trout with grasshoppers is, first catch an active kind of boy; next offer him largesse, and set him to catch the hoppers at so much a dozen; and then catch the trout. This way will save one a world of trouble; it will save you the unpleasantness of dabbing your hand upon the gorse prickles while in eager pursuit of an insect who seems to vanish on sight, and also it is a saving of time.

To angle most successfully, two grasshoppers must be transfixed on a No. 9 hook—the fateful number 9, which by the way appears to be the ordinary size of the New Zealand boot—and after they have been cast gently upstream or across, the line is gradually recovered, perhaps, during its passage a sudden check may tell of a trout, but if the angler strikes instantly he will probably lose his fish. Otherwise, when experience has taught its lesson, he will count slowly up to five or six, or allow an equal time before fixing the hook. In deep water, a couple of split shots may be squeezed on the cast to sink the bait; but usually this is not necessary. The cicada is managed in much the same way, and it is a still more killing bait, though it is even more difficult to procure than the grasshoppers, and a careless cast will surely flick it off the hook. It may be noted that the cicada is a lure which seems acceptable under almost any conditions. Come rain, come "fine," you can still find a fish; and with a fair knowledge of bait fishing, the angler is not likely to go short of "luck."

FLY CASTERS' ANNUAL BANQUET.

The annual banquet of the San Francisco Fly Casting Club at a downtown restaurant Thursday evening last week about takes precedence in the history of the many unique and pleasant gatherings of the jolly anglers during the past twenty years. After an appetizing menu was disposed of, the annual business meeting was held. The old board of officers was re-elected by acclamation—Frank J. Cooper, president; T. C. Kierulff, first vice-president; F. A. Webster, second vice-president; J. F. Burgin, W. F. Bogart, Walter D. Mansfield, Stanley Forbes and John D. Siebe, directors; Paul W. Shattuck, secretary-treasurer.

Walter Mansfield, on behalf of the club, presented President Cooper with a handsome and valuable loving cup, a replica of the beautiful trophy cup prizes awarded at the recent exposition international fly-casting tournament. Colonel Paul M. Nippert was the recipient of a novel watch fob, a token that many anglers have and all true anglers desire. Colonel C. G. Young, J. F. Siebe, Col. J. F. Burgin and others were also on the receiving line for appropriate mementoes from their fellow members.

The medal winners for the season of 1915 were: Walter D. Mansfield, F. H. Reed, W. J. Davis Jr., Harry A. Thomsen Jr., E. A. Rogers and J. Springer. These medals consist of a top and tail piece of gold, the member's class in the different events being shown by the bar furnished, viz.: champion class, a gold bar; master, a silver bar, and expert, a bronze bar. The top and tail piece medal being awarded but once to a winner in the championship class—subsubsequently winning series being recognized with appropriate bars.

The winners in the various events during the season of 1915 were:

Gold bars—F. J. Cooper 2, ,W. D. Mansfield 3, W. J. Davis Jr. 3, H. A. Thomsen Jr. 1, E. A. Rogers 2, J. Springer 1. C. H. Kewell 3, T. C. Kierulff 1, F. A. Webster 4, C. G. Young 2, C. H. Gardner 3, J. J. Burgin 4, Stanley Forbes 4.

Silver bars—Reed 3, Davis 5, Thomsen 3, Rogers 2, Springer 2, Kewell 4, Dr. W. E. Brooks 3, Young 1, Gardner 3, Burgin 4, Forbes 6.

Bronze bars—Davis 3 (2 for 1914), Rogers 3, Springer 2, Cooper 1, Kewell 2, Brooks 1, Kierulff 3, Webster 3, Young 1, Gardner 2, Burgin 3, Forbes 2.

There is a big run of salmon on in the Sacramento river in Tehama county and also in the Shasta river. Floyd Smith, a Chico resident, holds the record for the biggest salmon taken out of the Sacramento river so far this season—a 65-pounder landed last Sunday. Salmon can be caught now with hook and line only, or by means of a spear. The individual limit is three per day. In some of the shallower branches of the Sacramento river, where the salmon are going up stretm to spawn, nearby residents are taking many fish.

* * *

The open season in this State on black bass, Sacramento perch, sunfish and crappie, will close December 1.

At the Traps

Orange Belt Traps.—President C. E. Groat of the Vernon Gun Club was the high man November 21, with 95 out of a possible 100. J. F. Dodds was runner up. Shooting from 20 yards, he broke 94. Fred Gruell of the Hoegee company was third with 93.

The free turkey shoot was a success. Thirty-one shooters lined up with distance handicaps for the shoot. Some fine scores were made and sixteen beautiful birds were distributed among the winners.

However, those who did not win a Thanksgiving bird will not go without a fine dinner. The winners invited the losers to their homes for a dinner on Thanksgiving day. So every one went away happy.

Following are the scores:

H. A. Perk shot at 75, broke 55; J. A. Mitchell 50—39; Linderman 50—30; William Pugh 100—87; A. W. Bruner 110—97; R. J. Keelor 110—91; C. P. Mandaville 100—70; R. L. Hall 185—161; J. F. Dodds 185—175, Fred Gruell 100—93; J. C. Percival 100—64; J. M. Treus 145—117; A. N. Van Nest 60—52; B. A. French 60—40; E. T. Wheeler 50—32; H. Adams 50—42; Dr. J. E. Davis 70—62; C. B. Shipley 75—64; George J. Towsing 50—22; W. T. Donehety 115—99; C. C. Babcock 50—30; C. E. Groat 100—95; Mrs. C. E. Groat 50—30; J. E. Edmonson 50—32; C. Norton 70—45; Schadwell 50—43; Realixon 50—34; J. W. Trout 20—18; W. G. Braner 25—17; H. A. Sullivan 50—46; William McLean 25—13.

INTERSTATE ASSOCIATION MEETING.

The annual meeting of the stockholders of The Interstate Association For the Encouragement of Trapshooting will be held on the second day of December, 1915, at 10 o'clock in the morning, at the office of the association with The Corporation Trust Company, 15 Exchange Place, Jersey City, New Jersey, for the purpose of electing a Board of Directors, receiving and acting upon reports of the officers, and for the transaction of such other business as may properly come before the meeting.

In accordance with a resolution adopted at their annual meeting of 1912, the directors of The Interstate Association would be pleased to have the president, or some duly accredited representative, of the several State Associations and prominent gun club organizations, attend their annual meeting in 1915 and give them the benefit of their views on trapshooting.

MISLEADING RUMOR CORRECTED.

A recent communication from the Remington Arms-Union Metallic Cartridge Co. to the Breeder and Sportsman states:

"In view of rumors which have gained circulation to the effect that this company has changed hands, we feel called upon to advise that the 'Remington Arms Co. of Delaware,' whose plant is located at Eddystone, Pa., and which was sold to the Midvale Steel and Ordnance Co., was merely a subsidiary company organized solely for the execution of a large order for military rifles. No sporting arms have been manufactured at that plant nor was there any intention to manufacture such. It was this plant only that was sold to the Midvale Company.

Tre Remington Arms works at Ilion, N. Y., the Union Metallic Cartridge works and the new Remington Arms works at Bridgeport, Conn., and the Remington Arms-Union Metallic Cartridge works at Windsor, Canada, have undergone no change whatever and none is contemplated. These works are still being conducted under the same name, same ownership and same management as heretofore."

HUNTING NOTES.

The outlook for full game bags tomorrow for duck hunters who burn powder at nearby shooting resorts is not of an overly encouraging nature. Best results will probably be had in the Suisun, Sonoma and Petaluma marsh sections, northerly or northwesterly winds prevailing. While there are some northern ducks in this section at present, it is very evident that the main migration of wildfowl is dallying on the journey south. Advice from Puget Sound and other northern points indicate cold weather and state that for the past ten days ducks and wild geese have been swarming southward in great flocks. Even so, the aerial voyagers have only appeared here in small bunches. The main flocks of the birds are no doubt enjoying life along the coast rivers and lagoons, in the big lake at Big Meadows and the rice field and swamp country of the upper Sacramento valley, where feed and fresh water are plentiful. Nor will the birds congregate in our marshes and about the bays and creeks until the winter storms make them change up country boarding houses. It is possible, however, that stormy weather early this week up north may change matters considerably.

The upper Sacramento valley swamp and overflow country is rapidly being taken up by gun clubs—or reclaimed for cultivation. That section is now regarded as one of the best duck shooting districts in the State—barring the Imperial valley. The latest gun club speculation reported is the intention of thirty Lodi nimrods to secure shooting rights on 1,000 acres of rice fields in the center of fine duck hunting ground near Biggs. An investigating committee of Lodi-ites was on the ground early last week. Limit strings of mallards brought back gave credence to the enthusiastic reports of the scouts.

The Last Chance Gun Club members have been shooting on their fifteen-acre claim in the center of the Wild Goose Club's shooting domain. Deputy sheriffs were guarding the grounds of the Wild Goose Club Sunday. Hunters of Butte county state that they have known of the unpatented swamp land for years, but as long as the old Gridley Gun Club was in existence they were allowed to hunt. With the passing of title to the Wild Goose Club the independent gunner was left without a chance to get any duck shooting, hence the present attempt to secure the unpatented tract of fifteen acres.

Geese are plentiful up Rio Vista way. About the only market shipments last week came from that section. The birds are said to be plentiful on the Hansen tract.

Canvasback and bluebill ducks are fairly plentiful in Suisun and San Pablo bays, but not nearly as numerous as these varieties will be after a heavy spell of weather "up north." The "blueys" are in the majority at present. The first market shipment of "cans" came in here Wednesday—twenty-five birds sent down from McGill's. This batch was shot on the old preserve of the Alameda Gun Club, a famous canvasback producer in past seasons.

Down the San Joaquin valley fair sport has been the luck of Newman gunners since the season opened. The old Gustine duck shooting ground has been a fair producer only. At Badger Flats, between Volta and Westside, there has been enough water in the ponds to offer some decent shooting. The Westside country is, and has been, too dry for the birds to waste any time there. The Raisin City Gun Club's ponds near Dos Palos produced forty-eight limits of ducks for fifty-two members on the opening day. The balance of what has been a grand duck shooting section down that way has been deserted by the birds—no water. The winter rains, of course, will create ponds here and there and bring in more or less ducks, but patrolmen in the vicinity of Los Banos will keep off the trigger pullers.

Good duck and goose hunting conditions are anticipated by Fresno hunters this season. Stormy weather is now the hope of the Raisin City trigger pullers. The long dry spell, it is reported, has caused the ducks to stay in several small lakes down the valley, mostly controlled by gun clubs. A heavy rain will scatter the birds and give better shooting for the individual gunner and also send many birds from the bay region back into the San Joaquin valley. In these days of high-power machines distance does not cut any grave figure in reaching a good shooting ground.

* * *

Valley quail and mountain quail are plentiful this season in many parts of this State. Hunting conditions, however, are not of gilt-edged quality. Although the slight rainfalls bettered conditions temporarily, the dry ground and dusty cover need the attention of Jupiter Pluvius. Despite this quite a number of local devotees of upland sport have managed to enjoy good shooting in the nearby bay counties' foothills and also at distant points.

SALT WATER ANGLING.

Good catches of large-sized striped bass were made at different resorts by the Sunday delegation of bass chasers recently. Adam Hackmeir, Louis Radigan and several other local rodsters tried Gallenas creek, near the brick yard, above San Rafael. The venture proved a correct guess, for a number of fair-sized bass were caught.

Louis Gotthelf, Howard Vernon and others pinned their faith on the fishing grounds in Napa creek, near the railroad drawbridge. Gotthelf's 12, 15 and 18-pound striped bass was the high hook exploit for the day at that point. One fisherman's stout tackle was cleaned out by an unseen Leviathan claimed to be of huge proportions. He was fishing to form, for the largest fish always escape.

Among the Wingo visitors there was a catch of over 20 fine bass distributed a fortnight ago. Most of the fish were taken in Appleby bay, down the creek about twelve miles from Wingo station. The wise fishermen are looking for the seasonal run of large striped bass in the sloughs and creeks of that section. Indications point to a keen and persistent foray after big bass tomorrow.

One of the San Antoners landed a 40-pounder last week, a Sunday visitors captured a 12-pound bass.

Across the bay, along the San Pablo shores fair catches of bass are reported to have been made daily during the pleasant weather. At Port Costa and up to Martinez good fishing has prevailed. The Fish and Game Commission deputies have been active along Carquinez straits and have pinched a number of wharf fishermen for operating without a fishing license. Good bass fishing has been in vogue also at South Vallejo.

Rem-UMC Notes.

Fifty enthusiasts faced the traps of the Middlesboro (Ky.) Gun Club recently. Wm. Archer, shooting the perfect combination of Remington pump gun and Nitro Club shells, won high amateur average with a score of 93x100.

EXPOSITION SHOW.

The holding of the Exposition show at the Marine Cafe, on the "Zone," was a wise move on the part of the officials in charge. Entrance to the exhibit during the daytime will be free, a charge of 10 cents will be made evenings. The show will open Monday and close Wednesday night.

The daily press notices of the show have been a series of marvelous announcements of which the following is a sample:

"San Francisco has had dog shows for more than a score of years, but in numbers and in quality of dogs the coming exhibition of canines will eclipse the classiest event ever held on the Pacific Coast.

The entries represent 160 individuals and kennels. Never before have so many women appeared to exhibit their favorites. Forty-four members of the gentler sex are represented in the entries, and among these are many notable society women."

The reiterated statements that "600 blue blooded" dogs will be shown, is in line with the usual exaggerated preliminary press notices for our bench shows. Four hundred dogs is nearer the mark. At that the show will be a good one and worth visiting.

A PLEA FOR THE GREYHOUND.

The established prejudice against greyhounds as pets appears to have deep roots. How very seldom one sees them in the home. How much too often we meet some blue-blooded aristocrat of this breed playing the ignominious part of "lurcher" behind a gypsy caravan.

The deplorable truth of the proverb, "Give a dog a bad name and hang it," is perhaps too evident in the instance of greyhounds.

"Bad-tempered," says one careless witness; "cowardly," asserts a second; "greedy," a third; "a thief," a fourth; and so on, till the last shred of character is torn to tatters. Only set the ball well rolling, and it will gather some mud.

To rebut such charges in the face of so general a consensus of opinion is not easy, for the greyhound has truly in these later centuries lost his old prestige as a man's companion. Time was when hawk and greyhound were more important matters in the life of an English gentleman. Good old leisure flourished, and humanity had more dignity even in its sports.

Now to a greyhound is alloted a place "below the salt," and not at its master's feet in a dining hall. In point of fact, his master seldom sits down. And the pity of it is that he has lived too long amongst hirelings and menials. For he has suffered accordingly the injustices and degradations which such as they deal out to "them brute beasts," so often infinitely nobler in disposition and cleanlier in their ways of living than the "Christians" who arrogate to themselves the superior merit of having "souls."

From his babyhood a greyhound is now "walked," too often indifferently fed—a matter which does not encourage honesty. From his adolescence he is "trained" or "showed," also an education which does not encourage affection or demonstrative characteristics.

Usually, these poor pups lead a life of dull routine schooling and monotonous exercise on hard roads—things which help to crush a good deal of spontaneousness and gaity out of them. Life has a sad outlook from the beginning for most greyhounds, and they do not remain young or playful long in the round of work and drudgery. Given a similar life to a child, what would he become?

An ordinary greyhound seldom hears a kind word, knows nothing of gentle caresses, and tit-bits and dainties, such as house-dogs receive, are unknown to him. He is kenneled by men whose business it is to see to his exercise and food, groomed by rough boys who pull him about in the intervals of their task, while he patiently submits to such insults with the calm resignation born of hopelessness.

Yet those who have tested the greyhound's character in the house find many qualities which endear him to his owners. He is most sensitive to praise or blame from his superiors, for he undoubtedly recognizes the "classes," and distinguishes them from the "masses." And he has sweet gentleness which disarms criticism and roughness of speech. In a room he has the additional merit of a short coat and quiet movements. Also he has the advantage of there retiring into a remote corner and packing himself into an extraordinarily small space.

The insult of "thief" so frequently attached to his name has very little foundation. Given an education in the house, he is a strictly honorable gentleman. We have one who will guard the braakfast bacon, even in the fender, from the approach of any other dog, and any young greyhounds reared at our hearth will sniff at the approach of luncheon or dinner, but rigidly and loyally keep their distance. We leave our pups with the tea-table fully equipped with cakes, and we have never had to reproach for theft.

It is asserted of greyhounds that those of the present day are wanting in "life"; otherwise, I conclude, animation and "go." Who can wonder at this stigma on an ancient breed, lost in the remote days of antiquity—a breed now maligned and ill-used beyond any other? He appears to be past excitement—merely dutiful. In fact, the point of conscience and duty, I believe, is developed abnormally, and those points, we know, do not conduce to verve or originality.

MARQUE AT CURLES NECK FARM.

[Continued from page 8]

2:17, and an own sister of Bingen 2:06¼. That breeding is pure peaches and cream, eh? but here is another pedigree that is just as attractive. Its owner is a bay colt from Memories, an own sister of Todd 2:14¾! Just roll that over your tongue, will you? I took a good many longing glances at this fellow, for while he is no better an individual than a lot of the others, just think of the chance he has to become a great horse!

We now come to a trio whose dams are all by Prodigal 2:16—a horse who, during his lifetime, was not sufficiently appreciated, but because of the showing of his daughters has at last come into his own. Louise Wilson 2:10¾ has a bay filly, and Myra Prodigal 2:20¾ a bay colt, which, to my way of thinking, is about as good a prospect as the lot includes. The brown filly whose dam is Kingston Belle 2:10¾, has three white legs and a large star. In my notes I said this is "an extra nice filly"—and surely she is so.

Among the brood mares that Mr. Billings retained after using them, either in wagon exhibitions or under saddle, is the California-bred daughter of McKinney 2:11¼, Berta Mac 2:08. "Doc" Tanner always claimed that with few exceptions Berta had as much "lick" as any trotter he ever drove. She is a large mare and rather plain, and while her colt, a good-sized bay fellow, is not dandified, he has a good set of legs and is put up right. Baracalla, by Barongale (4) 2:11¼—Caracalla 2:10, is represented by a brown filly that is very attractive. I selected her as one that I would like to tie to on account of her breeding, which is of the best, and because she is almost faultless as an individual.

Many horsemen will remember Yo San, a mare that Mr. F. G. Jones, of Memphis, Tenn., used in the matinees, and because of her speed entered several times in the Grand Circuit stakes. She was not only very fast, but was considered individually one of the handsomest of trotting mares. Her filly, a brown, and, like its dam, slashed up with white, will make a very beautiful piece of horseflesh. They told me that she was growing fast, and for that reason was a little awkward, but that she was a genuine lot trotter.

Thad regards highly a bay filly from Baroness Jay 2:29¼, by Jay McGregor 2:07¼. He is at present working a yearling sister of this filly, and pronounces her one of the best trotting prpospects he ever handled. She is full of vim and ginger, but can step fast and do it right. Baroness Axworthy (3) 2:29¼, by Axworthy 2:15½, dam Erirange 2:21 (dam of Colorado Range (3) 2:08¼ and Zobedah 2:15¼, trial this fall in 2:05¾), by Prodigal 2:16, is responsible for a classy looking bay colt—Erirange herself won the classic two-year-old Lexington stake in 1900, and is proving a remarkable dam of speed. Gertrude Dillon's (2:10½) foal is a bay filly with white markings, a clean-cut, full-made one of good size. Her grandam, Biscari, is the dam of eleven.

In going through the pastures I came across Caracas, by Bingen 2:06¼, out of Houri 2:17, the mare that has repeatedly been pronounced by connoisseurs the finest type of standard-bred brood mare living. I knew her well when she was owned at Dromore Farm, St. Claire, Mich., and was mighty well pleased to see her again. When purchased for Curles Neck she was in foal to Justice Brook (3) 2:08½, the ex-champion two-year-old trotting colt, and the produce is a beautiful bay filly with no markings. Caracas has always thrown good individuals, and this one is up to her highest standard. Baroness Virginia (3) 2:08¼, to whom I have referred previously, dropped a bay colt by Silent Brigade (2) 2:10¾. Mr. Tipton told me to have a good look at this one, for he thought well of it. Well—it's a nice colt, but to my way of thinking, not so prepossessing as the black filly by the same sire and from Nonnie, by Moko. This one is a show filly, and no mistake, and ranks with the Violet A filly in respect to beauty and finish. The last of the weanlings to be accounted for is a bay filly by Justice Brooke, dam Clara Toddington, by Toddington 2 20. Her caretaker wanted me to see her step, and so moved her at the end of the halter, and sure enough—she can "mock a trotter."

When it was announced this fall that Mr. Billings would sell in the Old Glory sale all of his young stock, reserving not even Expressive Lou (2) 2:15, daughter of Atlantic Express 2:07¾, and Lou Dillon, many expressions of regret were heard due to the fact that it was the impression that Mr. Billings was going out of the breeding business. The fact of the matter is, that he is just going into the breeding business, and, as previously stated, will make additions to his band of brood mares. Mr. Billings has never raced horses professionally, and never will; so, you see, the product of Curles Neck, without reservation, will be sold. If he retained even one or two of the youngsters from his favorite mares, the impression would be given that the choice ones were being held out; but now that all will go to the sales annually the public is given an opportunity to secure at its own figures the entire crop, absolutely without reservation. Then, too, the fact that they will be sold when weanlings will give the buyers an opportunity to secure fresh, untried colts and fillies that have never been subjected to training or trotting, and, as a consequence, are sound and uninjured.

Five yearlings and two two-year-olds will accompany the weanlings to the Old Glory, viz.: a bay filly by Guy Axworthy (4) 2:08¾, dam Myra Prodigal 2:20¾; roan filly by Peter the Great 2:07¼, dam Baroness Evelyn 2:12¾; bay filly by Axworthy 2:15½, dam Kingston Belle 2:10¾, and chestnut filly by Axworthy, dam Lucille Marlow 2:09¼, by Prodigal; also the bay filly that I mentioned, whose dam is Baroness Jay 2:29¼. One two-year-old is by Peter the Great, dam Adioo Dillon (dam of Dillon Axworthy (3) 2:10¼, etc.), by Sidney Dillon. Thad worked this one a quarter in 39 seconds as a yearling. The other is Expressive Lou (2) 2:15, by Atlantic Express 2:07¾, dam Lou Dillon 1:58½. The Axworthy-Lucille Marlow filly is a beautiful thing, and I believe will bring a big price at the sale.

EXPRESSIVE LOU (2) 2:15

William 1:58½, Mr. Billings' latest acquisition, and Expressive Lou (2) 2:15, were quartered at the farm when I reached there. William was in fine fettle and the sensational filly was beginning to fill up and take on flesh. "Thad" gave me the following particulars as to her work:

"I broke her in the spring of 1914, when she was a yearling, but following instructions, didn't step her a quarter better than 40 seconds. Trotting came natural to her and she never needed much weight and no rigging. I intended to work her regularly the past spring but you know I was taken sick and was laid up for over two months. So she had had only jog work when we sent her to Jim Snell on the second of June, and in just ninety days from that time she took her record of 2:15, with the last half in 1:06; soon after, as you know, working a mile in 2:13¼ at Lexington. Snell calls her the most remarkable trotter he ever handled, considering how quickly she learned to carry her speed and the fact that she was growing so fast."

At Lexington Snell himself told me that he believed Exppressive Lou had a chance to become a sensational trotter if she was brought along with that end in view. He thought, too, that he could have driven her in 2:10 this fall, but stated that he let up on her after she had taken her record. "She is so good-headed," said Snell, "and trotting comes as easy to her as running does to a thoroughbred." She should be one of the very best futurity candidates for 1916 for she has not been overworked and has so many of the qualities that insure speed and class.

HUMFAST AND TRAMPRIGHT.

And while on the subject of fast records and notable workout miles at Lexington, a pair of performances by a couple of trotters got by the same horse make a vivid picture to all who saw them, writes H. T. White in a recent number of the American Horse Breeder.

Humfast (3) 2:09¾ and Trampright (4) 2:08¼ are the two who linger in my memory. When an apparently unbeatable three-year-old like Mary Putney comes along and dominates the stakes for its age in such impressive style that every eye is of necessity fastened on the star of the season, some others that, under ordinary circumstances, would be hailed as topnotchers inevitably are overlooked. "Nobody remembers the name of the second horse in the derby," is an old saying, but a true one, and it is, in a measure, to overcome this tendency of the public to see only the nag that is first past the post that I have something to say about Humfast and Trampright.

When Mary Putney set the record for three-year-old fillies at 2:05½ in the second heat of her winning race for the Kentucky Futurity, she naturally was the one big figure under the spotlight, and, in the shadow of a world's champion, other horses, not having the center of the stage, are overlooked. In that 2:05½ heat, the second horse, beaten but a little, was the filly, Humfast. She had occupied a like position at the end of the opening mile, coming from behind in the last sixteenth, and for that reason I never took my eyes from her during the heat that established a new record for fillies.

When the field scored down, Tom Murphy nodded for the word at least four lengths back of the leading horse. Humfast, a model of deportment, trailed along, and, while the public gaze was fastened on Mary Putney, I took note of all Humfast did. And her work was worth watching. It was evident from his willingness to take the word, although handicapped by a poor position, that Murphy—not believing his filly capable of beating the flying leader—was laying his plans solely with the idea of making sure of the $2,000 second money. He made no move to join the other colts until the home stretch was reached, and, although the pace at that stage of the contest was exceedingly fast (as it had to be to make the mile a record one) Humfast overhauled the others hand over hand, and, when Mary Putney flashed under the wire in 2:05½, Humfast was but a length or so back, easily defeating all but the winner.

After the race, the conversational buzz and the subsequent cheers were all expended on the new world's champion. Everybody overlooked Humfast except a few critical folk who had timed her apart from the winner. Most of the watches of this gentry registered 2:05. That night I talked with Murphy, who was all smiles at the mention of the filly's name. "I timed her in 2:05¼," he said, answering my query, and, while he did not say so, I am confident he believed the filly capable of still greater work had he asked her for it. And then the talk drifted to Trampfast, the filly's sire, with whom Murphy won the junior division of the Kentucky Futurity in 1907, in 2:12¼, a world's race record for two-year-old stallions, and to the fact that Murphy had in his string another Trampfast, the four-year-old stallion, Trampright.

"I am going to work him a good mile during the meeting," said Murphy. "He's a good colt." Knowing Murphy, and noting his words, I kept an eye peeled for that trial, and, when it took place, the showing, in the speed line, was even more than I had anticipated, as after going easily to the half in 1:04, the colt increased the pace perceptibly, stepping the third quarter in :31. That brought him to the three-quarters in 1:35, and the watch holders naturally thought that was the best speed on tap. But it wasn't, for, in the home stretch, Murphy called on Trampright for more, and the colt handed out the goods in sensational style by stepping the final quarter in :29¾, the mile in 2:04¾.

We had seen or heard of some wonderful miles this season by eligibles to the rich purses of 1915. Peter Mac's heat in 2:03½, the first half in :59, headed the little list of coming stars, and following it were the 2:04¼ heat of Mabel Trask 2:14¾, at Hartford, and the 2:04 trial of Ima Jay 2:13¼, at Detroit. There had been talk that Murphy, the star reinsman, never would be able to get that sort of tools for his 1916 campaign, but here were a couple of youngsters that showed 2:05 or better, were sound, well mannered and sired by a colt champion. Murphy was willing to talk about Humfast and Trampright, in fact, was enthusiastic about them, but had nothing to say about next year, except the enigmatical utterance, "Oh, I don't know whether I have anything or not."

Mowever, that is Murphy's way. Until a possible gem of purest ray has withstood the acid test, he does not prognosticate or laud. But, in the case of this Trampfast pair, I opine he has a fixed opinion which it would take a lot of evidence to remove. At all events, the world of horsedom is a unit in the belief that, when Murphy shows you a 2:05¼ three-year-old in a race and a 2:04¾ four-year-old in a public workout, he has suitable weapons for the most desperate frays that 1916 turf annals will chronicle.

And here is how the experts figure the situation: Murphy absolutely does not string his horses to the limit except when they are going for the money. True, Humfast was after the coin in the Kentucky Futurity, and she got the part Murphy was after—the $3,000 second money. Moreover, she took down that particular persimmon in commanding style, coming from behind, and at the end beating all but the champion that was out in front in the simplest manner possible. Similarly, Trampright's mile is analyzed as not revealing all the stallion had in the speed line. The last half in 1:03¾, final quarter :29¾, was done without stretching him to the last ounce, they argue and believe. Hence, taking into account the natural improvement in well bred and extremely fast young trotters that have not been asked for every last thing they could do in colthood, Murphy's hand for 1916, so far as the big purses are concerned, looks a little bit better than that of anybody else, since he has two aces to the other fellow's one—and, if all the tales about the Canadian trotter, Vanko 2:06¼, whom he recently acquired, are true, the man from Poughkeepsie may have three of them.

TOM GAHAGAN'S VIEW OF MISS PERFECTION.

The splendid race trotted by Miss Perfection was the surprise of the race, although she gave an inkling of her class when she trotted two workout heats during the recent Lexington meeting in 2:06½. However, Spriggan, winner of the similar stake in June, was supposed to be a 2:05 trotter, and Axtien had beaten Peter Scott a heat at Lexington in 2:06¼, so it looked like the MacKenzie filly would be lucky to get a place in the money. Axtien, however, was dead lame and never was a contender, while Miss Perfection simply outtrotted Spriggan, who finished third and never was dangerous in any of the three heats.

Miss Perfection was bred by Senator Bailey at his Lexington farm and was purchased by Havis James, acting for R. J. MacKenzie, during the trots in the fall of 1912, when she was a yearling. She was not raced as a two-year-old, but Charles DeRyder, who succeeded James as the trainer of the MacKenzie stable, brought her to the Grand Circuit in 1914, where she raced fairly well, taking a record of 2:09¼ in a losing race at Detroit. Last spring she was taken sick at Pleasanton and nothing was done with her for several weeks, the let-up preventing her starting at the exposition June meeting, although she rounded to sufficiently to work in 2:10¾ before being shipped east to the Great Western Circuit, where DeRyder raced her successfully the past summer.

Miss Perfection is bred to be a fast mare, being a daughter of the triple futurity winner, General Watts (3) 2:06¾, for three years holder of the world's record for three-year-old trotters and a speed sire of merit since being retired to the stud. Her dam is Sue Fletcher, by Tregantle 2:09¼, a very fast trotter and sire of such fast performers as Brace Girdle 2:04¾ and Airdale, whose yearling record of 2:15¾ is the best by one of the age. But four years old and still eligible to the stakes, Miss Perfection should be a valuable mare for DeRyder the coming season.—Western Horseman.

Drink Jackson's Napa Soda.

THE FARM

DRAIN WET LAND.

Much Farm Land Should Be Drained to Secure Maximum Crop Production.—Soil Condition Improved.

By simple drainage much of the wet swampy farm land which can not be cultivated in its present condition may be made productive. There is also many a piece of cultivated land which is not producing what is could be made to do if it were properly drained. Indeed, according to the department's specialists, drainage in the United States is only fairly begun, and its immense possibilities are but little known.

Lands that are too wet for the most profitable production of crops, such as wet level land, low spots, and the dry subsoils of flat areas on the summits of knolls, rivers and creek bottoms, and peat bogs, should be drained. Even uplands may often be drained with profit, especially hillsides subject to erosion or inclined to be "spouty." Indeed, drainage is profitable wherever it is necessary to the fullest use of the land. It is not uncommon for lands to wet for cultivation to produce, when drained, 60 to 70 bushels of corn or oats or from one to one and a half bales of cotton to the acre. On much of the drained land the increase of yield is from 25 to 100 per cent, and by the increased yield and decreased cost of cultivation the value of the land is often doubled.

Drainage improves the physical condition of the soil by making it more porous and friable. Thus stiff soils are made more easy to work. The roots of plants are given a greater feeding depth by the lowering of the water level and hence the ability of crops to utilize moisture is increased. Well-drained soils also absorb more rainfall than undrained soils, thus decreasing erosion and damage by floods.

Drainage warms the soil. Heat from the sun acts directly upon the soil when excessive moisture is removed by drainage. This is noticeable in the North, where the planting season is from one to two weeks earlier on drained land than on similar land when undrained. The danger of damage by frost both in the spring and in the fall is reduced. Warming of the soil also causes the seed to werminate more readily, thereby giving a better stand of crops and causing the plants to grow more promptly.

Drained land can be plowed earlier in the spring than undrained land. Crops an be cultivated sooner after a rain, and if covered tile drains are used instead of open ditches machinery can be used to better advantage and the cost of cultivation decreased.

Health conditions are also improved by the drainage of swamps and standing water. The breeding places for mosquitoes are removed, with the consequent abolishment of malaria in the locality.

The most practical drainage system is one that is adequate, permanent, uses the least possible land, and is not a hindrance to cultivation. Tile drains which empty into either open or closed outlets most nearly provide such a system. By the open-ditch system much valuable land is occupied, the drainage is seldom thorough, and the ditches become filled and have to be cleaned out. Open ditches sometimes occupy as much as 10 per cent and frequently 5 per cent of the area drained. Thus it is that tile drains, while more expensive to install, are generally the most economical in the end.

In laying out a drainage system, the outlet is the first consideration. On rolling or hilly lands channels have usually been washed out, although they may need to be straightened and cleaned out. On low, level land it is usually necessary to dig open ditches, and they should be straight and deep, since curves check the flow of water, while in a deep ditch water generally flows more rapidly and less vegetation is likely to be present. The outlets should be deep enough to take care of the flow from branch drains, which may necessarily be placed low to secure sufficient fall.

Open ditches work well with a drop of 4 feet to the mile, although some, of necessity, have no more than 1 foot drop.

ALFALFA PASTURES.

A system of rotation pasturing is being adopted in Arizona which, in the opinion of specialists in the department, offers great possibilities to alfalfa raisers in the Southwest. Farmers who pasture alfalfa frequently have difficulty in maintaining the stand. This problem is especially acute in the irrigation sections of the Southwest, where the season is long and live stocck kept on the fields practically the entire year.

Continuous close pasturing starves the roots of the plants, and the tramping of the wet soil does further damage. In consequence the stand thins out rapidly, weeds gain a footing, and the productivity of the fields is much decreased.

The Arizona system overcomes these difficulties by keeping the live stock off the fields until the alfalfa is sufficiently mature to make hay. The animals are then turned into the fields in large enough numbers to harvest the crop quickly.

This system has been partly developed on many farms in the State, but has been perfected on two farms to an extent which deserves particular attention. The system practiced is fully outlined in Circular 54 of the office of the Secretary.

One of these farms, situated near Phoenix, Ariz., comprises 160 acres of alfalfa of the best type found in the state. It is divided into 8 fields of 20 acres each, all in alfalfa. These fields are pastured at different times during the year, but occasionally the crop is cut for hay instead of being pastured off. When ready for pasture, dairy cows giving milk are first turned into the fields. After they have secured the best of the feed they are turned into a new field and followed by dry cows and young stock. These clean up the field and are in turn transferred to another, the first field being watered and left to mature another crop. In the case of those fields which are cut for hay, after the crop has been put up with a hay loader, dry cows and young stock are utilized to clean up the waste hay before the field is watered.

The obvious advantage o fthis system is that the milch cows are constantly supplied with the best feed on the farm. Maximum returns from them are thus secured, while the second-class feed is quite good enough to keep the dry cows and the young stock in condition. Under this system the equivalent of 168 full-grown cattle were kept on the farm for 12 months and 260 tons of surplus feed procured in addition. The stand of alfalfa has been maintained in excellent condition for 10 years now.

In describing this farm the circular already mentioned is careful to point out that the returns have been far above the average because both in soil and management the farm is exceptional. There is, however, no apparent reason why the system should not be equally applicable to farms on which these advantages are less marked.

Another farm near Yuma maintained on 140 acres the equivalent of 141 full-grown animals for 12 months and produced in addition surplus alfalfa hay and seed to the value of $1,860. This farm was divided into five fields; two of 18 acres each, two of 40 acres each, and one of 24 acres. Under the rotation system one field was pastured five times and cut for hay once, one field was pastured six times and cut for hay once, two fields were pastured off four times and cut for hay twice, and the fifth field was pastured twice, cut for hay once, and cut for seed once. The circular already mentioned gives in detail the pasture and crop record of this farm. Not only does this system result in maintaining the stand of alfalfa and eliminating obnoxious weeds, but losses from bloat are reported as being greatly reduced. During 12 months only three head were lost in this way.

PROFITABLE CROP ROTATION.

The most profitable crop rotation does not consist merely in changing the crops around from year to year, regardless of the relation of the crops to each other. The central aim in all crop rotation systems should be to leave each field in a better state of cultivation, better physical condition, and reasonably free from pests at the end of each rotation cycle.

No hard and fast rotation system cen be laid down for any community, but the most profitable system must be worked out for each farm and, indeed, for each field. There are certain general principles, however, that should be borne in mind in this connection in order to accomplish the most satisfactory results. For soil improvement there should be at least one leguminous crop in each rotation cycle. To this class of plants belong the clovers, alfalfa, peas, beans, etc. There should also be sufficient quantity of live stock, especially milch cows, on each farm to utilize the roughage and to supply the desired quantityye of stable manure, which, in addition to green crops plowed under, will furnish the necessary amount of humus to the soil. The conditions resulting from this treatment, if the soil is properly handled, will make the succeeding crops more vigorous and capable of offsetting, in some measure at least, the effects of any pests that may appear. Again, the successive crops in any rotation should be so selected and arranged that no two upon which the same pest may thrive will be grown in succession. The principles of disease control by means of crop rotation are based upon the fact that certain pests can thrive only on certain kinds of plants. Therefore, when the crops are changed and the food supply thereby cut off, the pests must perish or be greatly reduced in number.

SAFEGUARDING THE MEAT SUPPLY.

Washington, D. C., Nov. 20.—More than 58,000,000 meat animals were slaughtered in establishments under Federal inspection during the fiscal year ending June 30, 1915. Since approximately from 58 to 60 per cent of the animals killed in the country are slaughtered in establishments where Federal inspection is maintained, it appears that about 100,000,000 meat animals are now being killed each year in the United States.

Of the animals subjected to Federal inspection 299,958 were condemned as unfit for human use, and 644,688 were condemned in part. Thus a little more than 1½ per cent of all the animals inspected were condemned either in whole or in part. These figures include only cattle, calves, sheep, goats and swine.

Tuberculosis was the chief cause of the condemnation. More than 32,644 carcasses of cattle and 66,000 carcasses of swine were entirely rejected on account of this disease, and in addition parts of 48,000 cattle and 440,000 swine. Hog cholera was responsible for the next largest loss, nearly 102,000 swine being condemned entirely on this account.

The annual appropriation for the Federal Meat Inspection Service is now about $3,375,000, so that the cost

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints

REMOVES THE SORENESS—STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $120 00 paid in doctor's bills." OTTO A. BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet R.

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

F. W. KELLEY,
BREEDER AND SPORTSMAN.

CAUGHT 51 RATS ONE WEEK.

Trap resets itself, 22 inches high, will last for years, cannot get out of order, weighs seven pounds, 12 rats caught one day. Cheese is used, doing away with poisons. This trap does its work, never fails, and is always ready for the next rat. When rats and mice pass device, they die. Rats are disease carriers and cause fires. Rat Catcher sent prepaid on receipt of $3 00. Mouse Catcher 10 inches high, $1. Money back if not satisfied. One of these rat catchers should be used in every school building.

H. D. Swarts,
Inventor and Manufacturer Universal Rat and Mouse Trap
BOX 566, SCRANTON, PA.

—WANTED—

A position by trainer and race driver. Over twenty years' experience. Developed futurity winners. Was second largest winner of races one season. Sober, competent every detail. Want to get with good material. Address:

OLLIE GRAVES.
Independence, Mo.

FOR SALE OR LEASE.

The pure bred trotting stallion PALO KING 2:28½ (sire of Little Lucille (3) 2:09 and others) by Marengo King (son of McKinney, dam by By, the $10,000 broodmare by Nutwood, etc.), dam by Palo Belle 2:24½ by Palo Alto 2:08¾, world's Champion trotting stallion of 1892. Palo King is the only stallion standing for public service in California to sire a three-year-old with a race record of 2:09.

For particulars address:

Dr. HARRY CALMES,
2122 Bancroft Way, Berkeley.
Phone Berkeley 5695 or Oakland 4418.

FOR SALE OR TRADE—One imported registered draft stallion, weight 1800 lbs., sound and right. Would consider standard bred mares, draft mares, or thoroughbred mares. Address D.A. BAKER, Hill P. O., San Diego Co., Cal.

FOR SALE.

Three-year-old bay filly by Arner (brother to Diablo 2:09¼), dam Alberta by Diablo 2:09¼; second dam Sister to Little Albert 2:10, etc. This filly is a natural pacer and one of the most elegant individuals ever foaled. She has size, a splendid conformation, and is without a blemish. She traces twice to Bertha, the greatest broodmare matron in the world. For particulars address

MRS. W. B. BRADBURY,
Corte Madera, Cal.

THOROUGHBRED COLT AT A SACRIFICE.

The death of my father compels me to seek a buyer for an excellent thoroughbred racing prospect, a colt by Maritius—Santa Lucia. I am unable to have him developed and will sell him at a proper figure. Interested parties may learn particulars from Chas. T. Boots, or address

MISS FLORENCE GAULT,
105 Bush St., San Jose.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

to the people would be between 5 and 6 cents per animal if the service was confined entirely to the inspection of the animals and carcasses. In addition, however, great quantities of the meat and pproducts are reinspected In this item there was a very considerable increase during the last fiscal year, the reinspection resulting in the condemnation of a total of nearly 19,000,000 pounds of products of one kind or another. Furthermore, 245,000,000 pounds of imported meat or meat products were inspected and more than 2,000,000 pounds condemned or refused entry.

In the course of its work, the Bureau of Animal Industry, which is in charge of the meat inspection service, has discovered a new method of destroying trichinae in pork, which is an additional safeguard to human health. Refrigeration at a temperature of 5 degrees, F., or lower, for a period of 20 days will destroy these parasites which occasionally give rise in human beings to the serious disease known as trichinosis. Hitherto the only safeguard against this disease has been thorough cooking of all pork and pork products, and those persons who neglect this precaution have always been more or less exposed to the danger. Unless pork is known to have been subjected to refrigeration as above indicated it should be thoroughly cooked. The microscopic examination of pork for the detection of trichinae has been abandoned as the usual methods have proved inefficient.

In this connection it is interesting to note that more swine were slaughtered in the past year in establishments under Federal inspection than ever before. A total of 36,247,958 were inspected at the time of slaughter adn approximately 35,900,000 passed for food.

CARE OF DAIRY CALVES.

Careful attention on the part of a dairyman during the two weeks that follow a calf's birth will often mean the ultimate addition to his herd of a large, well-developed milking cow, instead of a sickly, undersized, stunted animal. The problem of raising calves is today a more complicated one than when it was customary to feed a larger amount of while milk. The dairyman will therefore find it to his advantage to take the best possible care of his calves from the very beginning.

Immediately after birth the navel of the calf should be washed with an antiseptic solution and tied with a silk thread in order to prevent infection. For the first feed the calf should have the first milk from the cow after calving and should have its mother's milk for several feeds thereafter. The sooner the weaning takes place the better, but ordinarily it should not be postponed later than the fourth day. The sooner the calf is weaned the more easily it is taught to drink. When first fed from the pail, 8 to 10 pounds of milk a day, fresh and warm from the cow and divided into two feeds, are sufficient. The feeding times should be as nearly regular as possible, and at first it is advisable to feed more than twice a day. The amount fed should be constant; and tc insure this, scales should be used, as variation tends to get the digestive organs out of order. At all times the utmost care should be taken to pprevent any digestive disorder, as all such trouble hinders the growth and development of the animal. Calf scours is the most common indication of this condition.

The following named precautions, to a great extent, tend to prevent scours:

Feed regularly.

Be sure that the milk is always sweet and warm.

In feeding use only clean pails.

Reduce the amount of milk one-half if the animal becomes sick.

Corn meal, bran, and oil meal, mixed in the proportion of three, two, and one, make an excellent grain mixture. This grain when fed with plenty of fine clover hay makes an ideal supplement to skim milk in balancing the ration.

Calves should be allowed all the grain that they will eat until they consume 3 pounds a day; from this point the feeder should use his judgment as to whether an increase is justified.

The calf, from the time it is two weeks of age, should always have access to plenty of clean, pure water.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want.

Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

A Powder For Every Opinion

Opinions on shotgun powders vary. But no matter what your individual ideas may be you'll have no difficulty in matching them with one of the

HERCULES
Shotgun Powders.

Infallible. This is a dense smokeless powder that gives high velocity, even patterns and light recoil. It is waterproof, weather-proof and age-proof, and therefore retains its uniformly high quality at all times.

To the sportsman who believes that there's no powder so satisfactory as a good bulk smokeless, we recommend an acquaintance with

E. C. This powder is always uniform in quality. It is easy on the shoulder and gives a pattern that the bird can't "get through."

And, finally, the man who swears by good old-fashioned black powder will find his ideal in

L. & R. Orange Extra.
Since 1808 this has been the standard black powder for shotguns and rifles. It represents over a hundred years' experience plus improved Hercules methods of manufacture.

Two interesting books are yours for the asking. Write today for *Trapshooting*, for beginners and veterans, and *Hercules Sporting Powders*, for every owner of a rifle, shotgun or revolver.

HERCULES POWDER CO.

A Practical Treatise on the Training of Hounds

Training The Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv , so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give **protection** to the shooter.

Other features of the shell are the perfect, **sure-fire** primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in **all kinds** of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

Repeating Rifles For Hunting

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

Every Good Gun Store is a Headquarters for Winchester Guns and Ammunition

Remington UMC — PISTOL and REVOLVER CARTRIDGES That Are Dependable and Accurate

Pacific Breeders Futurity Stakes No. 16

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1915 to Trot and Pace at Two and Three Years Old

Entries Close February 1, 1916

$1600 for Trotting Foals. — **$1100 for Pacing Foals**

$150 to Nominators of Dams of Winners — **$100 to Owners of Stallions**

$1000 for Three-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Trot.
600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:
FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds — one-third of the money will be allotted for the division for each heat; Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

A CHAMPION FOR WILBUR LOU (3) 2:10¼.

Hemet Stock Farm, while it has not had a very successful year with its aged campaigners, has had its fair share of the season's dividends in the good hard cash earned by Allie Lou (3) 2:12½, while through the sterling performances of the coast's new champion two-year-old trotter, Natalday (2) 2:13½, much honor has accrued to the name of the Farm's premier sire, Wilbur Lou, one-time champion yearling trotting stallion and winner of two of the hardest fought three-year-old events that have ever been raced in this section. Mr. Whittier entertained quite a party at Pleasanton last Saturday, composed largely of members of the immediate families of the Whittiers and Dobles, and it was hard to tell just where most of their enthusiasm centered—on Allie Lou or Natalday. To have been in any way closely connected with the production and development of either would be a credit to a breeder in any section, as they are of the kind that would have held their own well this season in any part of the country.

Natalday is one of the first crop of Wilbur Lou foals and was bred by Henry Delaney, Ventura's best known horseman. At about this time, Woodland Stock Farm was assembling the famous band of matrons which has just been dispersed, and before Ella J. was delivered of her foal she had passed to Mr. Considine's ownership. At an early age the foal passed into the hands of S. Christenson, of this city, whose property he yet remains and who has also recently acquired his dam. In the pasture the youngster held his own with the Woodland babies, and as soon as he was broken by Colonel Jim Thompson of Sacramento began showing a natural inclination to trot. The Colonel gave him his early education, imparting to him the best of manners and mouths, keeping him in charge until late last spring. The colt was entered in the juvenile stake at the June meeting of the P.-P. I. E., and as Mr. Thompson had nothing else to race here he was brought up and turned over to the noted eastern reinsman, Alonzo McDonald, who drove him to third money over The Expense and Carleta. Mr. McDonald liked the youngster very much indeed and gave him a clean bill of health as one real good baby trotter.

Having no engagements until November, Natalday was taken to Pleasanton and brought along slowly during the summer, making little headway though not going especially wrong. He went back rather than forward, however, and when turned over to Millard Sanders some weeks ago was hardly up to a mile in 2:35. Millard, with the skill that has squared away many a former winner, straightened him out after a couple of weeks handling and began making a bit of speed with him. On Thursday, Nov. 11, over a track that was little less than a nightmare, Sanders drove him to a handy win in the State Fair futurity for two-year-olds, trotting the first heat in 2:32 and the second in 2:29½, making him the first futurity winner for his sire. Two days later, in one of the hardest fought two-year-old trots ever contested locally, he was twice second to E. R. Dunne's great filly, Virginia Humbug, in 2:16¾ and 2:18 in the Breeders' futurity. This race, trotted as it was under heavy handicaps, put the seal of genuine greatness on the money winners, and indeed upon every youngster contesting it, for no entry was beaten by more than two or three lengths in the final heat.

Then came the change to Pleasanton, where conditions in general are very much more conducive to equine welfare than were those existing at the exposition track, and there, after about a week, he trotted in time faster than that hung up by Virginia Humbug in her fastest heat. His work was sufficiently impressive to keep the MacKenzie crack, Anvilite, in the barn when race day rolled around, the wisdom of Mr. DeRyder's course being plainly shown when Sanders brought the brown fellow down in front in 2:13½ and 2:14, each heat better than the coast record. While kept good company throughout both miles by the The Bondsman filly Lulu B., he won both without serious menace and Mr. Sanders, after the race, expressed the opinion that he could have stepped at least one mile during the afternoon in 2:12.

The new baby champ is bred along most pleasing lines, coming from families from which he might justly be expected to inherit many qualities of greatness. His sire, Wilbur Lou, a champion and a futurity winner, is a six-year-old son of Kinney Lou 2:07¾, a racehorse of sterling merit, and Louise Carter (3) 2:25 by Chestnut Tom 2:17¼, the latter horse having been bred by the late Martin Carter with the expressed intention of securing an excellent sire of dams, his blood being an intensification of that of the families of George Wilkes, Nutwood and Director. Louise Carter on the maternal side also had an inheritance of wonderful richness, being out of the very great matron Ingar (dam of John A. McKerron 2:04½ and five others) by Director 2:17, Ingar's dam being Anna Titus by Echo 462, whose daughters produced four performers with records below 2:10.

With decent luck, Natalday as a three-year-old should put his dam among the select array of triple producers of 2:10 speed at the trot, as she is already the dam of Honey Healey 2:08¼ and San Felipe 2:09¼, in addition to the pacer Emma C. 2:22¼. Ella J., while possessed of no record, is a full sister to that good "gray ghost" pacer of California history, Waldo J. 2:09, and a half sister to Silver Dick 2:09¼, also of the gray ghost variety, being out of Miss Taylor, a daughter of that good sire of dams, A. W. Richmond. Ella J.'s sire, Bob Mason 2:27¼, presents in his pedigree a sturdy intermingling of the blood of Hambletonian 10 and Williamson's Belmont, and her grandam was a daughter of the old thirty-mile champion, General Taylor.

Our notion of the matter is that Natalday has a right to be a trotter, and we wish ourselves no harder luck than that we have the pleasure of "reviewing" many more Wilbur Lou youngsters of the same general stripe.

CALIFORNIANS IN THE CHICAGO SALE.

There was a time when California trotters went to the eastern sale rings in several-car consignments and were snapped up eagerly at topmost prices, but since the passing of the famous farms of a day gone by the bulk of our horses that have gone across the divide to new homes in the east have found their new owners through private sale. A few scattering ones have been offered at some of the larger vendues of recent years, but until this month we have had no pretentious representation at the eastern markets in the way of large individual consignments. When the Chicago Horse Sale opens next Saturday, however, there will be a bunch of Californians there of the genuine brand of "horses as is horses," and some of them are going to be very much in demand.

The horse from the west who has been most in the public eye during the present season is none other than Prince Ansel (2) 2:20½, Woodland Stock Farm's premier, Mr. J. W. Considine having but recently announced his intention of sending the champion sire of yearling trotters to the sale ring. Never until recent years given any sort of a show, this great son of Dexter Prince has demonstrated most emphatically the qualities of sirehood that are truly his. Overshadowed in the estimation of a former owner by a horse really much his inferior as proven by subsequent events, Prince Ansel's "day" never dawned until the best years of his life had been put behind him. Not until this season was a yearling by him trained with the idea of taking a yearling record. Seven of them were sent last winter to Hunter Moody at Lexington, and of this seven, three are "in the list"—every one a champion. Consider this unrivaled showing, and then endeavor to estimate the value of Prince Ansel to a breeder who has a band of high class, speed producing matrons! "It can't be did," to put it plainly, for one foal of one crop of foals may be a champion, a great money earner, a great seller. Here are three of the band foaled in $610; Anselila (1) 2:17½, world's champion yearling ting gelding, sold for $535; Verbena Ansel (1) 2:22 (world's record of 2:26 on a halfmile track), sold for $610; Anselila ,1) 2:17½, world's champion yearling trotting filly, sold for $5,000. The value of such a sire cannot be determined at this moment in dollars and cents, and he is in the pink of condition and of unimpaired potency and vitality. There is no farm in America which he would not grace.

While the Woodland consignment is small and select, southern California is sending a representation that is large and select, recruited by the well known Los Angeles horseman, Robert A. Smith. On his way home from the exposition "Bob" stopped at Fresno and Tulare and secured the pick of the stables of J. W. Zibbell and I. M. Lipson, while on his arrival at Los Angeles he found that Will Durfee's lieutenants had gotten together a band of thirty-four to make the trip in the name of that most successful California trainer. William sends so many and such a well balanced lot in quality that it is a bit hard to "top" the bunch, and as the patrons of the Chicago sale are generally of the "wise kind" there are going to be several ready bidders on quite a number of the band, while none are apt to prove draggy sellers.

In point of developed speed the pacer San Jacinto 2:05¼ and the trotter Sargo 2:07¼ are the king pins, and each should cause some hot bidding. The former wears no hobbles, is eligible to the 2:07 class, has raced around 2:06 this season on the bull rings and has made a couple of trips in 2:03½ over the long route on mile tracks, while Sargo, eligible to the 2:16 class, looks very like a stake trotter. Will regards him very highly, has turned down a fat offer for him locally, and sends him merely because he already has a trio of good ones for next season's stakes in Virginia Barnette, Esperanza and The Lark. Carl, the black brother to Esperanza that has been second or third in each one of the coast's three-year-old trots this season, goes to make a good horse for some man, as does Old Folks 2:11¾, a gelded son of the great Del Coronado who has shown his ability to race around 2:10, while eligible to a much slower class. Another pair of nice young trotters are Carleta (2) 2:20¾ and Carlschen (2) 2:23, both by Carlokin 2:07½, the former out of Alexandria by Bon Voyage 2:08, and the latter out of the great broodmare Bonnie Ailsie 2:08¼ (dam of Contention B. (3) 2:08¼, etc.) by Faustino 2:12½. They are not only bred right but are right all around.

Miss Quealey (2) 2:26¾, the full sister to Manrico (3) 2:07¼, will be wanted by several parties, and is well worth owning. Last spring she trotted in 2:12¾ in May, with fractional distances at a 2:04 shot, but was affected by the change to the moist climate of the exposition course and was drawn from all her engagements. She is better than a 2:10 trotter and destined to become a great matron. Another couple of the championship family kind go along in Phyllis Barnette, a four-year-old sister to Don Pronto 2:02¼, sound, free-legged, with a three-year-old trial of 2:14, and the two-year-old Frank Berry by Manrico (2) 2:07¼ and out of the grand old trotter Zephyr 2:07¼ (dam of Virginia Barnette (3) 2:08¼) by Zombro 2:11. These are the kind that "make your mouth water," and the consignment is rounded out by brood mares of excellence by such famous sires as McKinney 2:11¼, Del Coronado 2:09½ and Zolock 2:05¼, as well as a grand array of younger things by Carlokin 2:07½, Copa de Oro 2:01, Siliko (3) 2:11¼ and Manrico (3) 2:07¼.

The consignment, personally conducted by Bob Smith, leaves Los Angeles on next Tuesday, and will form a very important part of the offerings at Chicago. Here's hoping they go into good hands at good prices.

RAYO DE ORO (3) 2:07¼.

Unless we have slipped a cog somewhere and some of those darned eastern folks have put through a three-year-old gelding of the wiggler variety whose performance we have overlooked, the record of 2:07¼ obtained at Phoenix by Rayo de Oro stamps him as the champion three-year-old pacing gelding. We hope it does, anyway, as California can use all of these championships she can lay her hands upon, and Copa de Oro 2:01 has such a credit coming to him. He himself was "technicalitied" out of a record of 1:59 at Phoenix, his three-year-old son Contention B. was "hard-lucked" out of a championship over the same course in 1914, so that it would seem no more than "poetic justice" for the third member of the tribe to get away with his title, gained over the Phoenix track, in safety. Outside clocks caught the mile all the way from 2:07¼ to 2:06¾ and it was in a race, not a time performance.

Pipe Dreams of Profit

SECOND STORY OF THE "DISTRICT FAIRS AND THE TROTTER" SERIES

Last week, taking for our text the district fair and the trotter, we ventured upon some ideas of our own as to the desirability of subsidized district fairs over "legalized speculation" as a means of guaranteeing future prosperity and a measure of stability to the industry of breeding and racing light harness horses, closing that installment of the story with a brief review of the most encouraging situations existing at such California towns as Ferndale, Ventura, Santa Ana and Riverside, where successful fairs, with harness racing, were given during the "off season" which we have just gone through. We ask now that you consider the case of Fresno where, with harness racing as a main feature, the association had laid up a little surplus during recent years and where, this season, they "shot the works" on a grand carnival of sport—and death—in an effort to show all "old fogies" just how millions can be amassed by merely observing truly "modern methods" in a fair program. From a Fresno paper, of an issue just prior to carnival week, we take the following merely to show you what they were going to do:

Fresno District Fair Satisfies Modern Demand for Novelty.

Automobile Races, Fiesta de Oro and Rodeo Take Place of Old Time Horse Racing and Fancy Stock Shows.

When the Fresno District Fair drew away from all precedent, broke away from the tradition that horse races are the big attraction of modern fairs, and staked everything on three big leading events, it set a new standard. Never before has fair of the magnitude and standing of the Fresno fair adopted a truly modern program. Clinging to the theory that what interested people a generation ago should interest them still, has been discarded as out of date. A new era of amusement has begun.

Nowadays fancy stock and fast horses do not interest enough persons to make it possible to give a fair. The competition of automobile races and amusements of various kinds has made it necessary to adopt other means of interesting the public than those that proved successful in past years.

It is because of the alertness of the directors of the local fair and their continual adding of new features year after year that the phenomenal growth has been made. Last year the Fresno District Fair eclipsed the state fair in attendance. This year preparations are being made to entertain at least fifty per cent more than attended during the five days of the 1914 fair.

In entering on the new experiment of offering something entirely new as this year's attraction, the directors took into consideration that the two big expositions would prove formidable competitors unless something different than they had to offer could be made the headline attraction.

This has been accomplished in the Fiesta de Oro, which surpasses any other pageant ever given west of the Mississippi, in size of the production, number of times given and in interest and excitement.

The Rodeo, too, is on a scale never before attempted. Rodeo Boss Griffin is securing promises from participants in the riding and other contests that insure the greatest Rodeo ever given.

The list of automobile entries to be published in a few days has already received names that assure the best races ever given in the interior of California.

These races, too, are in a class to compete against the exposition as an attraction. They compare favorably in amount of prizes, $5,000 in cash, with those given at the Vanderbilt Cup race, and will have all of the entries the rules permit.

New attractions have been added from year to year, but it is believed that the right plan has at last been selected in making the main attractions few in number, but of securing only the best that are to be produced.

This is only the introductory portion of an extensive story dealing in detail with that Rodeo and the Fiesta de Oro, the whole thing occupying a goodly portion of a page, and surmounted by a multi-column head that could be seen easily at forty yards by an octogenarian who had just broken his specs. Elsewhere in the paper under a very modest heading some mention was made of the "legitimate" fair features which really meant something to the community, but which were, of course, too thoroughly antiquated and of too little moment to be accorded much serious consideration according to the "Fresno idea" which was prevalent at the moment. Throughout the fair the press handled it in similar fashion, paying scant heed to material things, and devoting column upon column to the "carnival" features, the word "carnival" being much more fittingly applied to the event than the staid, old-fashioned phrase "district fair."

Under these conditions the Fresno folks, to revert to the vernacular of the street, "pulled off a hot one." They had crowds day and night and they gave 'em a run for their money in thrills, smashing up a few riders more or less, crippling one or two horses so that they had to be killed, and winding up with a grand automobile hippodrome performance in which two men—fortunately competitors and not spectators—were killed. It was a grand little week, and here is what the paper of the succeeding Monday had to say about it:

Success of Fair Means Improvements.

Dust and Barrenness to Be Done Away With; County Park to Be Beauty Spot.

More beautiful fair grounds will be the result of the splendid financial success of the Fresno District Fair last week.

The fair association hopes to have enough money left after paying all expenses for extensive improvements on the grounds. These improvements will include sidewalks, lawns, flowers and all other things that go to make a beautiful park.

"We hope to make a county park out of it," said C. G. Eberhart this noon. No definite plans have been decided upon.

The fair association took in so much money last week that the officials were unable to count it. C. D. Wentworth, in charge of receipts, is busy today counting money in the banks of Fresno, deposited in safety deposit boxes, twice a day during fair week. No figures on gate receipts and on attendance will be available until these deposits have been counted and totals compiled.

The total attendance is estimated at 75,000 for the week.

The total gate receipts are expected to pay all expenses and leave a sum for improvements for next year. Fair officials are much pleased with the phenomenal success of the fair.

"The only regret we have is the death of the two racers," said Mr. Eberhart.

Now you may have observed that these glowing reports, these gorgeous promises and these vain but very modest regrets were expressed before the counting of the money had become an accomplished fact. The promoters had simply made up their minds that their "modern methods" were absolutely bound to return a large profit and they entertained these ideas just as long as possible. They were nice ideas—ideas of a profit are almost always nice ideas, especially if said profit is obtained by such a slight expenditure as the snuffing out of two human lives. However, you know what a certain Scotchman—not Magnus Flaws or John A. McKerron—said about the "best laid plans o' mice and men," and that proved to be Fresno's fix. Those profits not merely sidestepped and went "agley" but they vanished entirely at the conclusion of the official count of the receipts. The exact figures are not at our disposal, but on the reports of such good authorities as M. L. Woy, Frank Malcolm, Harry Nelson and a few other Fresnans with whom we have had recent talks concerning the matter the deficit faced by the promoters is in excess of five thousand dollars. In the face of these returns it is possible that the "regrets" over the deaths of the benzine speed demons is more pronounced. However, harness racing built up a balance for the Fresno folks before this following after strange gods commenced; properly handled they will do so again, so that Fresno's fairground may yet have those walks and lawns and other improvements which failed to be made possible through the "exceptional financial success" of this season's rodeo, its fiesta, and its double funeral.

The event of 1915 at Fresno brings up the question as to the features which may properly be classified as belonging to a district fair, which it purported to be. In the event of the enactment of legislation extending state aid of a financial character to district fairs, Fresno is right in line for an appropriation. However, in the face of the disparaging opinion expressed of the importance of livestock and agricultural products as features of the fair, her people are not doing much to encourage the state to help them. California will not be quick to subsidize amusement promotions, but she will go down into her pocket to aid fairs whose foremost aims are the improvement of the products of her people and her farms. These purposes must be paramount to insure any long-continued success, with purely entertaining or amusing projects subordinated thereto.

Do not think for a moment that we disparage the importance of entertainment and amusement at fairs, for we do not. They must play their part, and a very important part, but they must not usurp the domination of the fair and its policy, or the fair becomes not a fair but a festival. The successful fair is the one in which the various "ingredients" are so skilfully mixed as to form a harmonious whole. Your successful fair must appeal without prejudice to all the people, and the Lord in a wise moment, and that this world might not become a place of too much monotony, made all sorts and conditions of people—seekers of knowledge, seekers of inspiration, seekers of entertainment, and seekers of amusement, and of these there can be no question as to which we are most indebted and to which is due the greatest consideration in the preparation of the program of any event which is to exert an appeal to the people.

In the complexities of present day civilization we have great organizations always at work whose sole objects are to cater to the inclinations and wants of our people as roughly classed above. For many weeks or months at a time each and every one of us sticks pretty well to his or her "business of life," his or her particular sphere. Fortunately, the most pedantic seeker of knowledge has moments when he "unbends" to a point where he appreciates a bit of relaxation; the "inspired" soul has its periods of leaning to the practical; the poor spirits whose greatest aim in life is to be entertained or amused are not totally devoid of the ability to appreciate the more serious workings of the world and its people, and it is to cater to all these moods at one swoop that we have the fair, be it county, district, state, national or worldwide in its scope.

To be truly successful, truly representative, the fair must not be wholly educational, nor wholly artistic, nor wholly entertaining nor wholly amusing, but it must embrace all these attributes at once, in a well balanced proportion. This is the fair which justifies subsidization by the state, and is the one which will endure and pay a profit.

A third installment, dealing more particularly with ways and means of conducting the coming campaign for the restoration of the district or county fair, will be forthcoming in an early issue.

GENERAL WATTS (3) 2:06¾, IN 1915.

According to unofficial reports the phenomenal young sire, General Watts (3) 2:06¾, has with the close of the 1915 season sixty-four performers in the standard record list, which makes him the leading sire of his age—eleven years. Of this number eighteen are new performers of the year, making him one of the leading progenitors of the season. The late performances of Miss Perfection, his great four-year-old daughter, at the San Francisco meetings stamps her as one of the best of the age that the season produced, and draws fresh attention to the remarkable racing quality that this great young horse is siring. It was Miss Perfection that gave Peter Scott a determined battle in the $20,000 trot at Frisco, and it was only after a desperate fight that Murphy's horse stood off the filly and landed first money. At the closing of the coast meeting it was this same filly who made her victory over Mirthful an impressive one and demonstrated that her form of the $20,000 race was not that of a single day, but rather that of a consistent and high class performer. The performance of General Yorke, the two-year-old son of General Watts at Lexington, when he trotted to a record of 2:11½, too, was a brilliant performance that has been outshone by very few of his age.

These and others of the Watts tribe show outstanding among the juvenile performances that have gone to make up the history of 1915. That the Watts tribe are speedy and will race consistently is a conceded fact, and the only man to deny their great qualities is the one who has been unable to get one, and in his ill-fortune seeks to salve his disappointment with a discount of their admitted capabilities.—Western Horseman.

George Strate was busy at Pleasanton Saturday showing visitors the recently arrived English-bred members of the Wingfield stables while making final preparations for shipping about fifteen head of his furthest advanced pupils to New Orleans. Honeywood, the four-year-old son of Polymelus—Honey Bird, was the principal attraction, and he, with other members of the stable, will remain at Pleasanton until considerably later in the season. The string taken to New Orleans by Strate was in the pink of condition, and it will take a mighty hard run of luck to keep the gold and silver of the Nevada Stock Farm from being well up in the racing frequently.

Natalday Cuts Record for Age

PLEASANTON FUTURITIES PROVIDE EXCELLENT SPORT

At a cost to himself of between three thousand and thirty-five hundred dollars, that good sportsman Rodney MacKenzie "made good" to his horsemen friends last Saturday by racing off the three-year-old divisions of the Pleasanton Futurity Number One and the two-year-old divisions of Futurity Number Two, the total amount hung up for the four events reaching the tidy sum of seventy-five hundred dollars. Ever since the events closed their sponsor has faced a certain loss on them which he accepted smilingly, and this year he was deprived even of any chance to get a good gate by racing them at a regular fair or race meeting, Alameda county following the pattern of California fairs in general and calling off her annual event that the exposition might have the right of way. Neither Mr. MacKenzie nor Superintendent Charley DeRyder had any hope that a one day card late in November would attract a crowd of any sort and they were in no way "disappointed" in this respect, the paying guests being only a handful. The "regulars" and owners and their families turned out in excellent shope, passing the gates unchallenged, and what the crowd lacked in numbers it made up in quality and appreciation, being practically a professional gathering which was amply able to recognize clever teaming and quick to applaud it. Everybody knew everybody else and the event had all the characteristics of a family reunion or a picnic, good natured raillery, outspoken congratulations and "brotherly" criticism being rife throughout the afternoon.

The three-year-old trot was the first race on the card, and with only Byron, Carl and Allie Lou to face the starter it was conceded beforehand to the Hemet Stock Farm filly, piloted by Charley DeRyder. Carl, who has been an unlucky little fellow all year, was affected with a touch of sickness a few days ago and warmed up lame in front, a new thing for him. Byron drew the pole but Allie Lou trotted to the lead early on the turn, only to make one of her very rare breaks and be passed by Carl, who opened up quite a little lead into the back stretch. Allie settled fairly handily and set sail for the black fellow in front and closed up much of her lost ground before reaching the half, though she did not succeed in overhauling the Carlokin colt until reaching the distance, from which point she drew away from him to win comfortably, the time, 2:12½, being a new mark for her by a fraction of a second. Carl corded after this heat but finished the race gamely, outtrotting Byron though unable to handle Allie Lou, who goes into winter quarters with a record of having won every three-year-old event in which she started.

The two-year-old trot attracted a great deal of interest and was a grand little horse race. The field was made up very largely of the same babies that furnished such good competition for each other in the Breeders' futurity at the exposition on closing day, the winner on that occasion, Virginia Humbug, not being among those present. The spectators were much in hope that they would get to see R. J. MacKenzie's good colt Anvilite in action, but Boss DeRyder, after sizing things up pretty carefully, decided that he was yet a bit short on work after his summer's sickness to go the sort of a race that would be necessary if he finished anywhere near the top of the summary, so did not start him. There were eight nice two-year-olds left, however, and all in the world they did was to go out and smash Lottie Ansel's state record all to bits, twice in a row. The daughter of Prince Ansel set the mark at 2:14¼ in 1912 at Stockton, but Natalday, closely pressed by plenty of company, went the route at Pleasanton in 2:13½ and came back in 2:14, the total time of the two heats being three and a half seconds faster than the time of Lottie's race.

Don de Lopez drew the pole but was unlucky in being just a bit back when the word was given after a few ragged scores, also making an early break. Natalday, from the outside, went into the lead around the turn, Lulu B. and Miss Axworthy Dillon staying right with him, with The Expense fourth a few lengths back and the others somewhat strung out behind her. Hermes broke on the back stretch and the four leaders raced home in the same position they had occupied since passing the quarter pole, the crowd giving the drivers and their young trotters a hearty welcome when they came down in the new record time. Sanders brought the field down fast for a few scores in the second heat, and after several unsuccessful trips Starter Wright designated Miss Axworthy Dillon as guide horse, a still worse score resulting. Sanders drew a caution from the stand and the next time they were sent away, the starter, in endeavoring to talk Sanders back where he belonged, overlooking Hermes, who was doing the dippy dip when the music started. In spite of Mr. Wright's efforts Sanders had the edge over the field at the start, and as in the first heat raced to the front with Lulu B., Miss Axworthy Dillon and The Expense his closest companions, the latter breaking on the back stretch but settling and coming on to regain her old position before the leaders straightened away for home. Lulu B. challenged gamely in the home stretch but couldn't quite reach Natalday's nose, while Spencer brought The Expense with a brush that sent Charley DeRyder to the bat to bring Miss Axworthy Dillon in third. The whole bunch beat the flag each heat, and the youngsters that finished behind the money were by no means devoid of considerable class. Save for Sanders' tactics in scoring, which took a certain amount of heart out of all the starters, including his own, the second heat would in all probability have been as fast, or faster, than the first. As it was, it stands as the best two-year-old trot ever contested on the Pacific coast.

Warm as was the junior trot, the baby pacers went 'em one better in the way of providing a real hot contest, though by way of comparison the time hung out was not quite so fast, the state record not being seriously endangered at any time. As a contest, however, the pace was right there with the goods and it is a toss-up as to which of the three heat-winners would have "copped" had not the conditions limited the event to three trips. Fiesta Lou was not at her best, Surety had landed at home from his exposition trip a very sick colt, and all had been more or less affected by their stay here at Pneumonia Park, but four of them, and particularly three of that four, were most equally matched under all the existing conditions. Fiesta Lou was awarded the pole and the field went away in nice shape on about the fourth score, Verna McKinney leaving her feet in the first eighth and Rico going to the front with Surety lapped up on him, Fiesta Lou third, Julia M. fourth and Verna bringing up the rear. Down the back stretch Surety's nose showed in front, while around the turn he gained a lead of over a length. Coming into the stretch Durfee stepped on the throttle and the Manrico colt responded well, while Surety came gamely for McDonald. The proverbial cranberry merchant had no more business to attend to than both Al and William Gee as they hie-boyed through the stretch, Rico winning by no more than a fair neck, Julia M. coming into third place and Verna McKinney overhauling Fiesta Lou for fourth position.

For the second heat, Surety went to the front with Verna lapping him and Rico in his trail, the field being nicely bunched at the half. Around the turn Fiesta Lou fell back a trifle, the others straightening for the wire well together, Julia M. being the worst off of the four when the sprint began. Verna McKinney and Rico drew away a bit and both drivers went to work with a will, racing the last few rods with wheels almost brushing, Verna having the best of things by a small margin. Allen with Julia M. tried to come through in the middle of the track but found a three strand fence built in front of him so took squarely over to the pole near the distance and was coming very fast when his chances were spoiled by the filly leaving her feet.

The third heat resulted in one more turnover of the dope before the season of 1915 could come to a close. Verna set the pace this time and, with Fiesta Lou drawn, led Rico, Surety and Julia M. into the stretch in the order named, Chadbourne swinging out a ways from the pole as he come around. The bunch was stepping along handily and Allen wanted to come through between Verna and the fence, finding the hole too small when he got closer up to it. Rico was well out in the track, and as a last resort Allen took the El Angelo lass out sharply into second position and the game baby sprinted down between Verna and Rico to win from the latter in fine shape, Verna breaking a few yards from the wire. Had any racing luck favored her the Los Banos girl wouldn't have done a thing but won the race, to all appearances, and was the freshest of the delegation had the event been fought to a finish. Under the conditions of the stake the third heat ended it, Rico with a first and two seconds being placed first, Julia M. second, Verna McKinney third and Surety fourth.

The three-year-old pace was a two horse affair between Bondalean and Rayo de Oro, the other starters, Sheldon B. and The Bondholder, finishing on the wrong side of Sandy Smith the first time out, this being the ungentlemanly Mr. Smith's only opportunity of the day to indulge in his favorite pastime of waving his red rag in somebody's face. The owners of the distanced horses needn't feel bad about it, though, for as one of the bystanders remarked, "All they had to beat was one world's champion and another horse that can beat him," Rayo de Oro and Bondalean being of the kind that don't run in schools. As in their former meeting, the more rugged son of The Bondsman had just enough advantage over the lighter built Copa de Oro gelding to win safely, though his lead at the wire in the second heat was purely of the eyelash order, the pair racing head on for the last few lengths. They are both game,, both good headed, and both fit to race in any company. Bondalean, by shutting out all but Rayo de Oro, was awarded first, third and fourth money, so owner Charley Silva found the day a very pleasant one, thank you.

No more enjoyable afternoon's sport has been staged in California for many a long day. Colt races are more interesting than any other kind when the entrants are as well matched as were most of those taking part in Saturday's events, and the day was made to order. A sharp frost Friday night gave the air plenty of snap and tingle during the early morning hours but the sun shone bright and warm all day and there was no wind. The track was in excellent condition—trust Charley DeRyder and his trusty lieutenant, Monte, for that—and many of those present made the trip from bay points as well as from Sacramento and other valley towns by auto, the Pleasanton plant being reached from all sides by most excellent highways. Many arrived early, in time for lunch and a trip around the barns and paddocks, and every person present went home well pleased with his or her trip, and expressing appreciation of the generosity and sportsmanship of the gentleman who made their enjoyment possible. Mr. MacKenzie was not present, being some thousands of miles away, but his ears must have reddened a trifle, if there is any truth in an old saying, over the many complimentary expressions concerning his horses, his plant, and himself.

Will Higginbottom had been expected to do the starting, but was confined to his home by another attack of the inflammatory rheumatism which has beset him more or less of late, Frank E. Wright of Sacramento stepping in and filling the office most acceptably. The judges were A. W. Longley of Oakland, C. W. Paine of Sacramento and George Lowery of San Francisco; M. C. Delano of Sacramento, T. D. Sexton of Oakland and Joe Twohig of Warm Springs did the timing; Bert Bringier of Pleasanton handled the clerical work and Sandy Smith manipulated the flagman's banner. The summary:

Pleasanton, Cal., Saturday, Nov. 27.—Pleasanton Futurity, three-year-old trotters, purse $3500:

Allie Lou, br f by Kinney Lou 2:07¾—Lady Zombro 2:24¼ by Zombro 2:11.....(DeRyder)	1	1	1
Carl, bl c by Carlokin 2:07½—My Irene S. (2) 2:28¾ by Petigru 2:10½.....(C. A. Durfee)	2	2	2
Byron, bl c by Tom Moko—Rita H. 2:12½ by McKinney 2:11¼ .....(W. G. Durfee)	3	3	3

Time—:33¼, 1:07, 1:39¼, 2:12½
:33½, 1:05¾, 1:38¼, 2:13¾
:33, 1:06¾, 1:39½, 2:13¾

Distribution of purse—Allie Lou $1750, Carl $875, Byron $525.

Pleasanton Futurity, two-year-old trotters, purse $1500:

Natalday, b c by Wilbur Lou (3) 2:10¼—Ella J. by Bob Mason 2:27¼ .....(Sanders)	1	1	
Lulu B., b f by The Bondsman—Loma B. by Stam B. 2:11¼ .....(Clark)	2	2	
Miss Axworthy Dillon, b f by Axworthy 2:15½—Cleo Dillon 2:13¾ by Sidney Dillon...(C. L. DeRyder)	3	3	
The Expense, br f by The Proof 2:10¾—Nusta by Nushagak .....(Spencer)	4	4	
Don de Lopez, bl c by Kinney Lou 2:07¾—Eradiate by Geo. W. McKinney 2:14½.....(Blackwell)	6	5	
Hermes, br c by Carlokin 2:07½—Miss Quealey 2:26¾ by Moko .....(Durfee)	5	7	
Miss Bond, b f by The Bondsman—Miss Harris by Sidney Dillon .....(W. C. DeRyder)	7	6	
Alesandro, b g by Barney Barnato 2:19½—Ramona by Prince Robert .....(Alvord)	8	8	

Time—:33¼, 1:07¼, 1:39¼, 2:13½

:34 , 1:07¾, 1:40 , 2:14

Distribution of purse—Natalday $750, Lulu B. $375, Miss Axworthy Dillon $225. The Expense $150.

Pleasanton Futurity, two-year-old pacers, purse $1000; Rico, ch c by Manrico (3) 2:07¼—Pavlowa B. by Petigru 2:10½ .....(Durfee) 1 2 2
Julia M., b f by El Angelo—Record Searcher by Searchlight 2:03¼ .....(Allen) 3 3 1
Verna McKinney b f by Vernon McKinney 2:01½—Ramona by Demonio 2:11¼ (Chadbourne) 4 1 3
Surety, b c by The Bondsman—Eva H by Washington McKinney 2:17½.....(McDonald) 2 4 4
Fiesta Lou, b f by Wilbur Lou (3) 2:10¼—Fiesta Queen 2:22½ by On Stanley 2:17½ (Blackwell) 5 5 dr

Time—:33½, 1:07 , 1:38 , 2:12½
:33½, 1:07¾, 1:40 , 2:13
:33¾, 1:07 , 1:37 , 2:13¾

Distribution of purse—Rico $500, Julia M. $250, Verna McKinney $150, Surety $100.

Pleasanton Futurity, three-year-old pacers, purse $1500:
Bondalean, b c by The Bondsman—Katalina 2:11¼ by Tom Smith 2:13¼ .....(Daniels) 1 1 1
Rayo de Oro, ch g by Copa de Oro 2:01—Easter D. (2) 2:13½ by Diablo 2:09½.....(Durfee) 2 2 2
Sheldon B., b g by Barney Barnato 2:19½—Ramona by Prince Robert ..... Alvord) ds
Bondholder, b c by The Bondsman—Corinne Sidmore by Sidmoor 2:17¾.....(Allen) ds

Time—:33¾, 1:07 , 1:38 , 2:10

Distribution of purse—Bondalean $1125, Rayo de Oro $375.

REGISTERING TROTTERS AS A SAFEGUARD TO IDENTIFICATION.

We have no figures on the total sums of money offered for competition during the racing season by the active associations, but when one considers that the ten Grand Circuit members distribute in the neighborhood of a half-million dollars and, furthermore, that there were about fourteen hundred meetings of various classes and degrees held in the United States and Canada during 1915, it is certain that the aggregate will run into millions. This is purse money alone and does not take any account of the salaries of trainers and care-takers, entrance fees, expenses of all sorts that are incurred by the associations in distributing the purse moneys, and those of the owners and drivers in competing therefor. Purse money combined with the additional sums alluded to that are spent in the annual racing season runs into a total so large that if it were known would seem almost unbelievable.

That such is the case speaks volumes for the interest in the harness horse and stamps it as a business of such magnitude that it should in all respects be conducted by the most up-to-date and progressive methods.

Some associations do this and the business methods of their meetings are such as would meet with the approval of the most expert accountants, yet by far the greater number muddle through in any old fashion rather than follow a course that good business sense would adopt.

There is absolutely no justification for such methods but we can easily detect reasons therefor, although said reasons are not sound ones, but, unfortunately, these reasons are furnished by the parent associations and what can be expected of the affiliated members if the central powers fall short.

The different individual racing associations pay their membership fees to the particular governing body they may select and in return therefor are assured that they may conduct legal meetings, will have assistance in collecting unpaid entrance fees, and are furnished copies of the code of racing rules that will determine, if duly followed, how the advertised purses shall be distributed. These subjects are in a way thoroughly covered and, within the limits announced, the individual association is actively supported by the central body, but when we look at the very foundation stone of successful racing, i. e., the designation of the qualified contestants, we find such a complete failure to handle the situation as to almost render null the many good and necessary regulations of the governing bodies.

From our view point, the basic principle that determines the efficiency of governing bodies such as the National and American Trotting Associations should be a plain and simple enunciation of the requirements of the horses that shall be permitted to compete over the tracks of the individual associations.

At present we have a multitude of rules and regulations aiming at such an end but the object sought to be accomplished is far from fulfilled and, we submit, largely so because the superstructure has been reared without any foundation.

It is true that laws exist requiring an owner or trainer to name his prospective entrant, give breeding, color, age and sex, but there regulation stops and no further description or identification is demanded until a suspicion arises that the horse may be a ringer. In the absence of such a contingency, the owner or agent writes down "Tom Jones, b. g. by Mischance or Accident" and the would-be race horse is started on his career.

The secretary who receives the entry is often so busy that he does not see the horse in question before he starts or possibly during the progress of the race; the clerk of the course does not appear until the racing actually starts and then his time is taken up in recording the finishes, making his entries in the Judges' Book and dividing the money according to the final result of the race; while the Board of Judges are in the majority of instances merely ornamental and not active, with the general result that everything goes in the absence of a protest that focuses attention upon some starter or starters, and, consequently with a whoop and hurrah, in a happy-go-lucky fashion, the winners of money are announced and the distribution is made.

The superior speed and racing manners displayed by a supposedly green horse occasionally causes a protest after the said campaigner has annexed a portion of the moneys in several races and an inquiry as to eligibility is started. When this contingency arises, the parent bodies are active and if there is any fraud, the perpetrators are speedily rounded up and punishment is certain, but this method always has reminded us of the old adage, "Locking the stable after the horse is gone," and in very few instances is it possible to compel restitution of the ill-gotten gains. Furthermore, the final conviction of a ringer is often only secured after the expenditure of a great deal of money and time.

The above bears directly only upon the case of the guilty in intent, but there are also many cases of ringing that actually occur through the fact that innocent individuals are sold horses under false representations as to their eligibility and, assuming such statements to be true and acting upon them, often find themselves convicted of racing horses illegally. In both of these cases, whether fraud is intended with guilty knowledge or occurs innocently through relying upon false statements at time of purchase, the effect is the same, and the number of such instances that are continually arising clearly shows to us the necessity of a positive identification of a starter before he or she shall be permitted to enter into competition at any race meeting.

We have not formulated any pet theory of our own that we desire to have adopted nor have we any personal ax to grind, but we do not hesitate to state emphatically that both the National and American Trotting Associations should, at their coming congresses, take all necessary steps to compel a complete identification of all horses before they shall be permitted to start.

At present all of the purses, as before stated, are open to competition merely upon the naming of the prospective starters and the payment of entry fees, but we consider that the second step in order and not the first.

The first step, in our opinion, should compel each and every owner of a horse that he desires to start in active competition to file with the Register Association a complete description of his prospective performers and request of said association a permit to enable him to race.

This application should set forth the full breeding, age, color and sex of the individual horse and, furthermore should describe as far as possible all of the peculiar markings that may appear on said animal to the minutest degree. Some years ago, as we know from personal experience, the United States government used a blank for purchasing horses that had a profile view of a horse and the practice was to mark thereon at the proper place each scar, blemish, if any, and each distinctive thing that would enable it to be distinguished from all others of its kind. Today many of the cattle registration societies use a similar blank and the effect is that thereby we have visualized before us a representation of the animal in question in such a satisfactory manner that, from such a document, identification is easier established than from a photograph.

Such blanks could be provided by the Register Association and furnished to the secretaries of the racing associations, with the requirement that upon the attempt to start a horse for the first time, the owner or agent should fill out the said application, and request the registration thereof, as a qualified entrant at all of the meetings to be held under ths auspices of the National and American Trotting Associations.

Upon receipt of such an application, accompanied by the requisite fee, which should not be, we take it, in excess of two dollars, the secretary shall be required to give said owner or agent a receipt therefor and permit said horse to start, and immediately forward the application to the Register Association. That association could at once, upon receipt of said application, properly made out, issue a certificate to the owner, and the prospective campaigner will thereby become sufficiently identified to qualify it for competition.

Once registered, the horse in question will be upon the records of the association with such a complete description that the possibilities of ringing will be reduced from that fact alone, and all future purchasers of horses reported to have raced will be able to ask for and demand the said racing permit or certificate of racing registration, before consummating their purchase, thereby greatly lessening the possibilities of innocent vendees suffering through misrepresentation.

Furthermore, the owner of a horse who has in this manner secured his identification, will thereby assure himself from suffering because of ill-advised protests and demands for identification, since such certificate, produced upon demand, would be regarded as casting the burden of proof upon the protestant and it would be up to such parties to establish their objections by a preponderance of evidence before the prima facie proof of the certificate would be overcome to the extent that the owner would be obliged to produce parol evidence in support thereof.

The racing associations could at all times, in cases of doubt, ask for the production of this certificate and thereby the secretaries would be relieved from any labor in tracing identity, as in this event also the certificate would of itself establish a prima facie case of eligibility, leaving the labor of contesting this presumption to the filer of the protest.

In addition, incalculable good would result to the breeders as the knowledge that definite information must be furnished as to a horse's pedigree would put all owners upon their guard to secure a true statement of blood lines so that the same might be entered upon the original application for racing registration.

In this manner we could expect to see the elimination of many of the present uncertainties as to the breeding of a performer, as the filing of an application for racing permit would furnish all necessary data to the Register Association and, in the event that the horse in question enters the standard list, his proper sire and dam could be duly credited.

All of the advantages that we have cited above will enure to the benefit of the local racing associations, the racing owners, the breeders of sire and dam, and the Register Association, but there is still an additional benefit that would be derived from such legislation. That would be the fact that the turf papers would also be assured of the breeding of the new performers and would thereby be enabled to report race meetings full and complete in all particulars without being compelled to insert after the name of a performer the words unknown or breeding untraced.

This idea, as we announced before, is not a new one and, during the Columbus Grand Circuit meeting, we learned that Mr. John C. Welty of Canton, Ohio, the gentleman who is commonly reported as the successor of Major P. P. Johnson in the presidency of the National Trotting Association, is unqualifiedly in support of such a measure.

Mr. Welty has been identified with the National Trotting Association for years and his prominence in the councils of that body and his known exertions for all measures tending to better and improve the racing system, renders his views worthy of the utmost attention, hence we welcome his disinterested support of this measure and we most earnestly ask his colleagues and the directing members of the American Trotting Association to seriously consider the proposition that we advance.

There is nothing behind the movement except good for the harness horse industry; no persons nor influences have any reason for advancing the idea from selfish motives; the general good resulting therefrom will in all respects be for the advancement of the sport we love.—American Sportsman.

SAN JOSE AND WOODLAND.

After having tried for some weeks to find a lessee for the San Jose Driving Park without success, S. C. Campbell in a conversation with friends Saturday at Pleasanton, announced his intention of advertising at once for bids for the clearing of the grounds of buildings and grading out the track preparatory to putting the entire tract back into cultivation. Mr. Campbell expressed regret at the necessity of the course, and also stated that had he himself constructed the track and stables he would feel in duty bound to maintain them as they are, believing that some day they will be valuable. However, as the ground was leased to outside parties and made into a racing plant, the lessees failing to make good, he feels it his only course under the circumstances to throw it back into cultivation, the estate looking to him to make it produce some reasonable revenue.

The San Jose track just as it stands is one of the best all-year-round training tracks in the west, and its passing will be a matter of much regret to horsemen. Should there be anyone desirous of taking it over and saving it as it is prompt action is absolutely essential, as Mr. Campbell's mind was all framed up for "making or breaking" without further delay.

To offset this news, unwelcome as it is, horsemen will be pleased to learn that negotiations are well under way for the purchase of the Woodland Stock Farm plant by the supervisors of Yolo county, the intention being to transform it into a fairground for the staging of an annual event, either "district" or "county" in nature. This course is so plainly a proper one for Yolo county to pursue that the announcement of the accomplishment of the purchase will be hailed with much pleasure and satisfaction. Mr. Considine stated during the week that he had every reason to believe that the supervisors would accept the proposition made them, which was based on a property value under the present market price of Yolo lands.

All of the two-year-old trotters in the local stakes this year will stand inspection and future remembrance, and there is one filly in particular who did not figure as a heat winner who will do to watch—Lulu B., the brown daughter of The Bondsman owned by M. L. Woy of Fresno. This girl carried Charley Clark to second money in the Pleasanton futurity, trotting both miles very nearly as fast as the winner or perhaps as fast as he did, having about the same relative position at the end of each heat that she held at the beginning. She is nice mannered and game and has mighty good backing on her dam's side, being out of Loma B., the daughter of Stam B. who produced that good trotter Albaloma 2:08¼, who forced Maymack to trot to a world's record last fall at Phoenix. Mr. Woy, owing to a pressure of business elsewhere, was one of the few owners of futurity colts who was not on hand Saturday to enjoy the well contested events, Clarence Berry being another regular who was conspicuous by his absence.

NOTES and NEWS

Rico (2) 2:12½.
Julia M. (2) 2:13¾.
Allie Lou (3) 2:12½.
Natalday (2) 2:13½.
Verna McKinney (2) 2:13.
November 27 at Pleasanton.
Not world's records, perhaps, but fast enough.
Not many parts of the world can boast of such performances at such a time.

◈◈◈

Hemet Stock Farm profited largely by the day, both in cash and renown. They are the breeders and owners of Allie Lou, and own Wilbur Lou (3) 2:10¼, sire of the new champion among California two-year-old trotters, Natalday (2) 2:13½.

◈◈◈

Will Durfee had a fairly busy afternoon of it, driving a horse in each race. He was once first, once second, once third and once behind the money. However, look at the fun he had!

◈◈◈

W. R. Murphy didn't do a thing Thanksgiving day but grab all four of the events at the matinee of the Orange County Driving Club at Santa Ana. W. R., sometimes known as "Silent" Murphy, doesn't do an awful lot of talking, but these kind of actions positively shriek aloud.

◈◈◈

Don't fail to turn to the classified ad department and give the offerings therein a careful scrutiny. Several local horsemen are offering bargains of the genuine kind, of all ages and sexes, for either racing or breeding purposes.

◈◈◈

In a recent start in a race at Victor, Montana, Mina Belle, a nineteen-year-old mare by Milroi 20585, pulled off a great performance. Although she was untrained and had never before been hitched to a sulky or been in a race she won the 3:00 trot in 2:48¼, 2:46. She has raised several colts, been used under saddle and to buggy, and had previously trotted an eighth in twenty seconds.—Field and Farm.

◈◈◈

John P. Quinn, who has been under contract to I. L. Borden for the last few seasons, arrived back in California a few days ago after grabbing two races in two days with Albaloma at Phoenix, and is in the old familiar place at Sacramento, where he is welcoming old and new friends. He will conduct a public training stable there and will in all probability have a good line of prospects to work on during the winter.

◈◈◈

Joe McGuire of Denver, who made the trip to the fall meeting at the exposition with one horse, Red Rock, and succeeded in rounding up something over two thousand dollars, returned home late last week after making side trips to Los Angeles and Pleasanton. The Denver situation is rather uncertain since the running horse folks purchased Overland Park, but in all probability Joe will train there as usual pending the start of another racing season.

◈◈◈

A $1,000 stake for five-gaited saddlers and a $500 junior stake will be given at the Denver Horse Show, to be held the week commencing January 16. Prospects already indicate that this season's show will be a record breaker and many horsemen are already making plans for the trip. The junior stake includes horses under four years old up until February 1, 1916. This show is held together with the Denver Fat Stock Show and is the big event of the winter for western show horse enthusiasts.—Spirit of the West.

◈◈◈

The purchase by A. Kingsley MacComber, a son-in-law of the late L. V. Harkness, of several thoroughbreds in England does not mean that the great breeding establishment for trotters known as Walnut Hall Farm will be in any way changed, at least for the present. The heirs have made no plans looking to the dissolution of the stud of stallions and mares that has made this place famous the world over, and there is every probability that the nursery for futurity winners will continue to turn out trotters of genuine merit, and that Harry Burgoyne the most capable manager who ever presided over the destinies of a breeding farm for trotters, will remain in his position to still further perfect the plans laid out during the lifetime of the founder. The success of San Francisco 2:07¾ during the campaign just closed has added to the interest in the beautiful place held by the present owners, and Walnut Hall Farm, the most extensive, as well as one of the most noted nurseries for trotters in the world, will remain intact for some time to come.—American Horse Breeder. (The thoroughbreds referred to above are those selected for Mr. MacComber by Walter Jennings of this city, who has but recently returned to America from his buying trip abroad. The youngsters will be put in training by Mr. Jennings at Aiken, South Carolina, the elder ones being programmed to begin their turf careers in 1916.—Ed.)

"Red" McDonald shipped from Pleasanton this week with the band of brood mares and young things purchased by Louis Titus of Stony Ford Farm, New York, from Woodland Stock Farm, C. A. Harrison and S. Christenson. After seeing them landed safely "Red" will probably tie up with some eastern outfit for a time, things in his line being a trifle dull at present in California.

◈◈◈

Will Durfee, whose winnings of approximately fifty thousand dollars this season give him a rank well up among the country's leading money winning drivers, is already laying plans for a trip to the big line in 1916 with a stable of half a dozen or more good performers. Virginia Barnette, Esperanza and The Lark are among the trotters who are almost sure of a ride across the Rockies if all goes well with them, while the pacing delegation will be represented by White Sox, Clara Mac and Contention B. The latter youngster has had less experience than the other members of the band but he is a pretty well behaved lad and has as big lick of speed as most of the horses eligible to his classes. His favorite distance for a real display of speed used to be about a half or a quarter, but he is learning to carry it now and at Phoenix was separately timed in 2:04¾. William also has some younger ones that may do to take along, and in case he does make the trip California's reputation will be in safe keeping.

◈◈◈

Harry Nelson of Selma is one "stallioneer" in California who has absolutely no fault to find with the breeding business insofar as his own operations for the season are concerned. Expressive Mac 2:25½ has had the best patronage of his career, having served over fifty mares, a number of them of much better quality than any he has previously had access to, while the draft horses and jacks have also had generous bookings made to them. Altogether, over three hundred mares have been served by the various members of the Nelson stud since the first of the year, so their owner will be able to feed them all during the winter and have money left. Expressive Mac has made quite a name as a sire for a horse whose opportunities have been so meager, and his 2:10 list next season seems reasonably assured of the addition of a trotter, the bay mare Nellie Mac out of an Altimont dam, owned by Mr. Nelson and a member of Charley Clark's training stable. She had been "buggy-raced" on the road prior to the time Harry bought her and put her in the Fresno trainer's hands, and since spring she has improved considerably in physical condition, gotten some of the notions out of her head and made a nice bit of speed. On Friday morning of last week she turned the Pleasanton course in 2:11½ just like a girl that is ready to 2:10 any day.

◈◈◈

A. W. Longley, who resides as fancy suits him in Chicago, Oakland or Inyo county and manages to spend the greater portion of his wakeful hours at Pleasanton, recently purchased from Woodland Stock Farm the weanling son of Prince Ansel (2) 2:20½, the champion sire of yearling trotters, and Ella J., the dam of Honey Healey 2:08¼, San Felipe 2:09¼ and Natalday (2) 2:13½, holder of the Pacific coast record for two-year-old trotters. The youngster is a rugged little scamp, every inch of him real, live horse, and he is certainly bred to be a trotter. Bob Mason, sire of Ella J., is also the sire of the dam of R. J. MacKenzie's Bertha Carey 2:07¾, while Ella J.'s dam is a daughter of A. W. Richmond, sire of the dams of four with records below 2:10. While the fast performers credited to daughters of the latter are all pacers, those in the Bob Mason column have all been trotters, while Ella J. herself has produced but one pacer, the mare Emma C. 2:22¼, at one time a member of Henry Delaney's stable at Los Angeles. The latest of the Ella J. line is in all the California classics closed so far for boys and girls of his age, and Mr. Longley has great hopes of seeing him among the contenders in 1917 and 1918.

THE "REBOUND" AT FRESNO.

Fresno horsemen, deprived by the directors of the district fair association of having any sport of their favorite kind during the festival given this season in place of the usual annual event with the features customary to a fair, staged a modest program of races Thanksgiving day at the fair grounds, and while time was not sensational nor fields large, interest ran high and the day was both enjoyable and successful.

So successful, indeed, that immediately after the holiday definite plans were set under way for the formation of the San Joaquin Valley Driving Club, the prospect being that a permanent organization with some seventy-five members will be effected at an early date. All horsemen throughout that section of the state are invited to join in the movement, and may get in touch with the situation by addressing Sid Brown at the Ventura Stables, Fresno.

Frank H. Fletcher, formerly president of the Syracuse Driving Club and one of the staunch supporters of the new enterprise, stated the case in a nutshell recently as follows: "There is no reason why horsemanship and racing, which once occupied the attention of the whole country, should be a dead issue, especially in the San Joaquin, where there is so much blooded stock and many promising horses. It is my belief that a permanent organization in the form of the San Joaquin Valley Driving Club would sound a popular note of approval and, as well, would be productive of sound results for the horse industry."

ANSELILA SELLS FOR $5,000.

Mr. Louis Titus of Stony Ford Farm, New York, who has recently made extensive purchases of California matrons and young things from John W. Considine, C. A. Harrison and others, rounded out the lot Saturday through the agency of S. Christenson, concluding negotiations with Mr. Considine for the world's champion yearling trotting filly Anselila (1) 2:17½, the mares Edna Saunders and Miss Faribault, both by Axworthy (3) 2:15½, and a half interest in the yearling trotter Senator O'Brien 2:29, the fourth of the produce of Carrietta 2:18 to acquire honors at his age. The sum involved in the transaction totalled $6,500, and the quartet was well bought at that figure, as both Anselila and the politically inclined gentleman have every right to mature into sensationally fast and game campaigners. The Titus purchases, which were assembled at Pleasanton and were scheduled to leave there late last week, were held until Edna Saunders and Miss Faribault could arrive from the northwest, where they were sent during the Oregon State Fair.

The sale practically cleans up the great band of matrons and youngsters of Woodland Stock Farm, though the stallions and a few other individuals of various ages yet remain there. It means, however, that for the immediate future, Mr. Considine plans practically a retirement from both breeding and racing, a retirement which horsemen and the public will note with regret. His love for the horse and his interest in the trotter is in no way impaired, however, and he will continue to be an active force in the work of furthering the welfare of the best of man's friends in many sections. His return to active campaigning will be awaited with interest, and the news that he is back will be of a most welcome variety when it does come.

THANKSGIVING MATINEE AT SANTA ANA.

The Orange County Driving Club held its fourth matinee Thanksgiving day at Santa Ana under most auspicious circumstances. Horse racing in Orange county is making rapid strides into public favor, and as weather conditions were most pleasing a good crowd turned out and enjoyed the contests immensely.

W. R. Murphy hung up a record by winning every race of the program, but he had no walkovers, the competition being of the warm variety. Dick W., a member of Mr. Murphy's individual stable, took the 2:20 trot after dropping the first heat to Abe Johnson's bay daughter of Bon Voyage 2:08, Alexandria, driven by F. W. Faucett. Dr. S., owned and driven by Dr. Stevens, gave the winners a tussle in the final heats and went a very consistent race throughout.

Viola Patch, owned by E. R. Bankert of Los Angeles, straightheated the 2:20 pacers—and without more delay it may be stated that the first heat of the afternoon was the only one Murphy allowed to escape him. Fred Cole's chestnut gelding Atlantic Fleet and Abe Johnson's Zella D. took turns in chasing out the winner, forcing her to step the last mile in 2:20.

The 2:30 mixed class was restricted to Orange county horses and was interesting from start to finish. W. A. Patterson's Miss Patterson brought Murphy home in the lead in both heats, with Fritz Schultz' Laddie right after her in the first and S. F. Clapp's Black Diamond driving her out in the second, with neither Pelee or May Raymon very far back. Laddie, who is a great favorite with local folks and has always been regarded as almost invincible in his class, suffered his first defeat for this track and sent some of his friends home rather downhearted. Schultz, however, laughs and says he was only baiting the boys for the next matinee, which will be staged some time in December.

The event for green horses, while not so fast as the others, was interesting and well contested, Wanna Wilkes, owned by the club's president, showing the way home with Carpus and Strathway Jr. horseracing each other for place.

Matinees have become regular events with the Orange County Driving Club, and outside horses and drivers will be welcomed by its members at all times, as they are "in it" for all the sport obtainable. The officers are E. D. Burge, president; R. A. Fuller, vice-president; W. Y. Lindsay, secretary, and Dr. H. J. Stevens, treasurer. W. R. Murphy is speed superintendent, Messrs. F. W. Faucett, W. J. Lindsay and C. J. Schultz form the speed committee, and E. J. Pleasant, to whose work is due much of the pleasure derived from the matinees, officiates as starter. The details of the Thanksgiving meeting are as follows:

2:20 trot:

Dick W., b g by Walter Barker	(W. R. Murphy)	2	1 1
Alexandria, b m by Bon Voyage	(F. W. Faucett)	1	3 3
Doctor S., b g by Carlokin	(Dr. H. J. Stevens)	3	2 2

Time—2:20½, 2:19, 2:22.

2:20 pace:

Viola Patch, b m by Junior Dan Patch	(W. R. Murphy)	1	1
Zella D., blk m by Zolock	(F. W. Faucett)	3	2
Atlantic Fleet, ch g by Murray M	(Fred Cole)	2	3

Time—2:25, 2:20.

2:30 mixed:

Miss Patterson, b m by Zenith	(W. R. Murphy)	1	1
Black Diamond, blk g by unknown	(F. W. Faucett)	3	2
Laddie, blk g by Aladdin	(Fritz Shultz)	2	3
Pelee, b m by Zolock	(R. A. Fuller)	4	4
May Raymon, ch m by Raymon	(Fred McCulloch)	5	5

Time—2:30, 2:29.

Green class:

Wanna Wilkes, b m by San Juan	(W. R. Murphy)	1	1
Carpus, b h by Barondale	(F. W. Faucett)	3	2
Strathway Jr., b g by Strathway	(H. E. Johnson)	2	3

Time—2:46, 2:44.

Whys and Wherefores of the Hobblers

A subscriber writes to inquire why it is that pacers remain on the turf so much longer than do trotters, and cites as examples Earl Jr. 2:01½ and Effie Powers 2:08½; also, he wants to know if it isn't a fact that hobbled pacers have a more extended racing career than the free-legged sort.

The answer to the first question is that pacers, because of their easy manner of locomotion, do not sustain the wear occasioned by the trotting gait; they do not have the action possessed by trotters, and as a consequence do not damage their feet and legs to such an extent; also, they do not so quickly become out-classed after obtaining a fast record; while, lastly, they are kept on the turf longer because they have a more extended opportunity to race. Once a trotter gets a fast record, he is forever after handicapped by reason of the fact that there is little left for him or her to do, aside from giving exhibitions—whereas the pacers are favored with free-for-alls in all sections of the country.

But the difference in gait constitutes the principal reason for the longevity of the pacer's turf career. Hard tracks, or tracks that break out, do not handicap them to the extent that they do trotters. Just consider the impact and the resulting shock to feet and legs when a trotter races over a flint-like track; then compare it, in your mind, with the easy, gliding action of the majority of pacers, particularly those that wear hobbles.

Trotters have a distinctive stroke, bringing their feet down in direct fashion after the manner of a smith working over his anvil. Trotting gaited pacers, too, have a "beating" stroke, but the lateral gait tends to ease the impact and relieve the concussion. In other words—pacers do not pound the ground so hard and thus strain themselves as do trotters.

Take Braden Direct, p. 2:01½ as an example. His front feet are "dished" (or concaved), and despite all the care and precaution that his trainer, Fred Egan, took with them, they used to break off and were always tender and more or less sore. Spurs extending half way up the front of his feet were necessary to keep the shoes on, but despite the handicap resulting from such feet, Braden paced some notable races this season and previously—he is, to my way of thinking, one of the greatest of all pacers, considering the condition of his feet. But the point is this—were he a trotter he would not, I opine, be able to race at all. I have known a lot of pacers whose feet were in bad shape, to keep on racing week after week, but very few trotters that did so.

R. T. C. 2:06¾, Tommy Murphy's champion money-winning trotter of 1911, lasted just one season on the Grand Circuit, having to retire on account of his feet. He left the turf sound in limb, but his feet went back on him and he would never stand training again.

We have had some very light-footed, low-gaited trotters, of which Dudie Archdale 2:03¼ provided the best example, but there are any number of pacers that Dudie was high-going as compared with in respect to action. Previous to 1914 I thought that Citation was the only original velvet-footed wiggler in the fast brigade, but she has lost this distinction. Roan Hal 2:06¼, the gelding that Sam Earing has raced so successfully for several seasons, wins all the prizes. Strange as it may seem, he is one of the most muscular horses I ever examined, and has a body big enough for a 1,200-pound horse. Yet he has a minimum of action—just raises his feet enough to clear the ground, and puts them down like they were packages of feathers. Another of these non-egg-breaking side-wheelers is the new champion four-year-old filly, Sadie Densmore 2:02, Henry Thomas' 1915 wonder. She has a trifle more action than Citation, but owing to her manner of just touching the ground, should be called "Slippery Sadie."

Pacers gaited like the trio that I have named never have leg trouble, and when they are finally relieved from their long service on the turf, it's either the result of one of three things—they may "get wise" and decline to try further; their motors may give out; or some fond owner may decide that they have earned a permanent let-up. Citation left the turf as sound as the day she was foaled. True, she was blessed with a wonderful set of legs, but it's equally pertinent that she didn't have to strain her pins, and thus they served her to the end unblemished.

The inquirant is correct in his surmise that hobbled pacers outlast the free-legged ones, and the reason for that is easily explained. The hobbles hold the pacers together, preventing them from overstriding and extending themselves to too great an extent. Hobble-wearers can stride just so far and no farther, and when the end of their stride is reached the hobbles are there to support them and relieve the strain. They give a horse confidence, too, and you can bet that the steeds feel 'em no matter how loosely they are adjusted. They become part of the horse's mental balance, aside from their mechanical office.

I remember well when Mr Geers was racing the ex-hobbler Harold H. 2:03¾ on the Grand Circuit. Harold had graduated in the straps and out of them, but he always had them on his mind. After every heat, when the caretakers came to unharness him, the first thing that he did was to raise one or the other of his front legs in order that the hobble loop (which he thought should be there), could be slipped off. He forgot them when he was engaged in battling for a heat, but just as soon as he was being unharnessed the old habit of thought returned. A great many of the hobble-wearers act similarly when being unhitched—proving that they are conscious of the presence of the straps.

Nearly every high-class, free-legged pacer is what we term a flexible horse—that is to say, one that can be snatched out from behind on one line without interfering with his stride, or can be taken in and out, pulled up quickly, shot through holes between other horses and sulkies, and made use of in the various ways contingent to racing, without causing him to break. But horses are often lamed through having one or the other of the things I have cited done to him. For instance, just think of the strain that is put upon the horse when he is going a 2:00 shot, and is suddenly pulled to one side in order to pass another horse, etc.; or, consider the strain to muscles and legs when the horse, say, in order to avoid a collision, is quickly pulled up from a 2:00 clip to a 2:10 rate—this frequently happens in races. Those are the things which induce lameness.

It is possible for hobble-wearers to meet these various racing contingencies with less damage to them for the very simple reason that the "pyjamas" support them, hold their legs together, etc. I am not an advocate of hobbles, but I cannot go back on facts which plainly reveal that hobbled pacers last longer than non-hobblers. In order to convince yourself of the truth of this statement, all that you have to do is to go through the Horse Review Racing Guide and consult the tables devoted to the winners of $5,000 and over. "One swallow doesn't make summer," but the great majority of the horses that raced five years or more will be found to be hobbled pacers.

The king pin of all is, of course, Earl Jr. 2:01½, the ten-year-old son of The Earl 2:14½ and Jenny, by Sagasta 4617. He made his appearance on the turf as a three-year-old, in 1908, being then free-legged, and for eight consecutive seasons has been in the thick of battle. Unlike his brother pacers, he was not out-classed or driven off the Grand Circuit with the coming of mature age. On the contrary, he fought the best of them always, gave them measure for measure, and usually more than they bargained for, and at the close of this past 1915 season was as good as he ever was. In his construction only the best material was used; also, he was supplied with a superior heart and lungs, and in addition to all of these physical qualifications, the gray horse was blessed with the gameness of old Andy Jackson. When you have in mind truly great horses, be pleased to let your thoughts revert to old Earl Jr., the toughest, hardiest customer that ever wore the nether harness.

* * *

"To perdition, and then some, with the hobbles," you and I may say, viewing them from the standpoint of the lovers of really good horses, but we cannot go back on the returns. Cussing the hobbles brings to mind a secret that I have held for a good many years, but up to this time have not divulged. If given carte blanche, and vested with absolute authority by the A. T. A. and the N. T. A., I can put the hobbles out of business within one month after the racing season opens in 1916. It's the simplest thing in the world; and, next to kicking a barrel down hill, I can imagine nothing else quite so soft. I really can't understand why it is that some of the rule-makers haven't thought of it! For years they have been lambasting the stuffing out of the hobbles; have wasted enough wind in oratorical denunciation to fill half the automobile tires in America, but ended in doing nothing.

I scarcely feel yet like I care to expose this momentous secret of mine, but since I said I would, I will!

DENY HOBBLED PACERS THE RIGHT TO WEAR KNEE BOOTS.

"That's all!"

Can you imagine a hobbler venturing upon a life of wild excitement and desperate deeds, over the twice-arounds, sans his knee paddies? As well send a soldier into battle unarmed, or a dog into a fight without teeth. Knee boots are, as an equipment to hobbled pacers, as essential as Hamlet in the play. Your imagination may be rubber like in its stretch, but you have to take the count when you try to use it for the purpose suggested.

Very often the knees of hobblers give rise to witticisms and cause humorists to write in comical vein. They seem to regard such signs of battles valiantly fought as jokes; but, let me tell you, the pacers do not look upon the matter that way.

Those two renowned western jehus, Frank Erwin and Bi Shively, happened to meet one morning as they were driving out to the track to jog a couple of steeds. Shively's mount was a pale-faced trotting gelding, whose outward ensemble and facial expression indicated that he had recently passed through some great sorrow. He appeared to be the victim of war, famine, grasshoppers, hot winds, chinch bugs and floods.

Erwin's mount was a nice, tidy black mare, in good flesh and showing no battle scars aside from an enlarged knee—enlarged, however, will not do as a description thereof. The mare doubtless "had a knee," for all horses are so equipped, but her's was not visible to the naked eye. It appeared that her forearm and part of her shoulder had slopped down and settled on the place formerly occupied by her knee, but the knee itself had moved away back somewhere and left no address.

Erwin, taking a slant at Shively's gelding, and desiring to greet his friend with pleasant, happy words, remarked:

"Bi, when you took the insides out of that horse what did you do with them?"

"Stuffed them in your mare's knee!" returned Shively, right off the end of his bat.

It is related that the two brothers-in-arms jogged several horses that morning, but that was the only conversation that passed between them.

The other incident that I am about to relate occurred shortly after the memorable battle of "Wounded Knee," which was fought at Columbus, O., Sept. 27, 1908. It will be recalled that the Teutonic forces (Eph Cinders 2:05¼), commanded by General Nat Crist, put to route the army of the Allies, in joint command of the noted generals, Cox and McMahon, inflicting fearful damage to life and property, and capturing the Allies' war chest, munitions and camp equipage. Several days subsequent to the carnage, Generals Cox and McMahon ordered their 72-centimeter field piece, Jerry B. 2:04¼, the only thing they got away with, led out for inspection and were holding a council of war in order to ascertain ways and means of repairing the gelding's wounds. Jerry's knee was indeed an object of interest, and one which the hospital staff of the Allies had thus far utterly failed to mend satisfactorily.

A bright-faced lad, who had accompanied his father to the races, stood near by the two great commanders, making an inspection of his own. Presently he shouted to his father: "Papa, oh, papa! Come here and see where a naughty bee stung the pretty horsie!"

General McMahon, who was still haunted by dreams of dreadful battle in which he had but recently been routed, turned to his brother officer and remarked:

"Bee, be h——."

Whereupon General Cox interjected: "Still, Dick, a bee could put a knee like that on a horse—providing he was as big as an elephant and his stinger was like an elephant's trunk."

All of which goes to prove that General Cox was ever a philosopher and a man of great erudition in the natural history not alone of hobbled pacers, but other queer beasts as well.

* * *

A knee very similar to that which adorned the right leg of Jerry B. had caused a trainer much worry and, like the commanders of the Allies, he was subjecting the swollen member to the most critical examination. "Wild Pat," one of the most skillful of caretakers, happened along and was called upon for an expression as to his opinion of the member and what was best to do for it.

"I have tried everything I could think of," remarked the trainer, "but there it is, half as big as a water bucket, and as sore as a boil. What would you suggest?"

"Prayer," replied Pat, making a hasty getaway.

* * *

Why is it that pacers whose front feet toe out—nigger-heeled is another term for it—have so much natural speed? I have put this question to many of the learned followers of the turf, also to several high-class veterinarians, but never have I received a satisfactory answer. If you entertain any theories on the subject, cut loose—it's a free-for-all, entrance free and every one invited to enter.—Marque, in the Horse Review.

THE TRACTOR AND THE HORSE IN THE SOUTH

"The articles in your journal regarding the tractor and horse certainly give one a fair conception of both sides of the argument. We Oklahomans have come face to face with the tractor problem and generally the horse is considered more economical, in all ordinary farm operations," writes H. J. Miller of Garfield county, Oklahoma, to the Breeder's Gazette. "Personal observation and experience convince me that the tractor can not always do field work when it should be done, and is not reliable.

"During the last three years one of our neighbors has owned and operated two large tractor outfits which have given him no satisfaction. During wet seasons the engines were used but little and sometimes stood idle for weeks because a few wet patches could not be crossed. Three new tractor outfits have been purchased and operated in the community during the last year. One has been turned back to the company, another has changed hands at a marked loss to the original owner, while the third can satisfactorily pull only two-thirds of the number of plow bottoms included in the outfit. The tractor-owners each season have lost much valuable time in miry places, in waiting for favorable weather and in repairing the engine.

"When the tractors were brought onto these farms all the horses were kept because they were needed in harrowing and seeding the fields and in plowing and harvesting when the tractor could not be used. Since the tractor does not lessen the number of horses kept on the well managed farm, since the cost of operation and maintenance is high, and since the engine is unreliable at its best, farmers of the great wheat-belt of the south see no economy in losing money, time and temper with tractors in the field, while horses are fighting flies in the pasture. Horses are still supreme in farm operations, regardless of claims to the contrary."

ROD, GUN AND KENNEL.

CONDUCTED BY J. X. DeWITT

A BEAR HUNT IN CHIHUAHUA.

Just above five years ago, after having read several stories of the good hunting to be had in Mexico, my side partner spoke the necessary words to convince me that a trip down there would be exceedingly helpful to our constitutions. A hunter friend of mine who had been through the territory we proposed to invade recommended me to write to Mr. Hyrum C. Cluff, of Colonia Garcia, Chihuahua, Mex., and secure his services as guide. After some correspondence everything was arranged and we met Mr. Cluff on the third of October at Nueva Casas Grandes (the month of October being considered the best month to hunt in that region), the jumping off place when bent on hunting in that neighborhood. I will say here that we did not make a mistake in securing the services of Mr. Cluff, as he knew every inch of the country, having lived there about twenty-five years, and he had the best eyes for spotting game I have ever seen.

In order to reach the Nueva Casas Grandes, one must start from El Paso, Texas, and cross over the border to the city of Juarez, and from there we took passage on the Mexican Northwestern railroad. The trip is about 150 miles and one arrives at the destination at about 6:30 in the afternoon. An 18-mile wagon ride over what is considered a road brought us to Colonia Juarez, a Mormon colony of about one thousand people. Here we had supper at 11 p. m., the first food since breakfast, as we had been on the move up to one o'clock getting our rifles, etc., through the custom house. We had a permit from the Secretary of War of Mexico to carry arms into the country, but the dear boys in the aforementioned custom house evidently could hardly believe their eyes; hence much delay was incurred.

The next morning we were up betimes but failed to get an early start, at least not the kind we call early in California; but by 8:30 we were off on the next leg of our journey of a day and a half to Colonia Garcia, the home of our guide and his able assistant, Mr. John Humphrey. The trip from Colonia Juarez to Colonia Garcia was a very beautiful one, and the chances for photographic work were many, though one should have a kodak with a large field.

We got another one of those early starts from Garcia and were soon in the midst of the scattering pines which cover the mountains of this section of the country. About two hours from Garcia we bumped into our first game—a band of turkeys, the finest I had ever seen. A shot from my .30 Springfield treed a nice one at about eighty yards and another brough him down, and that evening we had fried turkey breast which I am willing to swear was the best ever. That night we slept on the side of the Blue Mountain (part of the Sierra Madre range), our camp being on an angle of 55 degrees, but this only served to make an additional void in the region of our stomachs next morning, which the remainder of the turkey nicely filled.

October 7 dawned bright and clear and we were soon on our way down the Blue Mountain to where our permanent camp was to be. Half way down a couple of bucks were sighted down the side of the ring about ninety yards, standing in the shadow of some large pines. I didn't have a coach to give me the windage or elevation and the thermometer and hydrometer had been overlooked in the hurry of packing and even the range flags seemed to be out of order; so the first shot was only a close 4, i. e., a miss, but the buck was finally downed with four of the little 150 grain Springfield bullets through various parts of his carcass, and from the destruction wrought by them, I can hardly see how he stood on his feet as long as he did. The second shot fired struck him low down and too far back, but he went down, and when he jumped up and ran down the ridge, most of the small intestines were left in a pile on the ground. As he was running down, another low shot but farther forward than the last opened a hole through which a good part of the paunch hung out. This shot slowed him down a bit and he finally stood behind a scrub oak. Another shot through the scrub oak merely inflicted a flesh wound. Another shot as he was starting up the opposite side of the canyon struck him back of the shoulder, went through the heart and out through the right shoulder blade, making a hole in the skin through which I could put my first after the skin had hung in the sun for ten days. It is, perhaps, needless to say that the buck came down to this shot.

The sharp pointed bullet was, as I understand it, designed with two prime objects in view: One to decrease the resistance of the air in passing through it and the other to only wound and not generally kill soldiers. The Lord help any poor devil who is ever hit with one of these "humane" implements of war. All he will need will be the kindly ministrations of the burial squad, physicians and trained nurses would be largely unnecessary (unless he was struck at very long range).

The deer being down the next thing to be done was to get him up, and this appeared to me to be the hardest job of the two, but I was not then, as I afterwards became, familiar with the ability of the little Mexican mule to go almost any old place among the rocks and wall-like sides of the mountains and back again with a heavy pack and with apparent ease.

Our permanent camp was reached about noon and we proceeded to make ourselves as comfortable as possible on the soft side of the rocks (there was a little earth here and there around the camp). I had visions of heaps of pine needles for a bed, but the pines were only scattering and the annual fire which sweeps over the country keeps what few needles there might otherwise be carefully cleaned out; hence the so-called bear grass was made a very poor substitute. The whole surface of the copntry is covered with a coating (I don't know how deep) of loose rocks which vary in size from a small pebble to a 40 or 50 pound cobble, and this makes very unstable footing for the newcomer; and one of the first things to learn is to stand up. The natives and the horses and mules seem to thrive on it, but I can't say I liked it.

A week was spent in looking around for bear, during which time my side partner and I killed what deer we could eat and jerk; and when I had about given up hopes of seeing any bear, Mr. Cluff and I bumped right into a large black bear. Ten years ago, being then a practical shooter and innocent of such things as set triggers and palm rests, I should probably have rained bullets around the bear's vicinity in the most approved rapid fire manner; but the desire to always make as near a 25 shot as possible got the better of me and only one fairly deliberate shot was fired which, being slightly better than a hastily fired "close 4," doubled Mr. Bear up in a heap, the bullet flying to pieces on the tough shoulder and the fragments going the full length of his insides, all of which made his aforesaid insides look like they had been hung up and fired at with a shotgun. He was as dead as Adam before the echoes died away.

Things immediately took on a more rosy hue and the usual shaking of hands over the carcass of the bear was indulged in, and it was thereupon resolved that "Big Jim," the mule, should carry the bear into camp, to be there duly photographed so as to furnish documentary evidence to be produced when talking to our doubting Thomas friends at home. It was very easy for us to make the motion, but Jim being apparently of a democratic turn of mind, objected strenuously to any such measures and for considerable time it looked as if the minority would prevail. After being blindfolded and coaxed a great deal, Jim finally stood for having the bear loaded onto him, and thus blindfolded we led him to camp over some of the worst country imaginable. There are no trails down there; one simply goes where the spirit directs, if possible. Jim pulled off both front shoes in getting to camp and at the end of the hike he was stepping as high as a French coach horse, as many fallen trees had to be stepped over and many large rocks crossed, and all this with a bear that must have weighed over 300 pounds and who was then as thin as a crow.

Next morning found us all ready for more bear, and after tramping for some hours, on turning around a large ledge of rock in the creek bottom, we ran onto a two-year-old grizzly who immediately jumped up the ledge a little ways and stood up between two small pine trees and placed one of his front paws on each tree and gave us the "glassy stare" for a minute. I have always considered it bad form to "rubber" and I think possibly the bear would so consider it if it had had time to ponder on the subject, but one of the little bullets from the Springfield hit the white spot between the forelegs and the ground came slowly up to meet him (her, as it turned out to be). On approaching nearer, the bear sat up on her hindquarters like a dog and champed her jaws, but the bullet had made a large hole as exit near the spine and she was clearly paralyzed in the hind legs. The hide is now hanging upon the wall near where I am writing this and the long hair on the neck still bristles up much as it did as I approached the slowly dying animal. A picture I have was taken after the green light had left the small pig-like eyes; otherwise I should not have been so familiar.

I lived a life of ease all the following day while my hunter friend continued his quest after the elusive bear, but with no results. Another small bear was added to my list after a day's rest and luck seemed to change for my side partner, for he finally landed a yearling grizzly which had a very fine pelt and made quite an addition to the ornamental effect of his house.

Such continued good luck on my part, together with the high altitude, made us fearful lest I might be attacked with heart failure, so camp was broke and we started homeward. This is the worst part of the whole business, but it was finally accomplished. On the way out some trout were caught which were very fine and made a most welcome addition to our somewhat limited bill of fare. We also went around through what is locally called Cave Canyon, where the cliff dwellers flourished some years ago. One of the cliff dwellings is famous for the large olla, which is so often photographed, and the holes in which have been have been punched by vandals who have visited there. I understand there were originally two of these ollas in the cliff, but some enterprising "professor" from an eastern college knocked one of them down in search for earthenware pots or anything else he might be luck enough to find. The survivor seems to be good for some years yet if left alone.

Anyone desiring to hunt in that locality (up to the present strenuous times) was almost sure of having a good outing. Game was plentiful—deer everywhere, and there are some lions and evidently there are plenty of bear. The rates charged by guides are the following: For guide, $3.00 per day; helper, $2.00, and 50 cents for each horse or mule.

POPULAR FANCIES ABOUT HYDROPHOBIA.

There is nearly always something in a popular superstition. Though it usually only takes about five per cent of fact to serve as foundation for ninety-five per cent of fairy tale.

For instance, the belief in the deadly unwholesomeness of the night air, which is a classic all over the world, especially in the tropics, has been found to have a slender but painfully genuine basis in the risk of a bite by a malarial or yellow fever mosquito, both of which are night-fliers.

Similarly, while nine-tenths of the images of horror and panic which rise in our minds whenever the cry of "mad dog" is raised are almost purely illusions of fancy, yet it is distressingly certain that dogs occasionally do go mad and bite human beings with fatal effect. And though its name as usually applied is a misnomer there is such a disease as hydrophobia.

It would be hard to name a much more hopeless jumble of fact and fancy than our popular ideas about rabies. A mad dog is not afraid of water; he does not run wild and bite more than once in three or four cases; the disease has nothing to do with the "dog days," and instead of being quite common, is one of our rarest serious maladies. Consequently, public opinion in regard to it ranges all the way from a vivid and lively apprehension of being bitten and dying in convulsions every time the weather gets sultry for a few days, to an utter denial of the existence of any such disease as hydrophobia.

Indeed, a considerable class of our citizens oscillate from one opinion to the other, when annoyed by muzzling ordinances or the like, loudly declaring that any alleged epidemic of the disease is merely a doctor's fairy-tale, got up by the health officers to make the community believe that they are really doing something. While the moment that the cry of "Mad dog!" is raised within a mile of them, they fly into a panic and demand the immediate slaughter, not only of the animal, who may have been merely half-crazed with pain or overcome by heat and not rabid at all, but also of every dog who happens to lose his temper and bite, or even look savagely at any one on the street.

Indeed, while there is solid and indisputable scientific evidence enough of the reality and deadliness of hydrophobia to sink a battleship, it is this very alternation from skeptical indifference at one moment to panic-stricken credulity and dread at another which has made it possible for this doubt to come into existence in the popular mind.

HISTORIC BELIEFS UNFOUNDED.

So horrible and distressing is a death by hydrophobia, with its agonizing convulsions and ghastly strangling spells, while nature with a heartlessness which she shows in no other disease keeps the victim conscious and even rational until the very last gasp, that a community which has seen a case of it or heard a report from eye-witnesses is ready to believe almost anything that may be told about its nature and origin.

Consequently, it would not be too much to say that half, if not two-thirds, of the popular and historic beliefs about hydrophobia are unfounded. Hence it is quite possible for dog lovers, or those who have had extensive experience with dogs, as fanciers, judges of dog shows, officials of Society for the Prevention of Cruelty to Animals, and who have never seen any of these fabulous and imaginary symptoms, to honestly, with a little strain of conscience, perhaps, declare that no such disease exists.

The classic name of the disease, hydrophobia, is a misnomer as applied to the dog. The "dread of water," whose Greek form gave the name to the disease, is present in the human victim, any attempt to swallow being followed by such horrible choking and agonizing spasms of the muscles of the throat, that after a few experiences, the mere sight of food or drink brought into the room makes the patient cry out in terror

The disease in the dog, on the other hand, shows no such symptom, and a rabid dog will not only show no fear of water whatever, but will usually accept it, and eagerly lap it up until prevented by the paralysis of his jaws and tongue, which is a symptom of the disease. So that any attempt to decide whether a dog is mad or not by offering him a drink of water is absurd and utterly worthless, and will result in giving a clean bill of health to the most dangerous rabid animal imaginable.

The next most striking conception in the popular

mind of what rabies looks like, that is an infuriated and bristling red-eyed beast running wildly through the streets, frothing at the mouth and snapping right and left at everything he comes near, is only about one-third correct. Because a large share of dogs with hydrophobia, ranging from half to as high as three-fourths in different epidemics, never show the disease in this form at all.

Rabies is a virulent infection, of which the germ has just recently been discovered by Noguchi of the Rockefeller Institute, and attacks the brain and spinal cord of the dog, producing first of all a very brief stage of excitement like the delirium of some fevers, during which the animal may run and go out of his way to bite. But as the disease usually ends in paralysis and death within three to five days, this stage of delirious excitement is very short, and often entirely absent. A large share of dogs attacked by rabies either show no stage of excitement at all, or go through it so quickly that it is not even noticed by their owners, and pass on into the stage of depression and paralysis, particularly of the muscles of the jaws and throat, ending within a few days in death by general paralysis.

This paralytic, or so-called "quiet" form of the disease, is in one way much less dangerous than the active, because the dog will seldom bite, except when interfered with or thinking himself in danger. But under certain circumstances, it may prove very dangerous, as in the case of kind and humanely disposed persons who attempt to feed or take care of the poor creature, for the dog's temper in this stage is exceedingly uncertain, and he is just as likely to snap at his master or a pitying friend as at a stranger.

NOT A DOG DAYS DISEASE.

Finally, the firmly rooted idea that the disease is almost exclusively a hot weather affair, during the "dog days" of July and August, is almost entirely unfounded. The name "dog days" has nothing to do with the disease, nor with any mortal dog, but is simply the period of the zodiac during which the influence of the Dog Star Sirius, was supposed to be dominant. The disease may occur at any month of the year and often shows its maximum in mid-winter, though there does appear to be a tendency for it to increase a little in the summer, due possibly to the more general outdoor life and the leaving of doors and gates open at that period. The main thing that determines the time of an epidemic is the date at which infected animals are brought into the neighborhood.

The striking and dramatic character of rabies and the eagerness with which the ghastly details of such cases as do occur are passed from mouth to mouth, or spread by the newspapers, has given rise to a highly exaggerated idea of the commonness of the disease. Every case of it is, of course, one case too many, especially when it can be so easily and completely avoided. But in statistical reality, it is one of the distinctly rarer diseases, New York City, for instance, having had 121 human deaths from it in the last fourteen years, and all Great Britain, before the muzzling laws, from twenty to thirty deaths a year. So that it is quite possible for a man to handle scores and even hundreds of dogs without coming across a single case, and he may easily have handled thousands without seeing a case that he would recognize, if he had the popular idea of the appearance of the disease with reference to water and running amuck.

EXTINCT IN MANY COUNTRIES.

Fortunately the disease is no longer a terror and is already on the way to extinction. We have an absolute preventive in muzzling, and countries like Germany and England, which enforce it, practically wiped out hydrophobia a decade or more ago. The Pasteur treatment, if given within a week or ten days, is a certain and reliable cure for those who are unlucky enough to be bitten, and almost every State or large city board of health is prepared to either give it or send patients who need it to a Pasteur Institute.

If there is any doubt as to whether a dog-bite is dangerous a laboratory test of the animal's spinal cord will settle the question within a few days and rid the community of a nuisance as well.—Woods Hutchinson, M. D., in the Sportsmen's Review.

ARIZONA STATE TOURNAMENT.

The account of the Arizona tournament forwarded to the Breeder and Sportsman was lacking in the scores of the second day. In consequence we take the liberty of using the Sportsmen's Review data.

A steady fusillade sounded the initial practice for the blue rock tournament of the Arizona Sportsmen's Association at the state fair grounds at Phoenix, November 14. The shooters lined up twenty-one strong for the practice shoot. Some of the amateurs proved to be of professional caliber.

Following were practice day scores: R. DeMund, shot at 100, broke 96; *C. H. Knight 100—94; P. F. Dodds 100—94; *G. E. Holohan 100—93; T. H. Edens 100—91; L. R. Mellus 100—91; *Ed Mitchell 100—91; *H. E. Poston 100—88; N. A. Howard 100—86; *C. A. Haight 100—86; Dell Morrell 100—84; W. Heflin 100—83; H. P. DeMund 100—82; W. B. Twitchell 100—80; C. H. Nash 80—72; W. C. Mullen 60—50; F. Benjamin 60—40; J. H. Carlisle 40—31; A. C. Pinney 40—31; R. Feland 40—30; Geo. Staiger 40—29.

*Professionals.

First Day.—The first day of the big shoot showed that D. W. King of Denver was some scatter-gun shot. Mr. King made a record when he broke 197 birds out of a possible 200. King shot 120 straight without a miss.

J. F. Dodds, of San Diego, also surprised everybody with 195 out of 200. Dodds is not a professional and his record counts mighty high for the cash prizes.

Guy Holohan, the man with the happy smile, came up to the top, making the third high man.

The shoot started at 8:30 sharp in the morning and before one o'clock it was over and the shooters were all enjoying a big dinner. Thousands of the little round birds were smashed to smithereens. All during the shoot Joe Rice, cashier, was up to the many requirements.

Second Day.—The second day of the shoot resulted in the remarkable record by C. H. Nash of San Jose. He is an amateur shot and was high man for the day, having beaten all of the professional shots with a score of 204 out of a possible 210. Guy Holohan was second, making a score of 203. J. F. Dodds was third, having broken 202. Poor old Joe Rice got the booby prize, having shot but 29 out of 50. Joe used to be some shot, but his eyesight has been troubling him lately.

Following is the score for the second day:

Events—	1	2	3	4	5	6	7	8	9	10—210
C. H. Nash	19	19	20	20	19	20	19	20	24	24—204
*Guy Holohan	19	20	20	18	20	20	19	18	25	24—203

160-bird event—eight 20-bird frames:

W. H. Heileman	20	16	18	15	19	18	16	19	—141
W. S. Heflin	16	18	17	19	20	20	17	20	—147
Geo. Staiger	17	19	17	18	16	19	12	16	—128
"Bob" Feland	..	..	..	..	15	16	14	13	— 58

Longest run was made by H. E. Poston, 118 straight. Other long runs were made as follows: Holohan 64, Mellus 64, Mitchell 63, Nash 53, King 81. E. C. gold medals for straight runs of 50 or more were won by C. H. Knight, of San Francisco, 58; N. A. Howard, of San Francisco, 70.

Third Day.—The last day of the Arizona Sportsmen's Association tournament ended Wednesday at noon, with H. P. DeMund winning high honors. Mr. DeMund won for the second successive year the championship of the State of Arizona with a score of 49 out of a possible 50. He also won the Interstate Amateur State Championship by making a score of 98 out of 100. He also had second high amateur average for the entire tournament, thus winning him the high honors of the big shoot.

Howard Heileman won the gun put up by Mrs. Warner in the miss-and-out shoot. The long run of the second day was made by H. E. Poston, who broke 118 straight.

Mr. King made the longest run during the entire tournament with 120 straight. He also won the silver cup offered for the high professional.

High professionals were: First, D. W. King, 619 out of 645; second, H. E. Poston and Guy Holohan, tied, 613; Ed Mitchell, 604.

High amateurs were: First, J. F. Dodds, 622 out of 645; second, H. P. DeMund, 621; third, C. A. Nash, 601.

DuPont gold bars were won for 50 straights or over during the tournament by King, 120, Haight 63, Holohan 64, Mellus 64, Mitchell 63, Heflin 68, Nash 53, H. P. DeMund 73, Gold 55.

The scores for the last day:

CLARENCE BERRY ACQUIRES GAME PRESERVE

When Clarence Berry, California's foremost owner just now of trotting and pacing campaigners, failed to "materialize" at Pleasanton Saturday when the Pleasanton futurities were raced, the regulars opined that some momentous business deal in which the venturesome sourdough was involved must be hanging fire someway and require his personal attention. He was missed extensively and he remained missing from his accustomed haunts until Tuesday, when he reappeared and the mysterious absence was explained. "C. J." had not been working night and day on the trail of a great profit to be made in any extensive operation in the immediate vicinity of Miller House or Circle City, but had been real busy on a deal that promises a great yield of pleasure not only for himself but for a wide circle of his intimate friends—the acquisition of title to nearly four hundred acres of swamp and upland in the heart of the best goose and duck country in Sutter county. The tract lies about twelve miles from Live Oaks, and while work cannot be done this season to put it in shape, everything necessary will have been accomplished before the season of 1916 rolls around to make it a modern preserve. The club to occupy it will be composed of Mr. Berry's friends and some great sport is anticipated.

Clarence Berry is one of the coast's best known and most popular sportsmen, an amateur billiardist of note, a baseball fan, a reinsman of more than passing ability and an expert wing shot. To a high degree of skill with a splattergun Clarence adds a most pronounced efficiency and passion for wing shooting with a twenty-two, as evidenced by his course in potting himself in one foot last summer up in Alaska when there seemed nothing else to practice on. This seems like carrying one's devotion to a favorite pastime just a little too far, in real candor, but—we can see a world of fun ahead for the members forming the new club.

FEMININE "MASTERS OF HOUNDS."

According to a prominent eastern sporting publication the news has come from England that, by reason of the absence from that country this season of so many prominent men in the hunting world, who are seeing active service in the European war, there are many feminine masters of hounds. It is said that the fact that never before have there been so many lady masters or mistresses of hounds is due to the fact that in the great majority of cases these women are "taking command" during the absence of their husbands who, as some one has wittily said, are following the "dogs of war."

It is said that various hunts are being carried on principally not as a means of affording pleasure to the customary hunters, but as a duty to farmers who desire to see the stock of foxes kept in moderate bounds and also to give pleasure to those soldiers who when home on leave may be desirous of having a day with the hounds.

NGLISH AND AMERICAN TRAPSHOOTING SYSTEMS COMPARED.

[By W. P. Grosvenor.]

At the conclusion of a short visit to New York, I m glad of the opportunity to give you some impressions of your American trapshooting system and oint out the differences between the usual English lub procedure and those of the various clubs I have hot at during my recent visit to your country and hich I take to be common on this side.

I would first like to say that owing to the wonderful runs of kills made by your shooters, which we ear of in England from time to time, many of us lay bird shooters have the impression that your eneral conditions are much easier than ours, otherwise the runs of two and three hundred kills would ot be made. My own opinion, however, now is that our conditions are at least equally difficult, and that he long runs are to be accounted for to a great extent by the fact that the stance and methods of our scratch men have been developed to such a high degree that, given standard ammunition, the clay bird has been mastered very much as the decimal arget has been conquered by the miniature shooters of both countries these last few years.

The American clay bird shooting position strikes me as an absolutely rigid one, the gun immovably held and the whole swing, either vertical or horizontal, coming from the hips, whereas we swing in most cases by the arms, or to use an expressive and slangy word, "swipe" the gun up to or at the bird more in the way we shoot game. In my own case, I am often conscious that I am not "on" accurately as I pull, and while the error is not apparent by the result in many cases, owing to the margin allowed for by the killing circle, I get a certain percentage of misses which I am convinced would be decrased by the American style and which I therefore shall try to acquire in the near future.

Your average trap throw is less than ours by some 20 yards, and the birds, by reason of your rigid automatic traps, maintain a more constant level, but on the other hand the conditions, while reading as easy, are not so in practice, as the birds are more easily affected by the wind and also get down quicker.

Your birds are thrown lower than in England, so that under average conditions I found it necessary to see the bird if anything above the gun instead of covering it up as we have to do in England. The standard English practice permits the use of two shots at each bird if necessary, using shells with a maximum load of 1⅛-oz. shot. The use of only one barrel even when using your usual 1¼-oz. load has so far had a particularly daunting effect on my shooting, as I miss the confidence afforded by the second shot permitted under our conditions, and in consequence I have been possibly two-fifths of a second slower than I am with a second shot in reserve. I simply dare not take the chances I do under our own conditions.

This is, of course, only an individual opinion, and we have shooters on our side who would make a better showing than I have done, but even at that I do not think we can at present find a man within 5 per cent of your best form.

In short, my opinion is that under your conditions your best men are superior to ours, and under our conditions I think the result would also be in favor of your men.

Your use of one shell only and the price of one cent per bird tend to keep the expense lower than that of our clubs. Our birds are charged at 2 cents and the average consumption of shells per 100 birds is about 140 for our good shots and considerably higher for the less skillful men.

In conclusion, I would like to say that any American trapshooters will be heartily welcome at our English clubs. The Middlesex Gun Club, Henden, London, N. W., for instance, shoots every Saturday from March to the middle of November, and it will only be necessary for them to turn up and announce themselves to receive an equally hearty welcome to that given me by your clubs these last few weeks.

EXPOSITION DOG SHOW.

The dog show at the exposition opened Monday and formed a lively attraction on the Zone, being housed in the building formerly occupied by the Marine Cafe. Attendance throughout the three days was most satisfactory, and the show as a whole was the best yet held on this coast. One hundred and eighty-three owners participated in the event, by far the most pretentious and attractive individual exhibit being that of the Anoakia Kennels of Anita M. Baldwin, several members of which are of international renown.

The work of the judges on Tuesday resulted in placing the following awards: Russian wolfhounds, S. V. kennels and Anita M. Baldwin; field spaniels, Dr. Howard Herrington; Irish water spaniels, James Harvey Jones; cocker spaniels, Mission Cocker kennels and Mrs. R. G. Shute; beagles, Fred B. McKay, two winners class awards; dachshunds, Mrs. R. I. Smith and Miss E. Andeanea Flowers; fox terriers, W. B. Fechheimer, Dr. Gordon T. Courtney and El Sur kennels; Irish terriers, Miss Kentucky Leonard, Mrs. Edward G. McDonnell; Scottish terriers, El Sur kennels; West Highland terriers, Edna S. Lively and Mrs. W. A. Ward; Italian greyhounds, Mrs. R. E. Lindsay; chowchows, N. P. Holzheiser; samoyedes, Mrs. A. L. Barry; bull terriers, D. J. Tobin and W. R. Whittier; Pomeranians, Mrs. Leon L. Roos and Miss M. Virginia Phillips; English toy spaniels, Miss Mary R. Nichols; Japanese spaniels, Mrs. W. Z. Haskins and N. P. Holzheiser; Pekingese, Mrs. E. N. Hester and Mrs. Elizabeth Ayres; Chihuahuas, G. W. McConkey and Mrs. C. J. Lindgren; Mexican hairless, Child's Pinto and Babe; toy poodles, Mrs. Sinclair, two awards; Maltese terriers, Melita kennels, two awards; Doberman Pinche, Ernest G. Wiese.

On Wednesday the judging was resumed as follows: English setters—Dog, C. H. Edmunds; bitch, Charles J. McCarthy. Gorden setters—Dog, Mrs. G. A. Ball. Irish setters—Dog, J. J Mitchell; bitch, Mrs. J. L. Marks. Airedales—Dog and bitch, Anita M. Baldwin. Rough collies—Dog, Mrs. E. F. Brown; bitch, William Ellery. Boston terriers—Dog, Dr. Martin Smith; bitch, Arthur Foff. French bulls—Dog, C. F. Lewis; bitch, El Sur kennels. Bulls—Dog, A. B. Corbel; bitch, E. B. Perry. German sheep dogs—Mrs. Mitchelson. Belgian sheep dogs—Edwin Savery. Old English sheep dog—Mrs. M. Colverd.

BIGGER GOOSE STEW IN 1916.

Sacramento will repeat its big goose stew in the fall of 1916, and repeat the success of 1912 on a much larger scale, so states the Union. This was decided by over 200 sportsmen who gathered in the Elks' clubrooms last week to enjoy a program and banquet at the invitation of the Big Goose Stew Club.

No official action was taken then. In fact, the gathering was not a regular meeting of the club. Half of those present were not members of the club, yet they proved as enthusiastic over the next big goose stew as the club members.

The affair was given for the sole purpose of keeping interest in the big goose stew alive. Two hundred sportsmen got their heads together and discussed the event. Two hundred sportsmen unanimously declared that the big goose stew is too much a purely Sacramento institution, is too big an advertisement for Sacramento through the State, and too good a purveyor of fun and merriment to be dropped.

Jack Morshead, J. M. Miller, S. W. Russell, Dr. Howard Cameran and George Van Hutton composed the committee in charge of the evening's entertainment. Jack Inman was the master of ceremonies.

There was not a dull moment. Events, calculated to create amusement and merriment and cement the existing feeling of sportsmanship, passed in rapid review.

Frank Krumpf did the only speech-making of the evening that could be called by that name.

Krumpf asked all present to work, plan, think and help pay for the next big goose stew. All present not members of the club were asked to join.

The big hit of the evening was the singing of Miss Dorothy Vaughan of the Empress. Miss Vaughan gave four selections, each of them better than its predecessor.

Another unlooked for feature, which took the crowd by surprise and later by storm, was a battle royal staged between ten newsboys. The embryo Jess Willards, Willie Ritchies and Kid Williams flew at each other. The dogs of war were let loose. The result was that several hit the floor, while others left the scene of hostilities with eyes blacked and noses bleeding.

Accordion playing by Eddie Breene and Chinese impersonations by Fred Cutting rounded out the evening's fun.

During the entertainment moving pictures of duck hunting and the various industries of the Sacramento valley were shown by the McCurry Photo Company.

A frankfurter and sauerkraut "feed" was given in the banquet hall before the gathering broke up.

FIRE VISITS FAMOUS FISHERMEN'S PARADISE.

Destroying more than $300,000 worth of property, fire, which broke out early in the morning of November 29, swept the entire west side of Avalon, Santa Catalina island, and burned it to ashes.

The conflagration is supposed to have been incendiary, as there were two other smaller blazes earlier in the night, and each of these fires was accompanied by robbery.

The fire started in the Grand View Hotel basement and, aided by a strong wind, the flames rushed unchecked to Central avenue, taking in practically all of the business section.

Many persons were forced to flee, screaming and in their night clothes, from the five hotels which were enveloped by the conflagration.

The Metropole Hotel, which was a landmark of Southern California, having been built before 1886, was burned to the ground. There were no guests at the Metropole, as it had been closed since October 6th.

Five other hotels, the Bay View, the Grand View, the Rose, the Miramar and the Central, were burned to ashes.

From the main street the flames then spread up the mountainside and destroyed nearly every summer cottage on the slope and in the canyon, making a brilliant and spectacular sight for early risers in Los Angeles, fifty miles away.

The famous Tuna Club, known the world over, also burned. On the water front the only building left standing is the wireless station. The tug Warrior in the harbor saved the pier by throwing water on it for two hours.

The work of rebuilding, it is stated, will begin at once, and Avalon is to be made bigger and better than ever.

THE VANISHING ANTELOPE.

Of all the hundreds of thousands of antelope which once enlivened the plains of New Mexico, only 350 head are left, according to figures just compiled by the United States Forest Service, and this in spite of a state law providing a heavy fine for killing this beautiful and useful animal. The remnant consists of twelve little herds scattered around in various out of the way places, and according to reports at least half of these herds are even now decreasing from year to year. There are probably 100,000 square miles of natural antelope range in the state, which means that there is one antelope left to every 200 square miles of such range.

It is, of course, only natural and right that sheep and cattle should have displaced a large proportion of the original number of antelope in New Mexico, but the complete wiping out of this beautiful animal is entirely another matter. The mountain sheep of New Mexico are in even worse straits, only 20 head remaining alive, according to the last reports received by the Forest Service.

That the more enlightened stockmen and sportsmen are at last awakening to the gravity of the situation is shown by the fact that at least two protective associations have sprung into the work of saving New Mexico's game during the last month, one at Albuquerque and one at Taos. The Silver City Sportsmen's Association has been active for several years, but until recently has received scant support from the rest of the state. It is the object of these associations to co-operate actively with the state game department and the Forest Reserve in enforcing the game law and pushing an aggressive program of work for better game protection.

Remington-UMC Notes

Good Scores at Arizona State Shoot.—H. P. DeMund was the star of the 1915 Arizona State Trapshooting Tournament, held recently at Phoenix. Shooting a Remington pump gun and Remington-UMC shells, he won the State Championship with a score of 49x50, and also the Interstate Amateur Championship, breaking all but two of his 100 targets.

This is the second time Mr. DeMund has taken the center of the stage in the State classic, having won this event in 1912 by making a perfect score of 50 straight.

"ENCOURAGING (?) RIFLE PRACTICE."

I don't know why no other pilgrim holding down an executive position with a civilian rifle club has not before this risen in his wrath and demanded the explanation for the penurious, incompetent and exasperating method of handling the orders from civilian rifle clubs to the Ordnance Department, wrote a western sportsman to an eastern friend recently.

Regardless of being thus alone in my glory I purpose to hold forth on the subject for a space, with the assistance of a cake of ice on my fevered brow, a brake on the typewriter and a censor to oversee the finished result.

As is known to a few investigators on the subject, but not a matter of common knowledge, there is a handful of misguided gentlemen about this huge country of ours who have banded themselves into clubs, followed as near as human being can follow and remain human, the brilliant regulations of a National Rifle Association crossed with an incomprehensible War Department, and shot more or less faithfully the military rifle as used by the army and militia. These said misguided gentlemen, unlike the milish, are furnished nothing but a few perfectly good stumbling blocks, and some reels of red tape. Free rifles are theirs—after they furnish more documents and more bonds and pay more boxing charges and more freight and go through more annoyance than first class rifles, not wrecks, would deserve were they given without further restriction to the riflemen for the remainder of their natural lives. So startling was the success of the free rifle movement that 25 clubs out of 455 entered the first annual military interclub match, and not one of these said entered clubs used the said free rifles. Further testimony is not needed.

Not satisfied with withholding all practical assistance to said few and misguided civilian riflemen, the brilliant geniuses at the head of this "movement," evolved from the very first the most exasperating and nonsensical and delaying set of regulations covering the purchase of the few little things in the way of rifles and ammunition these riflemen needed in their work.

With the coming of the war the Washington presiding genius in this field broke out in all his glory. I don't know who he is, I hope that he sees this screed. First he cut off all sale to the few struggling clubs—they might be pirates or submarines or Mexicans killing people south of our border, they might sell a pitiful case of Springfields to some belligerent—although hundreds of Springfields already were in their hands were they so disposed. They might start a private revolution, having proven by their desire to shoot rifles they were undesirable citizens. Of course the stores were not full of other sorts of guns, and of course scores of army rifles were not already in their possession.

[Concluded Next Week.]

THE FARM

PRICKLY-PEARS FOR DAIRY COWS.

The prickly-year, specialists of the United States Department of Agriculture say, has now been demonstrated to be a good and palatable feed for dairy cows. Prickly-pears have been fed to cattle to some extent in Texas and Mexico for many years but their value as a feed has not been fully appreciated. Recent experiments by the Department of Agriculture have shown however that this feed can be used much more extensively and can form a much larger proportion of the ration than was believed possible heretofore.

The results of these experiments, says an article in the August issue of the Journal of Agricultural Research, indicate that there is no reason why prickly-pears should not come into general use for feed in all sections where they can be readily grown. Under proper climatic and soil conditions the prickly-pear is a perfectly practicable farm crop. At Brownsville, Texas, the average annual yield for the first two years' growth from cuttings was about 40 tons, and at San Antonio about 25 tons an acre. After the first two years a yield of 50 to 100 per cent more can be expected. Irrigation is unnecessary and the cost of growing the crop is therefore small in comparison with the tonnage produced.

The prickly-pear, it is found, contains approximately 10 per cent of dry matter, the remainder being water. If it is assumed that the nutritive values of different kinds of feed vary in direct proportion to their content of dry matter, 1 pound of sorghum hay equals 15.9 pounds of prickly-year when the latter is fed in large quantities, and 10.1 pounds when fed moderately. One pound of sorghum silage was found to equal 2.6 pounds of prickly-pear and 1 pound of cottonseed hulls equal to 5.8.

From 60 to 100 pounds of prickly-year, 3.6 of sorghum, and 1 of cottonseed meal a day made a maintenance ration for a Jersey mature cow when dry. If no sorghum hay is available the amount of prickly-pear should be increased to 110 pounds and the cottonseed meal to 2 pounds. Experiments show, however, that it is best to feed not more than from 60 to 70 pounds of prickly-pears a day. When 120 to 150 pounds were fed, excessive scouring followed, and in addition the laxative effect of the feed made it extremely difficult to keep the stable in a sanitary condition.

In general, it may be said that cows like prickly-pear and eat it with relish. The feed, according to the experiments, causes an increase in the quantity of milk produced but a slight decrease in the total production of butter fat. This decrease becomes more pronounced as the quantity of prickly-pear in the ration is increased. Butter produced on a prickly-pear diet is highly colored but neither its flavor nor the keeping quality of milk is noticeably influenced. From the experiments it is noticed, however, that cows fed upon prickly-pears appear to be more sensitive to "northers" than those which receive a dry roughage. The greater the quantity of the plant consumed the more the milk production fell off during these storms. On the other hand, the feeding of prickly-pears appeared to have no influence on the offspring of the cows nor on the condition of the mothers after birth.

The cost of feeding prickly-pear will depend naturally on local conditions. There is no great difference between the spiny and the spineless varieties in their values as feed, but the cost of harvesting the latter is less. On the other hand the spiny varieties yielded a larger tonnage to the acre in Brownsville and are not so susceptible to insect depredation. They are also more hardy and can be grown on a much larger area. The cost of singeing the spines off was most common method of removing them is by singeing with a strong gasoline torch, a machine specially constructed for this purpose being on the market.

WEEDS HARBOR INSECTS.

Getting rid of grass, weeds, and undergrowth about the farm during the fall and early winter is one of the best protective measures the farmer can use against crop-damaging insects the following year. Weeds, matted grass, dead vegetation and brambles along fences, roadsides, margins of fields, banks of little streams or ditches, especially in irrigated territories, are the natural hibernating and often the breeding places of many destructive insects. This vegetation gives grasshoppers, chinch bungs and other insects most favorable conditions for reappearance the following spring and winter. Similarly, voluntary growths of wheat harbor the Hessian fly; while stray alfalfa plants in the fields and around them may be the source of the incursion of grasshoppers. The Hessian fly in the absence of volunteer wheat at times lays its eggs on the young crab grass which may spring up in the fall after a tract has been burned over. At present, in some parts of the country, the late-sown wheat is being infested by Hessian flies that have developed in and spread from volunteer wheat. Late sowing cannot be expected to protect winter wheat from attack in spring if volunteer wheat has been permitted to grow up either in nearby fields or among the late-sown grain. Grasshoppers lay millions of eggs along the banks of canals and ditches in the western country. Chinch bugs hibernate in bunches of broom sedge, and many other destructive pests could not endure the winter were it not for these natural nurseries.

In many places community action in destroying weeds is necessary, as it may not be profitable for the farmer to clear his side of the road if the other is allowed to remain a harboring place for pests. In such cases it might well pay the community to get sheep co-operatively and use them to clean up the weeds of the entire section.

Gombault's Caustic Balsam

The Worlds Greatest and Surest

Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

FOUNDER,

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Peters — The Shot Gun Shells of Quality

Used by successful shooters afield and at the traps

Made with steel reinforcement in the head, placed there to give protection to the shooter.

Other features of the shell are the perfect, sure-fire primer, giving proper ignition to the powder and insuring greatest efficiency to each load; gun wads made of pure elastic felt, (manufactured by us for this special purpose) which properly confine the gases, improve the shot pattern and prevent leading; shot made in Peters Shot Tower, absolutely uniform in size and finish; last, but not least, the firm beveled crimp which holds its shape and permits the shell to operate freely in all kinds of repeating and automatic guns.

Because of these methods of careful manufacture, winners everywhere KNOW that Peters ammunition is dependable.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER

REPEATING RIFLES FOR HUNTING

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

Every Good Gun Store is a Headquarters for Winchester Guns and Ammunition

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS.

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds — one-third of the money will be allotted for the division for each heat; Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before December 31st, 1915, whether for extension of subscription, renewal of subscription or a new subscription. Address:

Entered as Second Class Matter at San Francisco P. O.

Terms—One year, $3; six months, $1.75; three months, $1. Foreign postage $1 per year additional; Canadian postage 50c per year additional.
Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

BARGAINS IN OUR CLASSIFIED COLUMNS.

While the Chicago sale has drawn on our horses to a considerable extent, all the bargains in California were not sent there by any means, and as usual some exceptionally good ones are offered for sale through the medium of the Breeder and Sportsman's classified department, page twelve of this issue.

Anyone desiring things ready to race should be attracted by the offerings of Adolph Ottinger of this city, whose business affairs will interfere with his activities next season. Agnes Carter 2:15¾ is one of the most pleasingly bred mares left in California and is better than a 2:10 trotter, having won several times over the Stadium course for Mr. Ottinger this season in 2:13. She can trot the short turns and should make a wonderful brood mare. Dick W. 2:06¼, eligible to the 2:08 class on the big rings and the 2:12 on the twice-arounds, is a familiar figure on California tracks and is as serviceable as ever, while Ina Frances S., a five-year-old daughter of King S., Mr. Ottinger offers an excellent prospect for next year's slow trotting classes, as she is sound and game and has a matinee record of 2:11½.

Mrs. W. B. Bradbury of Corte Madera lists for sale a three-year-old pacer whose pedigree is replete with famous names—a daughter of Arner, Diablo's brother, out of Alberta by Diablo, grandam a sister to Little Albert—a double cross to that greatest of matrons, Bertha. She is a beautiful individual and a natural pacer.

Californians well remember the good qualities of Ball Style 2:10, and I. F. Eaton of Chico wishes to dispose of two exceptionally nice young things by him, a three-year-old filly and a two-year-old colt, both out of a Doctor Hicks mare. Mr. Eaton also has a nice two-year-old filly by Dan Logan out of a daughter of Arthur Wilkes, nicely broken and high class in every way.

Have you good mares you would trade for an imported draft stallion, sound and of nearly ton proportions? If so, get in touch with D. A. Baker, Hill P. O., San Diego county, without delay.

A WORD TO THE SECRETARIES.

Meetings of secretaries of race and fair associations in various parts of the country are "in order" from now on, in fact a few circuits have already announced their dates for the coming season, and the managers of our few California fairs are no doubt laying definite plans for their events of 1916. To them we would make the suggestion that no exact dates be arranged or claimed until the latter part of January, basing the suggestion on these grounds:

The Pacific Coast Fair Association was formed for the express purpose of fostering fairs with harness racing in California, and early in January will begin its active work on the formation of a circuit of such events in 1916. A representative of the association plans to make the rounds of the various cities where fairs will in all probability be held, with or without the association's assistance, at the conclusion of which journey he will know pretty well just what will or will not be done. With this information at hand it will not be a hard matter for the representatives of the various local organizations to get together and agree upon dates which will establish a chain of fairs so arranged that there will be no conflicting dates and permitting of the most economical transportation of horses and other livestock and exhibits from one end of the circuit to the other. The advantages of such an arrangement are too apparent to require further comment on our part, and will appeal directly to fair promoters in all sections of the state.

The request that action be deferred until after the first of the year is made on account of the inability of Robert A. Smith, secretary of the P. C. F. A., to take up his work aggressively until after that date. Prior to the formation of the new body Mr. Smith had arrangements well under way for taking a large consignment of California horses to the Chicago sale and it was necessary that these plans be carried to their culmination before new responsibilities could be shouldered. Once home from the auctions, Mr. Smith will promptly "set things going" for the Pacific Coast Fair Association, and we bespeak for him the hearty co-operation of every horseman, stockman and agriculturist who is interested in seeing district fairs permanently re-established in California.

SARGO 2:07½.

Since 1912 the bay gelding Sargo has been racing up in the northwest without attracting any great degree of attention, though acquiring a record of 2:16¼. He was entered merely as being by Keeler 2:13¼, his dam not being given by the parties racing him and never being established in the Year Book—a case that is by no means uncommon, but one that is entirely too familiar. So long as the horse was content to trot around fifteen there was no great amount of worry felt over the missing portion of his pedigree as duly recorded in the season reports, as trotters of that caliber are rather numerous these days. Things happened eventually, however, that made him more prominent and a bit of curiosity began to be evidenced concerning his maternal blood lines.

At the Oregon State Fair, where he was third in one race and fourth in another, the fastest time in either event being 2:13, he was bought by W. G. Durfee for the proverbial song and shipped to California with the stable of the Los Angeles reinsman, unloading for a few days' stay at Sacramento and Pleasanton pending the closing of the exposition races, when he was scheduled to make the trip south. Once in Durfee's hands he was given the benefit of a little "working over" in shoeing and rigging and before many days trotted the Sacramento track for Loren Daniels in a bit better than 2:10. At Pleasanton he was given another material boost toward getting into shape by Dr. I. B. Dalziel, the latter gentleman putting his mouth in condition for him to derive some real benefit from the hay and oats consumed, and he progressed so steadily that Durfee took him along with him to Phoenix, where he was entered in the 2:12 trot. After winning the first heat in 2:11½ he developed a temporary trouble that caused him to be drawn before the race was concluded, only to "come out" nicely and be started again three days later in a special event, taking second money and winning the last heat in 2:07½, that being the fastest mile trotted during the Arizona State Fair this year.

Now there is considerable difference in the amount of interest displayed in a horse that is being beaten in midseason in ordinary time and one that trots in 2:07½ late in November, and that unknown dam became a mare of much more importance. Having been bred at Brook Nook Ranche it was a "dollar to doughnuts" proposition that he had not merely a dam but a good one, a request for information direct to headquarters being productive of the following information:

Sargo was foaled at Brook Nook in 1905, the resultant foal of the first of a series of three matings to Keeler of the brown mare Treacle, also a native daughter of Brook Nook. Each of these three matings proved productive of speed, Sargo 2:07½, Toffee (foaled 1906) 2:15¼, with a trial of 2:07½ with quarters in twenty-nine seconds, and Melero (foaled 1907) 2:11¼, Toffee and Melero both being pacers. Since 1907 Treacle has produced but three foals, two of which have been sold while the third, the yearling filly Honeyberry by Letrado (3) 2:25, remains the property of Brook Nook Ranche.

These are pretty fair proofs of the quality of the dam of Sargo as a speed producer, and she is bred along sturdy lines that explain why Sargo had a right to trot in 2:07½, being a daughter of Alcone 6780 and Brown Sugar by Red Wilkes 1749, second dam Bon Bon 2:29¾ by Fieldmont 5050, third dam Ellen Belle by Mambrino Patchen 58, fourth dam Belle of Meadowbrook by Edwin Forrest 49, fifth dam by Herr's Boston, etc. With these lines to back up those of Keeler (a son of King Rene and Ada Wilkes by George Wilkes) it seems almost criminal for Sargo to appear in the Year Book as one of the "Topsy" kind that "just growed," for he is most emphatically not an "accidental trotter." He sells next Thursday at Chicago, and if the right man gets him he will be heard from in the future.

Speaking of names—and we note that Potroast headed a sumptuous summary a few days ago down east—Sargo is not the proper title for this rather homely but good going trotter, "Sorgo" being the correct spelling, and the name being in keeping with those found in the "family tree." It is true that the method of procedure seems to have been reversed when Bon Bon produced Brown Sugar (the other way about being a more everyday practice) but no fault can be found with the course that produced Treacle from Brown Sugar and then went further and proceeded to the manufacture of Sorgo (Sugar), Toffee (Taffy) and Melero (Molasses). The system is simplicity itself—if you are provided with a smattering of border Spanish.

CALIFORNIANS SELL NEXT THURSDAY.

Sixty-four head of California's equine aristocrats left Los Angeles Wednesday on a personally conducted tour to the east, Bob Smith accompanying them in the combined roles of chaperon, groomster extraordinary, publicity manager and consignor's agent, the band having been assembled through his efforts. They were briefly reviewed in our last issue so little remains but to wish them a safe journey to new and pleasant homes, and to assure the patrons of the Chicago sale that they are worth the money—each and every one of them. The bulk of the local contingent will be put up for sale on Thursday, December 16, and the returns will be awaited with much interest. There are several individuals in the lot that should command prices well toward the sale's top figures, for they have the quality in every way.

In addition to the great array gathered by Mr. Smith, C. A. Harrison of Seattle has also sent a choice lot headed by the champion sire of yearling champions, Prince Ansel (2) 2:20½, who in a locality of much activity in breeding should prove of inestimable value to the industry at large. With the Prince went the brood mares Serpola by Mendocino 2:19½, in foal to True Kinney; The Attraction by Peter the Great 2:07¼, in foal to True Kinney; Princess Bessum by Egyptian Prince, in foal to Prince Ansel; Bela Hall by Walnut Hall, in foal to Robert Bingen, and Mista Lockheart by Lockheart, in foal to True Kinney. In the car were also included the yearlings Prince Anseleema by Prince Ansel—Aleema by Nutwood Wilkes, and Prince Bessum by Prince Ansel—Princess Bessum, as well as the weanlings Bingen McGregor by Robert Bingen—Alma McGregor, Ansel Lockheart by Prince Ansel—Mista Lockheart and Ansel Moko by Prince Ansel—Eocita by Moko, grandam Mendocita (dam of Mary Putney (3) 2:05½, etc.) by Mendocino.

Not since the days of Palo Alto has California sent such a draft of trotting stock to the eastern auctions, and it is a matter of deep regret that local conditions are such as practically to compel their sale outside of this state. We can spare such individuals only at high expense to our own best interests, and can only hope—and work—for a day when it will no longer be necessary to market them away from home.

ANOTHER ONE FOR ELLA J.

Last week when commenting upon the performance and pedigree of California's new two-year-old trotting champion, Natalday (2) 2:13½, we made mention of but one pacer produced by Ella J., the mare Emma C. 2:22¼, formerly trained by Henry Delaney, Natalday's breeder. A few days ago, however, we were advised by Mr. Delaney that we were one short in our estimates, Ella J. also being the dam of the pacing mare Santa Paula who acquired a non-winning performance record of 2:17¼ in a special event at the recent Riverside fair. The newcomer to the list is a full sister to Emma C., being by Silver Coin 2:10, and was bred by Ed Sewell of Santa Paula, also the breeder of San Felipe, Honey Healey and Emma C., as well as another filly out of Ella J. and by Joe Locke by Zolock. The Joe Locke filly is still owned by Mr. Sewell and has gone the route on a halfmile track in 2:23, so Ella's list is due for another boost in the course of the coming season. Not to be overlooked, either, is her yearling by True Kinney owned by Roy Mayes of Dixon, for this lad is paid up in the stakes and could show a forty gait when sold last spring.

The Story of Allie Lou

OUR BEST THREE-YEAR-OLD TROTTER OF 1915

When Esperanza made her campaign of 1914 which resulted in an unbroken chain of victories, including every three-year-old trotting classic of the Pacific coast, she set a brand new record in local trotting history. Not again soon would it be duplicated, was the opinion of horsemen in general, and while the season of 1915 brought forth no exact duplication of the performance it was productive of a series of almost equal brilliance and even greater profit, the same forming the season's campaign of the three-year-old trotting filly Allie Lou (3) 2:12½. The histories of these two fillies are very similar in many respects, both having been bred and developed in the same section of California, both being by sons of McKinney that have trotting records below 2:08, both being out of developed dams which are also multi-producers of standard performers, and both numbering several of the same series of stakes among their winnings. Esperanza has the faster race record by two and a quarter seconds and a time record of 2:09; Allie Lou was never sent for a time record as a three-year-old and was never as closely pressed in any of her engagements as was Esperanza. Esperanza won every three-year-old stake on the coast; Allie Lou did not start in two of them but won all the rest. Esperanza raced in three states and won over five thousand dollars; Allie Lou was never out of California and won over eight thousand dollars. The preliminaries being thus disposed of we will proceed to the main bout.

One of the famous friendships and partnerships of California pioneer days concerning which a wonderful wealth of "romance" and interesting incident could be written by some one possessed of its intimate history was that which for so many years endured between Mr. W. F. Whittier and Colonel E. L. Mayberry, a friendship that was dissolved only by the death of the latter a few years ago. Both possessed many likes—and dislikes—in common, the former including all sorts of red-blooded outdoor sports and a deep and sincere regard for the trotter. It was in the later eighties, while on a "prowl" for fish, fowl and adventure in Southern California, that they became aware of the opportunities presented by the Hemet valley and conceived the idea which culminated in the construction of the Hemet dam and the resultant transformation of the valley from desert to orchard and farm. Together they put their names into one of the finest chapters of California's constructive history, never becoming too deeply engrossed in business affairs, however, to prevent them from taking an active interest in the trotter or to keep their names from appearing occasionally in both the Year Book and Register.

Indeed, it was but the following year from his trip of discovery to the land of Ramona and her kindred that the Colonel laid the foundation for this story through one of his little breeding operations. Early in the season of 1888 a gentleman living at Chino had purchased from Palo Alto the then six-year-old stallion Woolsey, the first foal produced by a chestnut daughter of General Benton to the embrace of Electioneer. The bay colt came when his dam was but a four-year-old and practically unknown, but obscurity was not long to be her portion, as she was none other than Waxana, whose dam, Waxy, was a daughter of the great Lexington. In 1886 she gave birth to a full sister to Woolsey who, under the name of Sunol, was to startle the world at the ages of two, three, four and five years. Shortly after the arrival of Woolsey at his southern home, Colonel Mayberry sent to his court a thoroughbred mare of whom he entertained an excellent opinion—Sespie by Crichton. Crichton figures in a number of trotting horse pedigrees, especially in connection with the A. W. Richmond cross, having sired, among others, the grandams of the very fast pacers Italia 2:04¼ and New Richmond 2:07¼. Before coming into Colonel Mayberry's hands Sespie herself had been mated a few times with A. W. Richmond, but if the resultant foals exerted any influence upon the present day family of the trotter the same is not a matter of record. Should anyone reading this sketch be familiar with the history of any other of the produce of Sespie we would be pleased to hear from them.

Seventh dam the dam of Bolus by Comus.
Eighth dam Lisette by Hambletonian.
Ninth dam Constantia by Walnut.
Tenth dam Contessina by Young Marske.
Eleventh dam Tuberose by Herod.

In due time after the stinting of 1888, Sespie was safely delivered of a filly foal which was promptly christened Lady Woolsey, never to acquire fame as a race mare but to achieve much renown as a matron. For Colonel Mayberry she produced the full sisters Lady Zombro 2:24¼ and Nealy W. 2:27, both by Geo. W. McKinney 2:14½, and after passing into Mr. Whittier's hands gave birth to Walter J. 2:28½ (a brother to the pair of mares above mentioned) and Harry R., a son of Armond Lou 2:27½ who achieved a record of 2:24½ as a yearling in 1910. It is with the first of the foals mentioned, Lady Zombro, that we are most concerned at this moment.

Not being a stake candidate the Lady, who was foaled in 1897, was allowed to attain a well advanced maturity before much was done with her, Peter Hodges making one start with her at Los Angeles as a five-year-old and placing her 2-2-2-2-4 in time from 2:19 to 2:24, the heat winners being McKenna, Lady Fair and Lady Rowena. In 1903 she celebrated the Fourth of July—and here we have another "Esperanza" reference—at Santa Ana by trouncing hanna Treat three heats out of four, the latter gett her record of 2:24¾ in this identical race. So see the rivalry between Allie Lou and Esperan runs back farther than would at first appear, as h twelve years ago we have Allie's ma putting it o Esperanza's grandma and hanging a brand on that she carries to this day. Later in the seas Lady Zombro was distanced at Petaluma for the fi last and only time; at Los Angeles she was fourth Rosie Woodburn, and later at the latter course w 2-1-1-2-2 to Mamie Elizabeth, trotting both her w ning heats in her record time, 2:24¼.

This ended the Lady's trotting career, and we wi to digress to arise to a point of order and remi you of the fact that there was some mighty go leather in the bunch of girls with whom she associ ed in the two years just reviewed. Johanna Tre became the dam of Del Coronado 2:09½ (or rath was already his dam, as he was foaled in 1897), Irene S. (2) 2:28¾ (foaled the year following t race with Lady Zombro) and Zulu Belle 2:06¼; Ros Woodburn is the dam of O. U. C. 2:07½, while Mam Elizabeth produced El Volante (3) 2:13¼ (sire Del Rosa (2) 2:26), Amo K. 2:20¼ and Eileen (2:29¾ (dam of Eileen C. (3) 2:29). Save for the u timely death of El Volante, this roll of honor Mamie Elizabeth would undoubtedly have been mu more pretentious by this date.

Retired from racing after these brief campaig the Lady spent a number of unproductive years un purchased by Mr. Whittier to become a member the breeding ranks at Hemet Stock Farm, founded 1909. From that year she has never failed to rai a foal, five of which are in the list. First, foaled 1909, came Hemet (3) 2:08¼, one-time world's cha pion three-year-old pacer; then Miss Gailey (191 with records of (2) 2:29½, (3) 2:12½, (4) 2:11½ then Frank H. Holloway (3) 2:22½ on a halfmi track; then Allie Lou (2) 2:25, (3) 2:12½, the coast best three-year-old in 1915; then Billie Boyd (2:30, her first foal by Wilbur Lou (3) 2:10¼, t first three having been by Geo. W. McKinney 2:14 and the fourth by Kinney Lou 2:07¾; she has yearling and a weanling by Wilbur Lou and is aga safe with foal to him—certainly a remarkable reco for a mare who foaled for the first time at twel years of age.

So much for the maternal ancestry of Allie Lou- and the story of the other side of the house is or yet familiar to the ears of even the younger gener tion of trotting horse lovers, Kinney Lou 2:07¾ ha ing been gone from our midst but a few brief yea and his qualities of excellence being well remem bered. No horse stood higher in the affection Budd Doble, and it is most pleasing to the maste reinsman and his most steadfast friend, Mr. Whittie to contemplate the success achieved by his get racin

Budd Doble and His Old Favorite
KINNEY LOU 2:07¾
Sire of Hemet Stock Farm's Futurity Winners, Wilbur Lou (3) 2:10¼ and Allie Lou (3) 2:12½.

ler the registry of Hemet Stock Farm. Wilbur
l (3) 2:10¼ and Allie Lou (3) 2:12½ have made
nes for themselves which will long endure in
tting annals, and the future holds promise of an
n greater renown.

As a two-year-old, Allie Lou was taken with the
ble campaigned by Hemet Stock Farm throughout
lifornia, and while achieving no sparkling success
a trotter returned a pretty fair account of herself
her few engagements, in addition to being a con-
tent winner in standard bred show rings at all the
rs visited by the stable. Under the tutelage of
ssrs. Doble and Blackwell, not overlooking some
uable kindergarten lessons from Frank Rees, she
rned to trot early in life and at the State Fair of
14 was driven to her first record of 2:25 by Mr.
ckwell, the performance being against the watch.
ter during the same meeting she made her first
rt in company in the State Fair futurity, trotting
-2 to Byron and Carl in 2:23¾, 2:24½ and 2:22.
Pleasanton, in the junior trotting division of the
st of the colt stakes promoted by Rodney J. Mac-
nzie, she won second money to Byron in 2:21 and
20¾, being third the first heat and second in the
al. This told the tale for 1914, and she was taken
me to be prepared for a more extensive campaign
1915, as she was entered in every classic on the
ast save the Oregon futurity. Mud kept her out of
Stanford stake, but she annexed all the rest of
em in impressive fashion and with the loss of but
o heats, while on more than one occasion she
uld have shut out some or all of the colts racing
ainst her. Her performances this year being mat-
s fully reviewed at recent dates we present them,
th her winnings, in condensed form as follows:

San Francisco (mile track)

ne 18—P.-P. I. E. Stake, purse $5000, won (Alonzo McDonald)..... Rank, 2-1-1; time, 2:18½, 2:18½, 2:21.	$2,500.00

Riverside (halfmile track)

tober 6—2:14 trot, purse $300, second (A. L. Blackwell)..... Rank, 4-2-2; time, 2:15¾, 2:15, 2:14½.	63.75
tober 9—2:10 trot, purse $500, third (A. L. Blackwell)..... Rank, 3-2-3; time, 2:16, 2:13, 2:16.	87.50

San Francisco (mile track)

vember 2—Occident Stake, purse $2,885, won (C. L. DeRyder)..... Rank, 2-1-1; time, 2:15½, 2:16½, 2:16.	1,442.50
vember 5—State Fair Futurity, purse $1,400, von (C. L. DeRyder)..... Rank, 1-1-1; time, 2:13¼, 2:13½, 2:14.	700.00
vember 13—Breeders' Futurity, purse $2,500, von (C. L. DeRyder)..... Rank, 1-1-1; time, 2:14¼, 2:12¾, 2:14½.	1,500.00

Pleasanton (mile track)

vember 27—Pleasanton Futurity, purse $3,500, von (C. L. DeRyder)..... Rank, 1-1-1; time, 2:12½, 2:13¾, 2:13¾.	1,750.00

Total winnings in stakes and purses, $8,043.75

This is a tidy little sum for a three-year-old trotter
lay up in one season without leaving her home
ate and racing at but four meetings, but there is
t a modest amount to be added thereto. Under the
nditions of some of the stakes which she won there
ere added awards, aside from the purse actually
ced for, to be paid to nominators and stallion own-
s. From these sources Allie Lou earned $200 for
emet Stock Farm and an equal amount for Budd
oble as the owner of her sire, bringing her total
edit up to $8,443.75.

Eight thousand, four hundred and forty-three dol-
rs and six bits—say it fast or say it slow—is a lot
money. If you don't think so, try to borrow it!
nly four trotters exceeded it on the Grand Circuit
1915, so do you blame the Hemet folks for having
soft place in their hearts for Kinney Lou 2:07¾
id his descendants? And especially for Allie Lou
:) 2:12½?

THE RISE OF THE METROPOLITAN TROTTING CLUB.

Before this issue has reached all our readers the
rst day of the New Zealand Metropolitan Trotting
lub's Spring Meeting will have passed, and the New
ealand Cup of 1915 will have become a matter of
story. In view of the proud position which the club
olds today, it is interesting to look back and see
ow modest was its beginning sixteen years ago. In
899 the amalgamation of the Canterbury Trotting
lub and the Lancaster Park Trotting Club resulted
the formation of the New Zealand Metropolitan
rotting Club, and the new body held its first meet-
g on the present property at Addington in Novem-
er of that year. As may be imagined, the appoint-
ents were distinctly crude when regarded in the
ght of the present day's standard of comfort and
ompleteness, and the course as it is now would
ardly be recognized by anyone who had not seen it
nce it was first used. The meeting we are referring
extended over two days, and the stakes for the
rst day totaled £505, and for the second day £595, making a sum of £1100 for the gathering. The principal event was worth only £120, and the stakes ranged from that sum down to £30. The fields were small, and for the sixteen events during the two days there were just 99 starters, an average of just over six per race. Some idea of the quality of the competitors may be gathered from the fact that the fastest time registered in a two mile event was 5 min. 2 sec. and for one mile 2 min. 29 2-5 sec. The totalisator investments on the first day amounted to £3369, and on the second to £7326, making an aggregate of £10,695 for the meeting. When we consider these facts and figures in comparison with those of the present time, we are able to form some idea of the wonderful development that has taken place in the sixteen years of the club's history. The stakes for the three days of this week's fixture total £10,000, the same amount as was given last year, and the New Zealand Cup alone carries £2500, more than twice the amount that was given for the whole of the first meeting. The breeding of light harness horses has become a very important industry, especially in Canterbury, and the fields have become very much larger, while the improvement in the speed of the horses may be judged from the fact that last year's cup was won in 4 min. 31 sec. and that this year's race, confined to horses that have done 4 min. 37 sec. or better for two miles, drew an entry of twenty-one. Last year the totalisator investments, although not quite up to the previous year's standard, reached £117,999 10s for the three days, and the sum handled on the cup was £9321, which is not very far short of the aggregate for the whole of the two days in 1899. As is well known, the club has spent very large sums of money in improvements to its property, and it would be difficult to find in any part of the world a better equipped course than that of the New Zealand Metropolitan Trotting Club. The progress that has been made is indeed phenomenal, and we have no doubt that the future will show still further development.—New Zealand Referee.

Plans for Tia Juana

RACING TO COMMENCE JANUARY FIRST

The question that is of most concern to western followers of the thoroughbred just now is whether or not the Tia Juana meeting will become an actuality, there being numerous reports both ways in constant circulation. That there may be some grounds for doubt is possible, but from all most authentic reports from the scene the promoters anticipate no trouble whatever of a nature arising from the political situation in Mexico. It will be recalled that reports in September to the effect that Carranza would interfere with racing at Juarez failed to be substantiated, as the Juarez meeting is in full swing under most agreeable circumstances, and when it comes to a "showdown" it is quite probable that all differences that may have existed between Senors Carranza and Cantu will be found to have been fully and amicably adjusted. Among horsemen here the main doubt seems to be concerning the new track's ability to draw enough horses for a hundred day meeting, but there are a good many small stables scattered about the west that will make the trip, as well as a number of more pretentious ones from points farther east. The promoters themselves, who should know pretty well what they are facing, state that they have assurance of plenty of horses for the inaugral meeting of the new course.

For some weeks a big crew of men and teams has been working at top speed to get the course in shape for opening on New Year's day, with the result that a well equipped plant is rapidly assuming concrete form and nearing completion. Just how the work has progressed and what the future holds in store is told in the following story which, with illustrations, appeared last Sunday in the San Diego Union:

Surrounded by the mauve hills of Old Mexico, as though nature intended the spot for the site, lies the magnificent new Tijuana race course, a few miles from the thriving little Mexican village, where, on New Year's Day thousands will assemble to witness the inauguration of a 100 days' race meeting under the auspices of the Lower California Jockey Club, of which James W. Coffroth, famous sporting man, is president.

Nowhere on the Western hemisphere could have been chosen a more ideal location for the construction of a racing plant, such as the Tijuana track will be, when completed.

Climatic conditions are such, in this section, that racing can be conducted from one end of the year to the other, occasional rains being the only disadvantage—and this barely worthy of mention.

With excellent railroad facilities on the Santa Fe and San Diego & South Eastern Railway systems, thousands daily can be transported to the course from the centers of population on the coast and from points inland, as well as from the larger cities of the South, particularly New Orleans, from whence many are expected to come to witness the thoroughbreds in action on January 1.

That the track positively will be completed and ready for racing on New Year's Day, is the statement of the management of the jockey club which promises six races every day, excepting Monday, throughout the meeting. Fear of interference of any kind by the warring factions of Mexico has not stopped the association from spending a world of money to get the plant into shape for the opening card. Work is being pushed as rapidly as possible, shifts of men working day and night under the supervision of a capable body of foremen who have promised the owners that the jockeys will be able to take their mounts in workouts by December 15.

The track will be a one-mile oval, slightly banked on the outside turns and sufficiently wide enough to allow twenty-five horses to face the starter. The top soil already has been laid, with the exception of about forty feet of the track uncovered on the stretch turn. It is the purpose of the contractors to build the best and safest stretch turn on any track in the country, speed and safety being their aim.

A grandstand 300 feet long, having a seating capacity of 5,000 people, nearly is completed, about a week's work being necessary to have it ready for occupancy. Adjoining the grandstand and not more than 100 feet south, will be located the betting ring. Here it is expected that more than twenty-five bookmakers will go on the block on opening day and that a fifteen-book ring will prevail during the meeting. The structure is built of wood and concrete and will be completed within the next ten days.

Adjoining the betting shed, fifty feet south, stands the paddock, sufficiently large enough to accommodate the entries for the largest card of any day during the meet. This building also is constructed of wood and concrete and is located just a few feet north of the jockeys' room and the secretary's office.

In all, the arrangement of buildings, off the lawn, equals any in the country, when the rapidity with which they have been constructed is considered.

Above the paddock and far enough away from where the public will congregate, thereby preventing fire or interference with the horses, are the barns. Ten barns now are ready, each barn containing forty stalls, making stable room for 400 horses. Other barns are to be erected when necessity demands.

The board of racing officials chosen to handle the affairs of the club represents the better class of men in the racing game in the United States. Harry Morrisey, who will handle the barrier, is known to racegoers all over the country. His ability has never been questioned while his determination to give the public the best there is in him has won him a world of friends wherever he has performed.

Presiding Judge C. H. Pettingill of New York is regarded the leading official in his class in the game today. A square deal for all, has been his motto and has brought him abundant success.

J. J. Holtman and L. J. Rose will act as associate judges. Two men better qualified to fill these important posts cannot be found. Holtman is a thorough horseman, having been identified with the sport for a quarter of a century, while Rose, whose home is in this city, can recall his experiences on the race tracks of this country as far back as 1880, as a man, and long before that time as a boy, when his father owned and raced some of the most famous horses of that day.

President Coffroth, Baron Long and H. A. Houser, respectively treasurer and secretary, are all well known wherever sporting men congregate. They are hard workers for clean sport and with them as officials of the association, a successful season of racing is assured the Lower California Jockey Club.

In addition to the officials mentioned above it is worthy of note that Dick Dwyer has this week been notified of his appointment as handicapper, as his presence in that capacity means a well balanced program daily. Dwyer is one of the most popular of the old-time officials at Emeryville and other famous courses and horsemen in general will learn of his appointment with satisfaction.

The American-bred Rena Pointer, who won the Sydney Thousand last Easter, and is being prepared for the next Melbourne Thousand, fell while racing with Ivy Harum at Victoria Park the other week. A gusty wind carried a piece of paper onto the track, and Rena Pointer jumped violently when she came to it, and fell heavily forward. Her driver (George Babcock) was shot out of the gig, landing on his head. The mare's hopples had to be released before she could stand up, and the impact with the ground so much affected a shoulder and a leg that a veterinary surgeon was called to attend to her. The accident temporarily stopped her training preparations for the big Victorian event.—N. Z. Referee.

OFFICIAL SESSIONS IN WESTERN CANADA.

The annual meeting of the Western Canada Fairs Association was held at Edmonton, Alta., Nov. 15 and 16. Nine associations were represented, namely: Brandon, Man.; Regina, Saskatoon, Prince Albert and North Battleford, Sask.; Calgary, Edmonton and Red Deer, Alta.; New Westminster, B. C. A slight change was made in the circuit, with dates for 1916 as follows: Calgary, June 29-July 5; Red Deer, July 6-8; Edmonton, July 10-15; Brandon, July 17-22; Regina, July 24-29; Saskatoon, July 21-Aug. 5; North Battleford, Aug. 7-9; Prince Albert, Aug. 10-12.

The meeting of the Auxiliary Board of Appeals of the American Trotting Association for Western Canada was held the afternoon of Nov. 16. Only one case came up for hearing—an appeal from Jos. Huber, of Bozeman, Mont., against suspension for non-payment of fees by Brandon and Saskatoon exhibition associations. Mr. Huber claimed that it would have been necessary for his horses to take the mallein test, and this would have unfitted them for racing. It was shown by the defendants that Mr. Huber was fully aware on June 15 as to the conditions under which his horses could be shipped and raced, and that there was no necessity for his horses to take the mallein test in order to enter Canada for racing purposes. The appeal was therefore dismissed.

The Auxiliary Board of Appeals of the American Trotting Association for Western Canada is composed of Messrs. I. G. Ruttle, Calgary, chairman; R. W. Hamill, Regina; A. C. McCrae, Winnipeg; W. I. Smale, Brandon, and W. J. Stark, Edmonton, secretary.

W. H. Knight, secretary of the American Trotting Association, was present at the meeting, also W. O. McCullough, of Toronto, representing the Canadian National Trotting and Pacing Association.

ACTIVITY IN THE NORTHWEST.

[From the Rural Spirit.]

North Pacific Fair Association 1916 Meeting.

John W. Pace, Secretary of the North Pacific Fair Association, Seattle, Wash., has issued the following notification to members of the association and all concerned:

"Application has been made for reduced rates to and from the annual meetings of this association to be held at Seattle, Wash., February 3 and 4, 1916. It is not to be presumed that we can obtain any arrangement other than the certificate plan, which calls for the regular railway receipt when the ticket is purchased, and failure to get such receipt and certificate by some members has resulted in inability to show the attendance reached fifty.

"Those who have attended previous meetings are familiar with this subject and the troubles we have encountered. We ought, this year, with attention to this detail on the part of every member, to get the necessary number.

"This office will issue a bulletin on the matter at a later date. In the meantime, if there is a fair or other organization in your county or district, whose officials should be interested in our work, please take it upon yourself, individually, and as a member to invite a delegation.

"We want an interesting program. You will be called upon for some sort of participation in the discussions, or to present some phase of a topic connected with the work. Advise me now, so that I may put you on the program. In case of your failure to do so it will devolve upon the secretary to construct a program and the subject assigned to you, in absence of information as to your preference, might not be just the one you prefer to discuss. Please aid to this extent.

"You will later receive information regarding the plans at Seattle for the meeting. I have suggested that no form of entertainment be provided during the morning or afternoon of February 3rd or 4th. The session ought to be a busy one this year, and the regular attendants can recall meetings at which important business was interfered with by entertainment in lieu of the day sessions.

"I shall appreciate an early response to this bulletin regarding the part of your delegates in the program; also the names of those who have been selected to attend."

Racing Prospects Good.

To the Rural Spirit: A lot of people on the Pacific Coast who are neither kings nor poets say that racing is fit for kings only. I want to show that there are others that enjoy a good fair with plenty of racing, especially harness racing. You will notice that when the grand stand is only about half filled and the program shows a race is next, that grand stand fills up quickly. Some object to the races, saying it takes too much for purses. They forget that lots of times the entrance fees will pay half or two-thirds of the purses. They never think that if they did not have the racing for entertainment they would pay some side show or troupe the money and let it go out of the country.

I have been watching the ups and downs of the horsemen for the past eight years, but the mists are passing away and I think by the time you have read my contribution you will think so, too.

In the first place, I will start in with Skagit county, one of the best there is in the state. They had a fair last fall at Burlington which was away ahead of anything on this side of the mountains in the state of Washington. The grain exhibit was a good one and the large number of Holstein cattle was something wonderful to look at, and when it comes to draft horses, that county has them all downed. But there was one thing that did not suit the people at the fair and that was, they had a little race track, just a quarter-mile long, which was all their fair grounds would permit. They found that the track was their drawing card, and that it was too small. They purchased ten acres additional and are now surveying a halfmile track, which I think will be one of the best winter tracks on the Sound where horses can be wintered and trained cheaper than any place in the country. It is in the center of the Snohomish flats where they raise more than a hundred bushels of oats to the acre, and the best timothy hay which can be bought for $10 per ton.

The Skagit County Fair was capitalized at $10,000 and at a meeting last week this was raised to $25,000. Our adjoining county on the north, Whatcom, on the 12th of the month let a contract for a race track just one mile from the center of Bellingham. I have been told in the city of Everett people are talking track again. When they had a track there it was a success, but like Mt. Vernon, their track was soon in the center of the town and was sold. I never liked the plan of the Snohomish management of restricting the races to home county horses. There were horses in other counties that would have made more interesting races—Elfreda D. at Centralia, two or three runners at Burlington and some more good ones at Olympia and Elma.

I am pleased to read in the Rural Spirit that Tacoma is to have a track and I have it from good authority that McCormick will fit up Madison track this spring. Olympia had their first fair and race meet this year and it goes without saying that it was a success, and they are already laying plans for next year on a larger scale.

Next year, we will have Centralia, Elma, Olympia, Tacoma, Seattle, Burlington and Bellingham. We will have a good circuit without having to interfere much with our neighbors, Oregon and British Columbia.—H. R. Ball, Seattle, Wash.

TOM GAHAGAN REVIEWS THE DURFEE "TOPS" FOR WESTERN HORSEMAN.

The limited amount of racing afforded by the coast tracks does not appeal to the Los Angeles trainer, Will Durfee, who is recognized as the premier reinsman of the section west of the Rockies. "The Murphy of the Pacific Slope" is what they call him where he is best known, which is both a compliment to the Californian and to the wizard of Poughkeepsie. During the past three seasons Durfee has not been in the East, but his 1912 trip to the Grand Circuit will long be remembered, for that was the time he cleaned up in the Kentucky Futurity with the brown colt Manrico (3) 2:07¼, winning what was the most bitter contest ever waged for the honors of that colt classic. The coming season will see the trainer from the city of flowers back with us, if he adheres to the plans which he had formulated at the close of the recent harness meeting at the exposition track at San Francisco.

During the past season the Durfee stables in the main consisted of young stuff, the pacing mare White Sox 2:05¼ being about the only aged horse to be raced by the Los Angeles trainer. After the close of the 1912 season both Manrico and Helen Stiles 2:06¼, the latter a fairly successful trotter on the Grand Circuit, were disposed of, the Futurity winner being purchased by Walnut Hall Farm, where he is now in the stud. The star pacer, Don Pronto 2:02¼, was raced afterward on the coast, but was sold for export to Australia, and since that time Durfee has been searching for recruits of Grand Circuit caliber among the youngsters.

In spite of the fact that there are several trotting-stake prospects for 1916 which look to be able to trot miles from 2:03 to 2:05 Durfee announced a short time since that he would bring the four-year-old filly Virginia Barnette 2:08¼ east next spring for a try at the big cracks. This rather frail-looking youngster has been more or less of a sensation since a two-year-old, when she trotted a half over the Los Angeles track in 1:00¾. She took her record when a three-year-old in a race at Phoenix, where she beat Star Winter 2:05 a heat. She met with an accident during the early part of last season, running away and falling into an open sewer in Los Angeles, and was out of training for some time. At the June meeting at the exposition she won a race and was second to Spriggan in the $20,000 stake for 2:10 trotters.

Previous to shipping to San Francisco for the November meeting at the exposition track Durfee worked the filly in 2:06, and it was this that convinced him that she had a chance against even the cracks of the East. She won on the opening day at San Francisco, although not in a style which made her look like a stake trotter of class. In her next two races, however, she looked better, beating that wonderful stake trotter, Peter Scott, a heat each time, the champion, Lee Axworthy, being the only other trotter to beat the leading stake winner more than one heat this season. In the final race she gave Scott what Murphy stated was the hardest argument he had during the entire season, with the exception of the M. and M., in which he was beaten, and the New York reinsman had a lot of respect for the filly after that race.

Durfee did not ship Virginia Barnette to Phoenix for the late meeting there, fearing she might get a record which would make her ineligible to some of the Grand Circuit stakes, as her winning races at the exposition left her eligible to the 2:12 classes. 2:06 trotter at four years, he figures that she should improve considerably the coming season, and, with her perfect manners, she can be counted upon to be a contender in almost any company if all goes well with her in her training.

For the Grand Circuit pacing stakes Durfee is relying on the bay mare, White Sox 2:05¼, winner of the $20,000 race at the June meeting at the Exposition, and second to Hal Boy in the similar event raced at the fall meeting. Originally a trotter, the bay mare could beat 2:10 at the diagonal gait, but showed an inclination for the side-wheel style of locomotion. She paced the exposition track in 2:05¼ in winning the big stake last June and that means a lot, as the course by the Golden Gate is, as one of the grooms expressed it, "about 20 minutes slow." At Los Angeles, where there is a fast course, she worked in 2:02¾, and last week at Phoenix she won two races, in one pacing all three heats in 2:05¼.

The peculiarities of the exposition track make it hard to judge the capabilities of a horse racing over it, but White Sox defeated Hal Boy at the spring meeting, and finished a good second to him at the late meeting, and the gelding, with the exception of Russell Boy and possibly Single G., was the class of the stake pacers of the big ring the past season. In fact, he raced a faster heat than either of the stallions. At long range it does not look that the class of the stake prospects for 1916 is as high as for the past season, and Durfee is convinced that the daughter of Del Coronado is worth taking a chance on in the events to which she is eligible on the Grand Circuit. She is a mare which makes a break occasionally, usually going into the first turn, yet at that she can sprint away from the wire at a terrific clip, and I have seen her cover the first two furlongs of the exposition track in :29.

Durfee has a three-year-old pacer called Rayo d Oro (Ray of Gold), which looks to have considerable class, as he raced well at the exposition and won a heat in 2:07¼ at the recent Phoenix meeting. The four-year-old trotter, Esperanza, could also beat 2:1 away off, and should be useful in purse events, although she hardly looks to be of stake caliber.

BRIGHT PROSPECT FOR CANADIAN ICE RACIN

The formation of the Canadian National Trottin and Pacing Harness Horse Association a little mor than a year ago will solve, to a large degree, many of the difficulties prone to the owners of trotters an pacers in this country and every owner of a trotte and pacer that has campaigned to any extent know how much red tape there has been in settling up dis putes which have arisen during the racing in thi country, by the National Trotting Association, wit headquarters in Hartford, Conn., and the America Trotting Association with headquarters in Chicago Ill., the two parent bodies that have governed har ness horse racing both in the United States an Canada for many years.

The Canadian harness-horsemen came to the con clusion that the time had arrived for them to asser their independence and form an association of thei own to govern racing in their own country rathe than have the sport governed by men located i another country and unfamiliar with conditions o this side.

In selecting their officers, the new association cer tainly acted with wisdom, as their president, O. B Sheppard of Toronto, is undoubtedly the best quali fied man in Canada for the position. Mr. Sheppar is a thorough horseman and has owned and cam paigned many noted horses, including Maud Keswick 2:03¾, Ritchie 2:09¼, Black Bird 2:11¼, and Rich ard S. 2:13¼, all with success, and he is familia with every angle of racing. His ability has beer recognized by many of the Grand Circuit organiza tions as he has repeatedly acted in the capacity o presiding judge at the Columbus, O., Fort Erie, Ont. and Syracuse, N. Y., meetings, where his work has been of the highest character. Mr. Sheppard is also president of the Canadian Standard-Bred Association that has done so much to advance the interests of this particular breed of horse in Canada.

The secretary, W. A. McCullough, also of Toronto, has been secretary of the Dufferin Driving Club for a number of years, where he has always given complete satisfaction, and as secretary of the Canadian governing body he is making good.

During the many years that harness horse racing has been conducted in Canada under the jurisdiction of the National and American Trotting Associations, those organizations gave little or no attention to racing on the ice. In fact, they just about ignored this branch of sport, though its popularity has spread to large proportions. The reason for this is no doubt accounted for by the fact that there are practically no recognized winter meetings for harness horses in the United States and the managers of the parent bodies never considered it necessary to visit the winter meetings over here and find out just how pretentious they are. The fees, however, were always collected with unfailing regularity, although nothing was given in return.

It is pleasing to note that the Canadian Association will give the same attention to winter racing that they do to the summer meetings, and this means that many of the objectionable features which have been known to exist heretofore will be eliminated

ow that representatives of the association are to e present at each meeting.

One of the things that the new association will egulate will be the keeping of records made on the e. The National and American Trotting Associaons never paid any attention to time made over e and kept no account of such records, which, to ay the least, was not dealing fairly with the public, ho, after all, form the backbone of the sport.

The records of trotters and pacers on ice vary a reat deal more than they do on land, because the ondition of the surface of the tracks changes oftener nd it is a rare thing to find two tracks alike in the inter.

At Ottawa, when the races are held on the river, he horses may or may not race an exact mile, as the rack is made in a frozen body of water and may be ver or under the regulation distance, but at all other oints where ice meetings are held the tracks are of egulation size, consequently records made over them re authentic.

Up to this winter, all existing ice records were ade on halfmile tracks as no meeting has been eld on a regulation mile track, but this coming winer it is more than likely that all existing records ill go by the boards, as there will be a big meeting n the Mount Royal mile track in January, under the uspices of the Back River Jockey Club. This track s a mile oval and as many of the best horses of the resent day are to be at the meeting, new records re sure to be established.

The record for a mile on ice is 2:11½, made by he Eel 2:02¼ (now dead), on the Ottawa river, anuary 21, 1900. This was an exhibition mile gainst time. The race record for a mile on ice, :13¼, is held by Royal Grattan 2:06¼, made four ears later at Dufferin Park, Toronto. The Eel 2:02¼ nd Merry Widow 2:03¾ each paced the Delormier ark track in 2:14¼, in February, 1909, and this time tands as the local ice record. Both performances ere against time.—Montreal Star.

DEATH OF TWO GREAT MATRONS.

From New York comes the report that Nettie King (4) 2:20¼ and Portrait 2:23¼, two of the most highly prized brood mares owned by the Hillanddale Farm, Mamaroneck, N. Y., died within a few hours of one another. This pair of matrons have given the industry a number of very capable performers, Nettie King (4) 2:20¼ being the most prominent in a producing line.

Nettie King (4) 2:20¼ was by Mambrino King and out of Nettie Murphy by Mamlin Patchen, she having been bred by Village Farm, East Aurora, N. Y. The most notable of her foals were the The Abbot 2:03¼, one time holder of the world's trotting record; The Abbe (3) 2:10½, a notable futurity performer at the trot when a three-year-old, and when seven, the winner of his every Grand Circuit engagement, at the pacing gait, securing a record of 2:04; Bonington 2:04¾, one of the fastest trotters in 1915; The Huguenot 2:07¾, full brother of The Abbot 2:03¼ and The Abbe 2:04; King Bellini 2:10½, record made this season; Necia (3) 2:13¼, an exceptionally fast trotting filly which died early in the racing season of 1910 when she appeared to be the best of the two-year-old division; The Beau Ideal 2:15½, a noted show horse and sire; etc. Her record performers are as follows: The Abbot 2:03¼, The Abbe 2:04, Bonington 2:04¾, The Huguenot 2:07¾, The Abbe 2:10½, King Bellini 2:10½, Necia 2:13¼, The Beau Ideal 2:15½, The Mitre Bearer 2:19½, Stella Maris 2:23½, and Natoka 2:24¼.

Portrait 2:23¼ was by Alcantara 2:23 and out of Ethelberta (dam of four including Filipino 2:10½, and grandam of twenty, including Ethel Mac 2:07¼, Masetto 2:08¼, Tommy Mac 2:10½, etc.) by Harold; grandam Juliet (dam of three producers) by Pilot Jr. This mare also ranks as a producer of extreme speed, two of her offspring being members of the select circle and another trialled better than 2:10; her list being made up of Gazeta 2:06, Farfalla 2:09¾, Clodagh 2:11¼, Berta Bellini 2:15, Wakita 2:25¼ and Flora Bellini 2:29½.—American Sportsman.

When it comes to a matter of winter workouts the three-year-old pacing gelding Dixon Boy in Walter Tryon's stable at Sacramento seems to have the record for either old or young performers. Here at the exposition the Boy was unsteady and finished fourth in the three-year-old pacing division of the Breeders' futurity, showing some real quality by beating the flag in the third heat after being apparently hopelessly out of it earlier in the mile. Taken home, Walter kept working on him for a time and on Wednesday, December first, put Chris Jorgensen up behind him for a fair trial, Chris never having driven him before. The result was a nicely rated mile in 2:08, and to say that Chris and Walter were well pleased is putting things mildly, the enthusiasm bubbling over and flowing as far down the valley as the Marshall ranch in the Dixon country, James W. being breeder and principal owner of the lad. This Dixon neighborhood will butt into things occasionally in the horse line, and this fellow has a real Dixon flavor to him in addition to the name, his dam being Leota 2:23 by Diablo 2:09¼, grandam Trix Marshall (dam of Mona Wilkes 2:03¼, Aerolite 2:06¾, etc.) by Nutwood Wilkes 2:16½. The latest comer to the list of extremely fast ones emanating from the Marshall establishment is by The Patchen Boy (3) 2:10¾, himself as game a three-year-old pacer as they make 'em.

NOTES and NEWS

The Californians sell next Thursday at Chicago—and here's hoping they sell well and to good people.

◈◈◈

Yearlings by J. Malcolm Forbes were in demand at New York, four of them selling at prices from $1,000 to $3,425.

◈◈◈

Sargo is the fourth 2:10 performer for the dead sire Keeler 2:13¼, the others being Chase 2:07¼, Onoqua 2:08¼ and Star King 2:09¼, the latter being the only pacer of the bunch.

◈◈◈

Our Colonel 2:03¾ has found a home in New England, E. B. Phillips of Danvers, Mass., being his new owner. The Colonel will probably shine in those down east free-for-alls on the two lap courses next season.

◈◈◈

Some of the published reports of the Old Glory sale confine themselves to the offerings selling for sums in excess of one hundred dollars, but complete returns show a good many that sold from a hundred all the way down to twenty-five dollars.

◈◈◈

Most of our contemporaries have announced Christmas editions for early dates, and the western horseman who does not subscribe for them regularly will find the money well spent that he sends in for these special numbers.

◈◈◈

J. Frank, who campaigned among others that good trotter Jim Ferry 2:09½, will winter at Pleasanton and endeavor to straighten out the notions of Impetuous Palmer (3) 2:05¼ to a point where he can make use of his great flight of speed.

◈◈◈

A yearling brother to the good trotter Kingbrook 2:07¼ is being given kindergarten lessons at Brook Nook Ranche and his preceptors think well of him, quite properly. He is growing into a very pleasing individual and has shown a forty gait in his early handling.

◈◈◈

Bob Smith, who went to Chicago with the California consignments to the Clark sale, will go on east for a flying visit to New York and Philadelphia, returning home about January first to take up the duties devolving upon him as secretary of the Pacific Coast Fair Association.

◈◈◈

Miss Perfection (4) 2:08¼, who wound up her season by trotting second to Peter Scott and trimming the redoubtable Mirthful at the exposition meeting, is running out at Pleasanton and having the time of her young life. She will not be taken up for several weeks, as she has no June engagements in 1916 and has ample time to be gotten ready for another whirl with the Grand Circuiters.

◈◈◈

Maymack 2:04½ and Bertha Carey 2:07¾, two good "standbys" of the MacKenzie stable, are running in the pasture at Pleasanton and have both gone to the races for the last time. The girls have earned their rest and will pay some good dividends in the future as brood mares, if all goes well with them, being scheduled for mating with Anvil 2:02¾ when the coming breeding season opens.

◈◈◈

Hal B. 2:04½, former premier speed sire of the Pacific northwest, is evidently appreciated in his Ohio home, having made a season of sixty-seven mares this year. Hal Boy's campaign has given him another boost and his patronage in 1916 will also be of generous proportions. The famous old horse is nearing his twenty-third year, but owner C. A. Barber of Williamsfield reports him in excellent physical condition.

◈◈◈

A recent letter from Superintendent Henry L. Miller of Brook Nook Ranche, Montana's last great breeding establishment, bears news of a most excellent crop of foals of 1915, in every way up to the Brook Nook standard. The ranche premiers have had fair additions to their rolls of honor during the season just passed into history, both The King Red (4) 2:20¼ and Letrado (3) 2:25 gaining three new performers. The King Red's trio is composed of Student King 2·23½ and the full sisters Sea Fire 2:23½ and Sea Waif 2:20½, the latter pair being out of Sea Queen (dam also of Eddy Current 2:16½) by Vice Regent. Letrado, who is himself a product of the Larrabee establishment, gained Negra 2:27, Ostara 2:25½ and Novela 2:15¼, the latter making a most pleasing campaign for John W. Stetson of Salem. Mr. Miller also called attention to the fact that Union Jack, shown so successfully at the P.-P. I. E. horse show by Miss Helen Farrell of Portland, is also by Letrado, so the get of this young sire are both trotters and show horses. Union Jack's registered name is Ling Bird and he is out of Lunula by Red Wilkes, grandam the famous matron Lizzie Chase (dam of Lizzie G. 2:09½ and three others) by Mambrino Patchen 58. Miss Farrell has added much to the Brook Nook name in the show ring, as her other sturdy prize winner, Old Glory, is also a product of the same establishment.

J. L. Dodge recently shipped a carload of trotters from Lexington to his winter quarters at Groveton, Georgia, many of them youngsters. Last season the Dodge stables at Groveton went up in fire, entailing the loss of the great filly Lady Wanetka (2) 2:10 and others, but the master of Hollyrood Farm never quit going and has assembled a fine band of prospects with which to "try it over."

◈◈◈

Dick Benson, who for some years has handled James Butler's thoroughbreds, has been spending a little time in California of late, coming out from the east to take in the closing days at the exposition. Dick had a most successful season last year and has a good string of candidates for 1916, as well as the winter season now in full swing. From San Francisco he made a side trip to San Diego en route to Juarez.

◈◈◈

J. N. Colomb has disposed of the two nice brood mares recently advertised for sale in this publication, Mary Gordon 2:09¾ (dam of Onward McGregor (3) 2:23¼) by Gordon, and Yolanda 2:14¼ by McKinney 2:11¼, the purchaser being the well known southern California horseman Bert Baker of Hill P. O., San Diego county. Mr. Colomb has also sold Mary Gordon's weanling filly by Vernon McKinney 2:01½ and the young lady will remain at Pleasanton and receive her education under the eye of C. L. DeRyder.

◈◈◈

A letter from Tommy Murphy under date of December second dictated from the safe refuge of a hospital bed brings news of a second operation followed by a confinement of several days. Out here Tommy couldn't stand for the confinement with easy money in sight at the exposition race course and he is one lucky man that the after effects were not more severe. All was serene at the time the letter was written both with Tom and his horses, the latter having shipped home in great shape without once developing a cold or a cough, and the lank Yank expected to be out and about in a few days, getting a few horses lined up for a reception committee for one Wilyum Gee Durfee when that gentleman hits the big line in 1916. Might we be there to see!

◈◈◈

T. E. Pollock of Flagstaff, Arizona, will breed the fast mare Blanche 2:06¾ to Copa de Oro 2:01 next season and from a casual glance at blood lines and performance it seems a safe bet that the resultant offspring will be a race horse. Copa de Oro is proving himself a real speed sire, and Blanche is by Menlow (a son of Mendocino) and out of Subito, by Steinway, grandam Jenny Mac 2:09 by McKinney. Subito's list now includes White Sox 2:05½, Blanche 2:06¾, The Lark 2:09½, White Sox 2:13¼ trotting, and Miss Rico (2) 2:21¼, as well as Aviator trial 2:08¼ as a three-year-old, who died before being raced. She is also the grandam of Rico (2) 2:12½, who figured in the season's two-year-old pacing stakes.

◈◈◈

Marvin Childs was among the visitors at the Old Glory sale and made a few purchases for Omaha horsemen, about the likeliest one bid in by him being Walter Cox' baby pacer Sad Thoughts (3) 2:06¼, the champion filly of her age and gait for the season just closed. She is by Bingen 2:06¼ and out of Pleasant Thoughts by Prodigal 2:16, grandam Extasy (2) 2:10½ by Baron Wilkes 2:18, etc. The young lady was up against General Todd in her stake engagements and after being given her breeder's record was taken east to the twice arounds, where she won four races in three weeks. As her winrace record is only 2:17¼ and she has shown her ability to pace either size track, she looks well worth the $1,225 paid for her.

◈◈◈

Jenny Scott, the eighteen-year-old dam of Peter Scott 2:05¼, sold at the Old Glory sale for $725, going to R. E. Allen of Lexington, acting for Dr. William Simpson. Bonnie Scott, the three-year-old sister to Peter , went to the same bidder at a thousand dollar figure and the two are now quartered at the Kentucky branch of Empire City Farm. Dr. Simpson also bought the old M. and M. winner Eleata 2:08½, two hundred dollars being the limit he had to go to get her. She is eighteen years of age and has not been especially successful as a brood mare. The others of the Scott family were divided, the two-year-old filly by San Francisco going to H. J. Schlesinger while Chas. Robson secured the yearling colt by Mainsheet, the former bringing a thousand dollars and the latter four hundred.

◈◈◈

Margaret Druien 2:03¼, Walter Cox' meal ticket when in fast company last season, topped the Old Glory sale at $7,500, an excellent price indeed when it is considered that she was purchased for breeding purposes only. She goes to Curles Neck Farm to be mated to The Harvester 2:01, Queen Abbess 2:03¼ and Lettie Lee 2:06¾ also going to the Billings establishment, each bringing $2,000. Expressive Lou (2) 2:15, the Atlantic Express—Lou Dillon filly from Curles Neck, sold to Wm. Crawford of New York for $3,000 and the weanlings by The Harvester sold readily at an average price of about three hundred dollars, the top price of $625 being paid for Harvest Czar, out of Zarrine 2:07¼ by Silent Brook. "Real horses" sold readily and well, though the ordinary run brought little, added testimony in support of George A. Ryan's argument that the trotter our breeders must produce is one that will really trot.

THAT DUAL PURPOSE COW.

The dual-purpose idea seems to have been revived, and a great deal has been written about it, pro and con. I do not claim to be an authority on the subject, but I should like to give my opinion, and what seems to be the opinion of the greater part of the farmers in this state. Ten years ago our principal crop was wheat. If we had any cattle at all they were kept mainly to provide the family with milk, butter and meat. As the land began to decrease in fertility we began to pay more attention to our cattle. Now they are an important branch in our system of farming.

In traveling over the country it seems to be true that wherever there is a farm that shows evidences of not being in a prosperous condition, either no stock is kept at all, or so-called dual-purpose cattle are kept. Wherever one finds a dairy community where special-purpose dairy cows are kept one finds a prosperous community, with fertile fields and modern buildings. The same is true on the larger farms on which beef cattle are kept.

If there is a community that has grown rich by raising dual-purpose cattle I have not heard of it. I firmly believe that this dual-purpose campaign is doing a great deal of harm to the cause of better live stock. Now the man who has scrub cattle that do not pay their keep is the proud owner of dual-purpose cattle. No doubt they furnish him with milk and butter, but they cost him dearly. As the steers he raises are of poor quality he sells them below the cost of production. The railroad hauls them to the market, a feeder buys them and they are shipped out into the country again. As they are of poor quality, and feed is higher in price, the feeder loses money on them, for they do not fatten easily. But when he sells them the railroads haul them back to market again. The railroads make the money on these steers, and it is they that have inaugurated this dual-purpose campaign.—Victor Swenson, Kandiyohi County, Minn.

In your issue of Oct. 28 appears an article headed "The Dual-Purpose Cow Discussion" by Victor Swenson. He seeks to leave the impression that farms on which dual-purpose cattle are maintained are lacking in evidences of prosperity, and that if there is a community that has grown rich raising dual-purpose cattle he has not heard of it. It is evident that he has not only limited his observation of conditions, but his thoughts and ideas to a narrow scope. There are perhaps in Mr. Swenson's Minnesota community, as in many others, men who have drifted into the notion of rating scrub, or no-purpose cattle as dual-purpose animals, but a study of the history of such stock will invariably reveal the fact that these are the natural outcome of mating a strictly dairy-bred bull on common or native cows, and it is no wonder that steers from that sort of breeding fail to make desirable feeders.

Mr. Swenson goes on to state that in his opinion this dual-purpose campaign is doing a great deal of harm to the cause, meaning no doubt the special dairy-breed cause, and charges the railroads with inaugurating it. As a matter of fact, some of the great railroad corporations, and the men most interested in them, have seen fit to lend assistance to a movement to improve the live stock in the territory which their lines traverse, and this is commendable rather than deplorable; but it is hardly possible to believe that a man who indicates familiarity with conditions outside of his own county could express the opinion that men with sufficient force and initiative to operate such great enterprises could be so short-sighted as to advocate the breeding of cattle that would not prove profitable for generations to the producers as well as their corporations.

I had the pleasure of visiting some of the leading herds of dual-purpose cattle in Great Britain a few years ago. I did not find conditions in that country like those described by Mr. Swenson. On the contrary I found the owners of such stock the most prosperous farmers in England. I think I am safe in saying that 75 per cent of the cows in England are of the dual-purpose kind. They are the Devons, Lincoln Reds, Red Polls, and Shorthorns. The larger part of the farms are under the management of tenant farmers, who have to pay high rentals and make ends meet. They are doing it too with double-decker cows, and the same kind of cows have been kept for many generations. Now if the special dairy-bred cow is so much better for these tenant farmers, why have they not taken them up long ago, as they are handy to the Island of Jersey, and to the Island of Guernsey? But no; they are sticking right to those dual-purpose cows, and a happy, contented, prosperous people they are. If Mr. Swenson could spare the time to take a trip across the pond, and study conditions over there, and on his return go carefully over some of the communities in this country inhabited by men who have realized the fact that there is a demand far in excess of the supply, owing to conditions with which he evidently has not kept pace, he would be in a much better position intelligently to take a hand in the dual-purpose cow discussion.—L. D. May, Bradford Co., Pa.

In the issue of Oct. 28 Victor Swenson makes some very sweeping statements about dual-purpose cattle assertions which it would be unfair to make about any breed of cattle. I doubt very much whether he has seen any herds of dual-purpose cattle.

Mr. Swenson says: "Now the man who has scrub cattle that do not pay their keep is the proud owner of dual-purpose cattle." This is a remarkable statement which it is almost foolish to deny. In the first place, scrub cattle are not purebred cattle, and cannot be called dual-purpose. They are just scrub cattle and that is all.

If Mr. Swenson would post himself on the history of dual-purpose cattle he would find that the foremost type, and some authorities claim the only type, of dual-purpose cattle is the Bates Shorthorn, first bred by Thomas Bates in England. Mr. Bates' ideal cow was one larger than the Scotch Shorthorn, a cow that would give a good quantity of rich milk. Mr. Bates realized his ideal and today something like 80 per cent of the cattle in England are of Bates breeding. These cattle have in the past brought very high prices, and today the demand for the true dual-purpose type is great.

Mr. Swenson states that on the unprosperous farms "so-called dual-purpose" cattle are kept. There is much abuse of the term dual-purpose these days. Many breeders of cattle which it would be impossible to call dual-purpose are advertising them as such. Mr. Swenson should not judge dual-purpose cattle by scrub cattle or so-called dual-purpose herds. He should journey to one of the real dual-purpose herds and see the large, beefy 1,500 to 1,700-pound cows which give a large flow of milk, yielding cream yellow and thick.

Bates dual-purpose bulls are so quickly snapped up at high prices that one seldom sees Bates Shorthorn steers. But if Mr. Swenson ever saw a Bates dual-purpose steer he would see a larger, beefier steer than he is used to, a steer that would bring near the top price in Chicago.

It is unfair for any one to judge any breed by merely seeing some of the cattle in farmyards here and there. So many farmers are poor cattle raisers and are so indifferent to the study of pedigrees that with them no breed of cattle would prosper. The breeder as well as the cattle must be judged. Honestly to judge any breed of cattle one should first study their history, their milk and beef records, and prices they have sold for, and then seek out several herds of these cattle which are owned by experienced breeders who have brought together the best families of the breed and mated them properly.

This year in England the dual-purpose Bates Shorthorn took first price over all other breeds.—W. A. Riddle, Franklin Co., Ia. —Breeder's Gazette.

THE YEARLINGS OF 1915.

[American Sportsman.]

However sharp and widespread the sentiment may be against training and racing yearlings, the fact remains that more than passing interest is taken in the performances of the precocious trotters and pacers. Three years ago, when 29 of the babies went into the standard list, feeling went so high that the system was all but broken up and there is a fresh outburst every time a yearling trained colt breaks down, as for instance when the magnificent Belwin last year, unbeaten in four races and in possession of a four-year-old record of 2:06¾, broke down. His tendons gave out as a result of the severe work that was necessary to develop him to a yearling record of 2:21¼. Scores of yearling trained trotters have broken down at two, three and four years of age, but the list of those that survived the grueling is limited to about five, of which Peter Volo, Adlon, Airdale and Belwin were prominent in four-year-old form.

Interest having revived again this year, the tin cup mill, as it is called, was kept grinding and the grist shows seventeen trotters and two pacers. This makes the yearling 2:30 list, which Freedom 2:29¾ started in 1890, consist of ninety-five trotters and nineteen pacers.

To offset criticism many have been content of late with merely dropping their youngsters into the list, but in Kentucky the opportunity of winning a championship is never lost. The yearling filly Anselila, having won so cleverly on Monday, November 8th, in 2:20, was started again on Wednesday and lowered the world's filly record from 2:19¼ to 2:17½.

Only one yearling, the colt Airdale 2:15¾, ever trotted so fast.

While this new championship was earned on Kentucky soil, the honors belong to California. Anselila is one of three yearlings by Prince Ansel 2:20½, which J. W. Considine, the theatrical magnate who recently established the Woodland Stock Farm in California, sent to Kentucky to be trained. All three earned records, and two are championships, for in addition to Anselila's filly record, Anselot 2:28½ is the first gelding to beat 2:30.

There is much of interest in the blood lines of these Prince Ansels, and it is here that attention centers on yearling development. There used to exist a tremendous rivalry between Senator Leland Stanford and Kentucky breeders for the colt records, and the great breeder in California so jealously guarded the records, particularly the yearling mark, that he never suffered it to be away from his Palo Alto Farm for long. After his death Palo Alto lost all the colt records save that greatest of all trotting performances, Arion's 2:10¾ to high wheels at two years, but Anselila now takes the yearling record back to California and to Palo Alto as well. Her sire, Prince Ansel, is a son of Dexter Prince, a stallion which Charles Backman bred at Stony Ford Farm in Orange county, New York, and son of Kentucky Prince and of a full sister to Dexter, second dam Clara. Senator Stanford also bought Electioneer at Stony Ford, and the last named being a more prolific sire, Dexter Prince was sold to "Whitehat" McCarthy. But Palo Alto had to bring him back under lease, when the Dexter Princes proved such vigorous race horses.

Prince Ansel is out of Woodflower, a genuine representative of Palo Alto blood lines, for she is a daughter of Ansel 2:20, a half bred stallion by Electioneer out of Annette by Lexington, that the Senator regarded so highly that he recommended him to Robert Bonner as a sire fitted to head the Bonner Farm at Tarrytown.

Now that the coveted filly record has been returned to California, the following tabulation of its complete history will be of interest:

1881—Pride by Buccaneer, son of Green's Bashaw, a Morgan horse (California)..... 2:44½
1881—Hinda Rose by Electioneer (California)..... 2:36½
1887—Sudie D. by Sherman's Hambletonian (Kentucky, October 15th) 2:35¾
1887—Norlaine by Norval, son of Electioneer (California, November 12th) 2:31½
1891—Bell Bird by Electioneer (California)..... 2:26¼
1891—Frou Frou by Sidney, son of Santa Claus 2:17½ (California) 2:25¼
1893—Pansy McGregor by Fergus McGregor, son of Robert McGregor (Kansas)..... 2:23¾
1909—Miss Stokes, by Peter the Great (Kentucky) 2:19¾
1915—Anselila by Prince Ansel (California)..... 2:17½

This was Mr. Considine's first year on the turf, and in addition to the world's records made by Anselila and Anselot, his filly Verbena Ansel reduced the yearling halfmile track trotting record to 2:26, and his colt Suldine reduced the trotting record for a two-year-old on a halfmile track to 2:13¼.

It is notable that Mr. Considine sent a fourth yearling to Kentucky last spring, the colt Senator O'Brien by Peter the Great, which added further to the fame of his new farm. Senator O'Brien did not win in championship time, but by taking a standard record he gives to his dam Carrietta 2:18 the honor of being the first producer of four yearlings in the list. Carrietta is a wonderful young matron, as her performers are by three different sires, while one of them, Sileni Brigade, trotted to a two-year-old record, 2:10¾, and another, Suldine, this year reduced the two-year-old record on a halfmile track to 2:13¼. Carrietta is by Directman, son of Directum 2:05¼, and her dam was a daughter of Goldsmith Maid's only son, Stranger.

Of the eighteen yearlings which took trotting records this year, seven are the get of J. Malcolm Forbes 2:08, and swell his aggregate number to fifteen. When it is remembered that this son of Bingen and Santos is only eight years old and that most of his life has been spent in a training stable, his success as a prolific sire of precocious speed is marvelous. Noteworthy, too, is the place that his half brother, Peter the Great 2:07¼, son of Pilot Medium and Santos, holds as a colt sire, for he is second with eight to his credit. General Watts 2:06¾, of the Axworthy family, stands third, with seven. But as a tribe the Bingens are far in the lead as progenitors of yearling speed. Bingen 2:06¼ himself sired two, and six sons and seven grandsons have sired no less than thirty-three.

Charles Marvin, for many years the trainer at Palo Alto, was called a wizard in the development of colt speed, but his yearlings consisted only of Hinda Rose, Norlaine and Bell Bird, whereas of the present-day trainers the Lexington reinsman, Hunter C. Moody, has given records to twenty-eight, and Wickliffe Curry, also of Lexington, follows with a record of twenty-five.

The yearlings of 1915, with their breeding and drivers, are as follows:

TROTTERS

Anselila, b f by Prince Ansel 2:20½—Ila Moko by Moko; H. C. Moody..... 2:17½
Verbena Ansel, b f by Prince Ansel—Verbena Mack by Directum Spier 2:11¼; H. C. Moody..... 2:22
Emma Magowan, br f by J. Malcolm Forbes 2:08—Ivolette by Moko; W. Curry..... 2:22½
Princess Robey, b f by The Exponent 2:11¾—Miss Robey by Pactolus 2:12¾; A. Wishart..... 2:25
Una Bingen, b f by Albingen 2:18—Lucy Stoner by Baron Wilkes; H. C. Moody..... 2:25¾
Mary Magowan, b f by J. Malcolm Forbes 2:08—Irene Wiggins by Wiggins 2:18; W. Curry..... 2:26½
Katherine W., br f by J. Malcolm Forbes 2:08—Lyvolo by Cresceus 2:02¼; W. Curry..... 2:27¼
The Design, b c by The Exponent 2:11¾—Mardella by Del Mar 2:16¾; A. Wishart..... 2:27¼
Patsy P., b f by J. Malcolm Forbes 2:08—Bessie Hughes by Stammont 2:29¾; W. Curry..... 2:27½
Allee, blk f by J. Malcolm Forbes 2:08—Alice Lewis by Horace W. Wilson 2:19¼; W. Curry..... 2:27¾
Eloise Worthy, b f by Morgan Axworthy 2:17—Eloise by Wiggins 2:18; W. Curry..... 2:28½
Anselot, b g by Prince Ansel (2) 2:20½—Lottie Whippleton by San Diego; H. C. Moody..... 2:28½
Great Night, b c by Caduceus the Great—Red Nightingale by Milton S. 2:08¼; M. O. Stokes..... 2:29
Senator O'Brien, br c by Peter the Great 2:07¼—Carrietta by Directman; H. C. Moody..... 2:29
The Combination, b c by The Exponent 2:11¾—Tramp Lively by Trampfast 2:12¼; A. Wishart.. 2:29½
Leonard, b c by J. Malcolm Forbes 2:08—Mendosa Worthy by Axworthy 2:15½; W. Curry..... 2:29½
Labe Riddle, b c by J. Malcolm Forbes 2:08—Ann Tregantle by Tregantle 2:09¼; W. Curry..... 2:30
Flashfast, b c by Trampfast 2:12¼—Little Rebel by Norval 2:14¾; A. Wishart..... 2:30

PACERS

Poorman, b c by The Northern Man 2:06½—Mary Lloyd by Vice Commodore 2:11; Long..... 2:19
The Sign, b c by The Exponent—White Hydrastis by Whitefoot 2:19¼; A. Wishart..... 2:21¾
Treadfast, rn c by Trampfast—Queen's Token by Parole 2:16; A. Wishart..... 2:23¼

The European war evidently is having little effect on the plans for the ice campaign in Canada this winter. The first meeting is scheduled for Hillcrest Park, Toronto, Dec. 23, 24, 25, 27, 30, 31, Jan. 1 and 3. Dufferin Park in the same city follows with a four-day meet, Jan. 6-10, and Delorimier Park, Montreal, comes in on Jan. 13-19, to be followed by the biggest meeting of the entire lot at Ottawa, Jan. 27-Feb. 2.—Western Horseman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

Publisher's Note.—John X. DeWitt, "Jack" to all the rod and gun sportsmen of the coast country, who for many years has conducted this department as well as contributed largely to the sporting pages of the local dailies, has been an inmate of the Fairmont Hospital since the first of the month, a victim of valvular trouble of the heart. Friends will be pleased to learn that his condition is not serious and that he is on the mend, though the physicians in attendance prescribe absolute rest for some days to come. In the meantime, we crave the indulgence of the readers of this department, who will miss "Jack's" touch and pertinent comment upon local happenings.

AMONG THE OREGON WHITE-TAILS.

It is conservatively estimated that at least 5,000 deer were killed this past season in the pine-whiskered mountains of the southern Oregon coast country. That certainly looks like slaughter, but one must remember that the Coast Range of Oregon is a vast territory—a territory larger than some eastern states—and the deer and the wild things have a great portion of it to themselves. The game laws are strict enough, and good enough if enforced; and, thanks to the vigilance of the wardens, they have been as rigidly enforced in recent years as conditions would allow. When one man has a district one-half as big as the State of Massachusetts to guard, and much of that district an uninhabited wilderness, it is utterly impossible for him to nab every pot-hunter that goes beyond the limit or kills out of season. From August first to November first the Oregon woods are "open," and the man who gets his license and kills no more than five, will find no better hunting ground on all the American continent.

The resident deposits one dollar with the county clerk for the privilege of hunting a whole year in the Oregon domain; the non-resident pays ten dollars and by giving "pelt tags" may take the hides and meat out of the state.

The hunter may pack from almost any point on the railroad in Josephine or Jackson counties, but will find the larger places the most convenient. Supplies are easier to procure, and more direct trails lead from these. One may go just as "far back" as he pleases, for there seems no end to the wilderness once the border line is crossed. Yet a long journey is not necessary, so far as getting game is concerned. The writer made one trip by automobile from the mountain town of Grant's Pass. It was just an hour's drive from town—yet that hour's drive brought us to the pine-clad mountains of Murphy Creek, almost in the heart of the Coast Range. And out there, almost within shouting distance of town, the three of us killed six deer in three days, returning to the "city" on the evening of the third day. "Hunting deer by motor car" may be the twentieth century method of getting big game, but it must be admitted that the old-time plan is the best. The real sportsman, the man who is out to get all the recreation, who is out to fill his veins with rich, red blood, will get beyond "smelling distance" of gasoline. A pack pony and saddle-horse will be his modus locomotor, the heart of the wilderness will be his objective point, and all the days he can spare the limit of his sojourn.

There were three of us in a party who shut up shop, forgot the daily grind, and turned our ponies' heads toward the wilds of the Silver Creek country, in the heart of the Coast Range.

We followed Rogue River the first day, traveling toward the northwest, then left the main road and directed our course by the setting sun. A good trail leads from the river back into the primeval—a trail built long ago by the gold-hunters, but which is used enough each summer to keep it open. We camped the first night at the foot of Taylor Mountain, near the lower entrance to Hell Gate Canyon, a district that for picturesque grandeur and wild beauty is unsurpassed by even the far-famed Royal Gorge of Colorado.

The second day we climbed up, up, following the winding trail. Only at long intervals we emerged upon an open, usually the backbone of a mountain, then we would dive again into the impenetrable canopy. The second night we camped on a pinnacle of a ridge, well up on the slope of Peavine Mountain, whence we looked off across an endless array of purple ranges. We had seen deer signs during the afternoon, in truth, could have "set stakes" anywhere out there and "bagged the limit," but the hot desire of the Argonaut was in our veins, and we wanted to go on and on. It was good to know that the deeper we penetrated those wilds, the farther we left railroads and telephones and cares behind us. Tim, who was "general director" of the expedition, said we had one more day's travel ahead of us before we reached the "real hunting grounds."

But on the evening of the third day we reached the "promised land." According to Tim's best calculations we were seventy-five miles from any high-way wider than a pack trail, and perhaps a hundred miles from a place where a smiling-faced fellow, wearing a rather red nose, a curled mustache, and a white tie, would lean over the polished bar and inquire, "What's yours?" We were glad to be so far away from even such world-old temptations, and enjoy the genuine freedom of the mountaineer. My, my, what a land we were in—wide meadows of grass, knee-high to the ponies, where they could feed and feast to their cayuse-hearts' content; endless acres of flaming columbines; great patches of violets, forget-me-nots and verbenas. Very pretty, enchantingly beautiful the verdure, the gorgeous colors; exhilarating and invigorating the keen air, for we were at an elevation of 5,000 feet; and though we could have lolled in the shade and done nothing but drink in the ozone and the balsam, we denied ourselves that lazy luxury and made ready for the hunt. There are some who contend that the game hunter is a "wild man," a barbarian, whose thirst for blood is only satisfied when he slays the beasts of the wilderness. But the makers of these idle contentions do not know; the game hunter is not altogether a barbarian. The "wildest" of them enjoy the beauties of the forest, the grandeur of the mountains, the gorgeous coloring of a sunset, and are more deeply impressed by them than many who are favored with a bigger supply of superlatives.

"Tomorrow we'll have venison steak for dinner," Tim declared that third evening, after we had knocked the ashes from our pipes, spread our blankets and made ready for "rolling up."

"Amen," Si and I responded, with genuine gravity, for "trail grub" was getting monotonous. We were lulled to sweet slumber by the lonesome yapping of a coyote, and the hooting of a night owl near by. I awoke next morning with a delicious odor in my nostrils. Smoke was blowing over the blankets, and the crackling fire sent up a shower of sparks. Rolling over and opening my eyes, I discovered Tim busy with breakfast. It was yet early, but he had killed a quail, and had it frying in the pan. The coffee pot was steaming and the dutch oven giving off a smell of browning bread. No king ever ate a finer breakfast than that.

Before the sun stood a half hour over the saw-toothed range, we had shouldered our rifles and struck out for the day's hunt. Tim's plan was for Sid to strike over the ridge and take down a parallel canyon, for we had gone but a little way from camp when we came upon a trail of fresh tracks, deeply imprinted in the soft earth, and looking much as if a herd of yearling calves had passed that way. It was the trail of a deer herd, and it indicated plainly that the deer had gone along not more than an hour before.

"It's a big bunch of white-tails," Tim declared. "The moon is full now, and with bright nights the deer are feeding in the early morning; at this season they are herding. We'll find 'em in an open vale about a half mile from here."

A suggestion from Tim was equal to a command. So Sid took over the ridge. Tim and I proceeded leisurely down the canyon. We were to stalk the herd. So we kept the dog close at our heels. This is the better way, and the lawful way, but it requires patience, perseverance and hard work.

"The lay of the land, and the direction of the wind are just right," Tim muttered. Then I noted that we were coming down upon the herd, and going up against the wind.

Tim is a mountaineer, and he does things on the good, old-time plan. His reputation for deer stalking was not earned in a day. He is one of those grizzled, big-hearted men of the mountains who learn and acquire through the splendid school of experience.

"You keep close at my heels and do like me," he advised.

While I, nor any other man, would be able to imitate Tim, I watched him closely and did the best I could. So the three of us—the silent, lop-eared hound being the third party—moved silently down the canyon. We were getting near the herd now, and Tim's attitude was that of a chimpanzee—stooped, his long arms hanging low, his rifle almost dragging the ground. An hour of this and he dropped still lower, getting down to hands and knees. We were an hour getting through one clump of chaparall. Tim, mindful of every precaution, brushed each dry twig and leaf aside. He put his hands and knees down as softly, and with no more sound than that of a cat treading upon a rug. Whenever I snapped a twig, he would turn and give me a look from his grizzled face that made me think for a moment that he had murder in his eyes.

After getting through the chaparral the canyon widened and dipped more swiftly. "We must now go belly fashion," Tim said.

For the man who is looking for an exercise that will employ every muscle, fibre, ligament and bone in his body, that is guaranteed to increase his length two inches in as many hours, that will change him from a quadruped to a reptile, I heartily recommend traveling "belly-fashion." Imitating the wolf-man ahead of me, I dragged and snaked myself along for what seemed a mile, but which, in reality, was only a few hundred yards. To rest myself now and then, just as a swimmer will when wearied, I turned over and slid on my back, using my feet as a sort of stern-wheel profeller. It was hard work, slow work, but every real sportsman knows that the game is worth the price.

I could not raise my head to look, but I was confident now that Tim had sighted the herd, for we had slipped over the ridge and were sliding down the slope toward an open vale. I noted too, that the mountaineer used every intervening tree, bush and rock to cover our approach. We dragged on slowly, making our way inch by inch over the damp sod, and after another hour, came up behind a clump of manzanita. Here Tim took off his hat and cautiously peeper over. The hound was sniffing his keen nose and shedding tears, and though he trembled with impatience, a look now and then from his master was sufficient to keep him low.

The mountaineer gazed below a moment, then settled down and turned his face to me. A smile lighted his weather-beaten features. Though he spoke no word, I knew the meaning of that smile. I drew closer to the clump, drawing my rifle to a "ready." I had only a momentary glimpse of that scene below, yet it was so firmly, so indelibly fixed in my memory that I can recall every detail of the picture.

The herd was feeding not more than two hundred yards away. There were seven—two eight-pointed bucks, four does and a "spike." One of the bucks was a proud, noble fellow, who evidently scented trouble; and ever mindful of his charge, was listening to and fro, his keen nose listed to the wind, his crest held on high. Once he paused and looked directly toward us, then turned and tramped back toward the center of the vale.

We knew that Sid had long since reached his "stand" near the canyon below the herd, from which place he would get a "running shot" provided the herd came his way. So we raised up and took aim. I selected one buck, Tim the other. No sportsman will kill a doe when he has a chance at a buck. In fact, it were better if the game laws of every State protected the female deer, at least for a season considerably longer than that covering the bucks. In such regions as the southern Oregon country, even an amateur will find plenty of shots at bucks alone.

We drew bead—then Tim counted—one, two—

The rifles cracked as one weapon. Old Spot, the hound, who had been crouching behind us, his eyes fixed upon the guns, his mouth wide open, his sides heaving, leaped into the air with the report. He made a clean jump over our heads, and ran pell-mell down the slope. We jumped to our feet and scampered down the hill—I should say, we "tottered" down the hill, for that long crawl, that long drag "belly-fashion" had just about deprived us of our power of locomotion. We were some moments getting our cramped muscles adjusted.

In the meantime the herd was a brown, blurred streak down the canyon—safe behind the shelter of the forest before we could get in another shot. Tim's buck—the big, proud fellow—dropped instantly. Mine skipped, and I trailed after him, bitterly disappointed. This disappointment, however, was short-lived. Behind a great fir log, over which he had vainly tried to leap, we found him, crumpled in a shapeless, lifeless lump of flesh.

It could not have been more than a minute from the time we fired till we heard a long-drawn rifle report. It came from down the canyon.

"Sid's got a shot," Tim declared, as he whetted his hunting knife on his bootleg. And sure enough Sid did get a shot—a running shot it was—but it was true, and before we had drawn the bucks he came up, carrying the "spike" on his shoulder. "A one-year-old buck is better than doe any time," he declared, and in this we agreed.

That first day's stalk was but the forerunner of others equally as good—and equally as hard. What with the hunting and jerking, the long tramps and the peaceful smokes as we sat on our spread blankets near the glowing fire, the nights of heavy slumber, and the keen, crisp mornings—the days flitted by. Two weeks came and went before we were aware, and we reluctantly prepared our packs for the back trail—for the railroads, the telephones, civilization, and—the grind. But the office-racked nerves, the pale cheeks that two of the party took with them over that trail, were left out there in the wilds. In their stead were brought out veins throbbing with the blood of pure red corpuscles, cheeks ruddy with the tan of health and vigor.

"ENCOURAGING (?) RIFLE PRACTICE."

[Concluded from last week.]

Then having enjoyed this brilliant example of official obstruction and its results for a month or two, the said genius again broke loose, this time by rescinding the rule against the sale of arms to clubs, and putting in its place bait to make clubs think they really could get arms and ammunition.

The last scheme is this: Each club is given one or two certificates of standing—which, of course, could not be had from a list in the office of the Chief

of Ordnance and so dispensing with all this nonsense and delay. Said certificate states that the club is a club and has paid its dues. That is all it can state, because that is all the N. R. A. knows about its clubs.

Each order—which enables a lot of amateur riflemen to get at their own expense that which the militia get for nothing — viz., rifles and ammunition for target practice—must be accompanied by one of these nonsensical certificates.

Each arsenal from which supplies are needed in these orders must see the holy certificate, get well enough acquainted with it to call it by its first name, and in other ways hold it around for say a month at each joint, in addition to any delay at the office of the Adjutant General of the State, who may be a very efficient gentleman, or a red-faced politician who abhors the mention of efficiency.

So that order that calls for supplies—say from Rock Island and Springfield and Frankfort, or Benicia—is first duly anointed, blessed with the boob certificate and sent on its way to the office of a gentleman in charge of the militia forces of the state, which is because said gentleman has nothing to do with civilian clubs. That is logic, also efficiency.

Presently—sometimes—the order is split up and sent on its way. If you get rifles from Springfield going by the N.R.A. booklet, which is usually wrong, you have to pay an extra 10 per cent on the sling to cover the cost of its transportation from Rock Island. It is part of the rifle, but no differencia. It is surprising they do not charge you also 10 per cent advance on the cost of the stock, because that was not grown at the Springfield arsenal in the form of the tree.

So if the order goes first to this establishment, in due course of time—maybe in a month, if you're lucky—you get a communication to this effect, and you rush off the necessary seven or eight cents. In the meantime everything else stops and holds its breath so far as your order is concerned. Maybe the order and certificate first go to the Chief of Ordnance, I don't know, the time consumed seems ample for them to make a round trip to Mars.

As a case in point, on October 2 I shipped via Uncle Sam's mail to the commanding officer of Springfield 77 cents, covering 10 per cent addition on slings for some service rifles, and for which they were holding up an order amounting to about $100 and for which six or seven new members were sitting around and getting disgusted. On October 20 the order has not been received, although the arsenal was instructed to send it via express. This is called military efficiency, the same sort that will tickle the European invaders if they ever come over to visit with our red tape gentlemen, on strictly official business. Express takes six days from Springfield, mail takes five, total eleven days, which from the second counts up the thirteenth, leaving seven days of inefficiency, which would cause the head of the mail order department of any large house to lose his job were the delay brought home to him. Also, as the order is not yet at hand, there will probably be far more than seven days interval over the time that it should consume.

Quite evidently these precious certificates are sent in turn to each arsenal, a brilliant bit of business if this is true. As evidence, in this order in point, Rock Island sent on a rifle a club member desired, in some thirty days after the filing of the order.

Stores desired from Benicia, which is just 48 hours run by freight from Los Angeles, are not yet at hand, and the order was filed more than two months ago. Stores from Springfield are not yet at hand.

Logically, if the order were split and sent at the same time to all the arsenals, Benicia, being close to Sacramento, should have sent on its stores first, then Rock Island, then Springfield. Quite evidently it has to go through some red tape mill back at Washington.

The worst is yet to come, however.

We had two certificates. I don't know how many we were supposed to have. Mr. Wotkyns, the treasurer, sent in an order in June with a precious document. In some two months time the order showed up, but the certificate did not follow suit. From June to October this certificate, which is essential to ordering stores, has disappeared. The second was parted with in August, with a bunch of orders that had been maturing since the latter part of June and through July. We take in many new members and it has been particularly true this summer because of the formation of a Motor Reserve and a semi-military Scottish organization, the members of which joined the club to be able to shoot the rifle. Each man is compelled to pay $3.00 initiation fee and 50 cents a months advance for four months to order, as we desire to discourage the persons desiring to get government rifles by joining a rifle club.

These gentlemen do not pay their money for fun, they do not care to twiddle their thumbs through an indeterminate number of months after putting up initiation fees, dues and price of rifle, before shooting. No man likes to borrow rifles, nor to lend them.

Yet, because of the non-return of the first certificate and our fear that it would not come back, we were compelled to allow orders for rifles from new and enthusiastic men to lie and accumulate from the latter part of June to the latter part of August, and now that the order is in, the gentlemen punching up in June have, through the blatant incompetence of some boob not fit to hold a $10 job in a corporation that insisted upon results, are still without their rifles in the latter part of October, and they are not yet in sight.

Our fears as to the non-return of this certificate were well grounded; it is still missing.

Now is the pleasant situation that a number of other gentlemen joining the club are without rifles, without hope of rifles, and without incentive to remain in or to feel other than that we have taken them in by accepting their dues and not being able to deliver the goods to enable them to shoot. We have been unable to order since the latter part of August, two months ago. That order contained money orders for rifles dated in June.

We have as new members some of the most influential motor car men in Los Angeles, and we cannot get them rifles. Among our new men is Clarence V. Whitney, member of the Marine Corps rifle team of 1908, seventh in the Wimbledon of that year, who is paying his dues and hoping that we can get him a rifle so he can get back into the game.

How long would such absurd incompetency, such utter disregard of the difficulties and discouragements of civilian riflemen, be tolerated were the War Department and the National Rifle Association handled along Standard Oil or Ford Motor Co. methods? You answer the question from your own knowledge.

Any man brainless enough to be unable to evolve a better system for distributing government stores to civilian clubs, and still to make reasonably sure that they were not encouraging some commercial scheme, ought to be furnished with a pick and put in his proper sphere—with due precaution that he did not injure his own feet.

The whole certificate scheme is laughable in its simpleminded lack of common sense. If the question is as to the standing of the various clubs, lists from the N. R. A. can be furnished to the Chief of Ordnance and the club checked off by a $10 a week clerk when orders reach that office. Clubs do not lose their standing over night, they lose it only when they fail to pay their dues, that's all. True, the presiding genius once tried to run a huge bluff on us about not giving us our certificate because we were not shooting—ergo had not qualified for buttons the year before—in spite of the fact that we had done more shooting than any other club in the country and beaten the British in the season in a match for which we did not have to thank the N. R. A.'s star performer, or anybody else unrolling red tape.

However, after we'd discovered that only 62 clubs oue of the 300 had shot for buttons, and that only 60 some odd clubs had shot for the N. R. A. medal, which we had done, we called the bluff of this Senor, and called it hard, and the certificate came along.

I'd be curious to hear further from the gentleman about not shooting when a team of our clubmen cleaned up the championship of the country a month or so after our dispute with him.

However, getting back to some method of selling stores to the clubs—admitting for the sake or argument all the usual rot about sending the order to the Adjutant General, etc.—there is no reason whatever why the order should not go straight to the arsenals, why the arsenal commanders should not be furnished with lists of the clubs in good standing, and why the order should then not be sent out to the club buying precisely as an order would be sent out from any commercial concern in this country that did not have to build the goods to order. Then the club would get the order in not over two weeks, even though the order was for goods from the Atlantic seaboard for a club on the Pacific.

The new members would not be discouraged and "sour-balled," then the officers of the club would not get Hades for what is not their own fault, and then when a man joined the club and put up his money and wanted to get a rifle and make a rifleman out of himself at his own expense, he could get it within three weeks, because then in that happy day the club officers would fear immediately to send on the order lest they never get a chance to send on another.

So far as the statement in the N. R. A. bulletin about ordering every three months is concerned, comment is not necessary; it proves only the old tiresome fact that the controlling element of the National Rifle Association don't know the first principles of the civilian rifle club, and the difficulties experienced by the officers thereof in holding such clubs together under the most favorable circumstances.

The National Rifle Association passes the buck to the State Adjutants General, the Adjutants General pass the buck to the arsenals, the arsenals prove that they kept the order only long enough to fill it, say 10 days; nobody is responsible, and in the meantime the civilian rifle club members wait. They ought to wait, they have no license on earth.

All they do is to buy their clothes and their own rifles and their own ammunition and pay their carfare and provide their own ranges. Also they do not have to be clubbed into going on to a rifle range and shooting, even though they pay for their own ammunition. In all of these things they are different from the state militia—some 66 per cent of which qualified for any sort of grade on the range last year, with their free rifles and ammunition.

What we need is some new officials in the National Rifle Association and then somebody with, say two or three grains of initiative in his head to evolve a system for taking care of the shooting ambitions of the civilian rifle clubs about the country; the first move to make those old Krags available without filing more papers than would choke a cow, the second move to furnish an adequate supply of ammunition with them, the third move to furnish a rifle promptly to the man who is willing to buy it and use it.

Absolute incompetency marks the present system of" promoting rifle practice" by the board with the high sounding name, appointed for that purpose.

Los Angeles, Cal. RIFLEMAN.

OLYMPIC CLUB SHOOTERS GIVEN RATING.

A round dozen members of the Olympic Club of this city, members as well of the Pistol and Rifle Club which affiliates with the National Rifle Association, held a qualifying shoot over the state range at Manzanita recently, at ranges of 200, 300, 500 and 600 yards, the following scores resulting out of a possible 250:

Experts—J. D. Millikin, 222; C. W. Linder, 215; C. F. Armstrong, 215; S. T. Rogers, 211.

Sharpshooters—C. W. Randall, 209; R. Mills, 194; W. C. Prichard, 193; W. F. Blasse, 191; V. D. Cousins, 190.

Marksmen—G. L. Scoville, 185; B. P. Lapachet, 172; A. J. Reed, 169.

At the Pistol and Rifle Club's annual meeting last week the nomination of Dr. J. D. Milliken for the Pacific coast vice-presidency of the United States Revolver Association was endorsed, and officers for the ensuing year were elected as follows: President, W. F. Blasse; vice-president, W. C. Prichard; secretary, V. D. Cousins; treasurer, A. J. Baker.

FAIR SHOOTERS UNDAUNTED BY SNOW.

The first winter's snow did not scare the Nemours shooters last Friday afternoon—four of them shooting their cup events over the Greenhill traps at Wilmington and making some very good scores, too.

To date Miss Hammond is high for the "Diana Cup" given by Mr. Ellwood A. Davis, of the Millard F. Davis Co., and Mrs. E. L. Riley is in the lead for the "High Handicap Cup," the gift of Mr. W. M. Hammond of the Hercules Powder Co. These cups are sterling silver and have been in competition since the first of October. The final shoot for them will be held December 30.

Scores (25 targets) follow: Miss H. D. Hammond 22, Mrs. Harry White 10, Miss Schofield 16, Mrs. E. L. Riley 16.

PUGH HIGH MAN AT VERNON.

William Pugh was high gun and also winner of the fourth round of the W. H. Wilshire trophy contest, held last Sunday morning at the Vernon Gun Club. The trophy shoot constituted fifty targets at distance handicaps. Several rounds of practice shooting was also participated in.

Pugh shot from the eighteen-yard range and broke forty-four out of the fifty.

A good crowd was out, considering the fact that the duck and quail seasons are open and are drawing many shooters to the fields and hills.

Keen competition was also displayed in the contest for the blackbird watch fobs in the different classes. The winners are as follows: Pugh, class A; Gruell, class B; Dierdoff, class C, and Mrs. C. E. Groat, class D.

Following are the scores:

	Targets.	Hits.
A. W. Bruner	100	78
Keeton	100	66
Fred Gruell	100	76
H. Hoyt	100	78
Mandavill	100	62
Dierdoff	75	62
William Pugh	75	67
C. E. Groat	100	78
Mrs. C. E. Groat	75	56
H. D. Blanchard	100	84
H. Adams	50	40
F. O. Funk	100	72
C. W. Clement	100	77
T. P. Smith	50	38
Guy Holohan	100	83
Dr. Packard	75	59
W. E. Muller	50	41

TRADE NOTES.

Showing fine form under the bad weather conditions, F. A. Priestly, of Camden, recently won the target shooting championship of South Jersey at the annual tournament over the traps of the Camden Association. A gale blew directly into the faces of the marksmen, causing the targets to do all manner of stunts. Mr. Priestly, shooting Nitro Club shells, scored 89x100, beating Lloyd Wright, who shot the same brand of shells, out of first honors by one target.

Everett Brown won high general average at a shoot held recently by the Wolcott (Ind.) Gun Club. Shooting Nitro Club shells he made an excellent score, break 147 out of 150.

At the Liberty (Ind.) Gun Club, recently, Walter Combs, shooting from 20 yards, won high amateur average with a score of 140x150. He used Nitro Club shells, as did W. Arvin, who, shooting from the same distance, took second honors, scoring 137x150.

Wm. Cross, of Camden, N. J., won the match for the Hineline Trophy. He broke 44 out of 50 targets shooting Nitro Club shells. This shoot was held over the traps of the Camden (N. J.) Shooting Association.

Drink Jackson's Napa Soda.

INTERSTATE'S ANNUAL MEETING.

The annual meeting of the stockholders and directors of the Interstate Association for the Encouragement of Trapshooting was held December second at Pittsburg, the reports of the various officers showing the association to be in excellent financial condition and the sport in general to be flourishing to a marked degree. During the season of 1915 there were held at various parts of the country 333 registered tournaments in which 8,140 shooters participated and at 332 of which a total of 4,814,260 targets were trapped, one tournament being yet to be heard from. These figures give an idea of the hold which trapshooting exercises upon popular favor, and under the association's aggressive policies the reports for the ensuing season will undoubtedly entail much larger aggregates. The reports of the various officers are full of "meat" and interest, and as a most concise and illuminative view of the general situation the complete report of Manager Elmer E. Shaner, to whose activities much of the organization's success may be attributed, is presented herewith:

I herewith submit my report as Manager for the year 1915. The statistical data, giving operations in detail, will be found in the reports of the Treasurer and Secretary.

The following excerpt from my report of 1914 applies fully to this year: "The season has been unquestionably the most successful in the history of the Association — more contestants participating, more targets being trapped and more money divided in the purses than during any previous year." Could a more gratifying report be presented? What makes this year's showing more emphatic is the fact that baseball and other high class pastimes suffered severely from the industrial lull which prevailed the land over during almost the entire year. In no locality did the blight of depression affect trapshooting to any material extent. This showing clearly indicates the popularity of the sport under the guidance of our organization.

The amended trophy plan, whereby the winners could make their own selections of prizes, proved to be a most popular custom and met with universal favor. It was unquestionably a step in the right direction. Though the idea entailed more general work and bookkeeping than was expected, the results attained justified the extra work placed upon the Pittsburgh office. While the season was in its infancy a plan was evolved whereby the work of this department was kept up-to-date. There were times, however, when our orders for trophies almost swamped the New York manufacturers from whom they were purchased, but, through increasing their engraving force, they were able to keep pace with the demand with slight delay. Nine hundred eighty-three (983) trophies, not including thirty-three (33) awarded at the Handicap Tournaments directly given by our Association, were distributed in all sections. They are permanent testimonials to the efficiency of the Interstate Association and its methods.

The change made last year whereby all applications for Registered Tournaments carrying requests for contributions had to be filed by February 15th, was also a step in the right direction. It enabled us to make a proper, fair and unselfish award of the Registered Tournament Fund. It also permitted us to arrange a satisfactory list of Tournaments with virtuallly no conflicting dates. At the outset some opposition developed against this plan, the objection coming from clubs which, though aided in past years, thought they should be given preference in this year's allotment of the Fund. Compliance with their demands would have been discrimination against deserving clubs which had not been favored in former seasons. While contributions could not be made to all, no worthy club was refused registration under our "Old Policy." A few clubs may not yet be reconciled to the new method, but there is every reason to believe that they will fall in line, for, as the season progressed, there was an evident decline in opposition to the new plan. My observation of the situation leads me to suggest a continuation of the present plan in order that clubs which held Tournaments this year under our "Old Policy" can be given contributions next year. Of course, clubs that received contributions this year cannot expect to receive first consideration in 1916. This plan will enable us to make an equitable assignment of the Registered Tournament Fund, but owing to the amount at our command each year being limited, it will require more than one season to accomplish this result.

Grand American Trapshooting Tournament.

Our members are so familiar with the success of this stellar event, that it is needless for me to call attention to the fixture. Its magnitude overwhelmed the trapshooting world. Imagine almost one thousand contestants taking part, and the trapping of three car loads of targets, and a fair idea can be formed of this wonderful Tournament. Its like has never been known on the planet. Consummation of this big event without a hitch is a tribute to the thoroughness of organization in all departments. I want to go on record as saying that the marvelous success of this Tournament was largely due to the loyal support given the management by the office force, which cheerfully worked all day and late into the night to perfect the many details essential to its proper operation. Only those on the inside can form a reasonable estimate of the tremendous task of conducting this stupendous event.

The Tournament was held on the lake front in Chicago and the largest gallery in the history of the recreation assembled during the five days it was held. It is estimated that 25,000 people witnessed the main competition. The location was a most fortunate one as it brought trapshooting to the notice of thousands who had never witnessed a target thrown from a trap. Undoubtedly a lasting impression was made on many visitors and the sport will surely gain from this grand demonstration.

While I am harping on an old string, now that the Association has accomplished its object and produced the world's greatest sporting fixture, I think it is time to call a halt on the scope of the Grand American Handicap and establish methods that will tend to minimize instead of maximize this event. Although I have so stated in more than one of my previous reports, I would again state that in my view it should not be the ambition of the Association to make the Grand American Handicap the largest, but the best in existence. In my opinion, we should not cater to quantity, in preference to quality, and that we should not cheapen America's blue ribbon event by reducing it to the level of a show. I am not alone in this stand as several of this year's contestants expressed to me their belief that the event was tiresome and that the sport was detracted from by the massiveness of the Tournament. One man aptly styled it "a round up." True, many sportsmen were highly enthused over the colossal affair and heartily congratulated the Association on its success, but I am confident a reduction in the entry list and a return to five traps would meet with the approval of a majority of the contestants who annually take part in this great event.

I would reiterate that there is no intent nor need to change the system, but to make the conditions more rigid. I feel confident that this would meet the views of the best sportsmen, who would rather fail nobly contesting under difficulties than win what might possibly degenerate into a barren honor, where conditions were such as to induce a multitude to compete, no matter how much outclassed.

I hope our members will appreciate the fact that my sentiment is uttered with all sincerity and that I have nothing but the best interests of the Grand American Handicap at heart, devoid of any selfish consideration whatever.

The Future.

The outlook for 1916 could not possibly be better. At this time all that seems necessary is adherence to those methods which have carried us along so finely to the present time.

In Conclusion.

I again tender our members my hearty thanks for their unflagging support, and in this I include our honorary press members for their unremitting courtesy and encouragement.

Very respectfully submitted,

ELMER E. SHANER, Manager.

THE PACIFIC SALMON.

[Robert Page Lincoln, in Rod and Gun.]

Shapely the form of the chinook;
King of the foam and the deep—
Wrought in the olive that decks him,
Shimmering silver his leap.
As, like a bolt of sharp lightning,
Up he speeds o'er the last steep:

Over the tumult and clamour,
Flung from the rapid and fall—
Onward and inland determined,
Held in that vision of thrall;
Chevalier brave is the chinook,
Truly the king of them all.

Ah, when the army came homeward;
Long live the king—he was dead;
Faded the beautiful glamour
And from him beauty had fled.
Nature had voiced: "Heed the ruling,
"Death—it's the price when you wed!"
—Chas. Henshaw Cameron.

Of the Pacific salmon, William Hornaday has very aptly said: "The salmon were made for the millions. The Siwash Indian eats them fresh in the summer, dries them, and later on freezes them for himself and his dogs in winter. The epicure pays for having the fresh fish shipped in ice to his table, wherever that table may happen to be. In mid-ocean the great American canned salmon is often the best and only fish afloat. In the jungles of the far East, in the frontier bazaar of the enterprising Chinese trader it bobs up serenely to greet and cheer the lonesome white man who is far from home and meat-markets. Even in the wilds of Borneo its name is known and respected; and he who goes beyond the last empty salmon tin truly goes beyond the pale of civilization. The diffusion of knowledge among men is not much greater than the diffusion of canned salmon; and the farther Americans travel from home, the more they rejoice that it follows the flag."

The industry of salmon packing is one of the most important upon this continent, and yearly adds to its importance as the demand for beef is lessened, or as beef grows more scarce. There were some past years when it seemed as though the destructiveness of the salmon fishers would eventually prove disastrous to this well known fish; but the fact that the fish hatcheries have been working overtime is proof of the perpetuation of the supply and there seems hardly anything to fear from that end, though in the year 1911 almost forty-four million salmon were taken out of Pacific waters, and these were not wee sma' ones at that. But at the same time five hatcheries alone in the year of 1911 stripped something like two hundred and seventy-seven millions of eggs from three of the notable salmon of the living Pacific group which will in time add to the already great supply that is feeding the markets of the world. The enormity of this business is quite lost upon one. At first it seems hardly conceivable and yet the extent of it cannot be exaggerated. Salmon canning saw its inception on the Columbia river in the year 1866, which was followed after ten years by canning plants in California, and later on, up to the year 1878, along the Puget Sound, upon the Frazer river, gradually making its initial start and its foundation in Alaska where today we witness the industry at its height. While mentioning Alaska and its connection with the salmon business it may be interesting to note that the year 1914 saw one of the greatest salmon packs in the history of the canning profession, the Bristol Bay district of Alaska marking a steady run of these fish, a run that has never before in the history of the trade been equaled. Every canning factory was worked to the limit and a scarcity of cans made further packing out of the question. The Nushagak river canneries rounded out their season with 546,200 cases of one pound tins, or forty-eight to the case—a most phenomenal pack; and this in the face of the common assertion that the Pacific salmon will soon be a thing of the past. It is admitted that the salmon canning business has gradually seen the withdrawal of numerous millions of this commercial fish; but it is yet a long look into the future before we can say that annihilation is the result of wholesale slaughter. Hornaday early remarked as follows regarding conditions in Alaska, in the perpetuation of this industry. He says: "The destruction of salmon comes about through the competition between the various canneries. Their greed is so great that each strives to catch all the fish there are, and all at one time, in order that its rivals may secure as few as possible. Not only are salmon taken by the steamer load, but in addition, millions of other food fish are captured, killed and thrown away. At times, also, it happens that far greater numbers of salmon are caught than can be used before they spoil. A friend of mine told me of the throwing away of sixty thousand salmon at one time, near a cannery in Prince William Sound in 1900; and again the similar throwing away of ten thousand fish. So something like seven hundred thousand pounds of valuable fish were in that year alone, wasted. In the Kadiak and Chignik districts, the catch of salmon decreased from 360,000 cases in 1896 to 90,000 cases in 1898 and in 1899 it was almost a failure. In many of the small Alaskan streams the canning companies built dams or barricades to prevent the fish from ascending to their spawning beds, and to catch all of them! In some of the small lakes the fishermen actually haul their seines on the spawning grounds. In 1903 I recorded a warning of the impending destruction of the Alaska salmon industry, and demanded strict governmental regulation. It is a pleasure to state that notwithstanding the enormous annual drain upon them, and the reckless and wasteful methods of fishing that once prevailed, the salmon fisheries of Alaska are still holding up remarkably well. Ten years ago there were grounds for grave apprehension regarding the future salmon supply of Alaska, but Congress placed those fisheries under the control of the United States Commissioner of Fisheries, giving him arbitrary power to close against the fisherman any stream or streams that seemed to be in danger of exhaustion." The year 1913 witnessed one of the greatest catches of salmon in the waters of Alaska. In the twelve months of 1912-1913 close on four million cases were packed; and in 1912 upwards of eighteen thousand people were employed in the sixty-five salmon canneries that were operated in Alaskan territory, showing the immensity of the combined Canadian and American industry. That the future will see even a greater impetus in this remarkable trade there can be little doubt.

In the salmon of the Pacific we have some interesting fish to consider, and because of their importance I have decided to give the subject careful attention. First in consideration therefore is the genus of the fish. It should be made known that the salmon of the Pacific are not in reality salmon, of the genus Salmo (as are the Atlantic species), but are of a separate genus, Oncorhynchus, to be exact. It should be remarked, however, that there is not a wide range of difference between these species. The bones, or the rays of the anal fin form the main means of distinguishing the genus Oncorhynchus from Salmo; in the former genus there are noted from fourteen to twenty bones in the anal fin, while in the latter genus there are but eight to twelve. There are also more branchiostegal rays (the bones that support the gill covers), in the Pacific salmon; also noticeably more of the gill rakers. However, the anal rays form the principal means of identification if so desired.

Five individuals make up the salmon species of the northern Pacific waters, and to this list might be added another, a salmon found along the Japanese coast, known as the masu salmon (Oncorhynchus masu), though this same salmon is found along the North American coast as well. It is, however, in this category, left out; as we are concerned with the most noted of these fish. In the Chinook salmon (Oncorhynchus tschawytscha) we have the foremost and practically the leader of them all. As a commercial fish he leads in value and is the most sought after by the canneries.

THE FARM

STANDARD INSECTICIDES AND FUNGICIDES versus SECRET PREPARATIONS.

[By Geo. P. Gray, U. of C.]

No small part of the correspondence of the Insecticide and Fungicide Laboratory of the University of California is in answer to questions concerning the composition or value of various proprietary remedies which are being offered for sale for the control or eradication of insects or fungi. The following is an abstract from a letter which is more or less typical of many which have been received:

"Under separate cover I am sending you a small sample of a preparation which is being used and offered for sale in this district as a secret cure for . . . The man who is introducing this medicine claims great and mysterious things for it and is charging an extremely exorbitant price for the same. In one orchard, for instance, he treated something like 300 trees and claimed that his medicine cost $285. I desire very much to have an analysis of this material. I have assumed that it is merely creosote or some similar substance with . . . coloring matter in it. The man claims, however, to have some other mysterious substance mixed with it."

Very often the promoters of "secret" remedies either claim or imply certain mysterious properties for their compounds and "new discoveries" are frequently mentioned. The statement is commonly found that "years of study have been spent in the perfection" of such preparations. During the four years' operation of the California Insecticide Law, scores of proprietary insecticides and fungicides have been analyzed. In no cose could any mysterious or costly substance be found by the most searching examination, nor could any substance be detected which had not been made public as a remedy for insects or fungi. Based upon this experience, a study of the published writings on insecticides and fungicides, and of the formulas on file in the office, it is concluded that the most noteworthy "discoveries" and "secrets" in this class of goods consist not in the discovery of the insecticide or fungicide itself but the discovery and keeping secret of efficient and cheap coloring matters, or powerful and pleasant smelling perfumes to mask the presence of some very common remedy. The mysterious and wonderful properties ascribed to them are too often found on the outside of the package composed of printer's ink, rather than upon the inside of the package. Among illustrations of this kind may be mentioned the coloring of borax with iron rust, the sweetening of the odor of kerosene with oil of citronella, the coloring of carbon bisulphide with idodine and masking its tell-tale odor with oil of mirbane.

The most recent instance of this kind that has come to the attention of the laboratory is a red powder which is being offered for sale in the state under the name "Treevax," probably intended to catch the fancy of the public under the guise of a supposed tree vaccine. It is said to be manufactured by the Treevax Company of Hicksville, Ohio. Special mention is made of this compound for the reason that it is believed that the method of application is such as to place in jeopardy the life of any tree to which it may be applied.

A sample of "Treevax" has been analyzed by the laboratory and found to be of approximately the following composition:

Potassium nitrate (saltpeter)	2 parts
Sulphur	5 parts
Iron compounds (principally oxides and carbonates)	1 part

According to the best information available, such a mixture is practically valueless as an insecticide or fungicide when placed in a hole bored into the trunk of a tree, as directed in the circulars. The retail price of the most expensive ingredient (saltpeter) is only about twenty-five cents per pound, even at "war prices." The price of "Treevax" is $2 per pound.

Very alluring and extravagant claims are made in the circulars accompanying the package. The following are some of the statements made: "Treevax kills San Jose Scale, Caterpillars, Lice, Borers and many insects that feed upon leaf, branch, roots, or fruit, without injury to either. Blight—the enemy of the pear tree, is conquered by Treevax."

The above claims appear to be based largely upon the experience of a certain lady of Hicksville, Ohio, who testifies that she had a very valuable pear tree on her lot which was badly affected with the blight and that after treatment with "Treevax" "The tree soon took on new life and a healthier tree cannot be found than my pear tree, and it was just loaded with fruit." According to the circular, a quantity of the pear juice was extracted from the pears grown by the owner of this valuable tree and subjected to bacteriological and chemical analysis and found free from any injurious impurities Pictures are also shown of a certain Ohio orchard (consisting of sixteen trees) which had been treated with "Treevax" in comparison with an orchard which had not been so treated.

An effort is made in the advertising matter accompanying the package to create the impression that the compound and method of treatment are based upon scientific principles. The statement is made that "years have been spent in perfecting the compound." The directions for use and the testimonials are most unscientific, however. It is presumed that the best of the testimonials would be selected for the advertising matter, but those given are not calculated to greatly impress the scentist. The lady's pear tree and the sixteen-tree orchard which were rescued from an untimely death do not constitute sufficient evidence to warrant the statement appearing on the circular that "The Treevax treatment is based on the same scientific facts as are now commonly accepted by the medical profession and it is creating the same revolution in the treatmentof diseases of plant life that has already taken place in the treatment of human ills." The promoters can not be very familiar with the habits of scale insects, for it is directed that "All dead limbs should be trimmed or cut off tree. This is very essential for a dead limb has no sap and if left on scale or other pests seek refuge on it, hence full benefit of the treatment is not realized." Tis direction is printed in large type. The removal of dead limbs might be a benefit to a tree affected with blight, but one does not need to be a trained entomologist to smile at the thought of scale or other pests seekinf refuge on the dead limbs of a tree and there starving to death, of course, for the want of sap or other nourishment.

The most insidious feature of the application of the material is believed to be the effect of the "plugging" of trees by inexperienced hands. The directions for use are to bore a hole in the tree, fill with the powder, drive in a hardwood plug and seal over with grafting wax. This question has been discussed in the publications of several experiment stations and in other literature. A summary of some of the experiments and conclusions has been made in the California Cultivator of April 22, 1915, and orchardists are advised of the futility and probable harmfulness of applying the known remedies in the manner under discussion.

Present or futre investigations may disclose an effective and safe way to control insects and fungi by means of remedies carried by the sap of trees. At present, however, there is no satisfactorily demonstrated method of this kind which may be used by unskilled hands, nor is it at all certain that r remedy can be thus applied, even by the expert, in sufficient strength to destroy insects or fungi without injury to the tree.

It does seem certain, however, that a mixture of saltpeter, sulphur, and insoluble iron, selling at $2 a pound under the name of "Treevax" is a rank fraud and can have no legitimate place among the remedies in use by the fruitgrowers of California. The most serious menace of the compound is that some one may be misled by the confident assurance of the promoters and bore his trees full of holes, be further misled by the stimulating effect on the foliage of the soluble nitrate, and not realize his mistake until his trees begin to suffer from the effects and wood rot many months later.

It is not intended by the above discussion to imply that all proprietary preparations are worthless, for many have been examined which are valuable and reliable remedies, but are on the market under names which do not convey any idea of their composition. Some of them are being sold at their true commercial value, the name being used only as an identification mark to designate certain characteristics or quality or worth of the particular preparation. There can be no objection made to the use of a trade name or brand or trade mark in connection with a standard material and, in fact, it is quite often desirable. Furthermore, if an actual discovery of some new insecticide or fungicide has been made, there can be no objection to the use of a coined name to designate the product. If the composition of the material is disclosed (but not necessarily the mode of manufacturing or compounding), the product may be properly recognized as a standard remedy, if tests show it to be worthy.

The fact that an insecticide or fungicide of secret composition is sold under a trade name does not necessarily condemn the preparation, but it does place it under suspicion, for the following reasons:

1. Under the existing insecticide laws, it is possible to concoct any form of mixture which is not absolutely in-

CLOSING OUT BARGAINS In Winter Jogging Carts

Horsemen have never had a better chance to save money then now. We are closing out 5 different models of carts. We have on hand the following:

35 Model 8 Carts.—10 Model 44 Carts
15 " 11 " —3 " 6 "
—1 " 4 "

These carts are all new but will be sold at second hand prices to clean out before our 1916 goods are ready.

Send for booklet No. 205.

HOUGHTON SULKY CO. 320 LINCOLN AVE. MARION, OHIO

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

To Clean Up my Racing Stable

I will make campaigning horsemen or matinee drivers most attractive prices on the following high class race horses:

AGNES CARTER 2:15¾, TROTTER

by Nutwood Wilkes 2:16½ and out of Excella, a double producer, by Monbells 2:23¾; grandam the famous race and brood mare Expressive (3) 2:12½ by Electioneer 125. This mare is all her breeding indicates and is better than a 2:10 trotter. Eligible to the 2:16 class on mile tracks and the 2:20 class on the twice-arounds. Can trot the short turns, has worked Stadium track for me frequently in 2:13 this season.

DICK W. 2:06¼

a fast and game son of Athadon (1) 2:27, eligible by time allowance to 2:08 class on mile courses and 2:12 on halfmile tracks. Can win on either kind in his class. He is good mannered, good headed and wears no hobbles.

FRANCES S., MATINEE, 2:11½

a trotter and show mare, rich chestnut with silver mane and tail. By King S., sire of Maurice S. 2:06, the coast's best winning pacer in 1912, and out of a stoutly bred mare. Eligible to all classes and has a matinee record of 2:11½ trotting made this season. Can trot either size track, sound as a dollar, and as good a prospect for 1916 as any man's.

OFFERED FOR NO FAULT

but because my business will require most of my time in 1916, and horses are no good to me unless I can drive them myself or at least see them race. Particulars on request, by mail or in person.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

STANDARD INSECTICIDES AND FUNGICIDES versus SECRET PREPARATIONS.

[Continued from page 12.]

jurious and impose it upon the consuming public.

2. No standard can be made for proprietary medicines. Their composition is entirely according to the desire of the manufacturer and may be changed at will.

3. Copyrighted names are often taken advantage of to obtain a higher price for a common remedy than could be obtained by the use of the real name of the material.

4. Certain mysterious and wonderful properties may be claimed or implied for a compound sold under a coined name, and obtain greater credence than if the composition were known.

5: The United States Department of Agriculture and the Agricultural Experiment Stations of the several states are expending thousands of dollars each year in making a study of the standard insecticides and fungicides. Recommendations are made for their use based upon careful experiments, as to what materials are best adapted to meet the different requirements, what materials may be safely mixed, and giving precautions to be observed in their use. To the consumer who is using the standard remedies, all this information is available. Such, however, is not the case for the one who is using a remedy sold under a trade name which conveys no idea of its composition.

If the prospective user appeals to his County Commissioner of Horticulture for advice about the use of a proprietary remedy or goes to the Pniversity Experiment Station for help, the available information must of necessity be limited, for it would be an absolute impossibility to test out individually the thousands of materials offered for sale under trade names. Furthermore, if this could be done, thtere would be no assurance that the manufacturer would not change the composition of his product whenever he saw fit, and continue selling the new preparation under the old name. A secret remedy is compounded in accordance with no standard except the desire of the manufacturer.

Consumers are therefore urged to greatly discount the marvelous properties and virtues so often ascribed to secret remedies, and to make use of the standard materials of more modest, but usually more truthful- claims.

The apple growers of California, Oregon and Washington and Colorado were the orchard teachers of this country. They made the farmers of the east realize that apples might well be taken seriously.—Elbert Hubbard.

GUNCRAFT

By W. A Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

PART OWNERSHIP.

Can We Combine the Advantages of Tenancy and Ownership?

Most people in this country believe that the tenant is a menace, and that the owner is more desirable because he maintains soil fertility by live stock farming and other good systems and manifests more public spirit. Others believe that with a system of long leases such as prevail in England, the tenant would be able to conduct his operations with a much smaller investment, and without many of the objectionable features of tenancy as it now exists in this country. We will have to readjuust our ideas somewhat radically to reach the present English condition, but many of the advantages in our present ideas, according to O. R. Johnson of the Farm Management department of the University of Missouri.

In a survey of the western part of Johnson county, the department found that the size of a farm business has a close relation to the income which the farmer receives for his work and that small owners may often enlarge their operations by renting additional land. This part owner stands with the owner in the social matters, both from the standpoint of the individual and that of the community which he is helping to improve. In fact, in the region surveyed, he spent even more for his family living than the man who was renting no land. This includes what he grew on the farm, and he was more nearly self-sustaining because he produced a greater portion of his living on the farm and bought less of it at the stores. The interest chargeable on his total investment was less than two-thirds as great as in the case of the owner, for the total investments were $7,633 and $12,555 respectively. It must be remembered that even after renting some land from others, these owners had only about 7½ acres more land apiece than the owners, and 10 acres more than the tenants with whom they are compared. The actual figures were 143.6, 135 and 133.5 acres respectively.

To a considerable extent the matter may be summed up by saying that the owner made a labor income of $314 a year on 136 acres, the part owner $456 on 143.6 acres, and the tenant $531 on 133.5, but many people would be willing to pay the additional $45 a year for the advantage of knowing that it would not be necessary to move in a year or two, make new friends, and establish a system on a new farm. The difference between labor income the part owners and tenants have is more than counterbalanced by the higher standard of living of the part owner who spent $64 a year more on family living. The average owner in that region probably does not realize that his labor income is as far below that of the tenants or part owner as Mr. Johnson's figures show. He does not realize that so great a portion of what he regards as income is not income from his labor but from the money investment which his land represents.

HOG BUTCHERING NOTES.

Butcher hogs at home.

Give them water but no feed for a day before killing.

Zleed the hog with an eight-inch straight-bladed knife.

Be sure bleeding is done before scalding or the skin may be left too red.

A heavy blow with an ax between the eyes will stun the animal before sticking.

The meat may spoil if the animal is excited before killing, or the weather is warm afterwards.

Scrape as quickly and rapidly as possible after scalding. The cold carcass is hard to scrape well.

Bleeding will be finished more quickly if the animal lies on a steep slope with its head down hill.

Keep the hog moving in the barrel. If the animal is left pressed against the barrel the hot water cannot get at that part of the carcass.

Scraping is easier if a shovelful of hardwood ashes, a lump of lime, some concentrated lye, or a handful of soft soap has been added to the water.

Use a thermometer. Do not attempt to scald with the water at above 150 degrees. A good scald can be obtained at 140 degrees but it takes longer.

In opening the carcass, split the pelvic bone between the hams with a knife by cutting exactly in the center. To open the breast bone with a knife cut a little to one side of the center, but do not let the point of the knife get behind a rib.

A CHRISTMAS GIFT for SHOOTERS

WHETHER it be brother, father, son or friend, if he's a shooter here's the gift that will surely please him. A Christmas present that will give him many hours of pleasure. This gift is something different, and you solve the problem of what to give him when you present this

SHOOTER'S CHRISTMAS BOX
Containing the DU PONT Hand Trap and 100 Clay Targets

The DU PONT Hand Trap is a practical little device for throwing all sorts of targets from easy gliders to the most difficult shoots. It's just the thing for shooters. John B. Burnham, President of the American Game Protective and Propagation Association, says it's great field practice for both beginners and experts.

The Shooter's Christmas box (Hand Trap and 100 Targets) costs $5.00 at your dealer's. If he can't supply you, we'll send it prepaid on receipt of price.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv., so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types or English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

WINCHESTER

Repeating Rifles For Hunting

In choosing a rifle for any purpose, its reliability and accuracy should be carefully considered. Winchester rifles enjoy the highest reputation the world over for reliability, accuracy, strong shooting qualities and finish. They are made in all desirable calibers from .22 to .50, and in eleven different models. From these a Winchester can be selected that will meet any shooting requirement.

WINCHESTER CARTRIDGES shoot straight and hit hard. These two cardinal points of a good cartridge, and also that of reliability, are always found in Winchester ammunition. No matter what caliber cartridges you want or whether they are for use in a rifle, revolver or pistol, you will get the best results by using Winchester make. Accept no substitute but insist upon the **W** brand.

THE GRAND PRIX—the highest possible honor—was awarded to the entire Winchester line of rifles, shotguns, metallic cartridges and loaded shotgun shells, etc., at the Panama-Pacific International Exposition.

Every Good Gun Store is a Headquarters for Winchester Guns and Ammunition

TO BE GIVEN BY THE

Pacific Coast Trotting Horse Breeders Association

For Foals of Mares Covered in 1915 to Trot and Pace at Two and Three Years Old

Entries Close February 1, 1916

$1600 for Trotting Foals. $1100 for Pacing Foals

$150 to Nominators of Dams of Winners $100 to Owners of Stallions

$1000 for Three-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Trot.
600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when Mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds — one-third of the money will be allotted for the division for each heat; Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

THIS OFFER is made to all who will send us $3.25 before December 31st, 1915, whether for extension of subscription, renewal of subscription or a new subscription. Address:

RICO (2) 2:12¼.

Last week we reproduced on our cover page a very fair likeness of the two-year-old pacing colt Rico (2) 2:12¼, but the little story that should have gone in the same number was crowded off this page by the critters that were bound for the sales. Now that they have been properly attended to, however, we will endeavor to pay a little credit where credit is due.

In the spring of 1912, before leaving Los Angeles for his eastern campaign, Will Durfee mated a number of mares to the three-year-old trotter Manrico, then merely a "good colt," but destined ere the season closed to achieve a world's record and win one of the greatest Kentucky futurities ever trotted. Among these mares were My Irene S. and Subito, both famous producers at this writing, and Pavlowa B., a daughter of Petigru and Subito who was injured in a runaway during her breaking and was consequently never marked, though showing a trotting trial of 2:21. All three of these mares foaled in safety, My Irene S. delivering the chestnut colt Manuelito for which Clarence Berry paid twelve hundred dollars when it was only a week old and which has progressed nicely in his early education; Subito foaled the brown filly Miss Rico (2) 2:21¼, winner of second money in the P.-P. I. E. stake for two-year-old trotters in June, while Pavlowa B. gave birth to the youngster whose name tops this little sketch.

Now "W. G." usually enters his colts all the way through in the stakes, but for once he overlooked his hand and failed to enter Rico in the exposition events. Nevertheless he brought him along when the stable moved up from Los Angeles and had the pleasure (?) of seeing the two-year-old pace won in time which his colt, comfortably munching hay in the barn, could shade handily. This was annoying, of course, but as William annexed some seventeen thousand dollars with other members of his band he was able to bear up under the strain in fair kind of shape.

While left out of the exposition stakes, Rico was entered in all the regular futurities and was given a pretty stiff "prep" during the summer and early fall, taking his record of 2:12¼ in a time performance on October 19 at Los Angeles. On November fourth at the exposition track he was beaten in eyelash finishes by Verna McKinney in the Breeders futurity in 2:13¾ and 2:13¼, and on November 12 won the State Fair futurity over the same course in 2:21¾ and 2:20¼, the rains of early in the week having made the going very bad. At Pleasanton, where he tangled up again with Julia M., Verna McKinney and Surety he was a winner by a very narrow margin after having contested the race of his young life, taking a winrace record only a quarter of a second slower than his breeder's mark. He is a free legged, rugged sort of a colt, good sized and a good doer, behaves well in company, stands strenuous teaming on the end of a mile and all around bears the marks of a high class youngster.

While not a world's champion two-year-old pacer by a matter of several seconds, that other Californian, Directly, having had a half-nelson on said championship for over twenty years by virtue of a two-year-old performance in 2:07¾, he is nevertheless, of championship calibre on a more limited basis, his championship being of the "seasonal" variety, no two-year-old pacer having eclipsed his performance in 1915. Small favors are gratefully received when larger ones are out of reach, and California expresses her appreciation of one more little bit of recognition by the Year Book and turf journals as being the birthplace of champions.

Rico was bred, trained, raced and until quite recently owned by Will Durfee, but is now the property of Clarence J. Berry of this city, Durfee and Berry having indulged in a heart to heart argument some few days ago regarding the respective merits of Rico and The Lark, the latter then owned by the San Francisco sportsman. The battle did not go to a decision and resulted in a draw whereby Durfee got the mare, while Clarence is stuck for Rico's training and feed bills in the future. He will also collect his winnings, and if our dope factory has not slipped a cog the lad's account will show a balance on the profit side all right.

GOOD ENTRIES IN THOROUGHBRED CLASSICS.

Entry lists are one of the safest and soundest mediums for judging racing conditions from the standpoint of both horsemen and public, and from the patronage accorded the stakes to be run during the coming season in New York, entries to which closed the first of the present month, it would seem that the "thoroughbred revival" in the eastern portion of the country is a genuine re-establishment of racing and breeding. Saratoga's feature events have previously been regarded as well patronized when as many as seventy-five entries were received for such fixtures as the Grand Union, the United Hotel and the Spinway stakes, the latter being for fillies only, but the two first mentioned events for 1916 have attracted 126 entries each while the Spinway received 109. The Hopeful, with a guaranteed value of $17,500 and a starting cost of $400 per entry, has received 129 nominations, and for the Grab Bag Handicap there are 55 subscriptions, the former record having been but 38.

For the Belmont Park meeting the Metropolitan Handicap has 57 entries as against 37 in the last event of the series; the Suburban Handicap has 53 nominations and a like increase has been effected in the manner in which the minor events have been received, all of which is most gratifying. The more prominent of our western stables and farms are well represented, and California's reputation promises to be right worthily upheld.

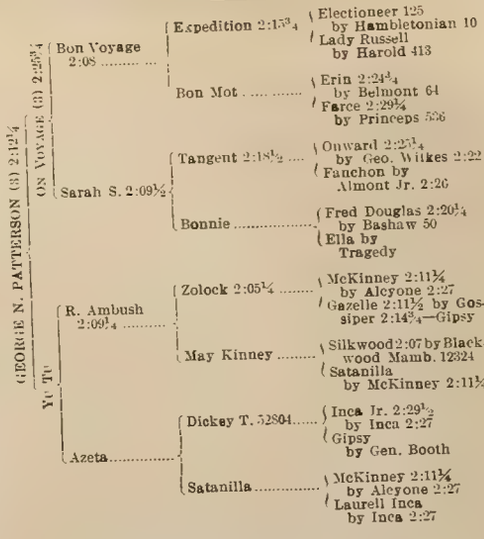
THOROUGHBREDS GATHER AT TIA JUANA.

Tia Juana, from recent advices from the Lower California Jockey Club, will have an ample supply of horses for the hundred days of racing which begins on January first. On Thursday of the present week there were 136 horses already stabled at the new plant, 140 more were en route from various points, and a total assemblage of not less than 400 was confidently expected. The book for the first week has been announced by Handicapper Dick Dwyer, six races a day being the schedule, with no purses less than three hundred dollars.

HUMAN FRAILTIES.

"I would not wear those pantalettes,"
Said modest Gertie Pease,
And then she hurries out and gets
A skirt up to her knees.
—Sharon News.

"I would not wear so short a skirt,"
Said Myrtle Goldilocks,
Then she tripped down the avenue
A-wearing rolled-down socks.
—Houston Post.



"I would not wear those rolled-down socks,"
Said Maudie Mabel Stout;
Then threw her "summer furs" away
And turned her wishbone out.
—Memphis Commercial-Appeal.

"I would not leave my chest so bare,"
Said plump Matilda Mack,
Whose newest evening gown is open
Two feet down the back.
Charleston (S. C.) News-Courier.

"I would not show my back like that,"
Said slim Maria Brown,
Who wears a sort of tennis net
She calls an X-ray gown.
—San Francisco Chronicle.

"I'd be ashamed to wear that thing!"
Blushed demure Daisy Schmitz;
But you'd scarce note the skirt she wears
For rubbering at its slits.

GEORGE N. PATTERSON (3) 2:12¼.

Fifth Dam Fairy Queen by Echo 462

George N. Patterson, whose tabulated pedigree appears herewith and of whom we present a photographic likeness on the cover of this number of the Breeder and Sportsman, enjoys the distinction of being the fastest Pacific coast three-year-old trotter of the season of 1915, both by public performance and, we believe, private trial, his work this spring at Pleasanton a trifle on the fast side of 2:10 being the fastest journey of its kind that we recall just at present. He was the only local three-year-old trotter to make an eastern campaign, and after having been given up for dead upon his arrival at the end of his first eastern journey from Pleasanton he rounded into form and went some most excellent races on the Great Western Circuit, winning a fair share of them and acquiring a record of 2:12¼ at Galesburg. Here at home he won the Stanford stake in the mud, the race throwing him out of condition for his final engagement in the Breeders Futurity, in which he was looked upon previously as the contending colt.

While George N. Patterson has spent his life here in California, save when away campaigning, and has received his education and racing at the hands of Homer Rutherford, it would seem that he has failed to heed President Wilson's admonitions as to preserving a strict neutrality, and has evidenced very pronounced pro-German symptoms. This statement may be challenged by some "doubting Thomas" who fails to realize that a horse may have preferences in such matters, but we submit as a matter of record the fact that by far the majority of his aggressive operations have been directed against the Allies—Watts and Lou. There have been charges and counter charges, retreats and victories, and while it may be remarked that he was successful in a number of his attacks upon the enemy's central formation, his operations here against the "west wing" of the Allies was far less productive of glory. These matters, however, are merely "by the way."

The tabulation appearing above shows rather unusual combinations of blood lines, and we would like to have an expert opinion as to the exact status of the relationship between George N. Patterson and some of his maternal ancestors. Nobody is barred and as many of you as choose to do so may all speak at once.

THE REVIEW CALENDAR.

As has been its custom for some years, the Horse Review has issued its calendar of champions for nineteen hundred and sixteen, the champions, of course, being those of the season just passed into history, in some instances world's champions as well. None of the pictures used have appeared in a previous calendar, and the new publication, ornately designed and put forth in five colors, forms an attractive as well as useful ornament to the office or den of harness horseman the world over. The horses whose likenesses appear are Bingen Silk (2) 2:08¾, Mary Putney (2) 2:05½, Nathan Axworthy 2:09¼, Peter Mac 2:03½, Peter Scott 2:05¼, Suldine (2) 2:12, Volga (2) 2:07¾, Directum I. 1:56¾, Hal Boy 2:01½, Russell Boy 2:02¼, Sadie Densmore (4) 2:02, and William 1:58½, certainly a most representative assortment.

Horses at the Mounted Service School

The principal cavalry post of the United States is located at Fort Riley, Kansas. It lies in a typical limestone region, supports many native prairie grasses, and, barring summer heat, is an ideal horse district. About 22,000 acres of land are within the confines of the reservation, largely hill country, broken in contour by sharp ravines. In such surroundings the Mounted Service School of the United States Army has acquired an efficiency rivaling that of the famous French cavalry school at Saumur.

The cavalryman's ideal is a Thoroughbred horse. In spite of the admirable qualities of the standardbred, the saddle horse and Morgan, military experience has found nothing that can quite equal the English breed of running horses. In courage and endurance they believe they excel the American saddler, while their type ranks them superior to the Morgan and standardbred. There are many things about Morgan conformation that would make them desirable cavalry horses, but they are permanently barred from the service through lack of size. The standardbred has the size, endurance and courage, but is too long in back and coupling, too straight in shoulder and too sloping in croup to meet the specifications.

The right kind of a standardbred makes an admirable artillery horse, as many first hand observers of the present European conflict can attest, and it is really superior in the cavalry service, because of endurance and courage, to many of the continental breeds of horses that possess more suitable conformation. However, the English cavalryman finds his mount of Thoroughbred blood much superior, and the American service recognizes the same fact as a result of its own experience. The best horses in each troop in the American cavalry are almost without exception high in percentage of Thoroughbred blood. Desirable types of these geldings are so scarce, however, that their price is almost prohibitive, and the onliy means by which the Mounted Service School obtains a reasonable percentage is by the purchase of the less promising animals in the various stables of the country as two- and three-year-olds. Most of such horses are from quarter-blood to three-quarter blood, with occasionally an inferior purebred among them. Of course such young animals go to Fort Riley and are never purchased for immediate active service.

The officers are required to provide their own mounts and usually find it necessary to keep two animals. The present minimum height for officers' mounts is 15.2 hands, minimum weight 975 pounds, and the finding of horses of this size that meet the requirements in other ways has almost permanently disabled the pocket books of a number of ambitious young men. There is a tendency at present to lower the minimum to 15.1 hands, so as to obtain the use of a number of highly desirable horses, almost as efficient as the taller ones and within the limits of the officer's purse. In fact, in 1911 the war office issued orders allowing the second mounts of officers to be of the smaller polo type, but placed a minimum at 15 hands, barring some few already owned at that time that exceeded 14.2 and possessed suitable cavalry conformation. Such horses were required to be sound, of desirable conformation and useful in military service in order to justify their maintenance.

Officers below a major in rank are allowed $150 a year for the maintenance of their charger, or $200 for two mounts. This is additional to forage and applies on the saddle, riding breeches and other equipment, as well as the general wear and tear due to the amount of riding required of the officer. Many officers, particularly the more enthusiastic horsemen, do not use the deep service or McClellan saddle, but instead purchase the flat English type of saddle, which is lighter and which tends to a more graceful, firm, yet elastic seat.

The troop horse must be sound, broken to the saddle and of a gentle courageous disposition. Geldings of uniform and hard color are the only animals bought. They must be in good condition, with an easy elastic mouth, from four to eight years of age, 15 to 15.3 hands tall (average 15.2) and weighing from 950 to 1,100 pounds, depending on the height. Each horse is subjected to rigid inspection and horses possessing material blemishes or defects, or animals which by their lack of quality indicate too much cold blood are rejected. For such horses the government will pay about $160. Since most mounts of this stamp cannot be raised to maturity for such prices, it is not surprising to find the government buyers more or less feverish over the quality of animals offered them.

It is in the development of the horses, once they are accepted, that the military service teaches its great lesson to the farmer. No horse in the United States cavalry is broken; every one is trained. And it is not a mere nicety of words either, but a difference between the hurry and bustle which occur each spring when the colts are being pushed through to help in the summer work, and a two-year or better education at the hands of careful men, who make the colt master point after point, so that its learning becomes an integral part of its nature.

The remounts which are furnished to the army come from three depots: Front Royal, Va., Fort Reno, Okla., and Fort Keogh, Mont. Those at Fort Riley usually come from the Virginia depot. When they first arrive they are classed as breaking colts, and this stage of their education is prolonged for a year if possible. During this time the colts are accustomed by the rider to the use of the hands and legs as means of control, are taught to obey signals instantly, are fixed in their habits as to the three gaits, are taught to lead off with either foot, and are given the rudiments of jumping. Much of this elementary work is with the horses "on the lodge" and without a rider. The second year they are classed as training colts, and the points taken up in the first year are repeated until they become second nature to the colt. They are taught to jump with the rider, and are given a variety of drill and formation work. From the best training colts are selected the jumpers and schooled horses, which are carried still further forward.

Many will not appreciate the necessity for training over the jumps and in other types of schooled work. In addition to the physical exercise that it gives both man and horse, and the subordination of the horse's will to that of the rider it has a very practical application in the mobility it gives to mounted troops in the roughest of country, an exigency which more than one army has been forced to meet in wartime. Furthermore every cavalryman must be the best horseman possible in order to get the utmost service from his mount, and must be able rapidly to develop to his needs any new mounts which replace losses during service.

Perhaps the most important essentials in the handling of a horse are a light hand and a well balanced firm seat. These the cavalryman acquires most readily in unusual tests, and jumping is a principal means of obtaining the necessary suppleness for satisfactory horsemanship. Jumping gives both rider and mount confidence, and the training which restricts the horse to encountering obstacles at an ordinary gait instead of rushing them, assures a commander of his ability to ride around hostile parties at a businesslike gait, to acquire information under almost every condition and to supply it to his less mobile forces. The conditioning the horse receives through the military system of training, the strengthening of shoulders, back, loin and hindquarters, the hardening of tendons and ligaments—any of these alone provide sufficient justification for the most elaborate type of schooling. The horse becomes more agile, learns to balance himself better by head and neck, and becomes bolder, more self-reliant, and cooler in tight places.

The Mounted Service School expends two years on the horses for its own service, but of course for average military usage—the period has to be shortened and the horses more or less forced. It is far more economical in terms of the present to prepare the horses by the shorter method, but in proportion as the horse learns his lesson rapidly, just so rapidly does he forget it. In addition forced training often ruins otherwise excellent colts. Experience has shown that the horses which receive at least two years of training are longer lived, more uniform in condition and degree of service, and less liable to the development of unsoundness, than the horses that are trained more rapidly. Such animals are subject to less wear and tear, are more regular in period and hours of service, and meet sudden strains or extraordinary demands much more easily.

In fact, the number that wear out is surprisingly low at the school. On the average about 20 horses are condemned each year out of about 275 in the cavalry service at the post. This means that the working life of these horses averages about ten years, and there are many horses still on duty at the post that have a speaking acquaintance with most of the officers that have ever been connected with the Mounted Service School.

For example, old Santa Claus is kept for the single purpose that he safely pretends to be unmanageable with a green rider. Scarcely an officer has entered the school who has not had a thorough lesson in handling a runaway horse aboard the old fellow's back, and Santa Claus knows why he is there. How his eyes beam with mischief every time an unsuspecting strange officer is introduced!

The principal reasons why horses are condemned are: unsoundness, age, chronic disease and general breakdown due to too much work. Incurably diseased horses are usually slaughtered. Occasionally auctions of the condemned horses are advertised at various points. Many of the horses are fairly useful for private work but unable to stand up under military strain. Therefore in some sections of the country there is a strong demand for them. In Virginia they usually average the highest at public sales, $80 to $90 being frequently realized. Kansas, through its nearness to them, appreciates them as little as anybody, and $50 to $60 per head represents the best averages.

A small amount of breeding is done at Fort Riley. A few government mares produce foals each year, and many of the officers get partial interest on their investment by breeding their mares to the post stallion, Vestibule. Vestibule is a capital type of Thoroughbred, and is sired by Rock Sand, a horse that was sold to the French government for $50,000. The hay production on the big reservation is interesting. There is a large amount of land that is so broken that hay cannot be cut, but the post more than supplies its own needs. In the dry summer of 1914, following a more severe season in 1913, about 4,500 tons were cut, but with the heavy rains this year as much as 8,000 to 10,000 tons will probably be placed in the mows. It is all prairie hay, mostly of the typical pasture grasses.

There are other kinds of horses at the post: artillery horses from 15.2 to 16 hands tall and weighing from 1,150 to 1,250 pounds; drafters (so-called) of the same height but weighing from 1,050 to 1,400 pounds; and mules of many styles, from pack to draft animals. It is in the cavalry types however that the military service teaches its agricultural lesson, and it is to the detriment of national horse production that this lesson cannot be more pointedly driven home in our horse rearing districts.—E. N. Wentwort, in Breeders' Gazette.

FAIR MANAGERS HOLD ANNUAL SESSION.

The annual conventions of the American Association of Fairs and Expositions are the most important from every standpoint of any meetings that are held in the interest of fairs, expositions or race meetings in this country, or any other on the globe. The twenty-fifth annual meeting of this association held at Chicago on Thursday and Friday of last week was the greatest in its history in showing of co-operative strength, and wealth of knowledge in the direction of fairs and expositions in all their departments. Over forty State fairs and expositions make up the membership of this association, all working on a grand scale for the education and betterment of the people.

Twenty speakers, including secretaries, fair managers and prominent educators from our leading agricultural colleges, and heads of different governmental departments, in various sections of the country, addressed the convention, presenting papers covering subjects of utmost interest to fair managers and secretaries of all State and county fairs.

The subjects covered were:

Automobile Racing at Fairs and Expositions—John C. Simpson, secretary Minnesota State Fair, Hamline, Minn., and G. W. Dickinson, secretary-manager Michigan State Fair, Detroit, Mich.

Cash Register Machines for Vehicle Gates and Nonpaid Admissions at Foot Gates and Demonstrations of Same—A. S. Palmer, St. Paul, Minn., and C. T. Steffey, Dayton, Ohio, representing the National Cash Register Company.

Reminiscences—J. W. Russwurm, secretary Tennessee State Fair, Nashville, Tenn.

Talk: Ideas on what there should be at Fairs—Dr. Charles McCarthy, Madison, Wis.

How a State Fair Was Conducted Without Cattle, Hogs or Sheep Exhibits— B. M. Davison, secretary Illinois State Fair, Springfield, Ill.

Uniform State Action Regarding Bill of Health for Animals Exhibited at Fairs and Expositions—H. E. Williams, Commissioner of Agriculture, Charleston, W. Va.

How Texas Conducts a Big Exposition, and with No Horse Racing—W. H. Stratton, secretary Texas State Fair, Dallas, Tex.

How to Draw Crowds to a District or State Fair—Len Small, secretary Kankakee Interstate Fair, Kankakee, Ill.

Entertainment and Its Economic Relation to a Big State Fair and Exposition: (a) Muusic and Free Attractions; (b) Carnival Companies and Other Paid or Percentage Shows; (c) Permanent Amusement Devices—Frank D. Fuller, secretary and general manager of Tri-State Fair, Memphis, Tenn. (Southern District); R. M. Striplin, general manager Southeastern Fair Association, Atlanta, Ga. (Southern District); A. L. Sponsler, secretary Kansas State Fair, Hutchinson, Kan. (Southwestern District); Don V. Moore, secretary North Dakota State Fair, Grand Forks, N. D. (Northwestern District); Joe Morton, secretary Interstate Live Stock Fair, Sioux City, Iowa (West Central District).

What State Fairs Think of the Different Racing Systems, and Suggestions to the Trotting Associations—E. J. Curtin, superintendent of speed Iowa State Fair.

The Artistic Side of Fairs—A. W. Miller, Chicago, Ill.

Sanitary Problems of a Big Fair and Exposition—S. C. Shaver, secretary New York State Fair, Syracuse, N. Y., and J. L. Dent, secretary Kentucky State Fair, Louisville, Ky.

Live Stock Exhibits at Fairs and Expositions—Prof. J. W. Kennedy, Sioux City, Iowa.

Messrs. Len Small, secretary of the Kankakee Interstate Fair, Kankakee, Ill.; John T. Stinson, secretary of the St. Louis Agricultural Fair, St. Louis, Mo.; R. M. Striplin, secretary of the Southeastern Fair Association, Atlanta, Go.; O. P. Hendershot, secretary of the Gem State Fair, Boise, Idaho, and George Morrisset, secretary of the Quebec Provincial Exposition, Quebec, Que., made application on behalf of their fairs for membership in the association. All were admitted and fully qualified.

The tentative dates selected and announced for 1916, subject to revision, are as follows:

North Dakota State Fair, Grand Forks, N. D., July 17-22.
Forest City Fair, North Randall, Ohio, Aug. 17-22.
Iowa State Fair, Des Moines, Iowa, Aug. 23-Sept. 1.
Kankakee Interstate Fair, Kankakee, Ill., Sept. 4-9.
Minnesota State Fair, Hamline, Minn., Sept. 4-11.
Michigan State Fair, Detroit, Mich, Sept. 4-13.

Indiana State Fair, Indianapolis, Ind., Sept. 4-8.
Ohio State Fair, Columbus, Ohio, Sept. 4-8.
Nebraska State Fair, Lincoln, Neb., Sept. 4-9.
Wisconsin State Fair, Milwaukee, Wis., Sept. 9-17.
Kentucky State Fair, Louisville, Ky., Sept. 11-17.
New York State Fair, Syracuse, N. Y., Sept. 11-16.
South Dakota State Fair, Huron, S. D., Sept. 11-15.
The Topeka-Kansas State Fair, Topeka, Kan., Sept. 11-15.
Vermont State Fair, Sept. 12-15.
Illinois State Fair, Springfield, Ill., Sept. 15-23.
Interstate Live Stock Fair, Sioux City, Iowa, Sept. 18-23.
Kansas State Fair, Hutchinson, Kan., Sept. 18-23.
Missouri State Fair, Sedalia, Mo., Sept. 23-30.
Oklahoma State Fair, Oklahoma City, Okla., Sept. 23-30.
Tri-State Fair, Memphis, Tenn., Sept. 24-Oct. 3.
Wyoming State Fair, Douglas, Wyo., Sept. 26-30.
Utah State Fair, Salt Lake City, Utah, Sept. 28-Oct 7.
St. Louis Agricultural Fair, St. Louis, Mo., Oct. 2-7.
American Royal Exposition, Kansas City, Mo., Oct. 2-7.
Alabama State Fair, Birmingham, Ala., Oct. 5-14.
Texas State Fair, Dallas, Tex., Oct. 14-29.
Mississippi-Alabama Fair, Meridian, Miss., Oct. 16-21.
Tennessee State Fair, Oct. 18-23.
New Mexico State Fair, Albuquerque, N. M., Oct. 24-28.
Georgia State Fair, Macon, Ga., Oct. 23-28.
Southeastern Fair Association, Atlanta Ga., Oct. 23-28.
Louisiana State Fair, Shreveport, La., Nov. 1-6.
Cotton Palace Exposition, Waco, Tex., Nov. 4-19.

A conference will be held in the course of two weeks of the State fair managers of Michigan, Ohio, Illinois, Indiana and Kentucky, with a view of forming a State fair circuit without conflicting dates.

The 1915 officers of the association, W. R. Mellor, president, of Lincoln, Neb.; A. L. Sponsler, vice-president, of Hutchinson, Kan.; Chas. Downing, secretary, Indianapolis, Ind., and Geo. H. Madden, treasurer, Mendota, Ill., were nominated and unanimously elected to succeed themselves in their respective positions. The entire convention was entertained Thursday evening with moving pictures of several of the different State fairs, and on Friday evening the association banquet brought the members together for an enjoyable farewell.—Western Horseman.

SPOT 2:17½ WINS AUSTRALIA'S GREAT STAKE, THE RICHMOND THOUSAND.

The Richmond Thousand of 1915 has now passed into the realms of trotting turf history. This year's event, the fifth renewal of the big stake, undoubtedly possessed features of unusual interest. Of the four previous Thousands, two have been won by New South Wales representatives, while two have been taken by local horses, therefore Friday's event gave Victoria a majority, and the popularity of Spot's win was manifested by the great reception with which he and his rider were greeted on returning to scale.

Again, the fastest winning rate in the rich event had, up to this year, stood to the credit of a New South Wales representative, Delavan Chimes, the winner of the inaugural Thousand in 1911, who went at a 2:20 gait. Spot's placing of this record at 2:19½ was another cause for local jubilation.

The field of 18 was eminently satisfactory, and though not the largest contrasted favorably with previous years. Last year ten kept their engagements in the big event, 1913 saw fourteen do battle, in 1912 seventeen faced the starter, while in Delavan Chimes' year (1911) the field numbered twenty. The withdrawals on Friday included Brown Boy (N.S.W.), who had met with an acident in Sydney, Lady Maritius (N.S.W.), Gerston (Vic.), who also had a mishap, cutting one of her legs while exercising at Richmond, and Happy Sam (Vic.).

The betting opened with Wilkes Child favorite at 7 to 2, while 8 to 1 was offered against the field. The quotations fluctuated considerably later, but the Allendale Farm representative, as usual, was accorded solid support by the public, her price touching 6 to 4, while 5's were offered against His Honor, with Spot figuring at 12 to 1. Apart from a Bracelet in 2:28½, out of several starts at Richmond, there was no seeming justification on public form for the confident support accorded Wilkes Child, the undoubted ability of L. Robertson as a reinsman being probably the controlling factor. At barrier rise her price was 7 to 4, with Spot shortened from 12 to 1 to 9 to 2, and His Honor dividing second favoritism at a like figure. Twelve to one was on offer against Whirlwood and Cressy Girl, with Mountain Palm, Judge Bells, and Huon Jack still less in demand at 5's, while odds of 20 to 50 to 1 were laid against such horses as Epic, Rockmore, and Trigonia. The Judge Huon gelding threaded his way through seventeen opponents, and treated spectators to a characteristic "Spot finish," there being no element of an "eleventh hour" victory about the race. Spot assumed command in the back stretch, held it, and looked equal to holding it had there been another half-mile to travel. Certainly Wilkes Child was unlucky to have met with an interrupted passage, but we cannot ignore the superb dash and stamina displayed by the older campaigner.

Of the eighteen competitors, thirteen represented local owners, while four composed the Sydney division, with Blue Danube alone appearing on behalf of South Australia. Of the Sydney division, Rockmore was the most conspicuous. His fourth in the Flying Handicap early in the day was a moderate effort, and revealed the gelding to be averse to the barrier system of starting, but his showing with H. Bass in the saddle in the big event was much better. Bass's attempt to pilot the Rock Huon gelding between Normalene and Wilkes Child when he thought he saw an opening was a costly move in a double sense, as he risked his chance in the race, incurred the displeasure of the stewards, and received twelve months' disqualification.

The unfortunate mixup at the bottom turn brought Huon Jack and His Honor down, dislodging the respective drivers, A. McLennan and T. Skehill, but the accident was not attended by any serious consequences.

The race was splendidly contested, and looked very open throughout. Both Normalene and Whirlwood looked promising for the first mile, and with Rockmore closely trailing the leaders, the race was full of interest. Spot quickly accounted for the back division, and, pacing without an error, ran into the lead in the back stretch. Wilkes Child made a gallant effort over the last two furlongs, but was beaten by seven yards amid intense excitement. Spot's seven yards' win provided the closest finish to date, nine yards in The Maid's year (1913) being the shortest distance between first and second previously.

The time, 3:36, was three seconds slower than last year, when the event was decided in 3:33, and 5¾ seconds slower than the record, 3:30¼, established in 1911, Spot's 2:19½ now standing as the best winning record in the big event. Wilkes Child went 2:24, so that there was reasonable basis for her solid backing. The class of horses competing aroused enthusiasm, and the finish was a contrast to the hollow victories of Lulu Boy and Delavan Chimes in previous years. Finally, this year's Thousand demonstrated the rapid forward strides that trotting is making throughout the commonwealth.

Spot is a bay pacing gelding, and was bred at Shepparton, being by Judge Huon from a dam not named. Judge Huon, owned by Mr. F. E. Colbath, of Sydney, was a bay horse foaled in 1891 by Huon (imp.) from Aristola (imp.). Huon was foaled in 1879, being by Almont Junior, by Almont from Polly, by Hamlin Patchen, a son of George M. Patchen. Aristola (imp.), the dam of Judge Huon, was by St. Claire from Lady Hubbard. Spot was sold early in his career for 11 guineas to Mr. Duncan McLeod, and later was disposed of for 13 guineas to Mr. A. McLennan, who in turn parted with the pacer for 40 guineas after being once successful. He was afterwards the property of the late Mr. Jack Davis, and is now owned by Mr. J. Trewin, of Ascot Vale, who last year refused £300 for him, and has had a distinguished racing career. On November 12, 1914, at Addington course, Christchurch, N. Z., he placed the Australasian two-mile pacing record at 4:35 2-5. He has been raced extensively in Victoria, New South Wales and New Zealand, with the following successive speed rates in his Richmond victories—2:26, 2:25¼, 2:26¾, 2:21¼, 2:22, 2:23, 2:21½ and 2:19½. —Australian Trotting Record.

Great Sire Justifies Mr. Harrison's Faith

Among the welcome visitors to San Francisco during the present week was the northwestern horseman Clinton A. Harrison, who made merely a few hours' stay in the city enroute to Southern California. Well on the way to complete recovery from the spinal trouble that sent him to the mat for the count some weeks ago, Mr. Harrison looks the picture of health and good spirits and loses no opportunity to do his part in disseminating the gospel of "Saint Thomas Equinus." The harness horse has no more steadfast friend in this or any other section of the world, and business matters are never too pressing for him to do a bit of evangelistic work in his behalf.

It was our first visit from Mr. Harrison since the Prince Ansel yearlings had gone through the world's record tables at Lexington and Louisville and picked out for their own the ones that looked best to them, and while highly elated over their showing and greatly pleased thereby, he took the record breaking performances largely as a matter of course, his implicit confidence in Prince Ansel having never wavered since the day in 1912 that he settled upon him as the best horse available for the purposes of Woodland Stock Farm, the realty and horseflesh holdings being turned over, immediately after their purchase by Mr. Harrison, to the corporation which has since conducted its affairs and with which he was in no way affiliated. A number of matrons purchased by Mr. Harrison individually were turned over to the corporation by him and, not being paid for by that body, were eventually returned to him and have since then been sold. It is a compliment to Mr. Harrison's ideas of values in blood lines and individuals that his selections of both sire and dams have been productive of most exceptional results. In the light of numerous recent events it is of interest to turn back for a moment and note Mr. Harrison's views of Prince Ansel and Woodland Stock Farm as expressed in December, 1912, the following paragraphs being excerpts from a letter written to this publication at that time:

A great deal of publicity has been given regarding the sale of the Woodland Stock Farm, and the futurity sire, Prince Ansel, together with fifty-three other standard bred mares, colts and fillies. Yourself and others have said many flattering and true sayings about Prince Ansel, the brood mares, and other animals purchased by myself. Therefore, I will take the liberty on behalf of the present owners of the Woodland Stock Farm, Inc., to publicly and sincerely thank you, and on behalf of myself I most truly thank you, and I will take this occasion to state that my acquaintance with the Dexter Prince tribe of horses dates back to the day of "Long John" Williams, and the beautiful black mare Princess Alice. "Long John" Williams was my first preceptor in the Dexter Prince school, and it was he who gave me my first ride behind a Dexter Prince when he gave me the great, beautiful mare Maggie, to drive in Golden Gate Park. Later on I saw Dexter Prince at Palo Alto and I saw Eleata 2:08, Fitz James, Charlie Ford, Royal Prince and most all the other stars of the Dexter Prince family.

I pinned my faith in them many years ago and I never wavered in my opinion that Dexter Prince was a greater sire than Electioneer, or any other horse ever in California. Now, this may, to some men, seem extravagant language, but time will tell. When the great young futurity winning colt, Prince Ansel, came along and showed the public what a good colt trotter he was, then the Dexter Princes were about all gone. Prince Ansel was not only a colt of early, game and extreme speed, but he is siring and has now a family of early, game and extreme speed, and if Prince Ansel had one-fourth of the chance Electioneer had, the story would now read, The Wondrous Sire, Prince Ansel.

As to myself. I don't see how I am entitled to any praise for selecting Lottie Ansel. I do plead guilty to reading nearly every horse journal and any man interested in the light harness horse should read the papers and study a little; therefore, any ordinary student could see that Prince Ansel himself, a great colt trotter; Lottie 2:15, a great trotter; Prince Lot 2:07¼, a fast horse. Why, how could Lottie Ansel help but be the greatest two-year-old in America, which she is today? I have looked at the Woodland Stock Farm, studied Prince Ansel, studied the blood lines of the mares now on that farm, and I again said Dexter Prince was a great sire and left the breeders of California a son who is greater than the sire, and I will predict that Prince Ansel will be the greatest sire of futurity winners ever bred or owned in California. Prince Ansel is a sire stallion.

Now I have disposed of the Woodland Stock Farm, Prince Ansel and all the stock, to an incorporated company, known as The Woodland Stock Farm, Inc. Mr. J. W. Considine is the president; S. Christenson, of San Francisco, and Wm. P. Reese, formerly of Texas, are the directors. Mr. Considine has appointed Harry Dowling as superintendent, trainer and manager of the farm, horses and track, and I will say to the breeders of California that they are to be congratulated on the fact that Prince Ansel stays in California.

It is the intention of Mr. Considine and his associates to give to Prince Ansel a prominent place in harness horse society. Every mare on the farm and every weanling, yearling and two-year-old are nominated, so that men who buy young stock from there can have the opportunity to win a futurity. The Woodland Stock Farm and its management has passed out of my hands, yet my best and most sincere wishes for its success are with every man interested in the ownership of it, and in every man employed on the farm.

Woodland Stock Farm, as it has existed for the last three years, is in all probability entering its last short lease of life, as most of the livestock has been dispersed and the farm itself will doubtless become county property in the not far distant future, but it has made a name for itself in trotting annals that will not soon be forgotten—and for the making of that name much of the praise is due to Mr. Harrison. It was he who selected Prince Ansel and the eastern mares that were brought to his court, mares whose matings with the Prince were productive among others of those two unrivaled yearling champion trotting fillies Anselila (1) 2:17½ and Verbena Ansel (1) 2:22, and in view of these achievements it becomes a matter of sincere regret that Mr. Harrison did not maintain his connection with Woodland Stock Farm, that it might have benefitted by his judgment and advice in other matters.

ADIOO GUY 2:10¾.

There is an old saying to the effect "That a blind pig will sometimes find an acorn," and it also occurs once in a while that the enthusiastic turf scribe, after witnessing a horse perform an impressive piece of foot-work, makes a prediction and lives long enough to see his forecast materialize. Early in the season, we had the pleasure of seeing the five-year-old stallion, Adioo Guy 2:10¾, perform, and at one point in particular he paced a piece of the road as fast as any wiggler we ever watched in a small track; he stepped from a rear position at the three-quarters around a good field and in less than an eighth of a mile opened up such a commanding lead as to be able to simply jog the balance of the way home. Shortly afterward we happened to encounter John H. Heyman, Sandusky, O., owner of the little stallion, and we then stated that, in our humble opinion, Adioo Guy would pace a good mile ring a little later on, if given the chance, in 2:05, and a part of it at a two-minute clip at least. While the stallion was not started at a Grand Circuit meeting, he was given one little work-out at Columbus when conditions were far from propitious and he turned the trick in 2:06 without being asked for all he had, which performance proved to us that we had not overestimated his speed, as the mile could have easily been a second faster had Harry Gray so desired. Adioo Guy 2:10¾ proved a most satisfactory campaigner, winning first honors at Detroit, two firsts at both Monroe, Mich., and North Randall Fair, a $1,000 classic at the Ohio State Fair, was second to Eel Direct 2:01¼ at Bowling Green and the next week beat the great gray wriggler from Canada when they met at Marion, O. When you stop to consider that he opened the year about as green as a gourd and practically all summer was up against seasoned campaigners, twice meeting Eel Direct which was a 2:04 pacer in 1914, and breaking even with him in results, it is but natural to conclude that Adioo Guy 2:10¾ is a pacer considerably above the average and should with another careful spring's training develop into a real crack.

Adioo Guy 2:10¾ is by Guy Dillon 2:21¼, sire of the sensational but ill-fated Guy Borden 2:07¼, winner of nine firsts and a second in ten starts in 1913 and by many Californians regarded as the greatest pacer which was ever bred along the Pacific coast. The dam of Adioo Guy 2:10¾ is the well known brood mare Adioo by Guy Wilkes 2:15¼, dam also of others, including Harry Dillon 2:10, a stallion sold to the Russians, but drowned as the result of a German torpedo while being exported. Adioo Guuy is also closely related to Adioo Dillon (2) 2:24¼, the dam of the fast trotter, Dillon Axworthy (2) 2:11¼, (3) 2:10¼, a futurity winner at two and three; his grandam was the famous $10,000 matron By By by Nutwood 2:18¾, which produced among others, the sire of Marie N. 2:08¼ and the dam of F. S. Whitney 2:09¾, etc., third dam Rapidan (dam of three, includuing Lockheart 2:08½, a 2:10 sire) by Dictator. This royally bred and fast young pacer is now in winter quarters at Sandusky, O., and will in the spring again be turned over to Harry Gray for a campaign and in all probability be nominated in some Grand Circuit events by Mr. Heyman.—American Sportsman.

TENNESSEEANS PROUD OF MY MAJOR DARE.

Californians will long remember with pleasure the visit of the Longview Farm horses to the Panama-Pacific International Exposition, and the award of the grand championship among saddle stallions to My Major Dare met with general approval not only here but in the many sections where he has longer been known. Especially proud of him are the Tennesseeans, as evidenced by the following letter to the Breeders' Gazette from S. M. Young of Smith county, that state:

"Tennesseeans were pleased to see on page 811 of your Nov. 4 issue the picture of the gaited saddle horse My Major Dare, champion in the breeding classes at the Panama-Pacific exposition. We claim his as "our hoss." He first saw the light of day in Smith Co., Tenn., was raised and handled by his breeders, Smith & Ward, New Middleton, and sold by them as a four-year-old at a price of $6,500, I believe. A few months later he passed into the hands of his present owner, Miss Lula Long, for a consideration of $10,000. It does not need to be remarked that he is a magnificent animal, and that this triumph at San Francisco is but the climax of a long series of successful exhibitions, including those at Fort Worth, Kansas City, St. Louis and the Chicago International.

"My Major Dare is sired by My Dare out of a mare by Electric, a son of Owsley's Red Squirrel. My Dare is a son of Chester Dare and a My Own dam. He is owned by Dr. W. W. Gray and is the sire of a large number of prizewinners, among them Gypsy Dare, the mare that Dr. Gray sold for $3,000. My Dare stamps his impress upon his get with more uniformity than any other sire I have ever known. He was never handled for the gaited rings; his showing achievements have been in the breeding and model classes where he has never suffered defeat. Among other notable awards which have been accorded him is the championship cup of the Tennessee State Fair. He has the unprecedented record of having shown with three of his get in 23 rings, each time with a different trio of colts, and never having failed to win first prize. It would be strange indeed if we did not feel both a state and local pride in this great horse and his progeny."

NOTES and NEWS

Colonel Jim Thompson of Sacramento made the trip east with the Todhunter and Woodland Stock Farm consignments to the Chicago sale.

◈◈◈

Tacoma promises horsemen a winter training plant ready for use the first of January, and is also in line for a spring meeting of some description, as well as some Fourth of July races.

◈◈◈

W. J. Lindsay of Santa Ana has recently purchased from Frank Thomas the pacer Buster by Zolock and will use him for matinee purposes, the gelding being a consistent 2:20 performer in amateur hands.

◈◈◈

Walnut Hall Farm will have a goodly representation of young things at the next sale at Madison Square Garden. Superintendent Harry Burgoyne and his assistants being occupied at present fitting about a hundred head for the trip to the auctions. They will find new owners without much delay.

◈◈◈

Lou Dillon's yearling filly Virginia Lou by The Harvester is pleasing her owner mightily in her home at Pembroke, Ontario. J. O'Kelly, is the happy man, and after breaking the lass double he hooked her to a bike a few times, very promptly brushing her an eighth at the trot in :20½.

◈◈◈

By his record of 2:06¼, made at Phoenix in a race, Bondalean becomes the second fastest three-year-old pacing colt of the season, and had Owner Charley Silva been at Phoenix to give the word for a time performance there is reason to believe he might have annexed the championship. Elmo Montgomery evidently had him figured about right a good many months ago.

◈◈◈

Most of the thoroughbreds recently in training at various nearby tracks have been shipped to Juarez, New Orleans or Tia Juana for the winter racing season, leaving only the youngsters or a few green ones in training here. Quite a number are at Tia Juana, where things will open with a rush on New Year's Day.

◈◈◈

A recent visitor to the Los Angeles track tells of seeing Jim Stewart drive a yearling Copa de Oro pacer an eighth in fifteen and a half seconds. The youngster is a full brother to the three-year-old champion Rayo de Oro (3) 2:07¼, being out of Jim's boss brood mare Easter D. (2) 2:13½ by Diablo 2:09¼. This Copa de Oro horse sure does put the pace into 'em.

◈◈◈

Secretary Knight of the A. T. R. A. announces that the Year Book for 1915 will be ready about January first and will be made up along lines similar to those of Volume Thirty. The Year Book is the court of last resort for authentic information concerning harness racing results and as the price has been reduced to $3, putting it within half a dollar of the cost of the unofficial publications, the new number should find a ready sale among horsemen.

◈◈◈

The Proof 2:10¾ has a nice representative to boost his stock in the east in the shape of the yearling filly by him out of Katalina 2:11¼, both filly and dam now owned by A. Albright Jr. of Prospect Farm, Newark, New Jersey. She has been broken only about two months, and ten days ago was trotting quarters handily in forty seconds. Mr. Albright describes her as having a beautiful way of going and being to all appearances a great prospect.

◈◈◈

Leon Wing, for some time a member of the Examiner staff of sporting writers and a gentleman of wide acquaintance and popularity among both harness and thoroughbred horsemen, has gone to Tia Juana to join forces with the Lower California Jockey Club as publicity manager and assistant racing secretary. He has a world of "well-wishers" in his new post and the L. C. J. C. will get a run for its money from his department.

◈◈◈

The Empire Racing Association, of which James Butler is the head, has won its suit against the National Fair and Exposition Association, breaking the latter's lease upon Empire City Park at Yonkers, New York. This means not only that no Grand Circuit meeting will be given there this year, but also that the runners will "rule the roost" there from now on. R. M. Williams and his associates "hoed a hard row" at Empire City, but met their obligations to horsemen in full this season, for which much credit is deserved.

◈◈◈

Patchen Wilkes Farm has recently purchased of J. J. W. Morrow, New Castle, Pa., the four-year-old mare Mary Derby by Charles Derby 2:20, dam Mary Burton (dam of Petress Burton (3) 2:09¾) by Warlock 2:24, grandam Josephine Knight (grandam of Peter Volo (4) 2:02 and Volga (2) 2:07¾) by Betterton. Charles Derby, her sire, foaled in 1885, has two 1915 foals at the Stokes establishment, both colts, one out of Georgie the Great by Peter the Great and the other out of Straight Forward by By Mac.

Helen Belle (2) 2:22¼, winner as a three-year-old of the Oregon futurity in 1915, trotted in the mud in 2:27, 2:28, was withdrawn from the Chicago sale by W. G. Durfee and was left at Pleasanton to be bred next spring to The Anvil 2:02¾, whose book has already attracted fifteen or twenty mares. The young lady should make a most excellent brood mare, as she is by Carlokin 2:07½ and out of Carolyn C. by Axtell (3) 2:12, grandam Expedience by Expeditor 2:15¾, great grandam Lurline by Princeps 536.

◈◈◈

There is a rumor making the rounds down east to the effect that T. W. Murphy will probably have the champion yearling filly Anselila 2:17½ in his stable next season. She is extensively staked both in that section and here on the coast, and without accident interfering should make a great futurity trotter. A picture of her recently published by the American Sportsman shows her to have grown into a good-sized lass of very pleasing proportions, wearing very little gear save the harness.

◈◈◈

The fast pacing mare Blanche 2:06¾, for some time the property of T. E. Pollock of Pinewood Farm, Arizona, has been purchased by her breeder and former owner, Clarence J. Berry of this city, and will be used from now on for breeding purposes. Mr. Berry has always had a warm spot in his heart for Blanche, as the half-sister to White Sox 2:05¾ and The Lark 2:09¼ was the lass to establish him as a "2:10 breeder." She should prove a very productive matron.

◈◈◈

The English government has been made the recipient of a valuable gift from Colonel Hall Walker M. P., in the shape of the latter's farm at Tully Kildare, and his training stables at Russley Parks Wiltshire, the horses involved including the great stake winners White Eagle and Royal Realm, as well as some famous matrons. The Colonel's gift is of million dollar proportions and will probably serve as the nucleus of the British government's entry into horse breeding on its own accord, after the fashion of other European countries.

◈◈◈

Our old friend Ed. Corrigan, who was in the cattle business in Colorado forty years ago and who subsequently became a famous racehorse man, is about to take up the breeding of thoroughbreds again. He has purchased in Canada the twelve-year-old mare Class, a daughter of Kingston and Blue Grass Belle and brought her to the United States for the purpose of breeding her in the spring to the best stallion available. He owned Class when she raced some years back. She is of the family of the celebrated Modesty with which he won the first American Derby.—Field and Farm.

◈◈◈

The grapevine telegraph has been circulating a story down east to the effect that Dick McMahon will take charge of Rodney MacKenzie's plant at Pleasanton, the thing having gotten started someway duraing the exposition race meeting. This is no election year, either, but these "roorbacks" do get born somehow and are much harder to kill. Richard and Rodney are great friends and it would not surprise folks here to see Dick come out and take charge, say about the thirty-first of February or as soon as the Imperial Valley begins importing skates and skis in car lots.

◈◈◈

Alhambra Prince (3) 2:27, grand champion trotting stallion at the recent P.-P. I. E. horse show, has been taken to Exposition Park at Los Angeles and has progressed in his training to a mile in 2:27 for owner Charles W. Winter of Alhambra. Mr. Winter is also developing a two-year-old colt by the Prince Alhambra Duke, and six weeks after taking him from the pasture sent him the route in 2:54 at the trot. For Alex Grant of Los Angeles, Mr. Winter is also handling a two-year-old filly by Escobado 2:13¼, dam Sona 2:16 by McKinney 2:11¼, and the lass is making speed nicely, having worked early in the week in 2:52 trotting.

◈◈◈

T. E. Pollock did not start his good three-year-old Lijero trotter, Pinewood, at the Arizona State Fair where he was entered, but will try and have him ready for a shy at fast company in 1917. The colt won a nice race at Albuquerque but was getting to be a bit hard to handle as a stud, so castration was on the program for him when the past season closed. The "concensus of opinion" last winter at Pleasanton before Ed Parker sold him was that castration would be a big help to this fellow, and that he was the making of a very fast trotter. No man in Arizona would appreciate a good horse more than Tom Pollock, and all his California friends wish him luck with Pinewood, and Pinewood Farm.

◈◈◈

Realization, one of the most popular and successful members of Longview Farm's stable of harness horses and a winner at many shows, contracted pneumonia while enroute home to Missouri from the recent National Horse Show and died shortly after unloading. Realization won the Waldorf cup at the Garden, with Revelation won the phaeton class, and was second in a number of other events. The loss is a severe one to Miss Long, who puts her horses in the "nearest and dearest friend" class, as well as to the world at large. The mistress of Longview has had unusually bad luck in shipping this season, having lost a valuable saddle animal on account of the visit of that portion of her stable to the P.-P. I. E.

Announcement has been made that Major P. P. Johnston of Lexington, who has for twenty-two years been president of the National Trotting Association, will not be a candidate for that office at the next election, in February.

◈◈◈

The ranks of stake candidates for the coming season were thinned a few days ago by the death of the five-year-old trotting mare Zobedah in the stable of Walter Traynor. She had worked the Lexington track in 2:05½ during the fall meeting and was a daughter of Zombro 2:11 and Erirange 2:21 (dam of Colorado Range (3) 2:08½, etc.) by Prodigal 2:16. She was bred at A. B. Coxe's Nawbeek Farm and at the time of her death was owned by the Pittsburgh horseman, Sam Pickering.

◈◈◈

Five thousand dollars has just been offered and refused for White Sox 2:05¼, winner of the big pacing stake at the exposition last spring. Five thousand dollars is a nice little price for a harness horse these days, but this girl looks quite capable of earning more than that by a good margin during the coming season, as she will be prepped for a swing down the big line. In fact, if a certain race can be arranged she stands a good show to win that amount in one bunch, as Mr. Berry offers to match her against Hal Boy for five thousand a side. The pair have met twice for big money and have a race each, so a match would attract a world of interest. Both would find plenty of support, and Californians would string their checks along with the Berry money.

◈◈◈

While harness horse records were broken well up into November the activities in that line have at last been brought to a temporary close. Not so, however, with the mild mannered bossy-cow, for whom there apparently is no "closed season," Lady Pontiac Johanna having last week set a new mark for a short time butter production, the flow of the "lacteal fluid" for the week having totalled 658 pounds, yielding 41.91 pounds of butter, surpassing the former figures by something over five pounds. We wouldn't mind owning a cow of this kind if we had someone to feed and water her, clean the stable, do the milking and churning and collect the money for us, even though we are not overly "strong" for butter. However, as Owner Oliver Cabana Jr. of Buffalo values her at a mere twenty thousand dollars we have decided to pass her up and worry along as usual with a can or so from the corner grocery until a really good cow comes on the market. There is really no money in these cheap sort of heifers, anyway.

◈◈◈

W. R. Murphy, who transferred the scene of his activities from Los Angeles to Santa Ana some months ago, is wintering a few horses in addition to his own and will have a stable to race at the fairs next season as well as in the matinees in his locality. Dr. H. J. Stevens owns the trotting gelding Doctor S. with whom Murphy has been a mile in 2:13 and whom he considers an excellent prospect as well as a nicely bred one, being by Carlokin 2:07¼ and out of a mare by Guide 2:16¼, sire of the dam of Castanada 2:09¾, etc. For E. D. Burge, president of the Orange County Club, Murphy is educating the three-year-old trotting filly Wanna Wilkes, a nice gaited lass of whom he entertains a very high opinion. She is by San Juan 2:22½ (a son of Nutwood Wilkes 2:16½) and out of a Seymour Wilkes 2:08½ dam, and while she has not yet been asked for much she has turned some nice quarters at a twenty gait. Another member of the stable that will probably be out among 'em next season is Mr. Murphy's own three-year-old trotter, Tommy Murphy, by Red McK. 43766, the youngster having already progressed to a mile in 2:17¾.

◈◈◈

Fire of an unknown origin joined forces with the Mee estate's wrecking crew Wednesday evening about eight o'clock, and within an hour the work of relegating the old Emeryville race track to Memoryville was practically completed, the blaze eating away practically all the old buildings which the wreckers had not yet reached. The conflagration started in the southwestern corner of the eighty-acre enclosure and by the time the fire department was on the scene and in action, with a line of hose extending for two or three blocks, the tinder-like structures were so evidently doomed that the firemen's work was confined entirely to preventing the spread of the flames to nearby residences of infinitely greater value. The costly club house and the great grandstand were dismantled some days ago and practically everything of value had been salvaged, so the loss is small. Ten acres of grass were burned over, much of the fence destroyed and Poverty Row, the haven of blasted hopes, with its stalls and shacks for the hard luck victims, rounded out its history in a spectacular manner. "Bone dry" and highly inflammable, the old losers' corner of the famous plant fell an easy prey to the all destroying element, the flames and their attendant column of dense smoke attracting attention from many points around the bay. Only a few weeks ago death claimed Tom Williams, and now the plant where for so long his word was supreme has been obliterated. Soon will come paved streets and concrete sidewalks, and then shortly will rise, over the ground where countless thousands have been won and lost and where some of the most famous battles of the American turf have been waged, will rise the stately residences of a "fashionable suburb." So passes the old order. Only Tanforan is left.

Tod Sloan, who has been abroad of late years and who was ordered deported from England not long ago, arrived in New York December 3 on the Adriatic. Tod states that he was sent out of Great Britain without a trial, but made no other comment concerning his case.

◈◈◈

Charles W. Williams, familiarly known to the horse world as the man who bred, trained and drove to their records, Allerton 2:09½ and Axtell (3) 2:12, and also established the first kite track at Independence, Iowa, is now strenuously engaged in evangelistic work in and about the scene where his earliest trotting horse fame was established. Various Iowa towns have turned out enthusiastic crowds this fall to welcome the evangelist where twenty-five years ago they cheered "the man from Independence" in some of his record-breaking feats with the two colts which he raised and developed, each later to become champion stallion of the world.—Western Horseman.

◈◈◈

C. W. Winter of Alhambra, who was about the best winning individual exhibitor in the standard bred classes at the exposition horse show, "came back" during the pigeon show for another quota of prizes, sending up six birds and receiving six awards, three firsts, two seconds and a third. Of four red rose wing Carneaux pigeons, one cock drew a first and another a second, while the hens were awarded a second and a third, respectively. Most pleasing of the awards, however, were the firsts for both cock and hen in the Flying Homer class, the pair sent up by Mr. Winter being probably the oldest brace of mated birds in the country. They were raised by their present owner at Alhambra and have been mates for nineteen years, which is a remarkable record. They are a wonderful pair and are still prolific, having raised three squabs last season and five the year before. Between Alhambra Prince and the pigeons, Mr. Winter has derived a great amount of pleasure and a bit of profit from his participation in the exposition's events.

◈◈◈

Julia M. (2) 2:13¾, her record made in the third heat of the junior pacing division of the Pleasanton futurity (a race which, by the way, she seemed amply capable of winning had it been raced "to a finish" on the old system) is the first performer to be credited to the seven-year-old stallion El Angelo 57039 by The Angelus 2:10¼, the latter horse being a son of Zombro 2:11 and the fast trotting mare Hazel Kinney 2:09¼ by McKinney 2:11¼. El Angelo was bred by T. W. Barstow of San Jose, passing eventually to D. W. Wallis of Los Banos and at present owned by Miller & Lux; his dam is Maud Jay C. by Nearest 2:22½ and out of Fanny Menlo by Menlo 2:12½, a son of Nutwood, Maud Jay C. being the dam of the trotter and speed sire Nearest McKinney 2:13¼. Through her dam Julia M. inherits a sturdy line of speed crosses, being out of Record Searcher by Searchlight 2:03¼, grandam Zeta Carter (dam of Chestnut Tom 2:17¼, etc.) by Director 2:17, third dam Lida W. 2:15¼ (dam of four, including Nutwood Wilkes 2:16½) by Nutwood 2:18¾, fourth dam Belle by Geo. M. Patchen Jr. 31, etc. This is certainly a husky combination of the families that have made California famous in the trotting world, and Julia M. will do to remember next season. She was trained and raced by Dave Allen of Newman and is still owned by her breeder, D. W. Wallis of Los Banos.

◈◈◈

George Swisher, who for many years was one of the well known and successful trainers of that section of the central west lying just east of the Mississippi and north of the Ohio, is wintering at his home at Provolt, Oregon, where he has a private training track, and is planning a trip into Canada for the early meetings of 1916. This season George raced through the Pacific northwest, his most consistent trotter being the bay mare Hallie B. by Hal B. 2:04½, dam Zircon by Vice Regent, whom he marked in 2:16¼ at Centralia. Hallie won one race and was seven times second, being the best of the unlucky band of trotters that had to eat Flora Dora Z.'s dust and call it good. A good three-year-old trotter in the stable is the colt Coos Bay which trotted 3-2 for George in this year's Oregon futurity, the time being 2:27 and 2:28 and the mud being somewhere between ankle- and knee-deep. This boy is a nice gaited trotter and a good bred one as well, being by McAlzo 2:17¼ (son of Zolock 2:05¼ and Zodell by Zombro 2:11) and out of Velma Z. 2:24¼, trial 2:12, by Zombro 2:11. The first time he was ever moved up he trotted a quarter at Salem in :37, and has made but two breaks in his career. Swisher also owns Bonnie June 2:24¼ by Zolock 2:05¼, dam by Woolsey, and some weeks ago purchased of the Woodland Stock Farm the pacing gelding Joseph Ansel (3) 2:12¾, whom he regards as the making of a very fast pacer if his front legs can be persuaded to stand the gaff. Later a move may be made to Spokane to complete the prep for the Canadian trip, and before long Mr. Swisher expects an addition to the stable in the shape of a horse he owns in his old home in Ohio—a five-year-old entire son of Nutwood Wilkes 2:16½ and Clifford Converse (3) 2:29¼ (to high wheels on a halfmile track) by Norwood Wilkes, Clifford Converse being the dam of Charley Patch 2:09¾. "Letters from home" convey the information that the horse is a nice chestnut fellow of the 1200 pound kind, with the best of feet and legs. He has just been broken and never trained for speed, but George expects to ship him out and take some samples of his quality.

Cresceus 2:02¼, one time king of American trotting stallions, is reported to be serving the land of his adoption, Russia, as a member of a team in the army's commissary department. "Sic transit gloria mundi," if the Review will kindly pardon our infringement of their copyright. It looks like the old fellow deserves a better fate, but we have very great doubts concerning the truth of the rumor. Russia has too many ordinary horses and too high a regard for good ones to make such a situation probable.

◈◈◈

A northwestern horseman who enjoys the advantages of having a comprehensive breeding establishment immediately adjacent to a thriving city is Alfred J. Boyle of Tacoma, whose one hundred and sixty acre farm lies within the corporate limits of the Puget Sound shipping center here mentioned. With an abundance of green feed and grain hay at his disposal Mr. Boyle finds breeding both pleasant and profitable and has assembled a nice band of trotters, headed by the Brook Nook Ranche stallion Burion 2:29 (sire of A. J. B. 2:18, etc.) by Alcone 6780, dam Belle (dam also of Pearl Fisher 2:18½) by Kisbar 2:27¾. The mares are mostly with foal to Burion and the former California speed sire, Almaden D. 2:16¼, and include such well bred matrons as Savonne Hal by Pilot Hal, dam the triple producer Savonne by Jay Bird 5060; Whit Hazel by Zolock 2:05¼, dam Carrie Mann by Jack Burr; Tacoma Lass by Doctor Bunnell 2:16¼, dam by Sunrise 2:19¾; Fuchsia Mack 2:27¼ by McKinney 2:11¼, dam by Gossiper 2:14¾; Black Bess by Del Norte 2:08; Lady Rozell by Romont, dam May Moon by Barondale 2:11¼; Almonette by Almaden D. 2:16¼, dam May Moon; Bon Hal by Bonaday 2:11¼, dam Savonne Hal, and Mildred's Last by Alto Express 2:22¼, dam Mildred (dam of Holly Brand 2:06¾, King Seal 2:09¼, etc.) by Coeur d'Alene 2:19½. In addition to these there are a number of excellently bred young things at the farm, so Mr. Boyle has plenty of material to work on.

TALKING OF PACERS.

While regretting that our act inevitably must give pain to certain editors who have no use in the pedigree of a trotter for the blood of horses that pace, it nevertheless is a duty to our readers to call attention to the interesting fact that Moko (who has two brothers with records of 2:03¼ and 2:10, pacing) is the sire of the dams of two of the eighteen yearling trotters that this season took records of 2:30 or better. Also that Baron Wilkes 2:18, sire of Moko, is the sire of the dam of a new 2:30 yearling, and that two leading daughters of Baron Wilkes, viewed as producers, are Extasy p. (2) 2:10½, and Rachel p. 2:08¼. Extasy is credited with six trotters, one of them Lord Dewey 2:03¾, with four sires added for good measure. Inasmuch as Rachel numbers among her progeny Great Spirit p. 2:20 (who is the dam of Native Spirit (2) 2:09¾, Sweet Spirit (3) 2:09½ and Worthy Spirit (2) 2:14¼, each by a different sire), it will be seen that her blood is breeding on in both the male and the female lines—the best test of a broodmare—and that her daughter, Great Spirit, is in the front rank of matrons, when early speed production is the standard.

Sweet Spirit, a granddaughter of Rachel, is now in the broodmare ranks, and it will be of interest to note whether or not the line of great broodmares, which began with Willie Wilkes (dam of Rachel), and has done so well for three generations, is to be equally prolific of speed in the fourth.

And do not forget that Nervolo Belle, the pacing mare with a public trial of 2:11, and that has produced two champion colt trotters in Peter Volo (4) 2:02 and Volga (2) 2:07¾, had on view at Lexington this fall a yearling son by Axworthy 2:15½, that showed a quarter in :34 at the trot, and for whom an offer of $5,000 was refused.—American Horse Breeder.

UNIVERSITY FARM SHEEP WIN MANY EXPOSITION PRIZES.

Like its steers, the fat wethers exhibited by the University of California at the recent livestock show at the Panama-Pacific International Exposition won every prize for which they were entered. In the sheep-breeding classes also the University Farm won many honors.

Championships were won by the University for grade Southdown wethers and for a pen of them, a championship for a Southdown lamb, and a championship for a pen of yearling Southdown wethers. The University's Southdown wether lambs won the first, second, third and fourth prizes. Its Southdown wether yearlings won first, second and third prizes, as did also the grade Southdown yearling wethers. First prizes were won also for a grade Cotswold wether lamb, for a pen of three Southdown wether lambs, and for a pen of grade Southdown wethers. Second and third prizes were won for yearling Southdown ewes, and second prizes for a yearling Hampshire ewe and for a cotswold lamb.

A carlot of lambs which had been used in a feeding experiment at the University Farm, being fed there about ninety days, received a fourth prize, and another carlot received a fifth prize.

These results are gratifying to the University as showing what excellent opportunities its students enjoy at the University Farm to become familiar with livestock breeding and feeding work of the best quality, and with fine representatives of various types of livestock.

MR. WHITTED AND THE POINT SYSTEM.

Down in the central west the point system has been the subject of a good deal of hot controversy during the months last passed, its foremost defender being Ivanhoe Whitted of Iowa, one of the real live wires of the harness racing industry in that section. Against all comers—and the attackers have been more numerous and more vehement than the defenders—Mr. Whitted has held his own right worthily, his latest brief for the defense having appeared in the following communication to the Spirit of the West:

Editor Spirit of the West:—I was very much interested in the two expressions of opinion anent the point system recently expressed in your paper, the one signed by J. J. M., the other from the pen of my esteemed friend, "Ole Oleson." I have enjoyed a personal friendship with both these gentlemen for many years and, knowing them to be thoroughly honest, have the utmost respect for their opinions, on the point system or any other question. The first named, as intimated in his letter, has raced horses practically all his life. I know he races on the square, or as nearly so as any man in the business today. If I were to make any suggestion at all, in regard to his position, it would be that the world is moving ahead, or somewhere, every day, and rapidly; and that we older heads who have been racing so long are liable to finish away back unless we score up with the rest. The old placing system, which he lauds above all others, was a good system—in its day. I have never a word against it, only that it belongs to the past. Its day is over. The racing world is about to spirit away from it. Something must take its place in the future, whether the point system, the three-heat plan, or some other, remains to be seen. For, as I have tried repeatedly to point out, the world does not revert to ancient orders and traditions. You and I, friend John, will have to get a move on. Unless we can manage to keep in touch with Change and Progress we will get the flag.

In his letter he declares: "Any man that is in favor of the point system has not raced much or else has wheels in his head." I cheerfully plead guilty to the "wheels." Most people have 'em, more or less. Wheels are a good thing to have, provided they are kept properly lubricated and free from the gum and rust of inaction and short-sightedness. It is the wheels that keep the machine moving. Like my friend I, too, have been in the "game" a long, long time, not quite forty years but crowding it closer than I like to think about. My own experience, however, has been mostly on the other side, the journalistic side, but it has meant bread and butter just the same. And I am anxious to have the point system tried out further, in an amended form, because I have in mind the future of the sport of harness racing and the continuation of the breeding of the standard bred horse. I try to look past the end of my nose and the considerations of today only. There never was a time since the first trotter appeared in public when the sport of harness racing had as much in the way of competition to contend with as it has today; never a time of so many counter attractions bidding for patronage. In any other line of human endeavor, whether business or pleasure, we refuse to be hidebound. We pride ourselves on our enterprise and pull some quick and sudden changes in adapting ourselves to shifting conditions and circumstances.

One reason a good many horsemen object to the point system is because under its workings it is impossible to lay up heats. Impossible to "save" a horse when the exigencies of the occasion seem to demand some such action. My friend says he can "Lay up two heats and then win if he has the speed." Sure! One can always win if one has the speed. But as a general thing if the winning speed is on tap there is not much laying up of heats. Nothing is impossible in this world, it has been asserted. It may be possible to lay up two heats and still win under the point system, but the man who lays up as many as two heats, under this plan of racing, with the expectation of coming to the front and winning, has a mighty lot of chances against it, and the best prospect in the world of finishing outside the money. After one has raced a heat or two he is compelled to keep on racing to save what has already been gained. To lay back in a field of any size, even for a single heat, piles up the total number of points at a rate that very soon sends one's chances of winning ballywest-and-crooked.

Attention is called to a certain race at Sioux City, in the course of which, by a bit of fool racing luck (always a possible contingent), the logical winner was left out in the cold and a non-heat winner got away with first money. Yes, those things happen occasionally, under the present reading of Rule 153, but not often enough to kick up a very big row over. Friend John asks: "Is there any sense racing horses that way?"

Well, under the old placing system, which he insists is the best ever, I have more than once watched a horse win two heats and then, through some idiotic bit of bad luck, a bad sendoff, punctured tire, lost shoe, or bit of unwise action on the part of the driver, get the flag and have to go to the stall unrewarded. It has happened hundreds of times, and I have no doubt my friend himself has been the victim more than once in his long career as a teamster of trotters. And yet he does not condemn that system because of an occasional failure to do full and complete justice to all concerned.

The fact is a perfect racing system has never been devised. That is only half of it. The other half is that it never will be devised. The point system, as I have repeatedly pointed out, has one lamentably weak place in its makeup. I have also pointed out how, by the simple process of changing a few words, the very thing our friend complains of can effectually be eliminated forever. We have laws against the crime of murder, but, in spite of the constant infliction of the severest penalties, murder is an everyday occurrence. We have laws against stealing, but men—some men—continue to steal. Not for a minute do we consider the idea of repealing the laws because they fail to do all that was expected of them.

I insist that the point system makes better racing. It makes cleaner racing and keener, livelier contests from the point of view of the grandstand and the man up there who has contributed his little old "four bits" to see, not a hippodrome, but a race. And that is the point of view which should be kept ever in mind by both horsemen and race officials. That is the point of view I have in mind when I ask for a continuation of the point system another two-year period with a change in the wording, as suggested in a previous article, of Rule 153.

The point system creates vastly more interest among horsemen themselves. Mingle with the crowd of race hangerson at the drawgate at any big meeting, the place, by the way, where there is more real heart interest than at any other place about the track. Every groom, every owner, driver, stable boy or stable attache of any sort or character, will have a score card and will be found watching the progress of the race with the liveliest kind of interest, figuring, always, the number of points won by this, that and the other horse, and speculating—literally, often—the possibility the various stable favorites have of finishing in the money and how high up. There is a vital, all-absorbing, soul-gripping interest discernible never to be seen or found when racing under any other system.

I am aware some horsemen will say I am advocating a system that is inimical to their own personal interests; that I am not in sympathy with horsemen and working against them. Not so, not for a holy minute. Only, I am looking into the future, or trying to. I can both see and appreciate their point of view. If I were campaigning a string of trotters I might be found fighting the point system and standing for some plan in which I would not have to race so hard for the money. But if we are to keep the sport of harness racing alive and flourishing in the future and enable us to meet the keenest of competition from a multitude of counter attractions, we will have to conduct it under rules and regulations that will keep it out of the hippodrome class. The goose is still in a fairly thrifty condition and laying the golden eggs. We will have to be almighty careful of the same goose. It is entirely possible to crowd her into laying an extra egg or two for present needs at the risk of crippling her for future usefulness. By all means let us keep her in training.

My hat is off to "Ole Oleson" for his firm stand for the point system. He is one of the old guard. In addition to being a lover of the sport he is an all-round supporter, financial and otherwise. For many years he has been secretary of a prominent racing circuit in the western part of the state. And for still more years he has been a breeder, racing his own stock, and if this point system were the heinous thing that some few people would have us believe it is a singular thing that our friend "Ole" has not got wise to it.

Mr. Editor, some weeks ago your paper published a sort of "round robin," signed by a number of trainers and race drivers, in the course of which they expressed themselves in unmistakable terms concerning the merits and otherwise of the point system. They intimated that in the future meetings favoring that particular system of racing might not be favored with their presence and co-operation. Personally, I am glad the boys spoke out in meeting. Confession is said to be good for the soul, and maybe in this way they managed to get a bit of it out of their own systems as well as to hand a package to the point system. It was all right. We want every man to say his say before legislation, instead of waiting until after it is all over. Deliver us from the grouch that sulks in his tent with not a word to say until legislation has been enacted and then comes to the front with his exasperating bawl of: "Now see what you went and done!"

I am not in the least worried over that "round robin," or that any of the good fellows whose names are attached are going to go off with a back stall and do anything to hurt their own interests. They are all racing for the money. They have to have it in their business. And they get it wherever it is hung up in the most attractive wads and, point system or no point system, they are going to race for it. They know, too, that the process of evolution, the climbing to higher ideals and better things, is a slow and grievous one. It demands lots of slow miles, lots of training, lots of wind. There is not a man in the bunch that is going to sulk in his stall if this point system is given another two-year trial in an amended form. Not on your life. Their interests and the interests of race officials and breeders are identical; and they know that only team work and perfect harmony will serve to continue the best of all sports on a high, clean level, and enable it to hold a prominent place amid the world of country attractions.

California horsemen, aside from those who make the summer trip across the divide to race on the tracks of the Grand and Great Western circuits, as well as on those of the minor organizations of the Mississippi Valley, have had less to do with the point system than their eastern friends, as in this section it has been tried but little, the prevailing system at present being the three heat plan, with every heat a race. This method, while not perfect, presents much more pleasing conditions for both horsemen and public than does the point system, in our estimation, its principal shortcoming being that the public does not always go home convinced that it has really seen a horse win a horse race. How much more confusing, also exasperating, must it be to the laity to see a five heat affair in which the "winner" never won a heat! Perhaps a modification of both plans would add to their attractiveness both to horsemen and spectators, but as remarked above there never was and perhaps never will be a truly satisfactory system of racing.

The argument regarding the interest created at the drawgate by point system racing may be passed by without consideration. Not a man at the drawgate has paid a cent to see the races, and where the "vital, all-absorbing, soul-gripping interest" should be displayed is in the grandstand. No matter how well conditions work out among the horsemen, the "casual observer," who goes to but a few races a year, should not be compelled to come to the track with a tablet, two extra lead pencils, a book of rules, a sextant, a set of logarithms and a Philadelphia lawyer to be able to determine where the horses stand at the end of each heat, and the race.

THE PERCHERON-TROTTER CROSS.

"The late C. A. DeGraff demonstrated the great value and selling quality of the trotter-Percheron cross, and the other way around it is equally good. Trotting-bred mares that fail to produce marketable racing speed may be more profitably bred to a Percheron. Their produuce from a Percheron will sell on the average for about double the price of their produce from a trotter. Concrete exemplary proof of this is plentiful," writes the well known Minnesota horseman M. T. Grattan, to the Breeders' Gazette.

"At the age of 26 Easter, by Trample and out of Magic by King Herod, bred to various sires had failed to produce a race nag, while her full-sister Tareta had 6 in the list and producing daughters. So Easter at 26 was bred to a Percheron. The produce, now a four-year-old, is a model horse that the buyers all clamor for—400 pounds heavier than his dam, with splendid feet, big, flat, clean bone, blocky, symmetrical conformation, on short legs, with a beautiful head, eye and ear and good mane and tail. He is a powerful, steady worker, a fine lady's saddle and carriage horse, and is worth practically as much as all of his dam's previous produce by various trotting sires. He is mated with a gelding similarly bred, by a Percheron sire out of a trotting dam, that brought near the top price at a clearance of a large farmer moving to California. Buyers on the street have often begged for a price on this pair without success.

"Now for an instance or two of the other way around. County Commissioner John Thacher, Fillmore Co., Minn., led his grade Percheron mare into the barn where John Broadwater had his draft stallion to which the mare had been bred several times unsuccessfully. Mr. Broadwater declined to breed her again but offered to wager the amount of the stud fee that bred to Lodaller 2:19¼, sire of Princess Welcome 2:07¾, she would conceive at the first service. It turned out so and the produce, several hundred pounds heavier than the dam, is a horse of such marked superiority on a load or on the road and individually that Mr. Thacher says: 'He is the best horse I ever owned and I never drive him away from home but that some one tries to buy him. It would take $500 to get him.'

"The late Andrew Wimmber had a grade Percheron mare that quit breeding to draft sires and he turned her to Lodaller once. The resulting produce weighed over 1,400 pounds at 3 years and sold for $210 at the farm.

"There is of course a reason why the trotter and Percheron blood mingles so kindly. Might it not be because each of them has so largely an infusion of the Arab in its composition? The reunion of this strain after long separation makes it dominant for beauty, soundness, good disposition and adaptability to almost any job but racing."

The Exponent 2:11¾, foaled in 1904, leads all the members of the Bingen and Electioneer families as a speed sire for his age, which is a most enviable position for a horse to occupy. California is well provided with means of access to his blood through The Proof 2:10¾, owned by Keefer & Spencer and already proven to be a sire, and the younger stallions owned by Frank Turner of Santa Rosa, the latter mentioned youngsters having been premium winners at the P.-P. I. E.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE PACIFIC SALMON.

[Concluded from last week.]

King salmon, or chinook, are the great commercial fish of the west and the largest in size of the salmon, some specimens in Alaskan waters going to 100 pounds in weight. He is also known as the Quinnat salmon, King salmon, California salmon, Tyee salmon and Columbia River salmon; and it may be added that there are connected with each of the five fish of this species a string of terms, Indian and otherwise, of jaw-breaking proclivities; in fact, travel where you will along the western coast, you will constantly come across some other name for them. Then, too, individual members of the family are confused, one with another,—no two persons seem to have the same opinion or name for one fish or for any of the five. The best means of identifying the different specimens is by the rays of the anal fin; by the branchiostegal rays; and the gill rakers. Coloration and shape are often most unreliable things to go by in identifying the different members, for there is a liability to promiscuous changeability. The chinook salmon is listed by Jordan as having about 16 anal rays, 15 to 19 branchiostegals, 23 gill-rakers on the anterior gill-arch, and 140 to 185 pyloric coeca.

Second the list of the salmon comes the Blueback salmon (Oncorhynchus nerka), also known as the Sockeye, Red Salmon, Sukkegh, Redfish and Nerka. The blueback is widely scattered and the abundance of them should be a fact noted among many others. It is Alaska's prime canning fish; a fine-flavored specimen, forming a table dainty that is only excelled by the valuable chinook. According to Jordan it has about 14 developed anal rays, 14 branchiostegals and 75 to 95 pyloric coeca. The gill rakers are most numerous in this individual, numbering something like 39. Of the blueback it has been stated that "in the spring its form is plumply rounded, and the color is a clear bright blue above, silvery below, and everywhere immaculate. Young fishes often show a few round spots, which disappear when they enter the sea. Fall specimens in the lakes are bright crimson in color, the head clear olive-green, and they become in a high degree hook-nosed and slab-sided, and bear little resemblance to the spring run. Young spawning male grilse follow the changes which take place in the adult, although often not more than half a pound in weight. These little fishes often appear in mountain likes, but whether they are landlocked or have come up from the sea is still uncertain. These dwarf forms are called kokos by the Indians and benimasu in Japan, for the sub-species Oncorhynchus nerka kennerlyi. The flesh in this species is firmer than that of any other and very red, of good flavor, though drier and less rich than the king-salmon." The present writer wishes to make note of the fact that these degraded individuals, inland in habitant, are found in Idaho, Washington and Oregon, and northward also in British Columbian lakes. Having spawned, the mature individuals die, following the leveling rule that Nature has laid.

Third on the list of these salmon comes the Silver salmon (Oncorhynchus kisutch), also known as the Hoopid, Coho salmon, Skowitz, and Whitefish. As a commercial fish it has third place, though the flesh is not overly well flavored, lacking in rich red color and the delicious oils. While the blueback salmon has a weight of five pounds in the average to its credit, the silver salmon is better, the weight being from six to eight pounds. According to Jordan it has 13 developed rays in the anal, 13 branchiostegals, 23 gill-rakers and 45 to 80 pyloric coeca. The scales on this salmon are thin and all except those of the lateral line readily fall off. The feature distinguishes the species readily from the red salmon." The silver salmon is silver and green; the green noted above, with a liability to a few black spottings. Despite its lack of the finer points in flavor, as a food fish, over two million pounds were brought in at Seattle alone in the year 1911. It should be noted that the silver salmon possesses whitish flesh as different from the other salmon.

Fourth on the list, and fourth in commercial value is the Humpback salmon (Oncorhynchus gorbuscha), also known as the Pink salmon, Holia, Haddah, and Hone. This salmon has to its credit a wide range of distribution, reaching from California to the coast of Kamschatka, to Japan, and northward. This salmon is by far the smallest of them, the average being from three to a possible six pounds in weight. According to David Starr Jordan, "it has usually 15 anal rays, 12 branchiostegals, 28 gill-rakers, and about 180 pyloric coeca. Its scales are much smaller than in any other salmon, there being 180 to 240 in the lateral line." The humpback salmon is bluish in coloration as to back, and silvery below. When on the verge of the spawning season this salmon asquires a hump at the shoulders from which is derived the name it bears. The food value of this salmon is questionable indeed and time was when it was absolutely disregarded by the canneries; but today there is a great impetus in this line. In the season of 1912 and 1913 over ten and one-half millions pounds of this fish were packed in Seattle. This proves that despite the fact that it has little commercial value, yet it is being made excellent use of in the canning business.

Fifth and last in this category of the Pacific salmon is the Dog-salmon, scientifically known as Oncorhyuchus keta. This fish is also nown as the Calico salmon, Lekai, Qualoh, Heyo, and Sake, after the Japanese. This fish is well known in Jananese rivers. It has a wide range of distribution, reaching from Californian waters northward, then southward into Asian territory. Also note the fact that its bulk is more appreciable than the last two named fish, and from eight to twelve pounds would take in this fish's capacity in weight. The dog salmon, however, is the most inferior of the five salmon as food and not until late years have the canneries sought, in the least, to concentrate on this specimen. In 1912, however, as high as seven and one-half million pounds were tinned in Seattle, for distribution throughout the markets of the world. Of this salmon Jordan, the highest authority on fishes in the world, has said: "It has about 14 anal rays, 14 branchiostegals, 24 gill-rakers and 140 to 185 pyloric coeca. In the spring it is dirty silvery, immaculate, or sprinkled with small black specks, the fins dusky, the sides with faint traces of gridiron-like bars. In the fall the male is brick-red or blackish, and its jaws are greatly distorted. The pale flesh is well flavored when fresh, but pale and mushy in texture and muddy in taste when canned. It is said to take salt well and great numbers of salt dog-salmon are consumed in Japan."

Information as to the habits and habitat of the various salmon individuals of the Pacific have not yet been decided upon, nor can there be any certainty as to the accuracy of many well-known investigations that have been laid down as facts. Jordan asserts that "there is no positive evidence that any salmon of the Pacific survives the spawning season." Governmental investigations tend to lay a doubt as to whether all of the salmon die after casting their spawn, and it has lately been held that many return to the ocean and live. Nor do they go to any certain limit in distance up the freshwater streams. Some have said they go at least a thousand miles upstream, despite obstacles. As a matter of fact they ascend till they reasonably cannot go any farther and then they, in natural sequence, spawn. It is commonly believed that these fishes spawn entirely in fresh water, but there has as yet been no proof that they do not also spawn in the ocean, or in salt water, to be more exact. From the time they become large enough to leave their fresh water home, to enter the ocean, till the time they return, no one knows exactly where they keep themselves. Salmon may be found around St. Lawrence Island, Alaska, the year round. It has also been found that a great number of the salmon do not go any farther up the rivers than three or four miles, and it may be said that these fish return to the salt water quite unharmed. But there is reason for this, inasmuch as they have incurred no gashes on their bodies, upon the rocks, wherein the freshwater parasites could gain a foothold. Logically speaking, it is the parasites that prove the undoing of the fish, not a set, immutable law on the part of Nature, making death the final outcome of reproduction and parenthood. This is what latter-day investigations tend to prove. Revolutionizing processes of going Nature one better are also under way. The government authorities have tried by a number of measures to help the fish in their spawning by stripping them of their eggs as they go upstream; and it is said that in the future a successful system will be formulated whereby the fish may be made to survive. Quinnat salmon are now successfully raised in many inland freshwater lakes, and in the eastern United States freshwater chinook salmon are an institution—large specimens are annually caught by the piscatorial element. The most notable of these successful attempts may be found in Lake Sunapee, New Hampshire, where the Pacific chinook thrives well with absolutely no hint of degradation, or the decay that is peculiar to this fish at the close of the spawning season. It is also a noteworthy fact that the chinook salmon has been introduced into European streams and lakes with what may be said to be eminent success. Time will prove whether or no the freshwater proposition is fallacious and disastrous to the life of other fish, or if the salmon may not be weened away from its age-old habits of ascending streams to a more placid, conservative system of spawning in lakes. In Massachusetts there has been a successful transplanting of Pacific salmon. Lake Quinsigamond furnished the first experimental try-out in that state. The lake is deep and exceptionally cold; food is plentifully supplied by the numerous and highly reproductive landlocked smelts. The outlet of the lake was carefully screened and ten thousand six-inch fish were planted there in 1912; twenty months later, in July, 1914, anglers caught over six hundred salmon in that lake, weighing from one to five pounds each. These successful results caused the commissioners to stock five other lakes in November, 1914, and this year (1915) some 100,000 of the chinook salmon's eggs were hatched and planted. At first it was thought that the pickerel and perch of these lakes would wipe out the young salmon before they had attained a likely size, but strangely enough the best of results have been noted. George H. Graham, of the Massachusetts Fish Commission, says regarding the work of transplanting these salmon:

"Since 1873 the Government has been experimenting with these fish, but not until they were introduced into Lake Sunapee was the work successful. Millions of them have been planted with very little success. It is possible that the many years of failure by the Government were due principally to two causes: first, the fish were planted in lakes and ponds that were not properly screened and, second, most of these fish were planted when very small. Year after year the results were the same and instead of going to the bottom of the trouble the same plan was carried out by the government. Small fish were planted in the lakes without screens and the fish allowed to run downstream, never to return. After these salmon were well established in Lake Sunapee the government made a faint attempt to study their habits when raised in fresh water, but these efforts were never finished and they know very little today as to the habits of these beautiful fish when confined to fresh water. They do not know whether or not these fish will spawn, or whether they spawn in the fall or in the spring. It is known that in France (the salmon by the way have been introduced to European waters) they have been kept in confinement for many generations and that they do reproduce. After going to the expense of getting them well established in Lake Sunapee it would seem that the government should endeavor to get all the information possible regarding them."

The proposition of stocking fresh water lakes with such salmon is surely a mighty big one, with a number of possibilities to its credit, the successful outcome of which promiscuous transplantings should give more sport to the fishermen yearly than has hitherto been realized.

AN OLD ENGLISH DECOY.

On the Duke of Devonshire's beautiful Hardwick estate, situated on the borders of Derbyshire and Nottinghamshire, is to be seen a most interesting relic of old wildfowling days—of those "good old days" when wildfowl of many kinds were to be met with in great numbers, not only amid the wild places bordering the sea but also far inland. In the Midland Counties, where duck were by no means so plentiful as in the low-lying fen-country, few of the old-fashioned duck decoys existed; but here and there, in secluded parts of the countryside, it was found possible to construct one of these ingenious contrivances for the catching of duck that would pay its way, even if it did not realize a large profit.

The example at Hardwick is built on the "cage" or trap principle, and, though it has not been in working order for many long years, sufficient still remains to enable the sportsman to form an idea of the construction and the working of the decoy, and a visit to this interesting spot is at once delightful and instructive.

This old decoy is situated amidst most beautiful surroundings. Overlooked by the romantic ruins of Old Hardwick Hall, it nestles in a small wood at the foot of a delightful stretch of rolling parkland. Adjoining the wood is a small but picturesque lake, where the writer has spent many happy days fishing for "tawny-finned" pike, dark-striped perch, and red-finned roach. Even in these times, when the neighboring countryside is scarred by the tall, black, smoke-belching chimneys of many collieries, quite a large number of wildfowl of different species come to this lake and several other smaller ponds in the park, especially during the winter; but, of course, in nothing like the numbers which came hither in the old days. Although within easy reach of a dozen colliery villages, Hardwick Park, with its many fine old oaks, hoary with age, its quiet and secluded plantations, and its numerous sheets of water, proves most attractive to wild life. Only a few months ago (during February of this year) a fine dog-otter was discovered in a rabbit-trap by one of his Grace's keepers near one of the trout-ponds, and during the past wild-duck season the writer saw at least three species of duck shot during one short afternoon, viz., mallard, teal, and tufted duck. The scenery hereabouts is delightful, and would need a more competent pen than mine to describe it adequately. Many times have I set out with pocket-book and pencil to record my impressions of this charming spot, but have found such a number of interesting things to see that I have rambled about the beautiful park all the summer day and returned home without having written down a single word. In such propitious surroundings was built the duck decoy, and doubtless at one time it answered its purpose well.

The pretty trout-book, which supplies the lake, also provided the decoy-pond with water. Much wisdom and ingenuity was displayed in laying out the site. After the pond had been made, high banks were raised around it, and well planted with larches, firs, and evergreens. Everything was done to keep the decoy quiet and secluded, for quietude is most essential if one wants to attract wildfowl. In the center of the pond was an island, on which the trap

was constructed. This trap was most carefully screened by trees and bushes of evergreens, together with other "cover," planted with the intention of hiding the wire-covered channel and of lulling the wary wildfowl into fancied security. Here, on the island, in the open spaces between foliaged trees, the birds were free from all outside disturbances, and could sit and preen themselves and doze away the hours between feeding times unmolested. In course of time they would readily take the corn or other foodstuff laid down inside the trap for them, swimming in and out of the open "cage" without suspicion.

The trap itself was simply a channel cut through the small island some eight feet wide by two feet deep. Over this channel were curved iron supports about six feet high, over which wire netting was stretched, and at each end of the "cage" was a trap-door, operated by means of a windlass and a wire rope running over pulleys fixed on the bed of the pond. These trap-doors were worked from a hut built in the bank of the pond.

We can readily imagine what would happen. The wildfowl, coming to this secluded hollow amid the trees, would learn to take the food scattered within the trap, the sight of their tame fellows—several semi-domesticated ducks being kept on the water to act as decoys—greedily feeding in such gloriously quiet surroundings being all that was required to break their natural wariness. When at last—probably after days of patient watching and waiting—there was a sufficient number of wild birds within the trap to warrant him making a haul, the decoyman would hasten to lower the trap doors and thus cut off all escape for the unsuspecting fowl. All he had to do then was to cross the water by a narrow plank bridge, enter the trap by the side door provided for that purpose, and secure the wildly fluttering creatures.

Although many years have passed since the decoy was last worked, there are still living in the neighborhood several old keepers who remember good hauls of wildfowl being made there. A few days ago the writer was conversing with an old man who at one time worked the decoy. "The last time I lowered t' traps," he said, "I made a tidy 'aul, considerin' 'twas back end o' season. I got thirty-six mallard an' duck that mornin'." I was also informed that on one of the last occasions on which the decoy was worked the "bag" consisted of nearly two hundred old rooks—a strange bag, truly, for a duck decoy! The old decoyman also told me that it was no joke entering the trap on a bitter cold winter's morning to take out the captured ducks. The fowl, he said, would fly frantically about, throwing themselves against the netting and falling back into the water in the shallow channel with much splashing. In a very few minutes the decoyman would be wet through to the skin—mightily unpleasant when snow was in the air and a shrewd wind was "keening" through the trees surrounding the decoy.

Today the decoy-trap is in ruins, the netting eaten away by time and weather. The curved irons still stand naked and gaunt between the trees. The narrow gangway over which the decoyman traveled to collect the spoils long ago disappeared, only the lichen-covered supports now standing. The pond itself is but an oozy shallow, where great beds of tall bullrushes and sedges grow profusely. Here and there a pool of stagnant water gleams, and coots, waterhens, and occasionally a pair of wild ducks nest unmolested amidst the thick cover of reeds. The last time the writer visited the site he disturbed a long-legged heron from his foraging along the margin of the brook running through the decoy, and was also surprised to observe Reynard sneaking away from the reed-cover. The red-brown fellow was evidently after the brace of teal which a moment after rose with much bustling of wings from a tuft of sedges.

The huts or sight-houses (there are two of these, situated at opposite ends of the trap), being of stone, are fairly well preserved, although the doors have fallen from their rusted hinges, and a thick deposit of dead leaves plainly tells that many years have passed since the decoy was used. The windlasses, used for raising and lowering the trap-doors, still remain, the wheels encrusted thickly with rust. Despite the decay into which it has fallen, however, there is still much to interest the sportsman, even though what was at one time a thriving and prosperous duck decoy is now but an abode of solitude—a sanctuary for the stray duck.

To the sportsman and the nature-lover there is something very attractive about a disused duck decoy. It is a link with the past—with the "good old days" when wildfowl swarmed in legions about the countryside. It is a relic of an old and not unsporting method of catching the wary wild duck—surely the warmest of all sporting birds. Some of these old decoys were run merely as a business venture, whilst others were laid down more for sport, or to supply country houses with birds for the table. The example at Hardwick Hall, I am informed, was specially constructed to supply the larder with wildfowl during the season, and at one time was very successful.—Arthur Sharp, in the British Sportsman.

———o———

S. J. Williams and Jerome DeBee tied for first place and high gun prize in the Thanksgiving Day shoot conducted by the Utica Field and Gun Club. Both men shot Nitro Club shells and made scores of 101x105. Mr. DeBee also won the special shoot for the turkey and the handicap merchandise event, missing but one of his twenty targets.

THE INTERSTATE ASSOCIATION'S ANNUAL MEETING.

The annual meeting of the stockholders of The Interstate Association For The Encouragement of Trapshooting was held at the Association's office with The Corporation Trust Company, 15 Exchange Place, Jersey City, New Jersey, on Thursday, December 2, at 10 o'clock in the forenoon.

The roll-call showed the following members represented in person:

United Lead Company by Evans McCarty; Remington Arms-Union Metallic Cartridge Company by A. F. Hebard, T. A. Marshall and J. Leonard Clark; E. I. du Pont de Nemours & Company by T. E. Doremus and L. J. Squier; Winchester Repeating Arms Company by F. G. Drew; The Hunter Arms Company, Inc., by T. H. Keller, Jr.; Parker Brothers by W. F. Parker; The Chamberlin Cartridge & Target Company by Paul North; American Powder Mills by Murray Ballou; Hercules Powder Company by J. T. Skelly and Edward Banks; The Western Cartridge Company by H. E. Winans; The United States Cartridge Company by C. R. Babson and O. R. Dickey.

The Lefever Arms Company, the Selby Smelting and Lead Company and the Ithaca Gun Company were represented by proxy.

Thomas D. Richter and J. D. Dando, of "Sporting Life," and H. S. Rosenthal, of "Sportsmen's Review," honorary members of the Association, were also present, as was John H. Turner, Resident Director, E. Reed Shaner, Secretary, and Elmer E. Shaner, Treasurer of the Association.

Messrs. J. S. Fanning, H. A. Keller, Neaf Apgar, H. E. Poston and T. L. Briggs were present by invitation.

The secretary presented and read a copy of the notice of the meeting, together with proof of the due mailing thereof to each stockholder of the Association at least two weeks before the meeting, as required by the by-laws.

The transfer-book and stock-book of the Association were produced and remained during the meeting open to inspection.

Upon motion, duly made and seconded, the minutes of the last meeting were approved.

Messrs. Thos. D. Richter and Henry S. Rosenthal (neither of them being a candidate for the office of Director) were appointed inspectors of election and duly sworn.

The meeting then proceeded to the election of the Directors by ballot in accordance with the by-laws.

The reports of the President, the Secretary, the Treasurer and the Manager for the past year were presented, read and ordered to be filed.

The polls having remained open the period prescribed by statute, were ordered closed and the inspectors presented their report in writing, showing the following persons, stockholders of the Association, had received the greatest number of votes:

P. D. Beresford and J. R. Wettstein of the United Lead Company; A. F. Hebard, J. Leonard Clark and T. A. Marshall of the Remington Arms-Union Metallic Cartridge Company; T. E. Doremus, C. A. Haight and L. J. Squier of the E. I. du Pont de Nemours & Company; J. T. Skelly and Edward Banks of the Hercules Powder Company; T. H. Keller, Jr., of the Hunter Arms Company, Inc.; F. G. Drew, H. S. Leonard and W. R. Clark of the Winchester Repeating Arms Company; W. E. Parker of Parker Brothers; C. R. Babson and O. R. Dickey of the United States Cartridge Company; W. E. Keplinger and T. H. Keller of the Peters Cartridge Company; Paul North and J. H. Webster of the Chamberlin Cartridge and Target Company; A. H. Durston of the Lefever Arms Company; F. W. Olin and A. J. Norcom of the Western Cartridge Company; Murray Ballou and E. B. Drake of the American Powder Mills; W. B. Stadfeld of the Selby Smelting & Lead Company; George Livermore of the Ithaca Gun Company; John R. Turner and Elmer E. Shaner.

The chairman thereupon declared that the above named persons were duly elected directors of the Association.

Upon motion, duly made and seconded, the United Lead Company's resignation from membership was accepted.

Upon motion, duly made and seconded, the Black Products Company of Chicago was elected to membership and "The Sporting News" and "Sporting Goods Dealer," of St. Louis, and the "American Shooter" of Baltimore were elected to honorary press membership.

Upon motion, duly made and seconded, a meeting of the new Board of Directors for the election of officers, etc., was directed to be held at 1 p. m. this day.

No further business coming before the meeting, upon motion, duly made and seconded, the same adjourned.

The Directors' Meeting.

The meeting of the Board of Directors was held at 1 p. m. The meeting was called to order with Mr. F. G. Drew acting as chairman and E. Reed Shaner acting as secretary.

The following officers were elected to serve during the ensuing year: President, T. E. Doremus; vice-president, C. R. Babson; secretary, E. Reed Shaner; treasurer-manager, Elmer E. Shaner.

The minutes of the Directors' meetings held December 3 and 4, 1914, at Jersey City, and August 18, 1915, at Chicago, Illinois, and those of the several mail votes taken during the year, were duly approved.

By special permission, Mr. C. T. Summerson, of New York, addressed the meeting and requested the Association to interest itself in a gun club he was forming and which will have shooting grounds in Van Cortlandt Park, New York City. It was explained to Mr. Summerson that the Association, as an organization, could not interest itself in the proposition and that the proper way to handle the matter would be to take it up with the members of the Association as individual concerns.

The Tournament Committee presented a plan covering a change in the distribution of that part of the Registered Tournament Fund allotted to Registered State Tournaments. The matter was discussed at length and, by resolution, adopted. Briefly outlined, the plan calls for the forty-eight states to be placed in four classes, namely, A, B, C and D, and for the Association's contributions to State Tournaments to be made in accordance with this classification. Each State Tournament in Class A will receive $250; each State Tournament in Class B will receive $225; each State Tournament in Class C will receive $200; each State Tournament in Class D will receive $150.

By resolution, it was decided to set aside $2,000 of the Registered Tournament Fund of 1916 to be expended for trophies to be given to all new gun clubs, or re-organized gun clubs which have not been shooting for twelve months prior to the re-organization, which have affiliated themselves with their respective State Associations.

By resolution, it was decided to continue in 1916 the same general Registered Tournament policy as was in force in 1915. By this ruling, with the exception of State Tournaments, Leagues of Gun Clubs and Special Organizations, all applications to hold Registered Tournaments carrying requests for contributions must be made on or before February 15, and no application will be passed upon before said date.

By resolution, it was decided to print in booklet form the official averages of 1915, the booklet to contain a brief digest of 1915 records, Grand American and Subsidiary Handicap data, and other matter of interest to the trapshooting fraternity in general. This booklet will be distributed gratis to gun clubs holding Registered Tournaments and to other interested parties.

By resolution, it was decided to present a trophy to the winner of the High Amateur Average of 1915.

By resolution, it was decided to allow women to compete at future Grand American Trapshooting Tournaments.

Upon motion, duly made and seconded, the Directors' meeting adjourned at 4:45 p. m., to meet the following day at 10 a. m., at the Hotel Astor, New York City.

The adjourned meeting of the Directors was called to order at 10:40 a. m., December 3, with President Doremus in the chair. New business was at once taken up where left off.

By resolution, it was decided that, in addition to the high gun trophies now awarded in the Grand American Handicap, yardage trophies shall be provided for each yard mark, said yardage trophies to be competed for only by contestants that are allotted the same particular mark, and that no contestant shall be eligible to win more than one trophy.

Letters pertaining to trapshooting matters in general, received from Messrs. M. D. Hart, Richmond, Va.; H. R. Everding, Portland, Oregon; Chas. L. Ulmer, Lisbon, N. D.; D. D. Slater, Grand Rapids, Mich.; Frank J. Ray, Dickinson, N. D.; and C. H. Ditto, of Keithsburg, Illinois., were read, ordered to be filed, and the Secretary directed to extend the thanks of the Association to the several gentlemen for the interest taken in the welfare of the sport of trapshooting.

By resolution, it was decided that one make of trap and one make of target only shall be used at the Grand American Handicap Tournaments in 1916 and 1917.

By resolution, it was decided that the Grand American Trapshooting Tournament in 1916 shall be given during the week commencing with August 20.

By resolution it was decided that regular entries for the Grand American Handicap of 1916 must be made on or before Saturday, August 5, 1916. This is one week earlier than heretofore.

By resolution, it was decided that in 1916 the Grand American Trapshooting Tournament shall be given at St. Louis, Mo.; the Southern Trapshooting Tournament at Memphis, Tenn.; the Eastern Trapshooting Tournament at Philadelphia, Pa., and the Western Trapshooting Tournament at Omaha, Neb.

Inasmuch as no applications were received for holding the Tournament, it was decided, by resolution, not to give a Pacific Coast Trapshooting Tournament in 1916.

The following committees were appointed to serve during the year 1916:

Tournament Committee—J. T. Skelly, chairman; F. G. Drew, T. H. Keller, Jr., J. L. Clark, L. J. Squier, R. W. Clancy, H. E. Winans.

Trophy Committee—A. F. Hebard, chairman; W. R. Clark, C. R. Babson.

Gun Club Organization Committee—T. H. Keller, Sr., chairman; L. P. Smith, Edward Banks.

The committee to allot handicaps for the 1916 Grand American Handicap will be announced later.

After discussing matters of no particular interest to the general public, the Directors' meeting adjourned to meet at St. Louis, Missouri, in 1916, during the week of the Seventeenth Grand American Trapshooting Tournament.

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Secretary.

FIELD TRIALS ON AT BAKERSFIELD.

For the second time during the year of 1915, dog fanciers are assembled at Bakersfield for the annual field trials of the Pacific Coast Field Trials Club, the reason for two "annual events" being held in one year being on account of the changes in the game laws which bring the open season for quail to an end on January first rather than on February first, as was previously the case. Early in the week President John W. Considine and Secretary S. Christenson went to Bakersfield from this city to make all final preparations for the sport, which was scheduled to begin Thursday morning. Entries did not close until Wednesday evening, and from the early entries it would seem that the number of sportsmen and dogs in attendance would approach record figures, goodly delegations being guaranteed from this city, Sacramento, Los Angeles and numerous other cities where the setter and pointer's friends are legion.

As usual, the trials are being held on the property of the Kern Land Company and conditions at present are very much more favorable than those prevailing last January. Quail are more plentiful and recent rains will serve to keep down the dust, the dryness of the fields having interfered greatly with the performances of the very best and most reliable hunting dogs at the last meet, there being just enough alkali in the soil to prove very bothersome to a sensitive nose when dry and powdery. In January, performances were very disappointing in almost every instance, but this week some most enjoyable sport was confidently anticipated. John A. Schumacher was appointed presiding judge, the action meeting with general approbation, and his associates were to be chosen from among those in attendance at the trials.

DUCKS SCATTER IN STORM.

The last rains have had the effect of further scattering the wild fowl which have the habit of following the fresh water. The result has been that the shooting on the inland game preserves has fallen off greatly, the ducks no longer being found in such numbers as formerly. Sunday last the hunters of one of the gun clubs who have been in the habit of getting the limit by 9 o'clock in the morning stayed until noon in the blinds and then turned with but 22 or 23 birds each.

Sacramento valley gunners expect to have some excellent shooting very shortly along the Yolo basin. Those who plan on going further afield are expecting word to the effect that shooting may now be had in the rice fields of Colusa county, where the lessees charge the hunters for the privilege of going on the grounds.

SAN FRANCISCANS RESPECTING GAME LAWS.

San Francisco, the clearing house for game violations in the state, is giving the Fish and Game Commission less trouble than ever before, according to R. D. Duke, the attorney of that body. This is due to the fact that the officers have persisted in their fight, making arrests with great regularity at first, despite the fact that no convictions followed, and seizing all game as it arrived, until finally it became unprofitable for the dealers and restaurants to handle the game. The fight even was carried into the higher courts when the dealers sued the commission.

Three years ago, Mr. Duke says, he was in court every day on one of the game cases. He has been in court but once this year.

MONEY IN LIONS.

Henry Doran, who lives near North Bloomfield in Nevada county, enjoyed a very prosperous hunt a few days ago. He was out in the vicinity of his home and saw a mother lion and two smaller lions, one of which was quite near him. He killed a fairly good sized lion and then went after the mother and cub but could not find them. He will receive twenty dollars from the State Fish and Game Commission for the bounty and will receive a similar amount from the stockmen, making forty dollars in all for a few minutes' pleasure. Mr. Doran will go after the missing two lions and hopes to clean up eighty dollars additional this month.

SEASON'S FIRST COURSING MATCH.

The first coursing match of the present season was programmed for last Sunday at the John Elliott ranch near Franklin, under the auspices of the Capital City Coursing Club of Sacramento. Over thirty dogs were entered to contest for the Rossiter Cup and the $175 hung up in prize money, but while a good crowd was in attendance the sport was marred by rain and tall grass, the field officials calling it a day after the preliminaries and semi-finals had been run off, the stake money being divided among the owners of the eight dogs which are still eligible to the elimination contests for the Rossiter Cup.

The drawings for the preliminaries matched the following pairs, who raced their trials as here given: H. Donahoe's Black Tom beat G. Heintz's Oakland Maid; Roy S. Avery's Checker Board beat D. Hogan's Pride of Richmond; D. Hogan's Richmond Boy beat Malcolm & Deckleman's Lady Kitchner; Lew Norton's Fighting Little beat D. Driscoll's Betsy Dempsey; J. H. Rossiter's Thread of Fire beat C. Mack's Jem Long; George Heintz's Oakland Beau beat Lew Norton's Cordova Girl; T. Kennedy's Pepper Kid beat G. Heintz's Oakland Girl; L. B. Morris' Hailstone beat Mrs. Tufts' Wild Rose; L. Monreal's Young Royal Gold beat H. Donahoe's T. J. Cronin; Carrol & Welsh's Mayhews Boy beat J. Hawke's Bob Wade; J. Hawke's Pints beat W. E. Loyd's Blue Bell; D. Hogan's Richmond's Best beat J. Quill's Rover; Carrol &Walsh's Country Boy beat Malcolm & Deckleman's Sweet Alice; L. Monreal's Young Gold Musk rol & Walsh's Country Boy beat Malcolmm & Deckleman's South Side Queen beat J. Hogan's Snoozer; D. J. Cahil's Abbeyfeale beat Malcolm & Deckleman's Three Paw.

For the first of the secondary qualifying contests, Checker Board beat Black Tom, Richmond Boy beat Fighting Little, Oakland Beau beat Thread of Fire, Pepper Kid beat Hailstone, Mayhews Boy beat Young Royal Gold, Richmond's Best beat Pints, Young Gold Musk beat Country, Abbeyfeale beat South Side Queen, leaving Checker Board, Richmond Boy, Oakland Beau, Pepper Kid, Mayhews Boy, Richmond's Best, Young Gold Musk and Abbeyfeale still eligible for further elimination matches for the cup.

COMING EVENTS.

Memphis, Tenn., May 9, 10, 11, 1916—The Interstate Association's Eleventh Southern Trapshooting Tournament, under the auspices of the Memphis Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Penn.

Omaha, Neb., June 13, 14, 15, 1916—The Interstate Association's Eleventh Western Trapshooting Tournament, under the auspices of the Omaha Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Penn.

Philadelphia, Penn., July 18, 19, 20, 1916—The Interstate Association's Tenth Eastern Trapshooting Tournament, under the auspices of the Keystone Shooting Shooting League; $1,000 added money. The winner of the first place in the Eastern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Penn.

St. Louis, Missouri, August 21, 22, 23, 24, 25, 1916—The Interstate Association's Seventeenth Grand American Trapshooting Tournament, under the auspices of the St. Louis Trapshooters' Association; $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Penn.

LONG LIVED TRAP SHOOTERS.

Uncle Joe Hineman of Wausau, Wis., is 91 years of age, yet he never misses a trap shoot that he can attend. He is on the job with the shooters every time they go out to the traps in Wausau.

Recently one of Uncle Joe's admirers propounded the following query: "Uncle Joe, how old does a man get before he loses his desires along the line of trap shooting?" With a merry twinkle in his eye, he replied: "Can't answer your question; you will have to hunt up some person older than myself."

Dr. O. R. Britton, 74 years of age, was an active participant in the shoot at Indianapolis when the ball players recently shot their match there. His score would indicate that he has not permitted Father Time to dim his shooting eye. On his last birthday a complimentary shoot was given this veteran, who has been before the traps over half a century. He turned in a score of 96 in a possible 100.

Remington-UMC Notes.

Scoring 92-100, T. E. Graham won high amateur average recently at the Round Lake (Ill.) Gun Club. He shot the Perfect Shooting Combination of Remington pump gun and Nitro Club shells, as did R. Bennell, who came in a close second with 91x100.

Bert Wagner, shooting Arrow shells, won high amateur average, and also made a long run of 61 straight, at a shoot held by the Prospect Hill Outing and Gun Club of Burlington, Ia. He broke 96 out ot his 100 targets.

Championships closed with the Arizona meet. The shooting this year has been of an unusually high order, the average of the winners coming pretty close to the hundred mark. Of the forty-three shoots it is a noticeable fact that the winners of more than half of them shot either Remington guns or shells, and in many instances, both. Among the most popular victories of the season just closed were those of Chas. H. Newcomb in Pennsylvania, E. A. Randall in Maine, H. J. Prendergast in New York and W. O. Runnels in Virginia.

RAIN FAILS TO STOP SHELL MOUND SHOOTERS

Sunday was anything but an ideal day for practice at the targets, but Shell Mound shooters are proof against such slight discomforts as wind and rain, assembling at the ranges in goodly numbers and turning in some excellent scores in spite of the handicaps under which the contests were staged. The events and contestants, with the scores shot out, are as follows:

Swiss Rifle Club, monthly medal shoot—Frank Muehlebach 226, 221; John Frei 222, 220; A. Schwarz 220, 220; J. R. Stalder 213, 198; A. E. Hintermann 206, 196; John S. Leutenegger 197, 190; H. Perrin 195, 186; Louis Hauser193, 193; Louis Hansen 193, 193; John Baumann 193, 184.

Swiss Rifle Club, monthly bullseye shoot—A. Hintermann 280, J. A. Sutter 380, A. von Wyl 455, Louis Hauser 460, J. Iven 500, John Baumann 590, John Frei 820, J. R. Stalder 1000, A. Schwarz 1025, H. Perrin 1030, C. Bachmann 1405, John S. Leutenegger 1720, F. Muehlebach 1020.

Company A, Irish Volunteers, monthly medal shoot—William Gaul 39, F. Dugan 39, Captain J. Waters 38, Lieutenant William Gaul 38, Corporal T. Moynihan 36, Corporal F. D. Cronin 35, Sergeant B. McGahey 33, William Cullinane 32, Sergeant J. Brodie 31, Lieutenant D. Harnedy 30, William F. Coleman 27, J. F. McArdle 26.

Independent Rifles, monthly shoot—Frank Schohay 46, C. Edel 42, Major B. D. Hilken 54, Lieutenant C. Iverson 66, J. M. Hansen 37, Lieutenant P. Volkman 35, A. Williams 40, E. Golch 42, H. Marzolf 44, O. R. W. Vossbrinck 47.

Germania Schuetzen Club, monthly medal shoot—Expert class: B. P. Jonas 213, William F. Blasse 221, George A. Pattberg 220, Otto A. Bremer 196. Champion class: G. C. Gunther 196, 192; John de Wit 190.

NEW MEMBER TOPS VERNON SHOOTERS.

Louie R. Mellus, a new member of the Vernon Gun Club, won a leg on the W. H. Wiltshire trophy, which was contested for at the club trap Sunday morning at fifty targets, distance handicap, by breaking forty-nine, a difficult feat for Mellus as he is new to the game but has progressed so rapidly that he was stationed at the eighteen-yard range. Mellus had a high run of forty-three.

Although a good many shooters were stalking the fields for duck and quail twenty-one trapshooters favored the club with their attendance.

Dupont Guy Holohan was high gun in the 100-bird practice contest, breaking 95 out of the 100. Stanton A. Bruner was the runner up with 93 "kills" out of a 100.

Mellus' nearest competitor was Dierdorff, who shattered 47 saucers out of the half-century. Third honors were taken by R. L. Hall. Hall smashed 46 birds.

The scores in the trophy shoot also counted on the black bird fobs. In class A Mellus led, while in class B. Dierdorff had first honors, in division C Hall, and in D, A. J. Smith.

The scores:

Name.	Practice. Tgt.	Bk.	Dist., Yds.	Trophy. Tgt.	Bk.
A. W. Bruner	50	39	16	50	43
R. L. Hall	125	105	16	50	46
W. H. Pugh	60	53	18	50	40
A. Keeton	75	51	16	50	38
Van Nest	50	34	16	..	..
Dr. Packard	50	40	20	50	43
S. A. Bruner	100	93	20	50	45

Casner	25	19	16	..	..

FORD SCORES HIGH MARK AT SAN JOSE.

C. R. Arques and Carl Schilling defeated O. N. Ford and William McKagney by a margin of one target in a special match over the traps at San Jose Sunday morning. The winners each broke 23, while Ford pulverized 25 and his partner 20. In the 50-bird race Ford, shooting in championship form, scored 49, being four targets ahead of his nearest competitor. While Bill McKagney was high gun with 19 out of 24 in the doubles. The winner made a run of 40 before missing. Ford led at the white flyers, getting 11 erratic plungers in a high wind, out of a dozen. The score:

Single bluerocks: O. N. Ford 50-49, C. R. Arques 50-45, Wm. J. McKagney 50-44, C. Schilling 50-44, F. Chapman 50-42, A. Dow 50-40, F. Pinard 50-40, B. Jones 50-39, A. Smith 50-38.

Doubles at 12 pair: Wm. J. McKagney 24-19, C. R. Arques 24-18, R. C. Hogg 24-17, C. Schilling 24-17, A. Smith 24-15.

Twelve flyers: O. N. Ford 12-11, C. R. Arques 12-10,, Wm. J. McKagney 12-10, R. C. Hogg 12-9, George Maccubbin 12-9, A. Maccubbin 12-8, F. Chapman 12-8, A. Dow 12-7, B. Jones 12-6.

A New Year shoot will be held by the San Jose club on January 2.

Drink Jackson's Napa Soda.

THE FARM

SHEEP IN AUSTRALASIA.

More and larger flocks of sheep are necessary to the full development of profitable agriculture in the Middle and Eastern States, according to specialists in the department. Under the present conditions, however, sheep raising in this country has not proved as attractive as in Australia and New Zealand. The department has recently conducted an investigation, the results of which have just been published as Bulletin 313, into the basic principles of the industry in those countries.

In New Zealand, says this bulletin, sheep raising is conducted on lines midway between those followed in our farming states and those in the range states. In Australia the sheep industry is, in the main, what would be called in America a "range proposition." With a total land area of a little more than the State of Wyoming, New Zealand has about 24,500,000 sheep, as against 4,500,000 in Wyoming. The average size of the New Zealand flock is now 1,124, and seven-eighths of the sheep are in flocks of more than 500 head each. In Wyoming the average size of the flock is nearly 3,000 head. From 1 to 8 sheep per acre are maintained in New Zealand on land which has been plowed and sown to artificial grasses. If the land has been surface sown without plowing, this number is reduced to from ½ to 2 sheep per acre. and valued Las high as $150 an acre has been profitably kept in grass for grazing alone, and nearly one-half of the occupied area is used mainly for sheep. The important place thus occupied by sheep in New Zealand is declared to be evidence of the possibilities of profit from valuable land devoted to well-managed flocks. The size of these flocks insures them an interest and care which is not so frequent in the farming states in America.

In Australia conditions more nearly resemble those in the American range states. Much of the Australian land now used for sheep growing is destined to be devoted to farming, and the government is taking an active part in assisting this development. In the meantime land is plentiful and the flocks have much space in which to run. There is, however, one fundamental difference between the managemenet of the range in Australia and in the United States. No Australian sheep owner is permitted to use the public domain without charge. On the other hand, he is in no danger of having his land grazed by other persons' flocks. Under the leasing system employed in Australia, the sheep owner secures for long periods of time, at prices varying with its value, absolute control of the land he uses. When the government is ready to resume the land in order to divide it into smaller allotments, the sheep owner is recompensed for whatever improvements he may have made and is, in addition, permitted to retain his own central homestead. In the opinion of the Australians the additional security and the permanence of the business more than compensate for the rent paid to the state. In America, stockmen themselves are inclining toward this point of view, as some means of controlling and improving the public grazing lands is believed to be urgently needed.

In another important respect sheep raising in Australia differs from that on the American range. In Australia the flocks are not kept collected and under the care of herders, but are fenced into "paddocks" which vary from 5,000 to 10,000 acres in size. Here they are left to run at will under practically natural conditions. In many cases they are only rounded up once a year for shearing. Even at lambing time there is little necessity for attention. This plan not only lessens labor—a difficult problem in all parts of Australia—but puts the sheep into better condition than when they are in charge of even the best herders. On the other hand, the fencing of the sheep runs is, of course, an added expense, but this is considered a less important item than the advantages already named.

The greatest difference of all, however, between the American and Australian sheep industries, is probably to be found in the handling of the wool after it has been shorn. This subject has already attracted considerable attention, and, although it is not believed that the time is yet ripe for advocating the complete adoption in America of Australian methods, familiarity with these would unquestionably aid American wool-growers to perfect important improvements in their present practice.

In the United States the wool is not infrequently sold before it is shorn, and in any event the sheep are not sorted for shearing. The entire fleeces are sacked just as they run and the price fixed for the entire clip, not for the various grades. The clips are usually sold to traveling buyers and are only graded after they have ceased to be the property of the grower.

In Australia and New Zealand, on the other hand, the wool almost invariably remains the property of the grower until it is sold to the manufacturer. Under this system the cost of actually shearing the sheep is only about one-half of the amount which the grower expends in preparing his wool for market. He himself divides his wool into various lots, and the grading is done with uniformity and exactness. Overclassing, however, is avoided. In one Queensland shed 10,000 two-year-old wethers were shorn and the clip divided into 11 classes. In a New South Wales flock of 7,000 head composed of ewes, yearling ewes and rams, 28 classes were made, but this is probably an instance of overclassing.

Despite the expense that this practice involves the Australian is firmly convinced that he realizes more for his wool by selling it in such a number of distinct lots, that the manufacturer can find exactly the kind of wool he needs for a particular fabric and can buy that wool alone. An additional advantage is the opportunity that this system allows of enabling the grower to determine the profit that he makes for each particular type of sheep and wool. It often happens that a heavier fleece with a slightly lower value per pound yields more profit to the grower than a lighter fleece with a higher value per pound. The separate sale of different classes of wool permits the sheep breeder to determine definitely what class of sheep he wishes to develop.

The Australian method of preparing wool is accompanied and made possible by an auction system of selling. Even a lot as small as one bale can be readily disposed of in this way, whereas in the American wool trade few buyers care to purchase lots of less than 10,000 pounds. This condition arises from the fact that the dealers who purchase entire clips at a lump price per pound have to sell to manufacturers who wish large lines of some single grade. It is not worth while, therefore, for the dealers to buy a small clip containing many different classes, none of which are in sufficient quantity to meet the manufacturers' requirements.

To inaugurate the Australian auction system in America would require, it is estimated, a co-operative movement by growers representing 20 per cent of this country's clip. If 50,000,000 pounds of wool were suitably put up and offered for auction for a number of years, it might result in establishing the new method of doing business. This, of course, is not likely to happen for several years to come. Another possibility is to consign classed or graded clips to commission dealers and permit them to combine different parts of various clips to suit the demands of the trade. This method also calls either for co-operation or for close and confidential relations between the grower and the selling agent.

DWARF MILO PROVES CHAMPION GRAIN AND SILAGE CROP.

Dwarf Milo has proved a highly successful crop in the University of California's experiments with sorghums at the University farm.

As a silage crop Milo equaled Indian corn in tonnage, and as a grain crop it exceeded anything grown under field conditions at the University Farm at Davis this year.

The average production at the University Farm in 1915 of dwarf Milo for silage was 11.27 tons per acre from 6.05 acres, and of grain it was 5,175 pounds per acre from 12½ acres.

The Milo cut for silage came from two different fields. In field No. 4 with one irrigation of 6 inches of water it produced 9.73 tons per acre. In an orchard plot with no irrigation but grown on land that was summer fallowed the previous year, and a cover crop grown and turned under in the spring, it produced 13½ tons per acre. The rainfall for 1913-14 was 28 inches, and for 1914-15 it was 20 inches.

The Milo cut for grain was on two fields. In field No. 12 in 1914, a crop of barley was taken off. It was plowed January 1, and replowed April 13, 1915. This field produced 4,020 pounds of grain per acre without any irrigation.

An orchard plot under the conditions mentioned above produced 5,491 pounds of grain. The following method of cultivation was used: The land was plowed as early in the spring as possible; kept cultivated and clean until all the rains were over; sown about May 25; rolled, after seeding, to bring moisture to the surface and give a firm seed-bed; and cultivated twice during the growing period, to kill weeds and conserve moisture. About nine pounds of seed were sown to the acre, in rows 36 inches apart.

STRAW MULCHING AND MANURE HELP SOIL'S NITROGEN AND FERTILITY,

Straw mulching is being urged by the University of California as a help to orchards and small fruits.

The Division of Soil Chemistry and Bacteriology of the University of California has found that one of the most important considerations in the maintenance of fertility in California soils is a proper supply of available nitrogen. The poorer soils are in organic matter, the less likely they are to make available all forms of fertilizer nitrogen, and their own nitrogen as well; the better they are supplied with organic matter, the more likely they are to make all forms of nitrogen available. It is, therefore, essential for the proper nitrogen condition of the soil, in California at least, to have plenty of organic matter there. This may be accomplished by using very large quantities of organic matter in the form of barnyard or green manure, but it is very difficult to do it by that means, and too expensive. It can be done better, so far as orchard crops or small fruits are concerned, through combining a part of this manuring method with a system of straw mulching in the summer or by a permanent system of straw mulching alone.

In localities where soy beans or cowpeas are grown extensively, experience has shown that the price of the seed on the home market holds up well so long as there is local demand enough to take all the seed grown, but falls to about $1 a bushel when it becomes necessary to ship to find a market.

Thetotal cost of the minor items of equipment needed on a farm is much greater than the average person is wont to think. It has been found by inventories taken on a number of farms that the tools and implements actually needed on the average farm, from a wheelbarrow down to a husking peg, cost nearly $200.

FOR SALE OR TRADE—One imported registered draft stallion, weight 1800 lbs., sound and right. Would consider standard bred mares, draft mares, or thoroughbred mares. Address D.A. BAKER, Hill P. O., San Diego Co., Cal.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by Ali Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

HOUSEHOLD SUPPLIES:—

"Smith's Pay the Freight"—to reduce the high cost of living, send for our Wholesale to Consumer Catalogue. Smith's Cash Store, 110-B Clay Street, San Francisco.

FOR SALE.

New "Ideal McMurray" light track cart for matinees, workouts, speeding and jogging. First-class, down to date cart, weight 45 to 50 pounds. Great strength and carrying power, absolute freedom of any horse motion. Constructed from the best second growth white hickory. Best guaranteed grade of pneumatic tires, handsomely finished in rich carmine or royal blue, with brass screen dash, detachable, and accessories consisting of serviceable foot pump, complete tool and repair kit, wrenches, oil can, etc., etc. Weight crated 90 pounds. Brand new and will be shipped to any address. For price address:

F. W. KELLEY,
BREEDER AND SPORTSMAN.

To Clean Up my Racing Stable

I will make campaigning horsemen or matinee drivers most attractive prices on the following high class race horses:

AGNES CARTER 2:15¾, TROTTER
by Nutwood Wilkes 2:16½ and out of Excella, a double producer, by Monbells 2:23¾; grandam the famous race and brood mare Expressive (3) 2:12½ by Electioneer 125. This mare is all her breeding indicates and is better than a 2:10 trotter. Eligible to the 2:16 class on mile tracks and the 2:20 class on the twice-arounds. Can trot the short turns, has worked Stadium track for me frequently in 2:13 this season.

DICK W. 2:06¼
a fast and game son of Athadon (1) 2:27, eligible by time allowance to 2:08 class on mile courses and 2:12 on halfmile tracks. Can win on either kind in his class. He is good mannered, good headed and wears no hobbles.

FRANCES S., MATINEE, 2:11½
a trotter and show mare, rich chestnut with silver mane and tail. By King S., sire of Maurice S. 2:06, the coast's best winning pacer in 1912, and out of a stoutly bred mare. Eligible to all classes and has a matinee record of 2:11½ trotting made this season. Can trot either size track, sound as a dollar, and as good a prospect for 1916 as any man's.

OFFERED FOR NO FAULT

but because my business will require most of my time in 1916, and horses are no good to me unless I can drive them myself or at least see them race. Particulars on request, by mail or in person.

ADOLPH OTTINGER,
722 Market Street San Francisco

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body — It is penetrating, soothing and healing, and for all old Sores, Bruises or Wounds, Bolts, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for
Sore Throat
Chest Cold
Backache
Neuralgia
Sprains
Strains
Lumbago
Diphtheria
Sore Lungs
Rheumatism
and
all Stiff Joints

REMOVES THE SORENESS--STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $1 [illegible] paid in doctor bills" OTTO A. BAYER

Price $1.50 per bottle. Sold by druggists, or sent by express prepaid. Write for Booklet B.
The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

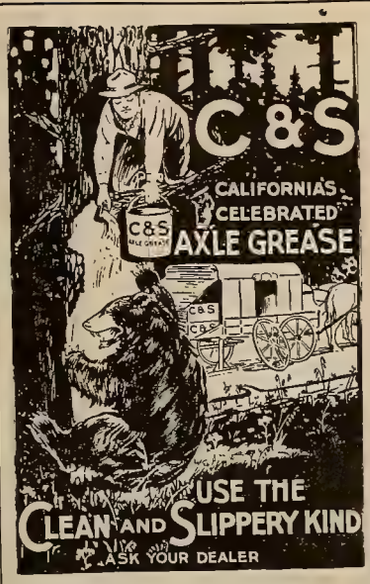
ADDRESS

BREEDER AND SPORTSMAN, 366 PACIFIC BLDG. SAN FRANCISCO.



A BOY AND HIS COW.

There was once a lad in Iowa who, fired with enthusiasm with a talk he had just heard his father give on the Guernsey cow, said: "Father, if all this talk you are giving the farmers in regard to the profit derived from Guernsey cows is true, you could well afford to let me buy a cow and let me own her and her offspring and you could well afford to keep her offspring for her milk and butter fat. You can see that you can well afford to do this, because if you can afford to put your money into a cow and then keep her for what she produces, you could afford to keep her if I bought the cow. My sisters and I have $140 in the savings bank and I would like to have you buy a Guernsey with this money on these terms."

The farmer, after what he had said at the meeting in the presence of his son, could ill afford to reject the offer, so he bought a pure bred Guernsey heifer, which, laid down at their home station, cost just $141. The seller had written that the heifer was a little under size and, therefore, she was not bred until late. Dropped August 2, 1906, she did not have her first calf until September 9, 1909. She was owned, therefore, two years by the boy and fed the same two years by the father before her first heifer calf appeared. At the time of this freshening she was put on test for the Advanced Register and made in that year an official record of 5,781.20 pounds of milk and 331.27 pounds of butter fat, and that butter fat sold on the market for a very little over $100. Before going dry, she dropped, on July 19, 1910, during her first lactation period, another heifer calf, and during this lactation period she gave $135 worth of butter fat. Her next calf was a bull, dropped September 2, 1911, and during this lactation period, from September 2, 1911, until June 21, 1912, she gave 398 pounds of butter fat, which sold for $143.48, thus making a total income to the father for the five years from the sale of butter fat alone from this one cow he was keeping for the boy of $378.40, or nearly $76 per year, which paid handsomely for keeping her and her offspring for the five years, besides the income realized from the manure returned to the farm.

As to the boy: In the fall of 1910 he sold the first heifer calf at three years of age for $300, and on June 21 of the same year the old cow herself was sold for $700. In the fall of 1913 the bull calf, then two years of age, was sold for $200, making in all for the cow, heifer and bull, $1,200, which the boy actually realized from the sale of his cattle between the purchase of his first heifer in 1907 and the sale of the bull calf in 1913, and he still has the last heifer born, for which $700 has been refused several times. She has just completed her first lactation period with an official record of over 365 pounds of butter fat for the year.

Providing the boy would sell the heifer for $700, there would be an income to him of $1,900 in six years, or over $300 a year from an investment of $140, which is 200 per cent. Did it pay for this boy to own pure bred stock and did it pay the father to keep them for the boy?—Guernsey Journal.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

The Grand International Handicap

At the St. Thomas, Ontario, Tournament, Nov. 29-Dec. 1, was won by Mr. W. J. McCance, Captain of the St. Thomas Gun Club. Score

96 x 100 using PETERS SHELLS

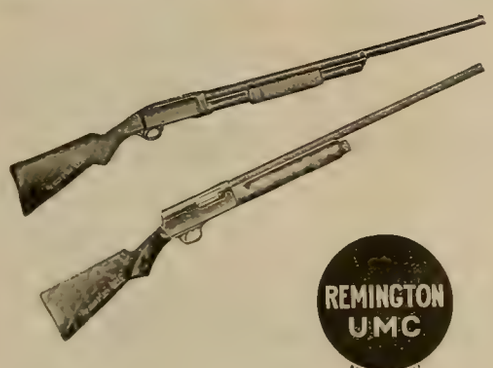
The High General Average at this shoot was won by that popular veteran, Mr. Rolla Heikes, who in spite of adverse weather conditions, scored

385 x 400 using PETERS SHELLS

This was the largest and most important tournament of the 1915 Fall season, and the winning of the two chief honors by users of Peters Shells, is in keeping with the remarkable record of successes made with the (P) brand.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, **San Francisco, Cal.**

WINCHESTER



To Sportsmen One And All We Wish A Very
MERRY CHRISTMAS And A HAPPY NEW YEAR

We also offer the suggestion that you can make some fellow sportsman's Christmas merrier and his New Year happier by giving him a Winchester Rifle or Shotgun and a supply of Winchester Ammunition.

Winchester Repeating Arms Co.,
New Haven, Conn.

Shall It Be an Autoloading or Pump Gun?

THERE are many kinds of Autoloading and Pump guns—some to be had at very low prices.

But it is typical of sportsmen that the great majority prefer Remington-UMC Pump and Autoloading guns in the hands of the average man.

If you shoot at traps or in the field, go to the Remington-UMC Dealer in your community and let him show you these guns. You will know him by his display of the **Red Ball Mark of Remington-UMC** — Sportsmen's Headquarters — and he knows the difference in guns.

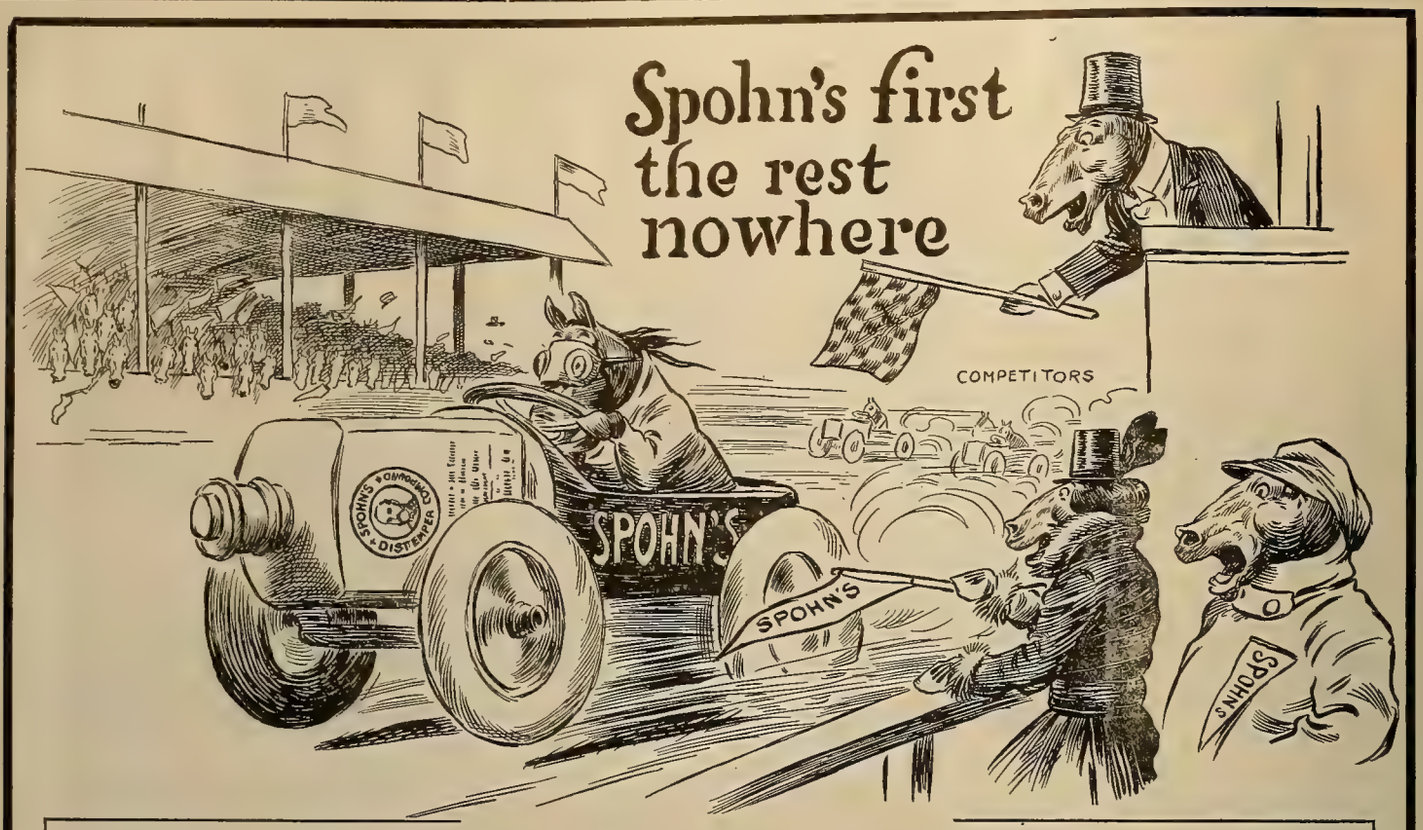
List of Foreign Countries with Reducine Agents:
GREAT BRITAIN and IRELAND—The Reducine Co., 38 S. Frederick St., Dublin, Ireland, and by Chemists throughout the British Isles.
AFRICA (SOUTH)—Haynes, Matthews & Co., Cape Town.
AUSTRALIA—Rocke, Tompsitt & Co., 292 to 298 Flinders St., Melbourne.
AUSTRIA—Armin Berger, Kaiser Josefstrasse, 36, Vienna.
CANADA—C. A. Burns, Toronto; Lymans, Ltd., St. Paul St., Montreal; and National Drug & Chemical Co., of Canada and all its Branches; Martin, Bole & Wynne, Winnipeg; P. A. Gouin, Trois Rivieres, Quebec.
CHANNEL ISLANDS—Le Rossignol & Roissier, 7-9 Esplanade, Jersey.
FRANCE—Roberts & Co., Rue de la Paix 5, Paris.
GERMANY—J. G. Henze, Preuzlauer Street, 35, Berlin.
INDIA—Eroom & Co., 168 Dharamtala St., Calcutta; E. F. Plomer & Co., Lahore, all branches of Army and Navy.Co-Operative Society, Ltd.
ITALY—H. Roberts & Co., 17, Via Tournabuoni, Florence.
JAPAN—Mollinson & Co., No. 48, Yokohama.
JAVA—Soesmans, E. V. & C., Kantoor.
NEW ZEALAND—Trist & Small, Cashel Street, Christchurch.
RUSSIA—V. L. Waldberg, Nikolojevskaja 84, St. Petersburg.
SWEDEN—Vasens, Apoteket, Droghandel "Vitrum," Stockholm; H. KJELLSTROM, Apoteket, Stromsholm.
SWITZERLAND—Bucher, Lohr & Cie, Minatolwerk, Luzern (Lucerne).

TAKE NOTICE



We can send Reducine by Parcel Post only when the amount of postage on two pounds for each can is sent in addition to $4.00 and 3c. added for insurance. Your postmaster will inform you of the amount required from Otsego to your postal zone.

CANADA CUSTOMERS, TAKE NOTICE—Reducine can be purchased in every part of Canada from local druggists and horse goods dealers. Reducine is sold, at wholesale and retail, by C. A. Burns, The Repository, Toronto, Ontario. The retail drug trade is supplied by him and by Lymans, Limited, Montreal, Martin, Bole & Wynne, Winnipeg, P. A. Gouin, Trois Rivieres, Quebec, and the National Drug & Chemical Company of Canada, Montreal, and through their branch stores at Vancouver, Calgary, Victoria, Nelson, Regina, Winnipeg, Hamilton, London, Toronto, Ottawa, Halifax and St. Johns.

For sale by your Druggist or Horse Goods Dealer or direct from us. Cash with order in all cases. Please send N. Y. Draft, Express Order or P. O. Order. If you wish us to pay Express Charges to any point in the United States, send us $4.25.

PRICE $4.00 PER CAN

"SPOHN'S FIRST—THE REST NOWHERE"

Is the decision of Judge Equus, the Hambletonian of his kind, in the 21 years' Non-stop race

"SPOHN'S! SPOHN'S AHEAD!! SPOHN'S WINS!!!"

From the Grand Stand comes the brays and whinnies of Equine Ladies and Gentlemen in tremendous chorus as the "SPOHN'S," like a thunderbolt, catapults across the line the winner by furlongs.

'Tis the same old story, over and over again, the race and the resulting credit and honor, are won by those most efficient.

By steady increase and largest of sales for 21 years, "SPOHN'S" has again demonstrated its real worth of the best materials, most approved methods, and greatest popularity among the owners and handlers of Horses and other Live Stock.

"SPOHN'S" is a speed marvel in the cure of all those forms of Distemper, affecting Horses, Dogs, and many other ailments of Domestic Animals.

Sold by all druggists everywhere. 50 cents and $1 a bottle, $5 and $10 the dozen, or delivered by the manufacturers, on receipt of price. Our booklet is free for the asking. Agents wanted.

FAIR MOVEMENT POPULAR.

Hardly a day goes by that into this office does not me some manifestation, either by written or spoken rd, of the spreading popularity of the movement r a circuit of district fairs launched here during e exposition race meeting, and from all present dications Secretary Robert A. Smith of the Pacific ast Fair Association will have plenty of work ead of him on his return from his eastern trip, as ll as an ample sufficiency of co-operation from rious sources. It seems well assured that Califor- a will have quite a little chain of fairs during the ming season, and state aid will not figure in the ancing of any of them. The fair association was rmed with the idea of raising a goodly sum and aranteeing its own purses at a number of fairs, but m the way the idea is being taken up in various wns, all that will be necessary for that body to do ll be to aid in forming a series of dates that will t be conflicting and in lending the co-operation of officials and members to the local associations.

A number of members of the Golden Gate Thorughbred Association have signified a desire to see e runners provided for in a representative way at e fairs throughout the state, and while such a oposition presents a number of angles and ins and ts that will require considerable smoothing out fore it can be made a success, there is no real ason why the thoroughbred should not play his rt in every fair in the state. As we said some eeks ago in these columns, a fair belongs to all the ople, and as a popular medium of education, inration, entertainment and amusement it must peal to all the people if it is to achieve success the true sense of the word. The thoroughbred ays a very important part in the world's affairs, d California in the days gone by has sent forth me of the most famous members of the American anch of the family. All over the country the runng races are working their way back into public vor, and their incorporation into the regular proams at our fairs would be a source of pleasure to any people, give the local end of the breeding inistry just that much more of a boost, and bring st so much more help to the movement to retablish our district fairs. There are numerous ate and county fairs where both the trotter and the nner are catered to, and there are no insurmountle difficulties in the path of such a plan of produre here.

Another branch of horsebreeders who have evinced their interest in the work of the Pacific Coast air Association and stand ready to lend their support and co-operation in every way possible are those ho center their activities upon the production of e gaited saddle horse. California at this moment osts of a number of establishments of more or less etentious size where the gaited saddler reigns upreme, and at recent state and district fairs the hibition of these grand specimens of the equine mily have aroused the interest and enthusiasm of e spectators to a very high pitch. At the recent position horse show the most popular of the constants were the saddlers, and while our eastern sitors from the centers where the five gaited horse as been established for generations carried off the ajor awards, the representatives of our farms fered ample evidence of the fact that we ourselves e producing horses of this class of the very best d most acceptable type. Equestrianism is grow- g in favor by leaps and bounds both in the east d here in the west, and the saddle horse breeders are anxious to do their share toward popularizing him further through that best of mediums, the local fair. They have gone so far as to signify their willingness to aid in the "missionary work" by having one of their number visit various points in company with the representative of the fair association, and the aid thus rendered will be of inestimable value to the cause.

While no direct tenders of assistance have been received from the draft horse breeders, to the writer's personal knowledge, casual conversation of late with several gentlemen who are in this branch of the breeding industry leads to the belief that much assistance will be gained from that source. The California Draft Horse Breeders' Association is a body of wide awake business men who are fully aware of the opportunities presented them through the holding of numerous fairs, and they will not be slow in answering any requests made of them when the time comes. Livestock breeders in general are endorsing the movement, and the outlook for the eventual and permanent re-establishment of the subsidized district fair is more promising than at any time since the former appropriations were discontinued.

Right now, before any work by the association has been done at all, there are enough fairs in sight for 1916 to justify owners and trainers to begin figuring definitely on having several weeks of racing this season. Salinas must give a fair this year or lose her appropriation, and there is no doubt but that the fair will be given; Pleasanton will give her usual event, that course having already been determined upon; Ventura and Riverside, both with money in hand from the successful fairs of 1915, are in line; Santa Rosa will give a good meeting, according to recent conversation with members of the association at that point; Hanford will resume her series of events where she left off when the exposition tore things up; Fresno, with a lesson learned this season at a considerable cost, will return to the fold, from all accounts, and the state fair promises a greater event than ever before in every line of endeavor; Bakersfield, where there is a completely equipped plant, has declared herself in on the proceedings, and it is not improbable that Santa Ana will give a fair of some description, the experimental one of the past season having met with considerable success; Ferndale will give the annual exposition of the Humboldt county section's resources, and it is possible that certain speed classes will be made open to all comers; the future course at Woodland is not yet known, but there is reason to believe that the situation there is well in hand and that the new owner and the county supervisors are acting in complete accord.

With this much to work on, it would seem that a bit of real enterprise on the part of the breeders of the various families of horses, coupled with the support of livestock growers and agriculturists in general, would set the district and county fair on a basis that will make them both permanent and profitable.

FIRST RACES ON MAY DAY.

While definite announcement of the fairs and race meetings of the regular season of 1916 will in all probability not be made until the latter part of January or the first of February, the Chamber of Commerce of the hustling little city of Dixon has sent out notice to horsemen throughout the central portion of California to the effect that the customary May Day celebration will be held there, and that the harness races will play an even greater part in the day's festivities than has been the case previously. There will be more races for more money, and as the events are usually made for half-mile heats horses can be raced there at a pretty good gait without taking chances of throwing them off in their training for the events which come later in the season. Last spring the races were "hot as hot," and some of the short heats were stepped in 1:01¼, with a number on the fast side of 1:05.

Chairman L. A. Morris of the Chamber of Commerce announces a new departure for the coming day of sport in the way of the "Dixon Colt Stake No. 1," which is a two in three affair at half-mile heats for two-year-olds, either trotters or pacers, and this stake will no doubt meet with the approval and patronage of horsemen who have futurity candidates in training. Entries close on January first (one week from today) when a payment of five dollars must be made. On March first a further payment of ten dollars is required to keep the engagement good, and on the night before the race a final assessment of ten dollars will be levied on starters. All entrance money and starting fees go to the race, to which its sponsors will add the sum of $150, the total amount to be raced for and divided into four moneys on the usual system. Five entries and three starters are required, and the right to declare off the event in case of rain is reserved, in which instance all money paid in will be refunded. The full program of events will be announced by Mr. Morris at an early date.

SADDLE HORSE GROWS IN FAVOR.

One of the most pleasing signs of the times for the lover of the horse to contemplate is the renewed interest in equestrianism that is being evidenced so strikingly in many widely separated sections of the United States at the present. The stables of the riding academies in the great cities of the east are entering upon a new wave of prosperity, and are busier than they have been in many a long-gone year, while the demand for high class saddlers fit for use on the park bridle path is increasing very rapidly. In New York city the wane of dancing and the rush for the outdoors that has followed the dancing craze have aided materially in re-establishing the horse in favor, and a number of orders for high priced animals for the exclusive use of certain members of the wealthy set have been filled in the central western states where the gaited saddler is produced in the greatest numbers and highest pattern of perfection. In Washington, the old riding clubs have come to life with a rush and new ones are springing up, while in many smaller cities the conditions existing are duplications of those found in the metropolis and the capital. Not to the eastern seaboard is the movement back to the saddle confined but it stretches clear across the country to the cities of the mountain section and those of the Pacific coast.

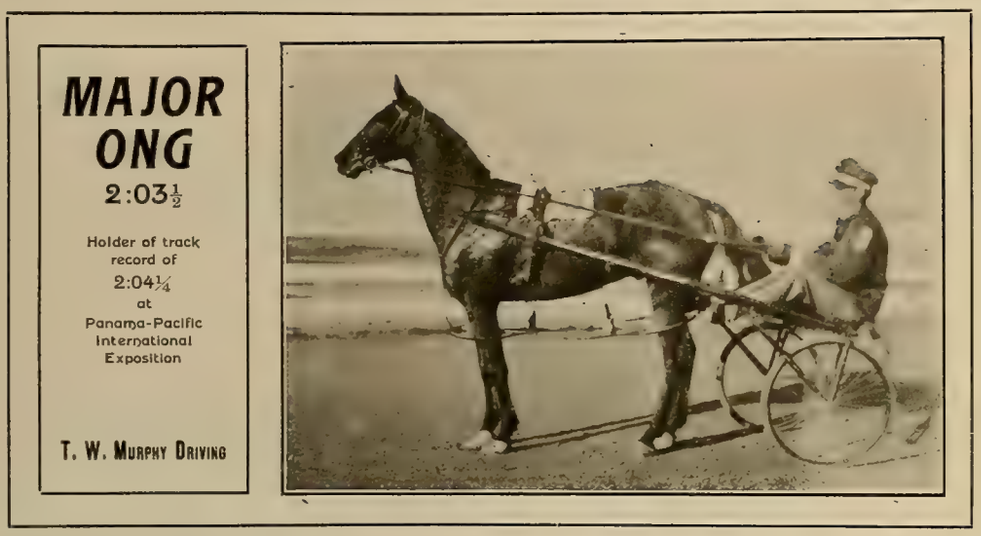
Here in San Francisco, the saddle horse has never wanted for a wide circle of friends and admirers who made daily use of his good qualities in the search for health, exercise and pleasure on long rides on the park equestrian course and up and down the beach, and this band of steadfast devotees has been receiving numerous additions for some weeks past, the exposition horse show having been the means of awakening a good deal of latent interest in the horse, and of showing to the folks with good red blood in their veins just what they were missing by staying indoors or in the tonneau of a touring car or in the sheltered recesses of a limousine. Automobiling has a certain savor given by no other means of locomotion, but it does not give exercise, nor does the "personal equation" enter into it to as great an extent as in either riding or driving. Gasoline speed merchants are now turned out to order in unlimited quantities and a gasoline motor is a gasoline motor and nothing more, while the art of equestrianism is not acquired in a day or week, and every horse is an individualist, with some traits different from every other one of his kind. What the motor lacks and that which the horse supplies is "life"—the one attribute that assures him a permanent place in the daily life of the human race.

"FIRST LESSONS IN GRAZING."

There is nothing more interesting in the world to the breeder of horses than the mares and colts in the paddocks along in the late spring and early summer. Young animals of all descriptions are always fascinating to the lover of livestock, and in the foal of the favorite "ol' mare" to the cover of some especially well regarded sire are centered not only the owner's affections, but his hopes of future fame and fortune on the race courses of many states.

California farms are the birthplaces of many youngsters of aristocratic lineage every season, but of all those foaled within her confines during 1915 the lassie appearing on our cover, with her dam, is without doubt the queen, being none other than the daughter of Peter the Great 2:07¼, the reigning king of speed sires, and Carrietta 2:18, who, as the dam of four yearling trotters with standard records, occupies a place absolutely unique in trotting annals. The young lady was bred by John W. Considine and foaled at Woodland Stock Farm, and though her dam has gone to New York state, to Stony Ford, she herself remains in California and will be developed by Millard Sanders, who, so long ago as 1891, drove a California bred yearling filly to a world's record. Certainly this one has every right to make the fifth to be credited to her dam, and perhaps be the fastest of the line. Her career will be watched with much interest not only here but throughout the country.

A Small Story of a Very Small Horse



THE HORSE BEING MUCH BETTER THEN THE STORY

Major Ong, the diminutive military genius who had command of the pacing division of the invading forces of that immortal turf general, Thomas W. Murphy, upon the occasion of the latter's first, last and only visit to our glorious clime, is a product of the grand old corn producing state of Iowa, where hogs and steers get fat as they do nowhere else in the world, and where horses should grow to enormous size. Maybe the drafters do get to be whoppers, but the growing process got headed off somewhere along the line in the Major's case, and it took him a long time to get to a point where he could make the scales balance at all. If he had been a calf instead of a colt the knowing observer would merely have remarked that he had been hit in the head with a churn dash, and let it go at that, while any cowboy would unhesitatingly have pronounced him a dogie and nothing else. However, it is a well known fact that the best goods do not always come in the largest packages, and when the Major once got away from home he proceeded to add fresh proof to this theory—or maxim, or axiom, or whatever the proper word is. No one can be found who is so foolish as to contend that the Major is the horse that put the s in size, but there are not lacking those who will support the theory that he is the identical little gentleman who put the siz in sizzle.

The Major comes of a strictly military family, and one that has made history in his native Iowa for generations before him. We use the word family rather than the plural for the good and sufficient reason that both his sire and dam are members of the same house, that of the speed sire Iowa Sentinel 2:29¼, sire among others of that quartet of good pacers Dick Sentinel 2:06¾, Wapello Girl 2:07½, Major Gantz 2:08½ and Prince Edgar 2:09¼. Iowa Sentinel was most distinctly an Iowan, as he was bred by the Valley Junction horseman A. A. Kitzmiller, and was a son of Ellerslie Wilkes 2:22½ and that grand old matron Sorrento by Grand Sentinel 2:27¼, sire of the dams of Peter the Great, J. Malcolm Forbes and many other famous performers and producers. It is with Major Gantz that we are most interested at the present moment, as it was he who sired the equine monster whose picture, with that of his trainer and driver, appears herewith. Major Gantz, if appellations other than those bestowed by the Year Book are in order, is the most promising candidate for the title of the "Iron Horse of Iowa," as he went to the races regularly for a decade, making campaigns of from five to fifteen starts, and paying a profit about every time he left home. In all he took part in a hundred races or more, in over half of which he was either a winner or a heat winner, a truly remarkable record for a horse these days. He did not make his appearance on the track until his sixth year, which may have something to do with the way in which he lasted, his first appearance having been in the summer of 1906, the spring during which he was mated with Bessie J., the resultant foal being the second member of the line to attain recognition for gallantry on the field of action and be breveted a major, Major Ong, to be exact.

Bessie J., at the time of her mating with Major Gantz, was owned by C. P. Johnson of Wapello, and some six years later the Johnson family went to the front with the foal, then five years old and about large enough to pass for a yearling in any ordinary company. What the Major and the Johnson family lacked in size they made up in quality, however, and when they came home that fall, 1912, they had six firsts and two seconds to their credit out of eight starts, and the Major broke into the books with a record of 2:18¼. In 1913 the same combination went out for another whirl with the world and out of six races let only one heat get away from them, and as they were not racing on the every heat a race system the slight faux pas (with our customary apology to the Horse Review for the use of their copyrighted turf terms) cost them nothing more than an extra mile and a few moments longer cooling out, mere nothings hardly worth the mentioning. They didn't have to go so very much faster that year than they did during the previous season, winter catching them before they had to get out of the sixteen class.

Now certain folks are always on the prowl for good racing material, and before another season had rolled around the Major had taken up a residence in the neighborhood of Poughkeepsie, getting his meals in the hostelry conducted at that point by one Thomas W. Murphy, whom we mentioned above, and taking all his exercise over the Murphy track. This was getting a long ways from his native Iowa, and just to keep the little cuss from becoming too thoroughly a professional New Yorker Murphy took him back west a ways when the time came for the bell to ring down on the big line. At North Randall, his first start in select company, he was unplaced, but won a six-heater at Detroit, being second the first three and taking the next three as they came, the fastest heat won by him being in 2:09¼. At Grand Rapids he was third, and at Kalamazoo he was second to Napoleon Direct and a somewhat silent elderly gentleman from Tennessee whom everybody seemed to know by the name of Ed. Back at Detroit in September he was third, and went from the jitney metropolis to Columbus for three starts, every one of them against bear cats and every one of them a split heat affair. In the first one he was third to Napoleon Direct and Camelia, winning the third heat in 2:07, the race going five rounds to a decision. In the second he tangled up with R. H. Brett and Baron A. for six trips around the big oval, stepping the third one in 2:09¼ to come down in front. In the third and final start for the meeting, and his last for the season, he matched himself against Beth Clark, Alcy E., Frank Patch and a couple of other rather shifty sidewheelers, and when the smoke of the battle had rolled away and the judges had figured up the winnings of the contenders it was found that the diminutive Major had annexed second money and a non-winning performance record of 2:03½, making him the fastest pacer recruited from his native Iowa in some time, in fact, very nearly in all time, Don Densmore 2:02¼ being the only Iowa-bred horse of either gait or sex to have a faster record, Alix 2:03¾, "sweet little Alix," being the third in lnie.

For the season of 1915 he was again figured by Mr. Murphy as being a good horse in his class and formed a member of the band of fast birds entered by the Poughkeepsie wizard from Hartford to San Francisco. At North Randall he won the 2:09 pace, stepping the fastest heat in 2:04¾, and at Detroit was second to the poison horse, Aconite, in the Hotel Griswold stake. At Kalamazoo he went to the mat with the Indiana bear cat, Single G., in the Park American Hotel event and drew down second money, winning the third and fourth heats. At Grand Rapids he headed the summary in the 2:09 pace, and at Empire City was fourth in the Broadway, a race which all the critics claim to be the one event of the season which he should have won with ease, as all he had to beat was Russell Boy, Hal Boy and Single G.—some field! At Hartford he was fourth in the 2:06 class, at Syracuse was third in the Onondaga, and at Columbus in his first start was unplaced in the King stake, the slowest heat of which was paced in 2:03. Later in the same meeting he was fourth in the Board of Trade classic, and at Lexington was fourth in the Blue Grass and unplaced in the Cumberland.

Then came the long trek to the Pacific coast, and as soon as he landed he began picking up, getting as right as could be in the course of a few days and upholstering his little bones with some thirty pounds of welcome meat. On the opening day of the exposition meeting he won the 2:09 pace, stepping t fastest heat in 2:06½, and on the following Saturd upset all the local dope by trimming White Sox 2:07¼, 2:04¼ and 2:05½, the second mile being record performance for the exposition track, as w as the fastest mile raced on the coast this season a competitive event. After this performance he w well regarded for the 2:06 stake on closing day, t the rain in the intervening days did away with t very hard smooth footing that just exactly suit him, and third position in the summary was the b that came his way, though he was second in the fa est heat of the event in 2:06. In point of money w during the exposition meeting he stood third to E Boy and White Sox with over five thousand thr hundred dollars to his credit, so that Mr. Murp was well repaid for bringing him along on the tr

Major Ong is a little fellow, weighing at the ti of his departure from California about seven hundr and thirty pounds, which is more than he usua tips the beam at when in racing trim. He is not exceptionally "good doer," but he is a hard little n to crack when at himself, and he is always a perfe little gentleman in company. The accompanying p ture of him and Tommy Murphy was taken at t exposition course on the closing day of the seas just prior to the start of the second heat of the t stake.

RAYO DE ORO, CALIFORNIA'S NEWE CHAMPION.

Ever since the September day in 1873 when t brown gelding Occident trotted to a world's reco of 2:16¾ for George Tennant over the track at S ramento, California has been a pretty consiste contributor of champion trotters and pacers of ages and sexes. A glance through the table world's records which appears elsewhere in t issue will prove sufficient attest to the correctne of this statement, and this present tabulation c tains only the champions of today. There are a number who have gone before, so that a Native S need take no shame in any company when the matt of champion harness horse comes up.

During the season of 1915 our horses fared ve well, thank you, in the line of record setting, spe ing a number of both world and seasonal sco the newest comer to the roll of honor being the che nut pacer whose likeness appears on the opposi page, Rayo de Oro (3) 2:07¼, whose record w made on November 27 at the "mid-winter fair" Phoenix. The ancestry of this lad was made t subject of a thorough review in these columns at date so recent that it seems futile at this mome to do other than present a mere "reminder" of h breeding—by Copa de Oro 2:01, dam Easter D. 2:13½ by Diablo 2:09¼, grandam Donnagene Athadon (1) 2:27, great grandam Trenna by Jun 2:22, etc. It is a genuine California pedigree a way you take it, so far as the horse line is concern and the folks of the human family who appear in c nection with the new champ are also of the re California brand. The honor of appearing in t records as his breeder falls to that somewhat elo gated Los Angeles horseman, James Stewart, w still owns his dam and a full brother to him; J. Nickerson of the same cafeteria center has been h owner for some months past, and it hardly see necessary to state that the gentleman who appea with him in the picture as rig-rustler and chief pil is one William G. Durfee, also an Angeleno, and al known to fame as about the handiest and most su cessful of the younger generation of western traine

So long ago as the time of Napoleon the theo was advanced that the Lord is on the side that h the heaviest artillery, but from the experience Willyum Gee in the record hunting business at Phc nix that gentleman is inclined to think that victo is not always with you even when you have t artillery. Whether or not the Lord's influence e tends to such purely mundane affairs as horse raci is doubtful, but it required three trips to Phoen with the Copa de Oro family before Will got world's record with them, and on each and eve occasion he had the heavy artillery present and action. With the founder of the tribe he travel a wonderful mile in 1:59 at the Phoenix course son seasons ago, only to be "technicalitied" out of t record; last season with the three-year-old geldi Contention B. he started for the world's record f the age and gait, and the judges or clerk of t course started the little fellow officially "to be 2:08¼," so his mile that tied the record constitute merely a losing performance and he got no credit f it at all. True, even had he been given the reco his glory would have been of the short-lived variet as Marse Ed Geers and Bud Elliott clipped the fra tion from the mark only four days later, but the every little bit helps (unless a certain widely quote elderly lady lied on a certain historic occasion) an a champion, even if only a four-day champion, wou have looked very nice for the first crop of the Co de Oros. This year, however, William had the art lery and the Lord's favor as well (or at least h evidently did not have to buck his disfavor) and Ra de Oro left no room for doubt as to the ability of t family to spear world's records over the Phoen track.

All indications point to a great family of pacers t be founded by Copa de Oro, the best bred of all t extremely fast racing pacers in the eyes of his man admirers, as they seem to be full of pace, are goo headed and go without any underwear.

CHICAGO HORSE SALE.

While the official report of the Chicago Horse Sale ompany as sent out direct from the office of that ganization to the turf journals bears the cheering ews that "it was the consensus of opinion that the cent sale was the most encouraging auction that as been held in Chicago for the past two years," e sale sheets which accompany the report do not ow that any records were broken in the way of gh prices. Of the numerous horses cataloged, of hich a very small percentage failed to go through e sale, less than one hundred brought prices in cess of two hundred dollars, while only three, two them members of the California delegation, ought over one thousand dollars. The reports of e sale sent from the company's office do not in- ude animals selling for less than two hundred dol- rs, so it is impossible for us to furnish complete turns of the prices realized on the consignments our local patrons of the auction, nor do the reports rry and returns from the Woodland horses. The top rice of the sale, $1,350, was paid by the Youngstown, hio, horseman, David Tod, for the yearling filly Tru- lla by Binjolla 2:17¾, dam Trussora by Moko, the cond best price being paid for San Jacinto and the ird for Raisin Girl. Taken straight through, the alifornia horses sold as well or better than those om any other section, but in view of the general nge of prices paid it is not likely that our breeders ill again soon make consignments of any moment this particular market.

Horses from this section on which a report was ade to us by the sale company brought the follow- g prices:

n Jacinto 2:05¼, b g (7), George W. McKinney 2:14½—Dot by Del Norte 2:08; D. D. Worman, Providence, R. I. $1150

iss Quealey 2:26¾, b m (7), Moko—Silurian 2:25½ by Wilton 2:19¼; J. R. Magowan, Mt. Sterling, Ky. 435

rgo 2:07½, b g (9), Keeler 2:13¼; F. L. Stiles, North Haven, Conn. 950

d Folks 2:11¾, b g (5), Del Coronado 2:09½—Iran Belle by Iran Alto 2:12¼; R. W. Wright, Indian- apolis, Ind. 625

arlschen 2:23, br g (3), Carlokin 2:07½—Bonnie Ailse 2:08½ by Faustino 2:12¼; Thomas McQuaig, Tulsa, Okla. 310

C. F. Silva Buys Woodland Stock Farm

PROBABLY WILL BE MADE INTO PERMANENT FAIR GROUND

For some time there has been a certain measure of apprehension in trotting horse circles concerning the future of the property which for the past several years has been known as the Woodland Stock Farm, as it was realized that Mr. John W. Considine was laying his plans to retire, at least for the present, from active participation in the breeding and racing of the light harness horse. Some weeks ago a great many of the mares and young things at the farm were sold to Mr. Louis Titus of the Stony Ford Farm, New York, and still others were sent to the Chicago sale, which was held last week. One or two parties inspected the farm proper with the view to buying, though nothing came of their visits, and it was then hoped that the supervisors of Yolo county would take it over and make it into a fair ground, for which purpose it offers very advantageous opportunities. Then came a rumor that the supervisors had passed up the proposition, and no further light was forthcoming until Tuesday of this week, when Mr. Clinton A. Harrison of Seattle forwarded the following communication to this office:

San Francisco, Cal., Dec. 20, 1915

Breeder and Sportsman,
San Francisco, Calif.

Dear Sirs:

On last Tuesday I was requested by the head of the Woodland Stock Farm, Incorporated, to close out the farm, its horses and equipment. After I was given proper authority I arrived at Woodland on Wednesday and proceeded to immediately check up all accounts and pay all bills due to every employee and merchant in Woodland and elsewhere. This has been done and everybody has been paid to the last penny. I also disposed of the horses that were left at the farm and sold the equipment except the equipment necessary for the care of the track. After I had paid all the bills and shipped the last horse away, the trial balances had been taken off, I stood and looked at the Woodland Stock Farm and it reminded me very much of Goldsmith's Deserted Village. A feeling of misery came over me and I made myself a promise that I would find a purchaser for the Woodland Stock Farm who would maintain it as a race track and stock farm.

This was on Friday evening, and after closing up all the business affairs of the farm I packed my grip and started to find a buyer. One of the men I had in mind is one of California's most successful business men and a man who has the interest of the State of California very much at heart. I placed the matter squarely before him and it took me just one hour to convince him that the Woodland Stock Farm was a good investment. I sold him the farm, and in selling it to him I was very much pleased because I knew the farm would be maintained as a race track and a harness horse stock farm, and I wish the new owner of the Woodland Stock Farm the highest kind of success, and I congratulate the horsemen of California on the fact that the Woodland Stock Farm has become the property of this enterprising citizen. This man in due time will publicly announce himself as the owner of the farm, and as he desires to tell the public in his own way I therefore will not at this time make his name public.

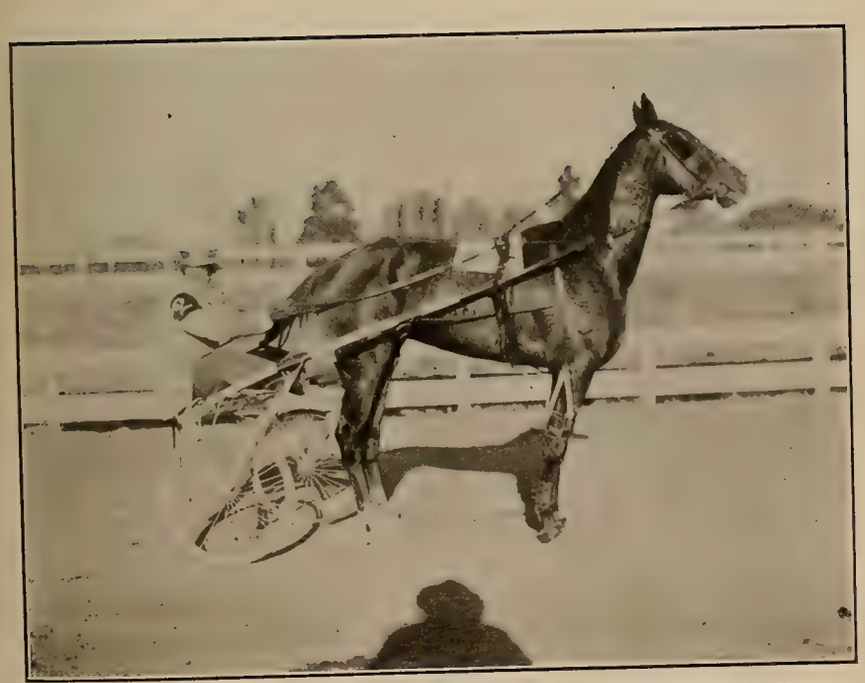
On behalf of John W. Considine, the man who did so much for the Woodland Stock Farm and the horse interests not only of California but of the whole United States, I want to say that in retiring from the ownership of this farm Mr. Considine has paid every debt and has done a great deal for the harness horse interests. And I want to say that from my personal association with him that I recognize him as one of the most honest and biggest hearted men that I have ever met, and I regret exceedingly that he has decided, for the present, to retire from the harness horse interests. But from what I know I am quite sure that he will in a very short time be in shape to again take his place amongst the foremost breeders in the United States.

Some person or persons during the fall meeting of the Panama-Pacific Exposition made public statements through the press that I had taken over the affairs of the Woodland Stock Farm and its horses. These reports were entirely false and without justification, as I never took over the affairs of the Woodland Stock Farm nor had anything to do with it since January, 1912, up until last Wednesday, nor did I ever say anything to cause such reports to be circulated. I did sell some mares that were my personal property under a private agreement which was naturally my own business. I also sold some other horses for the corporation.

Now that the Woodland Stock Farm has passed into other hands, while I am sorry to see my friend Considine step out, and hope that his absence from the game will be of short duration, yet I am sure that the horsemen of California will be pleased with the new owner.

As for myself, I wish every horseman in California and elsewhere, a Merry Christmas and Happy New Year.

Yours very truly,



C. A. HARRISON.

On Tuesday morning, the Chronicle of this city carried a story to the effect that the new owner of the Woodland plant was the well known Sacramento horseman, Mr. Charles Silva, who for the last several years has been one of the most extensive patrons of the trotter in California, campaigning a stable of excellent horses throughout the Pacific coast circuits and doing a great deal of matinee driving in person. During the season just passed Mr. Silva raced a good sized stable with most gratifying results, racing from the June meeting at the exposition clear through the year, taking in a number of meetings on the North Pacific Fair Circuit, the Arizona State Fair, and the futurity meeting at Pleasanton, the winnings of the various members of the string in the hands of Mr. Silva or his trainer, Loren B. Daniels, offsetting the expense of the campaign by a matter of nearly fifteen thousand dollars. For some time the "standby" of the Silva operations has been the good pacer Teddy Bear 2:05, and in the great three-year-old pacer Bondalean (3) 2:06¼, Mr. Silva has a campaigner who will undoubtedly achieve an even greater renown, as the colt numbers among his friends a circle of very warm admirers who consider him of genuine championship caliber.

The news that the future operations of Mr. Silva will be linked with the Woodland plant was heralded with a great deal of pleasure and satisfaction, and from a short conversation with him over the phone, we are in position to state that most interesting announcements from Woodland will be forthcoming in a very short time, as Mr. Silva and the Yolo county supervisors are in very close touch with each other, and are working in unison for the permanent establishment of a district or county fair. It is not improbable that the latter may take over the property in its entirety, or at least effect an arrangement with Mr. Silva that will permit of the doing of all work necessary to equip the plant as a fair ground and operate it as such. In any event, the deal is one that will meet with a hearty welcome from horsemen throughout the west, as it means the perpetuation of one of the best tracks in California, and the permanent establishment of what should prove one of the very best fairs in California.

It is a matter of regret throughout the west that Mr. Considine has judged it to be his best interests to retire for the time, as he has put a good deal of money in circulation, is a welcome figure at all gatherings where horses are the topic of conversation or are engaged in racing for the money, and has made himself well liked among the fraternity in general. Financial returns have not come his way in any large measure, but he has had the pleasure and satisfaction of having bred, in the short time in which he was actively identified with Woodland Stock Farm, the greatest trio of yearling trotters that ever went forth from any one establishment in one season, or any number of seasons, as three world's records have fallen to their lot. To him and to his "next friend," Mr. Harrison, the trotting world owes a debt whose true proportions will become more and more apparent as the years speed by.

To the retiring owner of the famous establishment countless friends will join us in hearty "hail and farewell" (though not a final farewell by any means), and to the new owner will extend the warmest of welcomes. Good luck and more of it to the whole of them!

RAYO DE ORO (3) 2:07¼, CHAMPION THREE-YEAR-OLD PACING GELDING

Futurities Close Soon for Foals of 1916

STATE FAIR AND BREEDERS' ASSOCIATION ANNOUNCE FIXTURES

Among the most important events that have been fixtures of the harness racing season here in California for many years past are the various colt stakes promoted by the Pacific Coast Trotting Horse Breeders' Association and the California State Agricultural Society, supplemented in certain years by the events sponsored by Messrs. Clark and Canfield of Los Angeles and MacKenzie of Pleasanton. The latter stakes are no longer being renewed, leaving the older classics in undisputed possession of the field, their importance being increased just so much by the passing of the younger stakes. It is greatly to be regretted that the breeding industry fell away to a point at which sufficient patronage could not be secured to make all these various events permanent, and it behooves every horseman who has bred a trotting mare during the season of 1915 to rally to the support of the stakes yet operative and make nominations in the same to the limit of his holdings.

There was a time some years ago when most of the stakes paid out more than the sums guaranteed by their sponsors, the generous support accorded them permitting of this most pleasing action, but of late years patronage has fallen away to a point that necessitated the making up of a deficit from gate receipts or private subscription, followed of course by the very natural result that the size of the stakes has been reduced to a figure in keeping with the scope of the breeding industry at this moment. Conditions have been made modern and most generous, and the various events are made just as attractive to breeders as is possible under existing conditions.

Both the Breeders' Association and the State Fair people have made announcement of their new stakes for the foals of mares bred in 1915, and we respectfully suggest that you turn to page seventeen of this issue of the Breeder and Sportsman and investigate thoroughly the conditions of each event, as they will be found there set forth in full.

Among the new departures adopted by the promoters of both events is the date of closing, which has in each instance been made some weeks later in the year than has usually been the custom before, giving breeders every opportunity of determining whether or not their mares are safe with foal, the State Fair event closing on January first and the Breeders' classic on February first, at which dates the risk of nominating mares that might prove not with foal is reduced to the minimum. The State Fair being the first to close, it is to its general conditions that we first direct your attention.

Originally the stake carried both two- and three-year-old divisions, but a year or so ago the two-year-old money was discontinued and the entire stake made for three-year-olds, the plan meeting with approbation to an extent that led Secretary Paine to draw the conditions for the current number along similar lines. The amount of the stake has been reduced, with reluctant regret, from five to four thousand dollars, divided $2,200 for three-year-old trotters and $1,800 for pacers of a like age. The contests will be on the three heat plan, with a portion of the purse paid to each heat and the balance to the winner of the race, a fourth heat being raced only in the event that three heat winners develop, they only to contest it. In the trotting division $75 will be paid to the nominator of the winner of the race, while $650 will be hung up for each heat, divided into the customary four moneys, the remaining $175 going to the winner according to the standing in the final summary. In the pace the nominator of the winner will receive $75, each heat will have a purse of $550, and the winner of two heats will be awarded the $75 additional. Distanced horses will be entitled to money previously won, and the distance will be well back, one hundred yards. The nomination fee and the early payments are very moderate indeed, the starting payments are not due until ten days before the races are announced to take place, and the conditions throughout have been drawn with the paramount idea of pleasing horsemen and providing an interesting race for the visitors to the State Fair of 1919.

We recommend the State Fair Futurity Stake Number 8 to your consideration without reserve and urge that you go your limit in extending it your patronage. Blanks have been mailed to breeders throughout the west, but if you have been overlooked by any chance, make immediate application to Charles W. Paine, Secretary, Sacramento, and send in your nominations as soon as you receive the blank. Please note that as the entries close on January fist, which is next Saturday, all nominations whose envelopes bear post mark prior to noon on the following Monday, January third, are legal under the rulings of the parent trotting association. We advise, however, that you take no chances with the holiday mails, and that you get your communications in your post office well in advance of the hour of legal closing.

Like the State Fair Futurity, the new number of the series which has so long and so faithfully been fathered by the Breeders' Association, carries a much smaller monetary value than in previous years, the smallest, in fact, in the history of the stake. When the first of the line was inaugurated with a guaranteed value of six thousand dollars it was no uncommon thing for the treasurer to pay out as high as eight thousand dollars to the winners of the various divisions, but the stakes of late years have fallen behind their guaranteed value rather than running over it, and a reduction became a mere matter of necessity, made with regret and heartfelt misgivings. Last year the stake was framed for a total of $5,150, and with the patronage accorded it is facing almost certain and considerable deficit, unless a greater percentage of entries are kept good than is usually the case. This season the directors of the association made careful estimates of what they might reasonably expect in the way of entries, and made the sum offered just as liberal as possible in the face of the many adverse circumstances they are facing. Three thousand dollars is the amount hung up for Futurity Number 16 for foals of mares bred in 1915, and the money is allotted according to their usual custom.

Moderate sums are set aside for the benefit of the owners of the sires of the winners at the time the mares were bred, and also for the nominators of the dams on whose original nominations are named the winners of the various divisions of the stake, the remaining sum being apportioned as follows: $1,000 to be raced for by three-year-old trotters, $600 for two-year-old trotters, $700 for three-year-old pacers, and $400 for the baby sidewheelers. The three-year-old events will be on the three heat, every heat a race plan, while the younger fry will race two in three on the old system, limited to three heats. Entries close on the first day of February, and blanks will be sent out in a few days or may be obtained upon application to Secretary F. W. Kelley, Drawer 447, San Francisco. Both stakes include a pleasing substitution clause in their conditions, and minor details omitted here will be found in full in the advertisements on page seventeen.

The value of the futurities to California horsemen is not to be estimated even approximately in dollars and cents, and every breeder who has the interests of his business at heart will be prompt in responding to the call for entries to the two stakes described herein. We all regret that the sums involved are not larger, but we all know that the Breeders' Association and the State Fair have been largely responsible for the fact that the industry of racing and breeding harness horses has been kept alive during the last several seasons, and realize that they will be the first to hang up more money in both stakes and purses whenever the business improves to a point that will justify them in so doing. Nothing will give them the assurance to go ahead with their plans like the generous patronage of the stakes which they are giving at present. You owe it not merely to them but to yourself to see that these events fill and fill well.

—o—

Someone with a surplus of good mares, either draft, standard or thoroughbred, and who could use in their stead an excellent draft stallion, imported, registered, and weighing well toward the ton mark, might stir up a most advantageous trade by addressing D. A. Baker, Hill P. O., San Diego County.

VERNA McKINNEY (2) 2:13.

While the folks in the vicinity of the valley to of Dixon pay the greater portion of their attenti nowadays to the production of those very importa and highly profitable B's, Barley and Butterfat, se eral of their number still have the time and inclir tion to breed a few trotters and pacers, and every often these birds go out and bring home a little mo renown for the neighborhood. The most persiste offender against the peace and dignity of the co munity in this respect is one James W. Marsha who has managed to squeeze his name into the re ords as the breeder of quite a number of most exc lent horses, several of them with records conside ably under 2:10. For more years than we can sta offhand, Jim has been dragging down his share fro the secretaries of the local race meetings, and son of his horses have gone east and "gotten theirs" the most select kind of company on the Grand C cuit. His latest comer to fame is the two-year-o pacing filly Verna McKinney (2) 2:13, whose phot graphic likeness appears on this page, the pictu having been taken in midsummer at Pleasanton.

This little lady is a mighty likely pacer, and addition to being a nicely bred lassie and a futuri winner here in California, enjoys the distinction being the season's fastest two-year-old pacing fill her record having been taken in the second heat that hot little horse race at Pleasanton on the fin day of the season, a race that occupies a uniq position in the summaries of the year's best pe formances. In the first heat, Rico set the seas record for two-year-old pacing colts; in the secon Verna McKinney performed a similar feat for h age and sex, and if there were any two-year-old pa ing fillies (or colts or geldings either, for th matter) who paced a third heat faster than that o won by Julia M. in 2:13¾, the same have not be called to our attention.

Verna McKinney is the first standard perform to be credited to the great race horse and risir speed sire, Vernon McKinney 2:01½, owned by Ro ney McKenzie and maintained permanently in ser ice at that gentleman's famous establishment Pleasanton, while she is the second good one to raised by Mr. Marshall from her dam, Ramona Demonio 2:11¼, the other one being the fast pac Del Rey 2:03¾, who made good on the Grand Circu for Walter Cox after one of that gentleman's patro had paid a round ten thousand dollars for him. T productive maternal line does not stop with Ramon either, as her dam, Carrolla by Steinway (3) 2:25 gave birth to the sterling pacer Ben F. 2:07¾.

Verna was developed and given all of her educatic by Messrs. Sutherland & Chadbourne at Pleasant and was driven to her record by the junior member that firm, the only occasion upon which she h been out of that stable being here during the expo tion race meeting, when she was driven by Loren Daniels, winning the Breeders' Futurity and pacir two heats over the slow exposition track in 2:13 2:13¼, Mr. Chadbourne's services being require elsewhere for the moment.

Given fair luck in the meantime for the variou youngsters that are at present eligible to them, wha great contests the three-year-old pacing events he in California should be this coming season!

VERNA McKINNEY (2) 2:13, BEST TWO-YEAR-OLD PACING FILLY, 1915

NOTES and NEWS

Merry Christmas!
And also a Happy New Year!
Cherish all your friends.
Forgive all your enemies.
And start all over again for 1916.

◈◈◈

Allow us to suggest moderation in all things, however, even in swearing off.

◈◈◈

One of the greatest safeguards against violating all of those New Year's resolutions is:

◈◈◈

Just naturally don't make 'em too darned numerous! a few moderate ones are all right in their place, but——

◈◈◈

It was the last heat that the colt got beat in, so don't go too many. There will be other New Year's Days, or——

◈◈◈

If it should happen that there are no more, we will all be where it will make no difference with us, so there you are!

◈◈◈

And just because you yourself happen to be having a mighty good time today, or this time next week, don't think the colt will not appreciate the customary feed and water.

◈◈◈

Dr. I. L. Tucker of Oroville is offering two well bred young horses for sale, both with their speed well developed and fit to prepare for the races of the coming season. They are priced to sell and full particulars as to breeding, etc., will be forthcoming to all parties inquiring for same by letter or a personal call on the Doctor.

◈◈◈

The inaugural meeting of the Lower California Jockey Club begins next Saturday, New Year's Day, at the new race track at Tia Juana, and a large delegation of San Francisco race goers and sporting men are laying plans to be in attendance when the bugle blows for the first time. The plant is in readiness for the event and recent visitors to southern California report that it is a very well fitted up and commodious one, with very good transportation facilities from San Diego and Los Angeles. The last of the horses trained in this vicinity will leave early this coming week and the promoters are assured of plenty of entrants for their events.

◈◈◈

Charley Silva recently had the great misfortune to lose his packing plant through fire, the flames making a complete sweep of the ultra-modern establishment where the butchering for his numerous markets was conducted. Immediate steps were taken for the construction of a temporary plant for taking care of the business, and early in the year work will be begun on a new and permanent affair to cost in the neighborhood of $60,000. From a very modest start some years ago, Mr. Silva has built up the largest butchering and packing business in the Sacramento valley, and it will not take him forever to make back what the fire has cost him.

◈◈◈

Mr. and Mrs. Harry Dowling, who for the past three years have made their home at Woodland, where Mr. Dowling was superintendent of Woodland Stock Farm from the time of its purchase by Mr. Considine until its sale a few days ago, left early in the week for their old home in Canton, Illinois, where they will spend some time with friends and relatives and enjoy a well earned little rest. Both are hard workers and devoted every energy to the furthering of the Considine interests while at Woodland, and take back east with them the best wishes of many newly made friends. Mr. Dowling's plans for the future have not been made public, but he will not long be idle.

◈◈◈

Mr. and Mrs. William G. Durfee, who have been making their home, temporarily, at the Matsonia Apartments in this city ever since along in October, departed for the sunny south this week, taking to the open road in William's gasoline space annihilator. They did not intend setting any new records for the San Francisco-Los Angeles run, as they have too many friends along the way, but expected to arrive home in time to get the house warmed up and put in shape to celebrate Christmas. San Francisco has seen a little more of the Durfees this season than usual, thanks to the exposition, and their circle of local friends has been materially increased during their visit. Their departure was postponed from time to time, as they were enjoying themselves thoroughly here and would have continued to do so indefinitely, but William plans an invasion of the Grand Circuit next season with a pretty strong stable of trotters and pacers and decided that January first was about the limit of time that his candidates could go without requiring his personal attention. From now until spring he will have his hands full, as in addition to the horses that will make the eastern trip he has a big draft of futurity candidates to go over, and will probably fit a second string to race over the tracks of the California fair circuit during his absence.

The Vernon McKinneys are "up and coming" and one of the nicest of the tribe is offered for sale by J. L. Chandler, Lincoln Hotel, San Francisco. The youngster was foaled in 1913, is sound and promising, and is out of Poinsetta 2:25 by Star Pointer 1:59¼, grandam the dam of Charley D. 2:06¼. He is right all round and priced to sell.

◈◈◈

E. Lovell, the wide-awake superintendent of Ansel M. Easton's Blackhawk Stock Ranch at Burlingame, has been covering a great deal of ground since the close of the exposition, selling or placing for service a number of the establishment's prize winning imported draft stallions. The Blackhawk horses were one of the prime attractions throughout the exposition, and made friends from many sections, so that Mr. Lovell has found little difficulty in consummating some exceptionally nice deals. One of the latest sales reported is that of the good sire Anwick Arthur 29025, who goes to a Salinas syndicate, and whose services should prove of inestimable value to the draft horse stock of that section.

◈◈◈

According to reports in the New Zealand turf papers, the California stallion Logan Pointer, taken to that country this summer by Mr. Freeman Holmes of Christchurch, has been accorded the best stud patronage that ever fell to the lot of an imported American stallion in his first season. There is a reason for this, of course, or several of them to be exact, as Logan Pointer is just the cut of a horse admired for harness racing purposes, and has the greatest speed inheritance of any horse ever exported from this state to the antipodes. American friends both of the horse and his new owner will watch his stud career with interest and confidently believe that he will prove one of the greatest progenitors of speed in Australasia.

◈◈◈

Last winter and spring Bert Webster handled among others for Mr. A. W. Longley the five-year-old pacing stallion Pedlar Direct, by Baron Direct and out of a Pedlar mare, the lad showing himself to be possessed of quite a bit of speed but hardly being considered up to taking in the trip down through the central west where Bert was headed. Consequently he was turned out for some months during the summer, being taken up late and brought along slowly by Mr. Longley and Henry Smith. They gave him brush work until a quarter around a two-minute gait was well within his capacity, and then began building him up for the longer routes. He has not yet been asked for very much, but is taking well to the system as a few days ago Henry worked him an easy mile in 2:30 with the last quarter in 30¾ seconds being by no means extended. All the Longley colts are doing very nicely and their owner is looking forward to the day when he can participate in the activities of the California circuit.

◈◈◈

Clinton A. Harrison, who came down from his haunts in the high hills and big timber of the Puget Sound country long enough to wind up the affairs of Woodland Stock Farm, was a fleeting visitor in San Francisco early in the week. The hard work of the last several days had put him a little to the bad again in a physical way, the old injury to his back taking advantage of this most inauspicious occasion to make itself manifest once more, but the effervescent Hibernian was in such high spirits, mentally, that friends began to suspect that he had inside information into the matter of the eventual freedom of the peoples inhabiting the Emerald Isle, a freedom which is, according to the book, "a consummation devoutly to be hoped for." Once started into the matter Mr. Harrison made short work of settling all the loose ends of the affairs of the Woodland corporation, disposing of the property to a good advantage and then making a bee line for Christmas dinner in Seattle.

◈◈◈

Information is gleaned from a recent number of the Butte Miner to the effect that "work will start tomorrow, and it is expected finished by February, on the first moving picture house ever established in the district formerly referred to as 'the flat,' on Harrison avenue close to the Bennett store. The building will be erected and owned by Kroffgranz & Frank and on its completion a lease of the building will be taken over by Charles F. Hayes. The theater, which will be known as the Englewood theater, will be managed by Mr. Hayes with the assistance of Mrs. Hayes, who has been actively connected with the management of the Lyric theater on East Park street and which theater will continue under their management." Save for the fact that very important private information is in the possession of the editor of this publication it would seem hard to trace the source of this item's interest for our readers, but the mystery is quickly cleared up when we impart to you the secret: "Charles F." is none other than the business alias of our old friend and former fellow citizen Ted Hayes, and we can go farther and tell you what the "F." stands for, the same being "Fonda," an appellation hugely redolent of the Iowa neighborhood in which, rumor hath it, he spent his green apple and swimmin' hole days. The Miner goes further into details, which establish the new theater as being in a class of its own among northwestern picture houses, and his legion of California friends will wish Ted the very best of success in the new venture, not forgetting to couple Mrs. Ted in the betting.

Arthur C. Thomas, sales manager of the Houghton Sulky Co., Marion, Ohio, offers some attractive bargains to persons wishing to enlarge their library of trotting horse works of reference. Partial sets of the register, year book and Wallace's Monthly are included in the list, as well as a large assortment of miscellaneous character, the prices being made very cheap for cash sales, or responsible parties may arrange to get the books desired on partial payments.

◈◈◈

Warren Dennis, the Idaho trainer who makes things hot for the boys in the north and central west every season, is wintering a dozen head at his regular quarters at Rexburg, and is confident that in some of them he has some coming great performers. Warren's principal patrons are Hamilton Brothers of Sugar City, Idaho, who owned the great pacing mare Ovieda 2:05 that died very suddenly last season while the stable was down in Nebraska. Ovieda was the best pacing mare that the northwest has produced in a long, long time and her death was a hard jolt for both owners and trainer, but they have a pair coming on that will help fill the vacancy, a full brother, Bob Fitzsimmons Junior, and a full sister, Bobonell, both being by Bob Fitzsimmons 2:07¾ and out of Miss Otta 2:11½ (dam of Ovieda, etc.) by Willowood 15751. Hamilton Brothers also have another real good pacing prospect in Mr. Dennis' hands in the person of the three-year-old Oregon Hal (3) 2:21 by Hal B. 2:04½, dam Brownlace by Lovelace, the youngster being about the fastest of all the Hal B. tribe for one of his years. At Davenport he was separately timed in a race in 2:08¾, and Warren will get him ready for another try for the money in 1916.

———o———

COUNTRY BELLE WINS NEW ZEALAND CUP.

On the same calendar day during which Major Ong was cutting the exposition track record to 2:04¼, the greatest stake of Australasia, the New Zealand Cup, was being contested at Addington, Christchurch, New Zealand, before a very much larger crowd than was on hand to see the Major's sizzling mile. Here it was nearly winter, there it was well along in the spring. Our meeting was a betless one, and on that day at Addington the "tote" turnover was £40,251, the amount wagered during the three days of the meeting aggregating nearly three quarters of a million dollars. Photographic evidence shows great crowds present in stands and clubhouses, as well as on the lawn and infield, eloquent testimony of the popularity of trotting in our neighboring commonwealth. The Referee describes the race for the Cup as follows:

The New Zealand Cup next claimed the attention of the public, and the fifteen horses for whom the final payment had been made all went to the post. Admiral Wood, who was coupled on the totalisator with his stable companion, Manderene, was made favorite, but Our Thorpe received almost as much support, while Adonis and Frandocia were also very solidly backed. Frandocia's track work had been done in most convincing style, while both he and Adonis have shown themselves useful performers in heavy going. There was no actual mishap at the start, but several of the competitors were quickly out of court. Manderene collided with Adonis before they had gone a chain; St. Ursula, Frandocia and Wallace Wood would not settle down to their work properly, and Our Thorpe lost a lot of ground by beginning slowly, leaving the mark after the scratch horses. Eccentric, always a good beginner, at once set out to make the pace, with Don Caesar next. Eccentric led for a little over a mile and a quarter, but then retired beaten, and Don Caesar was left in charge. Country Belle, who had begun in brilliant style, went in pursuit of the leader, and quickly had his measure. She was in front two furlongs from home, and though Our Thorpe and Jingle finished well, they had no chance with the scratch mare, who won very decisively. Our Thorpe stayed on very well , but he was beaten by a pacer of exceptionally good class, and Jingle, although finishing well could not reach with either of those in front of him. Don Caesar ran a very good race for a mile and three-quarters, but evidently found the distance just a little beyond him. Admiral Wood, who finished fifth, showed a lot of pace in patches, but he did not settle kindly to his work, and a race such as the New Zealand Cup is not one in which a horse can afford to make mistakes. Country Belle, who was bred by her owner, finished second in last year's New Zealand Cup, and her performance a month later in the New Brighton Cup, a free-for-all race, which she won in 4 min. 32 2-5 sec., stamped her as one of the best mares the Dominion has produced. She was driven a capital race by A. Hendricksen, who was behind Albert H., the winner of the race in 1912. Winners of the race are:—

Yr.	Winner and Driver	Hcp. Sec.	Time. m. s.
1904	Monte Carlo (B. Edwards)	7	4 44 3-5
1905	Birchmark (D. J. Price)	1	5 17 3-5
1906	Belmont M. (G. Milsom)	4	4 46
1907	Marian (J. Tasker)	9	5 16 2-5
1908	Durbar (A. Pringle)	scr	4 36
1909	Wildwood Jr. (W. Kerr)	5	4 39
1910	Wildwood Jr. (W. Kerr)	scr	4 33
1911	Lady Clare (J. Brankin)	4	4 38
1912	Albert H. (A. Hendricksen)	8	4 48 4-5
1913	Ravenschild (N. L. Price)	6	4 35 3-5
1914	Win Soon (A. Pringle)	6	4 31
1915	Country Belle (A. Hendricksen)	scr	4 35 3-5

World's Record to the Close of 1915

TROTTING

½ mile—Uhlan, bl g, 7, by Bingen (1911) (to wagon) :56¼
1 mile—Uhlan, bl g, 8, by Bingen (1912)..... 1.58

The Santa Rosa colony has received a welcome addition recently in the shape of the stable of Keefer & Spencer, who will winter there and get ready for the coming season's racing, also placing in service at the fair ground there the good son of The Exponent, The Proof 2:10¾. A public training stable will be conducted under the especial care of Mr. Spencer, well and favorably known among western horsemen as the trainer and developer of such good race goers as Bernice R. 2:07¼, Prince Lot 2:07¾, Glenrose 2:07¼, Aristo 2:08¼, Kid Cupid 2:08¾, Nada 2:09¼, Bonnie Ansel 2:09¼, Nuristo 2:10¼, The Proof 2:10¾, Laura Rodgers 2:11¼ trial 2:06¼, Bonnie Princess trial 2:07¼ and numerous others of lesser note. All of these were "made" entirely by Mr. Spencer, who has also won about all of the local colt stakes at one time or another, and who has very seldom been behind the money with a starter in these classics.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

HOW A RIFLE IS SIGHTED.

A rifle that will shoot into a dinner plate at 500 yards for a score of shots, and a set of sights that are cruder than those used on the ancient crossbow—this is the modern military rifle and its equipment. The simplest form of rear sight in the world—the quickest to catch, and the most accurate to use, is a round hole in a plate close enough to the eye to save searching for it when the rifle is thrown to the shoulder. But two rifles of the world's military rifles are so fitted. One of these, the rifle of the American service, has the principle applied in so faulty a manner that for fighting the peep is nearly useless. It is set too far from the eye, and it is too small in size.

The sights on a rifle are necessary, first to allow the firer to see over the elevated muzzle, second, to align the weapon accurately on the mark. Regardless of distance from the gun, if the mark is to be hit, the muzzle of the rifle must be pointing higher than the thing to be hit. At 1,000 yards the bore—the line of the barrel—is actually pointing 40 feet above the target. During its flight the bullet falls this distance and hits the mark. This is true of the present Government rifle, but in the case of the old black powder .45-70, the barrel was actually pointed 175 feet above the mark at 1,000 yards.

By raising the rear sight, the rifleman can see over the raised muzzle, and when the front sight is put into the proper relation to the mark and the rear sight, the rifle is pointed the correct distance above the target to overcome the effect of gravity, and still the rifleman is aiming at the target over his line of sights.

When the Government rifle is sighted for 1,000 yards, the rear sight is roughly 5-16 inch higher than its position for 100 yards, and the muzzle of course has to be raised that much to bring the front sight again into line with the rear.

At this thousand-yard range, an error in the alignment of front and rear sight of just 6-1000 inch—six one-thousandths—will make an error at the target of 10 inches. In other words the rifle pointed at the center of a man's body would miss him if the error of 6-1000 inch were made laterally, sideways. Four times this error in aligning the sights up and down—24-1000 inch—would put the bullet above or below the soldier if the sights were pointed for his middle and the rifle were sighted to hit there when normally aimed.

This is the reason why the impracticable rifle shooters demand peep sights. It is the reason why the protests of thousands of American military rifle target shooters compelled the Government hastily to install an after-thought peep on the Krag Jorgenson of one model, why our Springfield has a peep, and why the Canadian Ross has a peep sight set in the correct position close to the eye, not true of any other rifle in the world that is intended for the fighting man.

The open sight is merely a bar with a notch cut in it, set usually near the rear end of the barrel. When the front sight is drawn into the correct position in this notch, and then the front in turn is placed in the correct relation to the mark, the rifle is sighted correctly. Unhappily this process entails optical impossibilities, and a compromise, more or less satisfactory, has to be used with the open form of sight.

The mark, the front sight, and the rear sight lie in three different planes. The eye sees no two of the three sharp at the same time. The rear sight, for example, lies say 15 inches from the eye, the front sight 30 inches, and the mark a distance measured in yards. So the unhappy user of the open sight has to make his eye leap sprightly from one sight to another and then to the mark, the muscles of accommodation altering the focus of the eye for each one as one alters the focus of the lens of a camera for varying distances.

Normally the shooter sees the rear sight sharp for an instant, as he draws the front sight into the notch, then trying to hold the front sight in its correct position, he focuses on the front sight and puts that against the mark, and then focuses on the mark. By this time the rear is very blurred and fuzzy because the eye is not in focus for something 15 inches away, but for infinity of distance. The great change, of course, is from front to rear sight, because changing in focus for an object 15 inches to one of 30 inches, is a far greater strain than changing from 30 inches to 300 yards.

Not only do old eyes, with stiffened muscles of accommodation, fail to get accurate results with open sights, but young eyes cannot do the work with the open that they can with the peep. Into this list must be added the further evil that an excited man will not stop to draw the front sight into the right position in the notch of the rear sight, but will put it merely into approximate position, and let fly. It is an eye strain, and a slower method than the peep, but still the Continental authorities cling to this crude sighting method.

The peep sight, on the other hand, depends on a sound optical principle for its usefulness, and that the principle is sound is proved by too many years of the use of this form of sight. Crossbows dating clear back to the 14th century show peep sights as part of their equipment, one example belonging to an English nobleman, showing five different peep holes, one above the other for different ranges.

The light in the center of the round hole close to the eye is stronger than the light around the edges, and the eye, if left to itself, goes to the center of this hole every time. Queerly enough, if the hole in peep is about the size of the iris of the eye, the rim surrounding the hole in the sight nearly disappears from view, even though it be 1-16 inch thick or even more. The well-known Lyman sight for sporting rifles illustrates this latter form.

If the rifle is such and the peep is so arranged that it can be used close to the eye without recoil endangering the shooter's face, a very small peep, 3-100 inch across, can be used, and still allow a perfect view of mark, around it, and front sight. Here it is like looking through a pin hole in a sheet of paper against the eye.

In using the peep set in proper position with relation to the eye, it is utterly ignored and is seen no more than a person sees the frame of the window through which he is gazing. The eye goes to the center of the hole if left alone. So the problem of our rear sight is immediately solved, the shooter has left only the front sight and the thing to be hit. Also not only does the shooter ignore the peep, but he does not have to fight with a blurring image of the rear sight in his endeavor to shoot accurately. So our gain is two-fold, quickness in sighting and accuracy in sighting, to say nothing of the relief given to men with defective eye sight, or with the failing eyes of age.

The shooter's problem is resolved to the simple one of putting the clearly seen front sight in the correct relation to the mark. He has no more worry over seeing through the rear sight, once his head is in the correct position, than he would have did no rear sight exist.

But one military rifle correctly solves the sighting problem, and that is the Canadian service rifle, the Ross Mark III. Here the rear sight is set back on the bridge at the rear end of the receiver, and is hardly 3 inches from the eye.

Normally the sight lies flat on the bridge, when a large "U" shaped notch forms the sight, and gives the rifle about 400 yards of range. This is the "battle sight," used at close range in a very great hurry.

When the leaf is raised to the vertical, a plate carrying the round peep hole is exposed to view. Above the round hole is another U notch for occasions when the peep cannot be used, such as very bad light and badly defined objects. For target shooting considerations the hole is very small, about 6-100 inch, and in poor light the rifleman cannot always use it. It would be more practical for sighting if opened out to a tenth-inch diameter. As it is, however, it is so near the eye that the rifleman sees through it without effort in ordinary lights.

The other rifle fitted with a peep, the new Springfield of the American service, loses all the virtues of the peep by the sight being set too far from the eye. With the largest size hole but 6-100 inch, the sight is perched on the rear end of the barrel, about 10 inches from the eye, and only by strain and care can the small hole be seen, and the mark caught through it. It is not practical for fighting, particularly in bad light, or on neutral colored objects. The peep is somewhat useful for target work, even a poor peep being superior to an open sight.

All other rifles of military type use open sights well up the barrel, the notches cut either U or V in shape, usually the latter. Just as the peep sight is more efficient when close to the eye, the open is cut clearer when set a distance away, being then nearer to the focal plane of the front sight and the mark. Although the open military sight is seen more clearly when it is set a good distance from the eye, it cannot go too far away because then the distance between the sights is cut down, and errors are increased in the same proportion, on the target.

The German Mauser sight is known as a ramp sight. It is a leaf hinged at the forward end, and lying flat on the barrel. A ramp or inclined plate lies between the bars of the leaf, in one model. When a locking button in the sight is released by being compressed between thumb and finger and is pushed forward up the ramp, it carries the sight leaf upward, giving elevation for the various ranges, which are marked on the side of the ramp. The sight locks itself when the button is released.

The British sight, aside from being the old crude type, is the best of all the fighting rifles. The open feature could be altered at small trouble, and a peep provided.

Pushing the elevating bar forward up an incline gives elevation, the ranges being marked on the leaf of the sight that normally lies flat on the barrel. A wind gage is provided, and by means of a fine worm

A BUNCH OF CANVASBACK AND SPRIGTAIL.

Feathered Dividends Declared by Green Lodge Overflow Pond, on the Suisun Marsh. Not Once But Many Times During Past Hunting Seasons.

screw, the fine changes necessary in long range target shooting can be made between the coarser yard graduations. Saving the feature of being an open sight, it is probably the most practical of all outside the Canadian back sight.

The American Springfield sight has grave errors, being neither a practical military sight nor an efficient target sight.

When the leaf is raised vertically for use, it is exposed to blows, and is more or less in the way. Standing vertically, the green soldier perceives a notch of U shape, cut in crossbar of the leaf, and good for 2,850 yards, then below that another notch in the side, and below that a triangle milled out in the plate of the slide, and a third notch cut in that. If the range is 500 or 600 yards, raising the slide leaves an irregular shaped hole between it and the base of the sight, through which the rookie invariably proceeds to aim. So the green man has in front of him three different notches, a peep, and possibly a hole between slide and base that looks as if it might be intended to aim through.

When the sight leaf is laid flat on the barrel, the battle sight is in view, a notch of U shape, sighted for 530 yards. This is one of the most brilliant features of the rifle, a sight carefully designed to do away with all the virtues of the flat trajectory of the very modern army rifle. Being sighted for 530 yards, the rifle shoots more than 2 feet high at 300 yards, and the soldier is told to aim that much low. Inasmuch as the soldier is not disposed to judge distance carefully in the heat of battle, and inasmuch as a battle sight is supposed to be a sight with which you can hold on the enemy regardless of his range if he is within its scope, the American battle sight is carefully designed to put the entire sheaf of fire over the enemy at the most useful range.

What should be done, is to sight the rifle with this battle sight—an emergency sight we might call it—for 400 yards, when the bullet would rise nowhere more than 10 inches higher than the line of the sights and the soldier could then hold on his foeman at any range up to the 400-yard limit of this sight. This is utilizing the flat shooting of the rifle as it was intended to be utilized—that is, letting the very flat flight of the bullet take care of all errors in range estimate, and so make range estimate unnecessary up to the limit of the battle sight. To hold high or low for various distances is to get back into the class of the most old fashioned, slow speed, high trajectory rifles, where one had to hold high or low or change sight setting to compensate for the fall of the bullet.

A flat trajectory modern rifle means that the bullet flies nearly as level as a stretched string for a certain distance, because of itsh igh speed, and so long as this rise and fall of the bullet in getting over a certain range does not become enough to miss a prone man, then that range is the battle range, and the sight should be adjusted to shoot to center over it. Then if a man is nearer, the bullet still does not get high enough to miss him, and the soldier merely holds on his mark at any range within this limit.

When, because of its high speed, the bullet from the German Mauser does not have to rise higher than 20 inches to hit the center at 500 yards, then the battle range and the battle sight of that rifle is nearly 500 yards long. Up to that distance the sight setting does not have to be changed, the 500 yard setting catches nearly anything in between.

And, as pointed out, the most practical form of such a battle sight would be a large peep, set on the receiver bridge of the rifle so that the soldier could merely put the front sight on the mark and fire after he had once glanced through the peep to make sure that his eye was opposite it.—Scientific American.

DUCK HUNTING NOTES.

Wild fowl shooting on the Suisun marsh preserves for the past three weeks has been the poorest in many years. The birds—sprig, mallard and teal—have gone to other more congenial feeding and resting grounds. Last Sunday the combined bag for the whole marsh—inside the railroad tracks, did not count up 75 birds, mostly spooneys at that.

One reason given for the present scarcity of ducks is that there is too much shooting. Usually the Suisun clubs shot two days a week, Sundays and Wednesdays. Recently the bombardment has been almost daily. Even keepers on several of the preserves have been kept busy on the odd days to bag a few ducks for a return-to-town showing of inconsiderate gunners, it is claimed. Some of the old timers have called quits for the season, shooting conditions have become so unreliable.

In reference to these persistent shooters, out any old time, it may be charitably said that undue eagerness and enthusiasm really carried most of the sinners out of the regular path of sportsmanship, rather than any premeditated plan to either get more ducks than the law allows or to jeopardize the enjoyment of their fellow sportsmen.

Good duck shooting has been the rule in the upper portions of the Sacramento valley recently.

W. K. Brown, manager of the Moulton Irrigated Lands company at Colusa, reports that the duck shooting has been good the past few days around Colusa owing to the recent high water. During the late freshet the Sacramento river ran through the Moulton break on the east side of the river and flooded the farm lands below Colusa and along Butte slough. The deep water of course has somewhat spoiled the shooting on the gun clubs' premises.

MARTHA LEARNS THE TRICK.

Day before yesterday Jim Milburn, my next door neighbor, announced at luncheon that he had caught his last fish with a common rod and line. "Martha," he said, "I've bought a reel and I'm going to show you some true sport. Be ready by 5, and we'll go to the lake. Let all the kids go, for I'm very anxious to make good sportsmen of them and it's never too early to begin." Enthusiasm reigned, for the children didn't often get to go fishing with Daddy and one of Martha's pet theories is that fishing induces patience; so, feeling the need of this quality in the management of her family, she was quite elated over this opportunity to cultivate it.

Everything went well, and by 5 they were off in the old surrey, with the poles sticking out behind and the children so hilarious that the neighbors came out to see what was going on. Bobby had dug a gallon of earth worms and took along a net to dip minnows for extra bait, and Jim allowed Martha to take care of his new reel while he drove.

On the edge of the lake, near the landing, a number of rowboats were tied. "Now folks," said Jim, "we'll fish from the ends of these boats, so we can cast farther out. You know only the tiny fish come into the shallows among the reeds. Martha"—indicating a somewhat broad, flat bottomed boat—"it would be well for you to step into that; it's not so tippy as these others. Helen, Bobby and Charlotte can take these smaller ones and Jerry can sit on the landing close beside you. I shall take the one beyond the landing." So began the first lesson in true sport.

A BRACE OF TEAL
Suggestive Of Keen Wingshooting Sport In the Los Banos Country—Now Only a Memory.

Martha had some difficulty in reaching the end of her boat, for she is growing heavy, and even a raft will tip under sufficient provocation; but at last she got settled and put out her line. She was soon oblivious to surroundings. Patiently, intently, she waited—expecting each moment to experience that delicious thrill which runs up the rod, through the arm and into one's heart—a nibble! But it did not come. Slightly frowning, she examined her hook and found the bait gone.

"Oh, Mummy!" laughed Bobby, "you didn't get any bait. Here! Swing your line around and I'll put on a minny." She swung it around and it caught in the boat chain. Helen laughed and Martha started up to release it. "Sit still!" hissed Jim (who was busily getting acquainted with his new tackle)—"I'll get it off. You folks make enough racket to frighten a fish to death."

"Jim," sighed Martha, her eyes on little Jerry's bobbing cork, "you're such a patient man."

Jim loosened the hook and tossed it to Bobby for bait.

"There she is," whispered Bobby, and, without looking around, Martha gave a strong cast, and Bobby gave a yell. The sight of the poor laddy's torn fingers so upset poor Martha that she almost upset the boat. Fortunately, Jim still had his foot on the end of it and saved her life. "Stay where you are," he said sweetly. "I'll attend to the kid's fingers."

Her arms were wet to the shoulders and her rod was floating away, but Helen coaxed it back with hers, while Jim applied peroxide to Bobby's fingers. "Jim, dear," she said gratefully, "I'm glad you always carry peroxide. You are so prudent." He tied the fingers up and sent Bobby to sit in the surrey till he could be a brave sportsman and stop crying. Martha longed to cuddle her big boy and kiss his poor hurt fingers; but she felt it would be safer to obey her husband, so sat still. She sat still so long that when the coveted thrill finally came, a panic seized her and she gave a great heave. There was a wild chorus of shrieks as a large crawfish sought refuge on her back. Jim pounced upon the beast with such fury—Jim weighs all of 200—that the boat dipped again and they had to bail out the water. "Never mind, dear," he solaced her cheerfully; "you couldn't be any wetter, so you've nothing more to fear except drowning. You had better rest awhile and I'll show you how to cast with my new reel. A reel is the only thing, anyway: lands your hook out in the deep water, you know—no crawfish out there—and plays your catch in gradually, if he is a fighter, till you can use a net and land him safely where you want him. Some sport about a reel! If you catch on, I'll get you one tomorrow."

"Jim, dear," Martha smiled patiently, "you are so thoughtful of me."

Standing in Bobby's boat, he raised his arm and gave such a powerful cast that they all feared his hook would anchor in the bottom of the lake or on the opposite shore. It didn't. The end of the pole whipped the water furiously and—— "Huh!" he grunted. "Used too much muscle."

Ten minutes passed, while he painstakingly untangled the line from the reeds and wound it up. "Now, watch!" he whispered.

He stepped back a little, gave his wrist a professional looking twist, and—whiz! The hook dropped in the boat, at his feet! "Now what the —— Well, let's try it again."

This time he had to pull up a handful of reeds under the boat, to keep from breaking the line. As he wrung the water from his sleeves he smiled beatifically and suggested gently that his wife had better fish awhile, or she wouldn't have anything to show for her time, while he would see what in thunder had gotten into his reel.

Martha didn't have any bait; so little Jerry, who was dangling his legs from the landing and guarding the bait can, offered to bring her a worm. Fearing consequences, should he attempt coming to her, she told him to put the lid on the can tightly and toss it across. He hammered on the lid with his little fists and threw the can with all his might. Though

the can held a gallon and his arms are short, he is unusually strong and the distance was only a few feet. When the can struck her, the inevitable happened and it took fifteen minutes to gather up those precious, horrible, squirming, slimy things, which crawled in her hair, dangled in the limp ruffles of her old dimity dress and twined about her fingers when she tried to put them into the can. She gritted her teeth to keep from screaming; for she knew, if she so much as groaned, Jim would laugh and say: "Be a sport, old girl! Be a sport!" As it was, he didn't seem to notice, and she was congratulating herself upon this, when suddenly the air was electrified by a regulation swear word from her church-going husband. She flounced about so quickly that she barely escaped upsetting again. "Jim!" she cried, horrified—"Jim!"

"O Mummy! Mummy!" squealed Jerry. "De wums is all takin' a baf. Look at 'em thwim! One of 'em hath on a stwyped bavin' thuit. Lookee, Mummy! Thee him dive way down. Won't he dwown?"

But even the precious drowning bait failed to draw her fascinated eyes from her wild-eyed, disheveled husband, who was holding on to the end of his rod with one upstretched hand and frantically waving the other to keep his balance, while, with every lurch of the boat, his hook became more firmly ladged in the topmost branches of an old oak which stood a few feet back on the bank. "Somebody do something!" he yelled. "The line will break"

"Bobby! Bobby!" Martha called, fearing each moment to see her husband go headlong into the lake. "Go up and dislodge Papa's hook. Quickly!"

"I ca-an't!" wailed Bobby. "My hand hurts."

"I'll go!" piped Charlotte eagerly, "if you'll boost me."

Helen and Martha scrambled ashore and boosted. Charlotte is short, but quite as round as a bear and as clumsy, and it was only after repeated failures that they succeeded in getting her high enough to reach the first branch, and, when she straddled that, she could neither go higher nor come down, but clung there and screeched.

"Hold on there!" yelled Jim—"She'll fall in a minute. You come here, Martha, and hold on to this and I'll get her down. Don't let go or rod and all will be out of reach." She obediently crawled out to him, and, with his help, stood up, but it was only after several futile attempts that he succeeded in bringing the rod within her reach. She grasped it as if it were her last hope of salvation. "Stand still!" he yelled; but the more she tried, the more they both swayed, till finally they were holding onto that rod for dear life. Just then Charlotte gave an extra yelp and slid safely to the ground; the line broke and husband and wife lay sprawling across the boat, with their feet and arms in the water.

With some difficulty Jim rescued himself, and then, dragging her ashore, said soothingly: "Never mind, dear. We'll leave the darn thing in the tree and tomorrow I'll get some new ones. I've been reading those new flies: four hooks to a line and a different colored fly on each. If the fish don't like one, they're sure to select another. It'll be great sport! It's going to rain tomorrow and will be fine for fishing in the evening. We'll leave the children at Mother's. Plenty of time for them to learn later. You are rather wet, so we'd better get you home or you'll catch your death. But say, Martha! those flies are the bulliest bait! A fish couldn't resist them, they look so tempting."

Well, next evening there was a sure enough fishing drizzle—one of those gentle, quiet, warm, early summer semi-showers that keeps it up steadily, but softly, and doesn't seem inclined to stop until next week—that makes the fish rise to the bait as if it were their one object in life. In rubbers and rain coats they waded through the tall wet grass to a treeless spot, where the reeds along the edge were not too thick, and Jim handed her a handsome new reel. Her eyes glowed and Jim felt proud of himself when she ecstatically exclaimed: "Jim, I could fish in a tornado with this fascinating thing and never hear the clatter. And oh! those four beautiful flies are as natural as life!"

"Don't cast too hard," he admonished. "Watch me. Just give your wrist a quick twist, like this."

She saw the twist but her cap was gone forever. However, the flies landed so far out she didn't notice Jim's solicitous remarks or regret the cap, but eagerly tried the peculiar little twist. Now, how under the sun those flies got off the back way, crawled under her skirts and attached themselves to the top of her stockings, it is difficult to imagine; and she had to worry them out alone, for Jim was so intent on his own line that he was deaf and dumb and blind to all else. Those flies were true to fly nature in rainy weather. No sooner would one become unattached, than it would find a new place to settle! The only thing she could do was to keep each in her closed hand till all four were safely corraled. To steady her nerves and keep from wincing from the pain in her hand, she kept repeating to herself: "Fishing induces patience. Fishing induces patience."

The next cast was purely accidental, but a beauty, and they both sat in placid content, watching and waiting in the waning light, while the soft drizzle barely disturbed the water—waiting for the thrill.

"Jim," she whispered, "did any one ever catch four kinds of fish on one line?"

"Sh-h!" hissed Jim. "Never heard of such a thing."

"But I don't see why they couldn't," she argued. "Maybe we can if fisherman's luck runs high."

"We'll be lucky to catch one, if you don't keep still."

Five slow minutes passed.

"A catfish, a dogfish, a——"

Jim hissed. She chuckled. Five, ten, fifteen minutes more of drizzly silence.

"Dog gone it all!" Jim snatched out his line so suddenly that she grabbed hold of him, to keep from tumbling in, in her fright, and they both got their feet wet. "Now, what makes you so nervous?" he groaned. "Do you know what I forgot? The directions said these blasted flies must be well soaked before using, or the darned fish wouldn't bite."

"Jim, dear," she urged, "your language is shocking. But don't you think the flies are pretty well soaked?"

"That's so!" he ejaculated. "Well, let's mosey around to the other shore and try it there. Maybe we can fool the fish into thinking we soaked them before we came."

* * * *

Established on the other side, they cast again; but again the fiends of mischief seemed to possess Martha's flies, which so mixed themselves up in her hair that she had to take it down and pick them out. But she held on to her temper. "I dare not grow angry while fishing," she ruminated, "for the passion seems to be in some manner communicated to the fish and they only play with you. No! one must have patience. Fishing demands patience." So she patiently worked away while the deep, drizzly silence seemed to close over her head. She grew almost placid under it, when she was suddenly disturbed by a grunt. Hastily grabbing out the last hook with a number of hairs, she flung back her wet tresses, and, to her amazement, Jim was turning slowly around and around, looking about in a bewildered daze. She watched, in horrified fascination, thinking he had gone mad, till he began to mutter, "Where in tarnation are those —— flies! Where in thunder—!" And just then she saw and gave a screech which startled him into giving the line a strong pull—at which he let out a yell like a Comanche and grabbed the back of his thin Jersey. "Blast the luck!" he shouted. "Martha, you stop that howling and get these things out!"

She doubled up with agony, but the spasm soon passed; for she stepped on her own line and every one of those flies took an impish delight in attaching itself to different parts of her new rain coat. It was maddening. When she turned to extract No. One, No. Two came away with a section of the thin rubber cloth and settled in a new spot. This continued till, what with Jim's raving (never had she heard him use such language!) and six jagged rents in the rubber, she grew frantic, and, flinging off the coat, with her hands over her ears, cried out: "Get your old hooks out by yourself! I'll get a divorce, if you ever swear again!" And then she flopped right down on the soppy ground and bawled. Jim was stunned into silence and stood staring at her in such ludicrous fashion that her weeping suddenly changed to laughter and she laughed till the tears fell faster than ever. Then Jim laughed—a little uncertainly at first. She dabbed at her eyes with her wet dress and then he fairly roared—still holding on to the back of his Jersey—till at last she got up and took the hooks out for him and he picked up her coat, which was all in the water but one sleeve. And what do you suppose? There, on one of those perverse hooks, flopped a fish—a big fish—the biggest fish ever caught in our lake. I don't know what it was. They said it tasted like mud when they ate it for breakfast next morning, but Jim beamed seraphically upon the children and said: "Now that your Mother has caught on to the manner in which four flies must be handled, it's your turn, Bobby. If it drizzles tomorrow, I'll teach you the trick."—Exchange.

FISH LINES.

The season for steelhead angling in tidewaters of our coast streams opened on the 15th inst. and will continue until February 15. For the prior two years the season for tidewater sport closed January 1 and there was no limit on the catch. Under the present statute the daily limit is but two steelhead trout, size not counting—taken either with hook and line or with a spear, in district No. 2 only.

The curtailing of the winter catch of the big breeding steelhead, the natural and most reliable replenisher of the coast streams, and also the embargo placed on general net operations, will do more good in the line of keeping the steelhead waters stocked than anything else. How the unsportsmanlike use of the spear was permitted is a puzzler to the writer. It was no doubt in the nature of a placation to the "natives" in some sections.

Russian river bar was open and there was no doubt a run of steelhead from the ocean. The river on the opening day was high and muddy and has been in non-fishable condition since. Local anglers who visited Duncans Mills did not return weighed down with Austin pool prizes. However, the extension of the season for six weeks longer than last season will no doubt furnish ample compensation for the opening day's blank results.

Local rodsters who spent last Sunday on Paper Mill creek, at the White House pool, however, had great success. Del Cooper brought home a 12-pound steelhead, the largest for the day, while George Uri hooked the limit of two, one a 9-pounder. Among those who got the limit were Harry Thomson, H. Campbell, Moe Uri, Jim Andrews, Charley Arp and others.

Just what the conditions are down the San Mateo coast, in the San Lorenzo and other Santa Cruz streams, opposite on the Monterey side and further south to the Ventura river, the writer has not yet been advised.

Good catches of striped bass have recently been made in Napa creek near the railroad bridge and thereabouts. A week ago the veteran Al Wilson landed a 54-pounder. Wilson also made a 400-pound catch not long ago. One fisherman known as "Whitey" picked up a catch that scaled 600 pounds, which he sold for $58. Ed Howard's 200 pounds of bass was another recent notable catch.

Last Sunday good fishing was the luck of the Napa slough No. 2 and Backdoor slough anglers. In the immediate vicinity of Wingo and also at the San Antone slough fishing holes results were rather meagre.

AT THE TRAPS.

Vernon Powder Puffs.—Despite the fact that charity shoots were held in different parts of Southern California last Sunday and drew a large number of Los Angeles shooters to the fields and hills, the Christmas turkey shoot and the W. H. Wilshire trap shoot competition staged at the Vernon Gun Club was attended by thirty-two contestants.

High gun honors in the Wilshire contest went to Frank Mellus with a score of 48 out of 50. This was Frank's first trip to the Vernon traps and he didn't go away empty-handed. He never does, for that matter; he is too good a shot, and is Heine Pfirrmann's most bitter rival in the blue rock world.

The contenders entered in the turkey competition were put in squads of five with a turkey to each squad. Each event consisted of 15 targets and were shot at distance handicaps. A great deal of interest was shown and most every one was well pleased, especially those who copped a turkey.

Birds were won by George Oliver, Mrs. C. E. Groat, Harry Cline, Fred Grewell, Bill Dougherty, R. L. Hall, Dr. Packard, Stanton Bruner, C. White, Frank Mellus, Lou Mellus and T. P. Smith. The scores were as follows:

Wilshire Trophy—

	Yds.	Shot.	Bke.
R. L. Hall	19	50	44
W. Pugh	18	50	43
W. Hoyt	18	50	45
C. S. White	17	50	45
W. C. Dougherty	16	50	45
Fred Grewell	17	50	43
H. Cline	18	50	39
S. A. Bruner	18	50	39
Dr. Packard	19	50	44
J. Dierdoff	18	50	44
T. P. Smith	18	50	41
C. D. Hagerman	18	50	43
George Melford	17	50	40
Fred Mills	18	50	47
Frank Mellus	19	50	48
Lou Mellus	19	50	46
O. Evans	18	50	39

Turkey shoot scores—

R. L. Hall, shot at 125, broke 107, George Oliver 95—73, S. W. Trout 25—21, Wm. Pugh 65—58, H. Hoyt 85—65, C. White 150—110, W. Dougherty 95—71, M. R. Kees 85—66, Geo. Toussing 25—15, C. Shipley 70—36, Dr. J. E. Davis 70—39, Fred Grewell 110—91, Van Nest 55—33, George Cline 100—83, Harry Cline 95—73, C. E. Groat 85—65, S. A. Bruner 100—84, Dr. Packard 85—76, J. Dierdoff 45—38, T. P. Smith 30—27, Mrs. Groat 30—25, Fessler 60—47, C. D. Hagerman 45—38, Coffman 40—22, R. Stock-24, well 30—21, Geo. Melford 70—50, Frank Mellus 50—44, Lou Mellus 25—24, O. A. Evans 25—22, Tuckett 25—18, Geo. Middleton 25—18.

* * *

Venice Traps—Frank Mellus must have broken all records in getting to Venice, or from Venice to Los Angeles, it has not been completely learned yet just where and how. But, anyhow, he was also high gun at the turkey shoot staged by Fred Teeple at the Los Angeles Gun Club with a score of 91 broken targets out of 100 thrown.

Brother Lou was second high gun with 89 out of the century. Lou made a high run of 25 straight. The scores are as follows, at 100 birds:

Frank Mellus 91, Lou Mellus 89, Tuckett 86, U. M. C. Clement 84, Nichols 80, Middleton 79, Parker 74, Battle 61.

* * *

Winter Trap Shoots.—The Spokane Gun Club will begin a series of weekly shoots, commencing January 2. The main prize hung up will be a diamond trophy donated by Clark and Bevan of Spokane. Lady shooters will also compete for three fine prizes. Mrs. Charles A. O'Conner is captain of the woman's team.

* * *

Some Chicago Scores.—Sam Huntley recently lined 'em out for 171 straight at the Lincoln Gun Club grounds in Chicago. In the 100 bird event he broke straight. Hugh Poston hung up 93 out of the 100. Huntley and Poston both broke straight in the 25 bird event.

Drink Jackson's Napa Soda.

Sidelights on Professional Matters

REDUCINE PROSPERS IN NEW HOME.

There was a time not many years ago when Reducine, Ireland's premier remedy for lame, sore, worn and blemished horses, was imported to this country and marketed as best it could be; then came the time when it was prepared in a small way in New York city, followed a few months later by the removal of the American plant to a brand new home in Otsego, Michigan, and here the famous "humane treatment" has flourished amazingly. Never since it first came into general use on this side of the Atlantic has its efficacy been questioned among knowing horsemen, and with many of them the firing pin has been entirely banished since they became fully aware of the possibilities presented by the use of Reducine. Bowed tendons, curbs, thoroughpins and like afflictions to which the horse is heir and for the cure of which the iron was once considered indispensable, all yield to treatment by Reducine, as do any number of other equine afflictions, as well as many disorders of the human system. Around house or barn it will be found of inestimable value, and once used becomes a permanent member of the household kit for first—and continued—aid to the injured.

The new home of Reducine is complete in every way for its manufacture under most economical and efficient conditions, the plant at Otsego, where the facilities afforded by nature are of the best and purest, is a model among its kind, and horsemen and their friends from all parts of the world are invited to pay it a visit when in that portion of the country. In the meantime the Reducine booklet should should be in the hands of each and every one of them and is free for the asking. Mention the Breeder and Sportsman when you write for it.

OWE THEIR SOUNDNESS TO GOMBAULT'S.

How many horses there are in the world today who owe their soundness, either by prevention or cure, to the fact that their owners had the "savvy" to adopt the use of Gombault's Caustic Balsam as soon as their troubles began to manifest their existence. For many years this famous French compound has been imported and distributed in the United States and Canada by the Lawrence-Williams Company of Cleveland and Toronto, and so thoroughly has it been disseminated throughout the lands named that there is scarce a country store in a community where livestock is produced in any quantity at all that does not carry at least a few bottles of it always in stock. Its simplicity of application, its economy, its efficacy and the ease with which it may be obtained have combined to place it foremost among the great veterinary remedies of the world. Only common sense and adherence to the instructions are required for its successful application to any cases of founder, thrush, diphtheria, ringbone, pinkeye, sweeney, spavin, quarter cracks, scratches, poll evil, splint, capped hock, strained tendon or kindred ailments, and it is an accepted fact that users of Gombault's have the least of veterinary bills to pay. Ask your dealer for it, if you are one of the few who have yet to learn of its good qualities.

TWENTY-ONE YEARS OF SUCCESS

is a brief summing up of the record of the great distemper preventative and cure known to horsemen the world over under the name of Spohn's Compound, and which for that period of time has been manufactured and marketed by the Spohn Medical Company of Goshen, Indiana. Early in life Dr. Spohn was thrown into direct contact with circumstances that rendered it imperative that he learn and apply every practicable course for the safeguarding of the health of horses and other purebred livestock, as well as to cure them from infectious and contagious diseases once the same had been contracted. To the ideas he was enabled to gain from the teachings of his elders he added those gained by his personal and painstaking researches into the secrets of animal ailments and their prevention or cure, the result being the great remedy herein alluded to. At first manufactured in a very modest manner and marketed only in the neighborhood of the Doctor's home in Indiana, its genuine merits soon made it known throughout a much wider territory, with the result that today it is accepted as one of the standard remedies of the veterinary world. First purchased by the horseman or stockman as an experiment, or in desperation from having tried other "remedies" with little or no success, it soon becomes indispensable about the stock farm, training stable, sale yard and kennel, its introduction being an unfailing guarantee of its continued use. Its cost is but a trifle when the results attained are given consideration, and it has been found unrivalled in combating colds and coughs and all their kindred diseases and complications.

Buy a bottle against the time when you may need it, and when you go to use it, take this tip from one who has been there before: "Don't forget the paddle."

PRIZE AWARD FOR NAMING NEW MODEL.

The $10.00 prize for the best name for the new Model 80 jogging cart of the Houghton Sulky Co. has been split between J. C. Moreland of Osage, Ia., and Harry J. Snyder of Oregon, Ill., who both suggested the name which was selected, namely, "The Masterpiece."

The Houghton Sulky Co. asked us to thank its hundreds of friends who sent in suggestions.

"The Masterpiece" is the name that strikes a responsive chord, because the Model 80 cart is so well "hung" and all masterpieces are supposed to be well "hung."

There is quite a story which goes with the construction of The Masterpiece. Last spring a prominent trainer who was not one of the regular Houghton boosters came to the factory of the Houghton Sulky Co. and told Mr. Houghton that he wanted to have a special jogging cart constructed along the lines of the Houghton Model 8, but with certain improvements incorporated.

The Houghton Sulky Co. turned out such a cart and it proved so satisfactory that horsemen everywhere began to talk about it, and Mr. Houghton decided that it would be a good stroke of business to use the cart as his 1916 model.

The owner of the cart was therefore requested to send it back to the factory and it was carefully investigated and found to be without a flaw. The owner was asked if he could suggest any further improvements, and the reply was, "Aabsolutely none. The cart is perfect." The cart was therefore used as a model for making up a sufficient supply for 1916. It was repainted and returned to the owner in just as good condition as when it first left the shop although it has had seven months' hard usage.

Is it any wonder then that when the name "The Masterpiece" was suggested, that it immediately appealed to the manufacturers?

"The Masterpiece" is guaranteed to have less horse motion than any other make or an owner can return his cart to the manufacturers and they will cheerfully refund his money. Riding in The Masterpiece is guaranteed to be a joy—a pleasure—a delight. It is the cart that sends the man home happy at night, it pulls like a sulky, it will not unbalance a horse, and the shafts are long enough to allow of speeding without the horse hitting the basket.

If the reader is interested in having further particulars and full specifications of the Masterpiece cart, he is invited to drop a postal to the Houghton Sulky Co., 320 Lincoln Ave., Marion, O., and ask for booklet No. 206.

BIG DIFFERENCE, SMALL COST.

If you are the owner of a good horse that is the victim of some slight unsoundness, or some more disturbing affliction which is yet not uncurable, stop and ask yourself this question: "How much more would he be worth to me if he was a sound horse?" Have you considered it? There is no doubt but that he would be worth anywhere from fifty to five hundred more, is there? That being so, you are fully assured that he is worth many times the five dollars that would be the cost of a bottle of Save the Horse—and that is the cost that stands between his present condition and one of useful soundness. Stop once more and think again, this time concerning how foolish it is to have an unsound horse on your hands, especially if he is young and his ailments have not developed to a point of permanency, which is not probable. The most stubborn and aggravated cases yield successfully to the ministrations of Save the Horse, and so confident are the manufacturers that it will do all that is claimed for it that it is sold under a binding contract guaranteeing a cure or your money back for such unsoundnesses as bone and bog spavin, thoroughpin, ringbone (except low cases), curb, splint, capped hock, wind puff, shoe boil, injured tendons and other ailments producing lameness. Write to the manufacturers for literature and testimonials from satisfied customers. It is made by the Troy Chemical Company, Binghamton, New York, and is distributed on the Pacific coast by D. E. Newell, 80 Bayo Vista Avenue, Oakland. Your druggist has it.

Do you remember that good trotter All Style 2:10 that was exported to Australia, and that whirlwind pacer Dan Logan 2:07¼? You most certainly do, and you know that they are siring good colts, things to win races like the sires did. I. F. Eaton of Chico is offering three youngsters by them for sale and it will pay you to write and find out all particulars concerning them. Two are by All Style from a Dr Hicks mare, and the other is by the Logan horse, dam by Arthur Wilkes.

TWENTY-FIVE YEARS OF USEFULNESS.

This year has been an important one for the manufacturer of Absorbine. It marks the quarter century milestone in the career of this popular liniment and the first year of growing on his large farms some of the herbs used in its manufacture. By growing the herbs and distilling the oils Mr. Young is assured of having the highest quality ingredients at all times for his preparation.

The fact that he has always maintained the high standard of his product and never in the slightest degree cheapened it, is one of the reasons and probably the principal reason why Absorbine has grown from a very humble beginning to a product known throughout the world.

Absorbine is used by leading trainers and breeders because it is dependable and effective, mild and prompt in its action and always safe to use without blistering or causing the slightest inconvenience.

It does everything usually expected of a high grade liniment and in addition is a positive antiseptic and germicide which accounts for its value in healing cuts, boot chafes, bruises and sores.

If you are one of the very few horsemen not familiar with Absorbine, write to the manufacturer, W. F. Young, P. D. F., 54 Temple St., Springfield, Mass., and ask for his free booklet "How to Remove Blemishes." You will find it well worth having.

Adolph Ottinger of this city usually wins his full share of the local matinee races and the same horses in the hands of his trainer get a nice portion of the money out on the circuit. Business will interfere with Mr. Ottinger's racing plans for the coming season, and to avoid unpleasant conflict he is selling the three good performers that were winners for him during the past season—the trotting mares Agnes Carter 2:15¾ and Frances S., matinee record 2:11½, and the pacing gelding Dick W. 2:06¼, eligible by time allowance to the 2:08 class. There are no better buys in California for the money asked, and if you are a racing man you should investigate them.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate relief. A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

THE LAWRENCE WILLIAMS CO., Cleveland, Ohio

WINTER TREATMENT

NOW—While time and opportunity favor, make your horse sound. DON'T WAIT! It is sound judgment and QUICK, PROMPT ACTION, that puts one man ahead of another in this world. DO IT NOW! is timely advice to every trainer and owner.

Spending money for SAVE-THE-HORSE (Trade Mark Registered.) to remove blemishes or to cure a lame horse, is one of the most profitable and safest investments any man can make; PROOFS BEYOND QUESTION.

MAKES A VALUABLE DISCOVERY

A. M. Thayer, Supt., Oak Hill Farms, Canastota, N. Y.—Please send another bottle of Save-The-Horse remedy—would not be without it for twice the cost. I found also an excellent wash is made by using it with equal parts of New England Rum and Wormwood—fine for bathing racing colts after heats—they are never stiff next day.

Elmer B. Cole, Franklin, N. Y., September 16th, 1915, writes—Some time ago I purchased a bottle of Save-The-Horse for the treatment of contracted foot, said to be Navicular Disease. It made the horse entirely sound.

E. T. Bentley, Plainfield, Wis.—Your Spavin Remedy has taken the swelled leg down to normal size, and has removed two small round puffs.

O. C. Williams, R. F. D. Carrier, Modesto, Ill., Nov. 7, '15, writes: I bought a bottle three years ago for a bad Bone Spavin. He went lame all the time before using Save-The-Horse. After the first week he has never taken a lame step. I work him to big loads through mud, snow drifts and rough frozen ground. Your remedy is all you claim for it.

C. H. Bates, Brook Farm Herd, Breeder of Holstein-Friesian Cattle, Morris Plains, N. J., R. D., October 4th, 1915, writes—Enclosed find check, for which send me a bottle of Save-The-Horse with guarantee to cure ringbone, or lameness between the hoof and ankle. About twelve years ago I used your Save-The-Horse on a saddle mare that threw ner tendon out. I got a complete cure and rode the mare for eight years afterwards, and she stayed all right. This is the reason for sending for another bottle. Kindly send me your Save-The Horse BOOK.

Dr. O. T. Atwell, Zanesville, Ohio, September 4th, 1915, writes—Having used your Save-The-Horse on my driving horse with remarkable result in removing a pastern join enlargement, I naturally turn to you when in trouble again, etc. I wish your advice and a remedy for him; please mail or express same and I shall send you the price by return mail.

John E. Lingo & Son, Spar Makers, Flag Poles, Derricks, Ship & Yacht Spars. Yard & Office Foot of Elm Street, Camden, N. J., August 18th, 1915—Troy Chemical Co., Binghamton, N. Y.—Gentlemen—The mare, Troublesome, was very lame in the hip about three years ago and one bottle put her to the races again in less than two weeks. She has never taken a lame step since, and has done a lot of racing. I would appreciate very much your opinion on another case,—etc.

R. F. Huddy Furniture Co., 113 West Main St., Independence, Kans., write—Enclosed check. Ship at once two bottle of Save-The-Horse Spavin Remedy. We wish to state that the horse Lexel that we treated last year is racing this year, and his hock joint is standing the strain splendidly. We cannot say too much for Save-The-Horse.

After using Save-The-Horse for two weeks on a Bone Spavin he did not go lame. I will say it is a great remedy, says Albert Stoll, 915 S. 4th Ave., Ann Arbor, Mich.

One Half Bottle of Save-The-Horse cures horse of corn.—Mrs. Jennie Parks, Lawton, Okla., writes—Our horse had a corn and he is well of that. It got better right away and we didn't have to use half of a bottle, etc.

$5 Every bottle of Save-The-Horse is sold with a binding contract to refund money or cure any case of Bone and Bog Spavin, Thoroughpin, Ringbone (except low), Curb, Splint, Capped Hock, Wind Puff, Shoe Boil, Broken Down, Injured Tendon and Other Lameness. No blister or loss of hair.

WRITE — Do it today, if only a postal. It will cost you nothing for information and ADVICE; copy of contract and BOOK, and there'll be no string to them.

OUR 96 Page **SAVE-THE-HORSE** (Trade-Mark Registered.) BOOK is the Quintessence and last word of **Up-to-Date** knowledge and practice on **All Lameness.** This book contains things that are new, helpful and reliable — nowhere else found. It is our 20 years' **Discoveries**—Treating Every Kind of Ringbone—Thoroughpin—**Spavin**—and **All**—Shoulder, Knee, Ankle, Hoof and Tendon Disease. It is a mind settler—Tells how to locate and treat **58** forms of **Lameness — Illustrated.**

THE FARM

THE PROFIT OF "TAKING PAINS."

It pays to be particular. A tiny worm in an apple of the Oregon exhibit at the Panama Exposition cost a highly coveted prize. The sweepstakes award for the world's best apples went to Fred Conklin of Brewster, Wn., for his exhibit of five boxes of old winesaps. They were the pink of perfection, the judges declared, after their arduous task of examining exhibits from every apple-growing section in the United States.

The townspeople of Brewster and the bucolic wiseacres thereabouts were inclined to discourage Henry E. Tweed, a young student of the Washington state agricultural college, when he set out to select an exhibit for the World's Fair in San Francisco. Young Tweed showed such infinite pains that people laughed at him. The critics declared he was only wasting time, "as he wouldn't get the prize anyway." But the young man had his own ideas. He realized that notwithstanding the extraordinary precaution taken to keep worms out of orchards in the Okanogan river country, one of these squirming descendants of the original serpent of the Garden of Eden might perchance have crept in. He not only was particular to guard the pride of the Okanogan apple belt against any possible humiliation from this source, but he seemed to pay particular attention to every little precautionary detail. He carefully selected and weighed each apple and saw to it that there was not the fraction of an ounce difference in the weight of each one. Wise old orchardists laughed right through their whiskers when young Tweed used postal scales to weigh apples. He took more of their jibes good naturedly when he used calinipers in order to be sure the measurements o fthe 575 apples were identical. That was all. After selecting the best apples in the world young Tweed was not satisfied until he got Harry Rogers, champion apple packer of the Pacific coast, to attend to the packing of them. All this took a lot of time, patience and much labor, but the young student of horticulture today stands in a different light before the people of the Okanogan country. In fact, he is hailed by the entire Pacific coast country as the greatest instructor of the age in his "particular" line. Even the pessimists take particular notice of this particular young man now. The people of his home town, Wenatchee, which is located in the famous rival apple valley of that name just south of and adjoining the Okanogan country, are determined to have this native son select their exhibition apples "next time."

—o—

In preparing quarters for any breed of pigeons, bear in mind that each pair requires two nests, for the reason that the female lays her second hatching of eggs and begins to set on them before the first pair of young are large enough to leave the nest. And be sure to provide plenty of nesting material if you keep them confined. Pine needles are excellent for this purpose.—Rural World.

HIGH-CLASS TROTTING BRED COLTS FOR SALE.

No. 1. Three-year-old filly sired by All Style, dam Dr. Hicks. This filly is registered.

No. 2. Two-year-old colt, full brother to the above.

No. 3. Two-year-old filly sired by Dan Logan, dam a Wilkes mare who was a great natural pacer but unfortunately was crippled by a barbed wire accident as a yearling and was never worked.

The All Styles are large, strong built, with all the style of their sire, perfect in action, and all three of the above colts should make race horses second to none. The Dan Logan filly is perfectly gentle to handle and drive and is a high-class filly in every respect. Apply to or address,

I. F. EATON, Chico, Cal.

To Clean Up my Racing Stable

I will make campaigning horsemen or matinee drivers most attractive prices on the following high class race horses:

AGNES CARTER 2:15¾, TROTTER

by Nutwood Wilkes 2:16½ and out of Excella, a double producer, by Monbells 2:23¾; grandam the famous race and brood mare Expressive (3) 2:12½ by Electioneer 125. This mare is all her breeding indicates and is better than a 2:10 trotter. Eligible to the 2:16 class on mile tracks and the 2:20 class on the twice-arounds. Can trot the short turns, has worked Stadium track for me frequently in 2:13 this season.

DICK W. 2:06¼

a fast and game son of Athadon (1) 2:27, eligible by time allowance to 2:08 class on mile courses and 2:12 on halfmile tracks. Can win on either kind in his class. He is good mannered, good headed and wears no hobbles.

FRANCES S., MATINEE, 2:11½

a trotter and show mare, rich chestnut with silver mane and tail. By King S., sire of Maurice S. 2:06, the coast's best winning pacer in 1912, and out of a stoutly bred mare. Eligible to all classes and has a matinee record of 2:11½ trotting made this season. Can trot either size track, sound as a dollar, and as good a prospect for 1916 as any man's.

OFFERED FOR NO FAULT

but because my business will require most of my time in 1916, and horses are no good to me unless I can drive them myself or at least see them race. Particulars on request, by mail or in person.

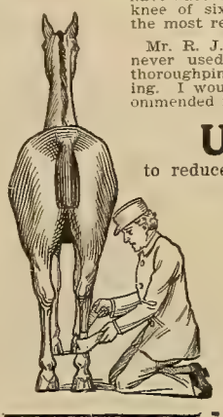
ADOLPH OTTINGER,
722 Market Street - San Francisco

Your Lame Blemished Horses Need Attention Now

Don't delay—it's easier and cheaper to treat blemishes before they become deep-seated. A few applications of ABSORBINE well rubbed in acts quickly and effectively without blistering or laying up the horse.

ABSORBINE is concentrated—handy and economical to use. A few drops is all that is required at an application.

ABSORBINE
TRADE MARK REG. U.S. PAT. OFF.



THE ANTISEPTIC LINIMENT

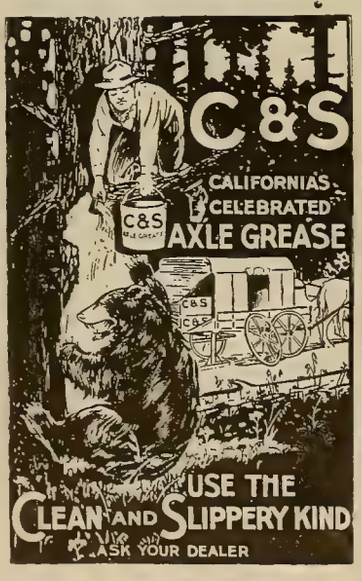
is used by successful trainers, breeders and horse owners the world over—it has increased the working and selling value of thousands of horses—it has helped many horses break records on the track, and incidentally has made money for its users. ABSORBINE itself has a record of twenty-five years' service in producing successful results.

WHAT USERS SAY

Mr. CHAS. LAWRENCE, Paoli, Pa.: "I have successfully used your Absorbine on a big knee of six months' standing. It certainly is the most remarkable liniment I ever used."

Mr. R. J. CRABTREE, Maroa, Ill.: "I have never used anything equal to Absorbine for thoroughpin. I removed one of a year's standing. I would not be without it and have recommended it to my neighbors and friends."

USE ABSORBINE



to reduce bursal enlargements, bog spavins, thoroughpins, puffs, shoe boils, capped hocks, swollen glands, infiltrated parts, thickened tissues, rheumatic deposits, enlarged veins, painful swellings and affections; to reduce any strain or lameness; to reduce strained, ruptured tendons, ligaments or muscles; to strengthen any part that needs it.

ABSORBINE $2 a bottle at druggists, or postpaid upon receipt of price.

25 to the Nominator of the Dam on whose Original Entry is named the Winner of Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when Mare was bred.

SPECIAL CASH PRIZES FOR STALLION OWNERS.

Given to Owners of Stallions standing highest in number of Mares nominated in this Stake that were bred to their respective horses, divided as follows:

FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds—three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

Write for Entry Blanks to

To be Given Under the Direction of the

California State Agricultural Society, 1919

Entries to Close January 1, 1916

Money Divided as Follows:

TROTTING DIVISION

$75 to Nominator of Dam of Winner in Summary of Race

$2125 Three-Year-Old Trotters

PACING DIVISION

$75 to Nominator of Dam of Winner in Summary of Race

$1725 Three-Year-Old Pacers

ENTRANCE AND PAYMENTS—$2 to nominate mare on January 1, 1916, when name, color, breeding of mare and stallion bred to must be given; $5 July 1, 1916; $5 December 1, 1916; $10 on yearlings February 1, 1917; $10 on two-year-olds February 1, 1918; $10 on three-year-olds February 1, 1919.

STARTING PAYMENTS—$50 to start in pacing division; $75 to start in trotting division. All starting payments to be made ten days before the first day of the State Fair at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

CONDITIONS

The race in each division will be for three heats; if no horse wins two of the three heats a fourth heat must be raced by the heat winners to decide the winner of the race; all other horses to go to the barn.

Trotting Division heat purses $650. Total purse $2,125.

Pacing Division heat purses $550. Total purse $1,725.

Heat purses divided 50, 25, 15 and 10 per cent; the extra $175 in the trotting division and the extra $75 in the pacing division goes to the winner of two heats.

Distance 100 yards. A distanced horse shall be entitled to money already won.

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or the foal dies before December 1, 1916, her Nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than the amount paid in. In nominating, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entry must be accompanied by the entrance fee.

Nominators are liable for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $4,000, the amount of this guarantee only.

Hobbles will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

There will be no more moneys in each division or heat than there are starters. No horse shall receive more than one money in each heat.

Entries open to the world.

Other than exceptions made in this entry blank, rules of National Trotting Association to govern.

M. M. PERRY, President.

CHAS W. PAINE, Secretary, Sacramento, California.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

The Masterpiece

NO MORE tired backs! After six years of constantly improving our Model 8 Faultless Cart it now becomes our Model 80 "Masterpiece." In it are incorporated the Ideas not only of cur Mr. Houghton (the premier constructive genius of the turf vehicle world), but of scores of practical horsemen who have favored us with their criticisms and suggestions. The first Model 80 was tested vigorously for seven months by a prominent horseman before being placed on the market. It came back to the factory without a flaw.

THE MASTERPIECE is guaranteed to have less horse motion than any other make or you can return your cart and we will cheerfully refund your money! Riding in THE MASTERPIECE is a joy—a pleasure—a delight. You can jog horses in it all day and come home at night feeling happy. Indirectly, your wife or sweetheart will appreciate its advantages as much as you. In this respect it would make an ideal Christmas present from "her" to you.

THE MASTERPIECE is perfectly hung, it pulls like a sulky, it will not unbalance your horse, the shafts are long enough so you can speed him without his hitting the basket. It is not too heavy for early brushing.

Write at once for booklet No. 206 describing The Masterpiece in detail. The booklet gives price and full specifications. Write at once. A postal will do.

—THE WORLD'S RECORD!!!

Mr. Lester German, shooting at the Westy Hogan tournament at Atlantic City, September 15 to 17, scored

647 OUT OF 650 TARGETS

shooting his PARKER GUN, which is the greatest score ever made at a Registered Tournament.

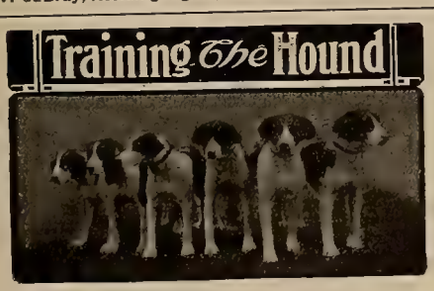
At Portland, Oregon, Mr. Peter H. O'Brien scored 241 targets straight, making

PACIFIC COAST RECORD

with his Parker gun.

At San Diego Mr. Henry Pfirrmann won the Pacific Coast Handicap, with Mr. J. Foster Couts second.

At San Francisco, in the California-Nevada State Tournament, Mr. Pfirrmann won high average and Mr. Couts won the Championship of California — all of which was done with



PARKER GUNS

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

PARKER BROS., Meriden, Conn. New York Salesroom, 32 Warren Street;
or A. W. duBray, Residing Agent, San Francisco, P. O. Box 102

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv , so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

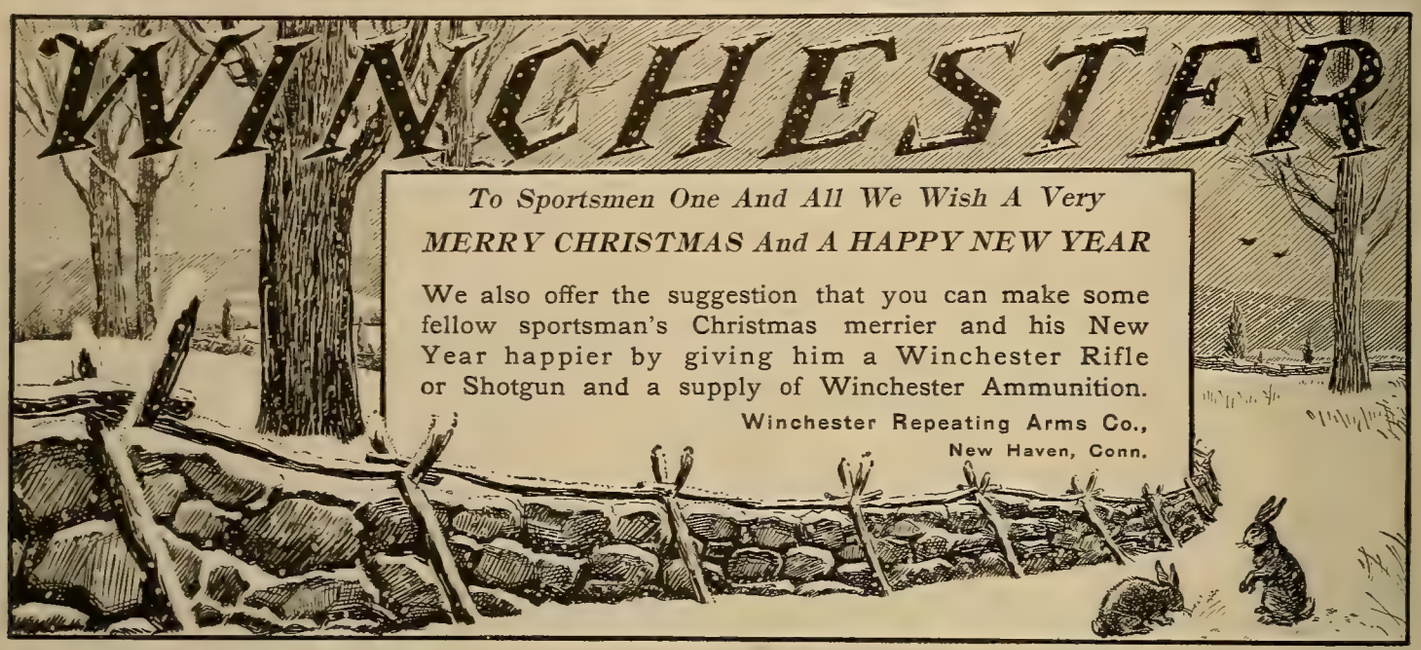
The Grand International Handicap

At the St. Thomas, Ontario, Tournament, Nov. 29-Dec. 1, was won by Mr. W. J. McCance, Captain of the St. Thomas Gun Club. Score

96 x 100 using PETERS SHELLS



The High General Average at this shoot was won by that popular veteran, Mr. Rolla Heikes, who in spite of adverse weather conditions, scored

385 x 400 using PETERS SHELLS

This was the largest and most important tournament of the 1915 Fall season, and the winning of the two chief honors by users of Peters Shells, is in keeping with the remarkable record of successes made with the (P) brand.

THE PETERS CARTRIDGE CO., Pacific Coast Branch, 583-585 Howard Street, San Francisco, Cal.

WINCHESTER

To Sportsmen One And All We Wish A Very MERRY CHRISTMAS And A HAPPY NEW YEAR

We also offer the suggestion that you can make some fellow sportsman's Christmas merrier and his New Year happier by giving him a Winchester Rifle or Shotgun and a supply of Winchester Ammunition.

Winchester Repeating Arms Co.,
New Haven, Conn.

Shall It Be an Autoloading or Pump Gun?

THERE are many kinds of Autoloading and Pump guns—some to be had at very low prices.

But it is typical of sportsmen that the great majority prefer Remington-UMC Pump and Autoloading guns in the hands of the average man.

If you shoot at traps or in the field, go to the Remington-UMC Dealer in your community and let him show you these guns. You will know him by his display of the **Red Ball Mark of Remington-UMC** — Sportsmen's Headquarters — and he knows the difference in guns.

LAST CALL FOR STATE FAIR FUTURITY.

Today is the date of closing for entries to the State Fair Futurity No. Eight for foals of mares bred in 1915 to trot and pace as three-year-olds in 1919. Under the rules of the National Trotting Association, however, as tomorrow is Sunday and hence a holiday, entries bearing postmark prior to noon next Monday, January third, will be legal, so that if you have not already made your entries for this event you have ample time to fill out the blanks tomorrow and get them mailed in proper shape to comply with the letter of the law governing the stake. We do not know of any better way for a horseman to start the new year than by making a futurity nomination—or a number of them—so do the thing up right while you are about it and name every mare that you own that shows the slightest sign of being with foal.

The conditions of this stake were reviewed at length in a recent issue of this paper and will be found extended on a business page of this issue, but just as a memory jogger and to acquaint you with its more salient features we call your attention to the following points:

The stake is made for a guaranteed sum of four thousand dollars and is strictly a three-year-old event, the two-year-old division having been discontinued for the last number or so of this series, the plan seeming to have met with the approval of breeders pretty generally. Two thousand two hundred dollars will be devoted to the trotters, of which seventy-five thousand dollars will be paid to the nominator of the winner according to the standing in the summary, with a purse of six hundred and fifty dollars divided into the customary four moneys on each heat, the winner in the summary being awarded the additional one hundred and seventy-five dollars. In the pacing division, which is for a total sum of eighteen hundred dollars, seventy-five will be awarded the nominator of the dam of the winner, while the heat purses will be five hundred and fifty dollars each, leaving an extra seventy-five for the winner. This division of the purse contributes to racing to win, which means more interest for the spectators, while prohibiting any long drawn contests which would be injurious to colts of that tender age. Unless three heat winners develop in the first three times out, the race will end at that point, and cannot possibly go more than four heats to a decision, as heat-winners only will be the order after the third round. The winner of the race draws a slightly larger portion of the purse than is customary under the old system, but this is a step in the right direction, as he is the one and only horse to be penalized with a record and should profit from the race to an accordingly greater proportion. Racing to win, which means a great advance in the drawing power of harness racing from the standpoint of the public, should be encouraged by making winning more nearly worth while, as no matter how great the contest, it is the winner that has really held the crowd. It is an old saying that "nobody remembers the name of the second horse in the Derby," and there is a lot of truth in it, too. Try it on yourself, for instance. You can name a number of horses that have won the M. and M. and other great stakes, but we will lay you a small bet on our own accord that you cannot recall the names of the horses that finished second in those same events.

The initial cost of making nomination to the stake is very moderate and the conditions throughout have been drawn with the express purpose of making the event most attractive to breeders. The customary substitution clause prevails, and if you have not already made your entries we suggest that you turn to the published conditions and sit down and attend to the same at once. Failure to provide your foals with futurity nominations may prove a matter of considerable regret to you in future years, especially when its opportunities may be safeguarded at a cost so trifling as is the case in the present instance.

TO PROTECT OWNERS OF PUREBRED LIVESTOCK.

At the recent annual meeting of the National Society of Record Associations which was held on November 27 at the Hotel LaSalle, Chicago, one of the most important topics up for consideration was the outbreak of foot and mouth disease, from which, by the grace of vigilance and the utmost of good fortune the breeders of the Pacific Coast section have escaped scot free. The outbreak was discussed in all its phases, and after sending a memorial to Governor Dunne of Illinois urging prompt legislation to provide for the overdue obligations of that commonwealth to its citizens who have had their herds destroyed, the members in attendance turned their attention to a consideration of the plight in which breeders of purebred herds find themselves, the present systems of reimbursement for slaughtered cattle taking no further account of the situation than that a cow is a cow, working a manifest injustice upon the man who sees his almost priceless animals "scragged" on a scrub basis. The methods of instituting and maintaining quarantine and making restitution for cattle killed lead to the adoption of the following resolutions, which were at once transmitted to every member of the House and Senate at the nation's capital:

Whereas, county quarantines have been imposed by Federal authorities, and followed by State officials in fighting foot and mouth disease; and

Whereas, such quarantines are palpably inadequate where the disease is located within a short distance of the county line and oppressively unjust in such instances to farmers located on the other side of the county, twenty or thirty miles away;

Therefore Resolved, that the National Society of Record Associations vigorously opposes such quarantines and demands a radius quarantine that shall be absolute and of unquestioned efficiency of such distances as the authorities deem necessary, which alone is protective in the highest degree and at the same time just, and that we also favor the marketing for immediate slaughter of sound and healthy stock where conditions warrant from within the radius, subject to proper inspection.

Whereas, neither the Nation nor the State can legally take for public good the property of a loyal citizen without adequate compensation, either in the exercise of its powers of eminent domain or its police powers; and

Whereas, the Federal Department of Agriculture believes it has no authority in the statute to pay for pure bred stock slaughtered in disease eradication higher prices than it pays for ordinary market stock kept for meat or milk purposes; and

Whereas, some states have set an arbitrary maximum limit to the value that appraisers in such cases may fix for pure bred stock;

Therefore Resolved, that the National Society of Record Associations demands Federal and State legislation which will allow appraisers to value pure bred stock at its reasonable breeding value, without arbitrary limitation, when slaughtered on account of foot and mouth disease. We commend as a model for such legislation the New York statute which provides that in the event that either party to the appraisement is dissatisfied appeal may be taken to the proper court, without delaying slaughter, where the value of the property of a citizen taken for public use is finally fixed in accordance with the rule of law and court practice.

Resolved, that the National Society of Record Associations appeals to Congress to amend the statute which requires that the Chief of the Bureau of Animal Industry shall be a veterinary surgeon by eliminating that provision, in order that a man of business training, familiar with the production and marketing of live stock, may be eligible to such position.

Resolved, that it is the sense of the National Society of Record Associations that the question of whether pure bred herds exposed to foot and mouth disease shall be slaughtered in all instances or not, should be determined on the merits of each individual case.

In the matter of the election of officers for the ensuing year, M. D. Munn, president of the American Jersey Cattle Club, was nominated for president; W. Reid Carpenter, president of the American Shorthorn Breeders' Association, was nominated vice-president, and Wayne Dinsmore, secretary of the Percheron Society of America, who has served the record association as secretary since its inception, was nominated to succeed himself in that office, all three gentlemen being declared elected unanimously.

MONGREL STALLIONS DECREASING IN NUMBERS.

One of the most pleasing features to be noted in the fourth annual report of the California Stallion Registration Board, which has just lately come to hand from the office of Secretary Charles W. Paine, is that portion which shows the steady decrease of the number of mongrel stallions licensed since the law became operative in 1912. In that season there were 766 of these undesirable citizens listed with the registration board; in 1913 the number had fallen to 707, and in the following year only 547 were licensed under this uncomplimentary description. By this time breeders had begun to fight shy of this kind of animal in earnest, with the result that the returns for 1915 showed the greatest falling off of any season, the number of animals described as mongrels having dropped to 350—scarcely one-half as many as infested the farms of the state at the time the law was put into effect. The value of the law in this respect alone is incalculable, and in the course of a very few years the average value of the horses in California will show an increase directly traceable to the beneficent workings of the stallion registration law.

Of stallions of all classes, licenses for the season of 1915 were taken out for 1,336, while the permits for jacks swelled the number of licensed sires to a total of 1,631, a decrease of 32 from the totals of the preceding year. The most popular horse in the state, as measured by the number of stallions of the various families for which licenses were issued, is the Percheron, with 437 representatives. Next in order come the Standard-bred Trotter with 186, the Belgian with 143, the Shire with 72, the French Draft with 46, the German Coach with 32, the Clydesdale with 22, the Thoroughbred with 13, the Saddler and the French Coach with 10 each and the Arab, the Hackney, the Non-standard, the Norman and the Suffolk with from one to four each. Of the 295 jacks, 114 are purebred, 6 are grades and the remaining 175 are mongrels, so that there is still room for a great deal of improvement in their ranks. The stallions of the various families are well distributed throughout the state, with the counties of San Joaquin, Fresno and Alameda being the leading centers of breeding operations.

The report is the most comprehensive and elaborate of any yet made by the registration board, showing that Secretary Paine and his associates are fully alive to the importance of the work in hand. The stallion registration law, as revised and amended by the last session of the legislature, appears in full and in addition to the statistical tables there is much interesting and important supplementary matter. The states in which stallion registration laws are operative are shown, as well as a summary of the various foreign breeds which are recognized by our government as established families of pure lineage, with illustrations of the certificates issued by the parent record associations which are recognized by the local board. Not the least important, by any means, is that portion of the publication devoted to a verbal and pictorial description of a number of the various diseases enumerated in the law as contributory to unsoundness.

SECOND ANNUAL DRAFTER SALE.

Secretary E. W. Westgate of the California Draft Horse Breeders' Association has announced that the second annual sale of pure bred draft horses will be held by that body on Wednesday, February second, at the University Farm at Davis, thus offering to local breeders most exceptional opportunities of exchanging stallions which would have a new and enhanced value in a change of location, and of recruiting the best obtainable young mares and fillies for their brood mare bands. Last year the first of these sales was held at Davis under the auspices of the association, and proved a success in every way. As the sale becomes more widely known as a fixture of the season and as a consequence attracts patronage from a much wider range of territory, its value to the draft horse breeding interests of California will become just so much the greater. Detailed information concerning the proposed sale will be forthcoming at an early date, and in the meantime any breeders who will probably have consignments to make to the same are advised to begin getting the horses in shape and also to get into touch with Secretary Westgate, whose home address is Rio Vista. "Condition" plays a large part in the prices paid for both mares and stallions.

Actions of the Parent Associations

During the earlier portion of the month of December the tribunals of both of the parent associations under whose jurisdiction the sport of trotting is conducted were in session as usual, straightening out the tangles that arise invariably during the course of a year's racing. No great amount of action of especial interest to western horsemen was taken by either body, the following excerpts from the detailed official reports about covering the ground as far as our readers are concerned:

The Board of Appeals of the American Trotting Association met at 10 o'clock a. m., Tuesday, December 7, at the Auditorium Hotel, pursuant to call, the following members being present: W. P. Ijams, Terre Haute, Indiana, President; Thos. H. Gill, Milwaukee, Wisconsin; J. C. Linneman, Lima, Ohio; W. H. Smollinger, Iron Mountain, Missouri; L. N. Brueggerhoff, Shreveport, Louisiana; Geo. R. King, Dallas, Texas, members of the Board, and W. H. Knight, Chicago, Illinois, Secretary.

No. 5671, Protested Money.

G. H. White, Malvern, Iowa, versus C. N. Clark, Winfield, Kansas, Bob Sebastian, Hemet, California, and b. h. "Hal McKinney."

Protested first money, 2:08 pace, Beatrice, Nebraska, June 24, 1915.

On June 24, 1915, the b. h. "Hal McKinney," by "Hal B.," started and won first money in the 2:08 pace, at Beatrice, Nebraska.

Protest was made against the eligibility of said horse to win in a 2:08 pacing race on account of a winning performance at Oklahoma City, Oklahoma, on or about September 30, 1914, the time of said performance being recorded as 2:06¾.

The money was withheld by the member pending investigation, but later on, on or about July 7, 1915, at West Point, Nebraska, the money was paid over to the owner or agent of the horse "Hal McKinney" on the authority of a telegram from I. S. Mahan, Secretary of the member at Oklahoma City, stating:

"Record by 'Hal McKinney' on our track last year exhibition only, message sent G. H. White, Kearney, Nebraska, error. Letter follows."

The protestant, however, still insisted that a money consideration was attached to the performances and filed program and advertisements apparently showing this to be the case.

Further inquiries were made from the Secretary of the member at Oklahoma City and after looking into the case further, Secretary I. S. Mahan wrote under date of August 23 that he had taken up the matter with the Superintendent of Speed for 1914, who writes as follows:

"Referring to the exhibition of the horse 'Hal McKinney' last year, beg to say we offered this horse a certain purse to give us an exhibition, and a certain amount added if he would reduce the track record. In addition to this we paid some runner to accompany him in the exhibition. I believe this is the sum and substance of the contract.

"FINAL SUMMARY.

"Double Team Race—Pacing:
"Hal McKinney and Wm. Knight.... 2 1 3
Paid $100.

"Free-for-All Pace—One heat:
"Hal McKinney, first. Paid $55."

With this evidence on file and as there is no dispute as to the time of the heat won by "Hal McKinney" in the free-for-all pace, for a consideration of $55, namely, 2:06¾, it is evident that under the rules of The American Trotting Association the b. h. "Hal McKinney" obtained a winning record of 2:06¾ at Oklahoma City, on September 30, 1914, and hence was ineligible to compete in the 2:08 pacing class at Beatrice, Nebraska, on June 24, 1915.

Ordered, that the protest be sustained and Bob Sebastian of Hemet, California, and C. N. Clark of Winfield, Kansas, be ordered to return said winnings of the b. h. "Hal McKinney" for redistribution.

No. 5704, Demand for Identification and Protested Money.

W. C. Brown, Vancouver, British Columbia, versus A. E. Smith, Vancouver, British Columbia, and b. g. "John D."

Demand for identification and protested first money, 2:30 pace, Ladner, British Columbia, June 26, 1915.

During the meeting of the member at Ladner, British Columbia, June, 1915, a demand was made for the identification and eligibility of the b. g. "John D." to compete, said horse being entered in the 2:30 pacing race on June 26. The horse started under protest and won first money, which was retained by the member and subsequently deposited in the Trust Fund of The American Trotting Association.

The horse was owned and nominated by A. E. Smith of Vancouver, British, Columbia. The demand for identification was made by W. C. Brown of Vancouver, British Columbia, Vice-President of The American Trotting Association for British Columbia.

In response to the demand for identification, A. E. Smith states that he is unable to furnish any information as to his pedigree, record or previous history. That he is a dealer in horses and purchased said horse from Stanley O'Neil of Steveston, British Columbia, who owned the horse for two years, but did not discover that he had any speed. That Smith has owned the horse for one year and nine months and has known the horse for four years and a half. That he has tried to find out all about him, but has not succeeded.

It is clearly shown that the horse "John D." is not and cannot be sufficiently identified to comply with the rules of The American Trotting Association.

Ordered, that the winnings of the b. g. "John D." in the 2:30 pace at Ladner, British Columbia, June 26, 1915, be redistributed under the rules and that said horse be declared ineligible to compete in any race over tracks of members of The American Trotting Association until he is satisfactorily identified.

No. 5817, Application for an Order.

W. W. Fleming, Jr., Winnipeg, Manitoba, versus Dominion Exposition, Victoria, British Columbia.

Application for an order.

On March 1st, 1914, the British Columbia Agricultural Association of Victoria, British Columbia, made application for membership in The American Trotting Association for their meeting, advertised to take place September 21-26, 1914, under the title of The Dominion Exposition.

The application was accepted and the association duly placed on the roll of members.

Subsequently, on August 25, 1915, the said meeting was declared off, the official statement of the Secretary being, "The Fair and races have been canceled on account of the war."

This case is an application by W. W. Fleming, Jr., of Winnipeg, Manitoba, for return of moneys paid by him as entrance fees in the races advertised by said member, which were subsequently declared off: to the amount of $510, said entrance fees being paid as entries on

"Princewood," in 2:09 pace, 2 per cent...$30.00
"Creosote," in 2:24 trot, 2 per cent..... 20.00
"Tropic Dawn," in 2:18 trot, 2 per cent.. 40.00
"Creosote," in 2:18 trot, 1 per cent..... 20.00

And is accompanied by affidavit that the amounts so paid have never been returned. Also by the receipt issued by the member at Victoria, B. C., on May 15, 1914; also by the official list of Early Closing Events issued by the member prior to date of declaring off.

The member at Victoria, British Columbia, was notified, and responded through its Secretary, by stating that Mr. Fleming withdrew all his entries before the second payment was due. That they were also notified by the Circuit Secretary that his entries had been drawn from all points in the Circuit. That as the meeting in Victoria was not declared off until some time after the second payments were due, they considered that he had no claim for a refund, as he could not have paid any more whether the meeting would have been held or not.

The Board held that, under the rules of The American Trotting Association a member declaring off its meeting was not entitled to retain any moneys paid in to him for entrance fees or forfeits, and

Ordered, that the Dominion Exposition of Victoria, British Columbia, be ordered to return to W. W. Fleming, Jr., the amount paid in by him as entrance or forfeits, amounting to $110.

No. 5826, Protested Collection.

Protested collection.

J. G. Belt, Phoenix, Ariz., versus John B. Ryland, Tucson, Arizona, and s. g. "Naboth, Jr."

Protested winnings, 2:25 trot and 2:18 trot, Phoenix, Arizona, November 15, 1915, and demand for eligibility. Continued to the next meeting of the Board, May, 1916.

According to the By-Laws, a regular meeting of the Board of Review of the National Trotting Association was held at the Murray Hill Hotel, New York, N. Y., commencing Tuesday, December 7. The Board convened at 10 a. m. The following officers and members were present: President, P. P. Johnston, Lexington, Kentucky; Third Vice-President, John C. Welty, Canton, Ohio; Chairman of Eastern District, F. O. Beal, Bangor, Maine; Chairman of Atlantic District, Horatio N. Bain, Poughkeepsie, New York; Chairman of Central District, Carlos M. de Garmendia, Tuscarora, Md.; Chairman of Western District, A. P. Sandles, Ottawa, Ohio, and the Secretary.

When the Board was called to order by the President, the Secretary announced that there were vacancies on the District Boards in the Southern and Pacific Districts. On motion of Mr. Beal, seconded by Mr. Bain, J. O. Winston of Richmond, Virginia, was nominated and duly elected a member of the Southern District Board. Also after said election, he was by the President named as Chairman of the Southern District and when he arrived at 10:45 a. m. he took his place as a member of the Board of Review at the December meeting. On motion of Mr. Sandles, seconded by Mr. Welty, Thomas S. Griffith of Spokane, Washington, was nominated and duly elected a member of the Pacific District Board.

No. 6111?, Application for an Order.

J. B. Stetson, Salem, Oregon, vs. P. J. McCormick, 1401 10th Ave., Seattle, Washington, and b. m. "Flor Dora Z." Application for an order under Rule 1 Section 1.

The b. m. "Flora Dora Z." was not eligible to th 2:2[illegible] class at Canby, Oregon, and therefore could n acquire a record in that event. Case dismissed.

Proposed Changes in the Rules.

Acting as a Rule Committee, the Board of Revie considered the following changes in the rules a they now stand, and submit them to the consider tion of secretaries and other racing officials, bree ers, owners, trainers and all persons in any wa connected with the trotting industry, requesting tha they read them over carefully, decide whether the are good or bad, and make their ideas known prio to the meeting of the rule committee, which wi take place in the not far distant future. Horseme in general are sufficiently acquainted with the rule to identify those in which the changes are propose and then estimate the improvement effected, or th damage done, according to the personal viewpoin and this paper will be pleased to act as the mediu for expression of any suggestions on these matters

Rule 2, governing entries. Amended by addin the following Section:

An entry signed by an officer or representative c a member for another person is void.

Rule 2, Section 7, publishing entries. Amended b inserting the words "and state on same all claims fo time allowances" after the word "entries" in th third line.

Rule 2, governing entries. Further amended b adding the following Section:

An error in any entry may be corrected before th day of the race by payment of a fine of five dollars providing the identity of the horse is satisfactorily established.

Rule 5, defining eligibility. Amended by addin the following Section:

(Winrace in Postponed, Unfinished and Limite Races)

A winrace acquired in a postponed race shall bea the date on which the event was decided. In a unfinished race, the horse standing best in the sum mary shall receive first premium and acquire a win race, except when two or more stand equal. In tha event, none of them shall acquire a winrace in tha race. In races limited to a specified number of heat or dashes the horse standing best in the summar shall acquire a winrace.

Rule 5, Sections 5 and 6, time allowances. Struck out and the following substituted:

(Time Allowances.)

A horse with a winrace made on a mile track shal be allowed one second for each quarter of a mile o fraction thereof in the distance to be raced whe entering on a half-mile track, providing the class t which he would be eligible under this allowance i not slower than his winrace for the distance on a half-mile track. Other allowances may be granted i so stated in the published conditions but when offere for losing performances or for being behind th money in public races they shall be limited to th current year. A nominator is also required to clain time allowances when making entry and also stat in same why his horse is entitled to it. Should h fail to do so his nomination is not entitled to an time allowances in the event.

Rule 6, Section 1, naming horses. Amended by in serting the words "or in a matinee given by a mem ber" after the word "race" in the third line.

Rule 18, power of postponement. Amended by in serting the word "received" after the word "forfeits" in the seventeenth line and by inserting the words "who have horses on the grounds that are" after the word "nominator" in the eighteenth line, making the sentence read as follows: When an installment plan purse is declared off under this Rule, the entrance money and forfeits shall be divided equally among the nominators who have horses on the grounds that are eligible to start.

Rule 29, Section 2, barring hobbles on three-year-olds or under. Amended by inserting the words "of any kind or form" after the word "hopples" in the first line.

Rule 31, relative to heats and horses eligible to start. Amended by changing the first sentence to read as follows:

In heats best two in three, a horse not standing for money at the finish of the second heat shall not start in the third.

Rule 33, Section 1, time between heats. Changed to read as follows:

The time between heats for any distance up to and including a mile shall be twenty-five minutes; for any distance between one and two miles, thirty minutes; for any distance between two- and three-mile heats, thirty-five minutes and for any distance between three and four miles, forty minutes.

Rule 37, Section 1, distance flags. Changed to read as follows:

In all heat races on a mile track, eight yards for each furlong raced shall be a distance, except when eight or more start in a heat; then ten yards shall be a distance. In all heat races on a half-mile track, ten yards for each furlong raced shall be a distance, except when eight or more start; then twelve yards shall be a distance. When a specified series of races or heats are given for one entrance fee, the distance shall be the same as in heat races of the same length, except that it is waived in the last race or heat of the series except for fouls.

TABLE OF DISTANCES
(Mile Track)

		When under 8 start.	When 8 or more start.
Four Furlongs,	½ mile.....	32 yds.	40 yds.
Five "	.....	40 "	50 "
Six "	¾ mile.....	48 "	60 "
Seven "	.....	56 "	70 "
Eight "	1 mile.....	54 "	80 "
Nine "	.....	72 "	90 "
Ten "	1¼ miles.....	80 "	100 "

(Half-Mile Track)

		When under 8 start.	When 8 or more start.
Four Furlongs,	½ mile.....	40 yds.	48 yds.
Five "	.....	50 "	60 "
Six "	¾ mile.....	60 "	72 "
Seven "	.....	70 "	84 "
Eight "	1 mile.....	80 "	96 "
Nine "	.....	90 "	108 "
Ten "	1¼ miles.....	100 "	120 "

Rule 42, Section 2, public race and handicap. Changed to read as follows:

(Length of Race and Number of Heats)

The length of a race and the number of heats to be contested shall be stated in the published conditions. There shall be at least a furlong but not a fraction of one between the length of races; for example, five furlongs, six furlongs (three-quarters of a mile), eight furlongs (one mile), nine furlongs, etc. If no distance or number of heats is specified in the published conditions, all races for four-year-olds and over shall be mile heats, three in five; for two- and three-year-olds, mile heats, two in three, and yearlings a mile dash. In the event of a race being given for an irregular distance, for example, seven and one-half furlongs, the time made by the winner shall create a bar which shall stand as a winrace in determining eligibility at eight furlongs (a mile), the next regular distance. The time made at a regular distance is a record and for the winner of the event a winrace for that distance but it is not considered in determining eligibility for any other distance, and until winraces are established at the different distances, it is recommended that members designate their classes on a mile basis; e. g., a race at six furlongs for horses eligible to the 2:20 class.

Rule 43, Section 2, when time becomes a bar. Changed to read as follows:

Any public race at an irregular distance, for example seven and one-half furlongs, shall be regarded as irregular, and time made at any such distance shall create a bar at the next regular distance.

Rule 44, Section 2, when time is not a record or a bar. Amended by adding the following:

When admission is charged at the gate or grand stand if the money collected is divided among the horses competing, the time made shall stand as a record and winrace as in public races.

IF IT ISN'T HORSE SENSE IT'S HORSE TALK, ANYWAY.

"Don't be surprised because we horses can talk," said Miss Dinarth Dot of Washington, Ill., in her stall at Madison Square Garden, to the writer. "Didn't Black Beauty write a book?"

"I would advise you," Miss Dot continued, to ask us for facts if you want to write something about the show."

"I imagine we will see some pretty good form and some mighty fine action in the boxes," Mr. King Larigo, Miss Dot's father, interrupted. "I will be glad to look over the 1915 debutante class."

"How you talk, pop," Miss Dot exclaimed. "And you a grandfather! You see," she continued to the reporter, "Pop insists on looking at this event purely from the horse point of view. He seems to think he was brought here from Illinois just to look over the humans—and him the grand champion stallion of the Panama-Pacific exposition."

"My word!" exclaimed Lady Dilham of Washington, who was being manicured and shampooed by a whiskered maid. "My word! These creatures from the middle west are positively vulgar. Listen to that young girl talking to a newspaper reporter!"

"Rawther," agreed Mr. Irvington Model of Hamilton farm. "Beastly bad form these middle western horses show!"

"Listen to Mr. Irvington Model, pop," Miss Dot said loudly. "He thinks he's going to be the whole cheese at this show. Why, they do say he's got such a reputation that Lady Dilham is going to wear extra high shoes to get out of his class and into the class of Lady Seton. I guess you'll show 'em a few, pop!"

Mr. Larigo, who is only 41 inches tall, wagged his black head and winked at the reporter.

"I hope there's nothing but class in the boxes," he whispered. "I like style and pep."

"Huh? Whazzat, pop?" Miss Dot asked, pricking up her ears. "You wait and see when we get home if I don't tell ma how you've been carrying on. He rubs noses with all the pretty girls that call on us," she added to the reporter.

"You tell on me," Mr. Larigo retorted, "and I'll tell your mother how you can't keep your eyes off the silk hat class. Even if she is my daughter and a champion—she takes after me in that respect—I must say she's a poor judge of human flesh.

"They've all got to go some to beat my family," the old man continued proudly. "Gosh! We cleaned up at the Exposition. I had to beat one of my sons to be grand champion—Perfection Larigo's his name. We took 72 blue ribbons there and 2 grandchampionships."

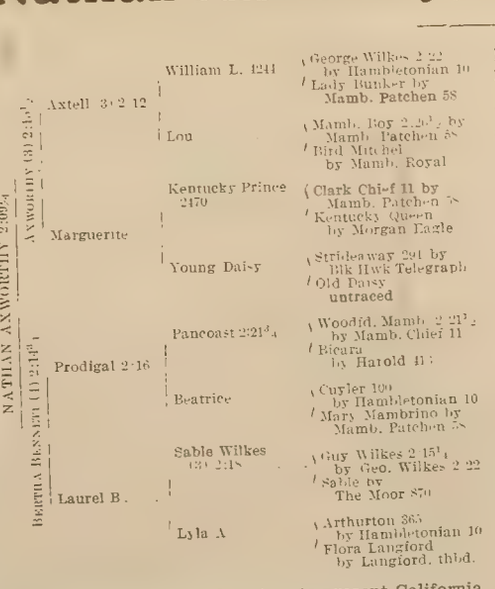
"But they say that Mr. Irvington Model, who has James Cox Brady cutting coupons for him, is going to be THE horse at this show," called a young lady horse, who had ust arrived in her private moving van limousine. "They say he has been winning everything around these parts."

"You wait, my dear, until they see me and my family," Mr. Larigo replied, looking his horsiest for the pretty newcomer. "I can congratulate this Mr. Model that he is not in any competition with me or any of my family. And if he thinks he's going to be the whole thing in this show he's got to go some, believe me."

"Look here," Miss Dot said, showing the reporter her elbow. "See those scars? That's where I kick myself when I am stepping out for the judges. Your old Mr. Model—the conceited thing—couldn't step any higher than that, could he?"

"Now, people, don't be undignified," advised Mr. Earl Grey of Toronto, Canada, who won the Waldorf-Astoria cup last year for the best horse suited to gig. "You Hackney ponies are always getting into arguments."

"Well, you can't eat those things," Mr. Larigo rejoined, yawning, "I wish I was back on George A. Heyl's farm at home right now. This show business keeps me all tired out. I'm sick of it."



"So are we," said all the horses together.

P. S.—This interview was translated from horse language into English because it appears that very few persons—except Ernest Thompson-Seton and one or two other authors—are familiar with horse language.—N. Y. World.

Do not forget to make that nomination in the State Fair Futurity for foals of mares bred in 1915 not later than tomorrow, so that the envelope containing the same will bear a postmark prior to Monday noon.

Bear in mind that the Year Book for 1915, which will be Volume 31 of the series, will be forthcoming from the office of the A. T. R. A. early this month. It is the one and only "official" publication of the season's racing statistics and the price, which has been reduced to three dollars, puts it within the reach of every horseman and breeder.

Nathan Axworthy, Two-lap Champion

While it is our general custom to present California horses, or those from neighboring states, or chance eastern visitors upon our cover page, we take pleasure in departing from the usual routine long enough to introduce to our readers the five-year-old New Jersey trotter, Nathan Axworthy 2:09¼. Now before somebody jumps up and bawls us out for mis-stating Nathan's age allow us to rise to a point of order long enough to state that Nathan was five years of age when this was being written, though as the paper is due to appear on January first, nineteen hundred and sixteen, he will undoubtedly be a six-year-old by the time you read this. We are careful to call attention to these little things in connection with any mention of Nathan, because every time we wrote of him last spring one of our most esteemed far eastern contemporaries insisted upon disagreeing with us in a very pronounced and annoying manner, and we do not wish any recurrence of the same at this writing. Consequently, in order that our most esteemed far eastern contemporary may continue its more recent course of "requiescatting in peace" so far as contradicting any remarks of ours concerning Nathan is concerned, we admit that he is six years old. Having thus evidenced our admiration of our beloved president's policy of preparedness by throwing out a few safeguards of our own, we will proceed in our humble way to express a brief appreciation of the good qualities which have united to bring Nathan into the limelight as the world's champion halfmile track trotter.

Californians will remember that back in 1912 there was quite a little race on for a time between our own Lottie Ansel and the Massachusetts filly, Nowaday Girl, to decide which should be the champion of the age and gait for the season. Lottie finally had the best of the argument by a mere matter of half a second, but Nowaday Girl was trotting right around within a few seconds of the mark, or fractions of it, mighty regularly, even going so far as to trot a half-mile track in the world's record time of 2:16½. Of course, in the words so long and so forcibly emphasized in the advertisements disseminated throughout our fair land by the late Mr. Post, "there's a reason"—or, to be more exact and not arouse the criticism of our most esteemed far eastern contemporary, there was a reason—the same being materialized in the person of the identical Nathan Axworthy of whom we have just been speaking. Nine times Nathan heard the word go that season, and in every one of the nine heats he was a handy second. Twice each was he beaten by Nowaday Girl and that good futurity trotter, Dillon Axworthy (2) 2:11¼, showing such pleasing form that many observers were of the opinion that, had he been fitted for such an attempt, he would have been able to have taken a record of 2:10 that season. No effort was made to mark him, however, as breeder's records and the like had not yet been provided for by the parent associations.

Having no futurity engagements—and please note before going any farther how foolish those few words appear when written of a good colt—his three-year-old activities were confined to a careful and not extensive "carrying over" work, in view of taking another whirl at the trotters on the Metropolitan circuit as a four-year-old. This campaign he accomplished with marked success, winning six out of seven starts and retiring at the end of the season with a very moderate mark, 2:12¼. By this time his owner was convinced that in Nathan he had some real race horse material, and for 1915 he was entered in some of the later events on the Grand Circuit, being furnished with a few preparatory engagements on the "Met," just by way of trying him out.

The "tryout" was much more than merely successful, for on the seventeenth of August, over the historic track at Goshen, he met and conquered a field of nine high class trotters in the world's record time of 2:09½, 2:10¼, 2:09¼, the band going down to defeat behind him including Andral, Bronson, Gay Audubon, Parclife and Leo A., all of whom were behind the money, while Harry J. S., Raffles and Strafford had to be content with second, third and fourth money, respectively. The following week he was given the first real leveling of his life and trotted the Goshen two-lap course in 2:07, which, had it been a public performance, would have constituted a world's record for a trotting stallion over a track of that nature by a matter of three-quarters of a second. Convinced that he was ready to meet all comers, his trainer took him to the Grand Circuit meeting at Empire City Park, and there, in footing that was a nightmare and gamely endeavoring to pull a driver that tips the scales at a figure over the two hundred pound mark, he shared the fate of Lee Axworthy and received a "cooking" that practically settled his chances for the entire season. He was second in the first heat in 2:09¼, but gradually faded until the flag caught him in the fourth, still game, still trying, and still trotting. Later in the year he got back to a mile in 2:07 but was never really at himself, and failed to figure seriously in any of his later engagements. He retired, and after a brief stud season next spring will be prepared for another campaign on the big line.

Comment upon Nathan's breeding, other than the tabulation which appears at the head of this sketch, seems hardly necessary, as the salient features of the same are so apparent. The family of Axworthy is accepted as one of the truly great ones of the trotter of today, and through the maternal line the quality of the houses represented will find favor with the most exacting. Californians will note with pleasure that it runs through producing dams back to the same old matron from whom is descended that other famous member of the Axworthys, Guy Axworthy, sire of this year's M. and M. winner, the fourth dam being the famous old matron Flora Langford trial 2:24 (dam of Lillian Wilkes (3) 2:17¾, etc.) by Langford, firstborn of California's thoroughbreds.

Nathan Axworthy is owned by a gentleman who numbers many Californians among his circle of friends and acquaintances, Andrew Albright Jr., of Newark, New Jersey. Mr. Albright spends several months each year in the Golden State and in the course of the last year has purchased a number of California horses, including C. A. Durfee's former meal ticket, Zulu Belle 2:06¼ pacing and 2:10¼ trotting, and the good trotter and brood mare Katalina 2:11¼, whose first foal developed into the fast and well mannered three-year-old futurity winner Bondalean (3) 2:06¼. Both mares are now at Mr. Albright's Prospect Farm, just a short distance from the city of Newark, and will be mated with Nathan Axworthy during the coming season. Other Californians at Prospect Farm are the pacing mare Josie Ansel 2:14 by Prince Ansel, and the yearling filly by The Proof 2:10¾ out of Katalina. This young lady, by the way, is progressing famously with her kindergarten work, which is being given by Isaac Hully, who handles the horses at Prospect Farm, and looms as a real trotter with ample capacity for adding considerably to the renown of both sire and dam.

TIME IN NEW ZEALAND IS FASTER.

While improvements in the breed of the American trotter and a great advance in the systems of shoeing, training, hitching, and the conditioning of race courses have worked a wonderful increase in the speed rate obtainable from our horses of today over those of a decade or so ago, the harness horses in our sister countries of New Zealand and Australia have been making strides of equal import. Horsemen in those countries have not only been quick to adopt such American methods as appealed to them as being fundamentally sound but they have gone further and developed to an advanced degree a system of training suited throughout to their particular plan of racing, with the result that their horses are improving in speed and endurance in a most gratifying manner. With the totalisator as a means of investment, with the governing bodies constantly on the watch for ways and means of improving the quality of the racing as a means of providing popular amusement, and with breeders steadily improving their stock by infusing new strains of blood from the established American families, conditions in general have reached a most gratifying state, and the industry of breeding and racing the harness horse is on a most excellent basis. The New Zealand Referee's following brief review of the recent spring meeting at Addington gives a good idea of the healthy condition of the sport there and the advances being made in the way of extreme speed production:

When the stake for the New Zealand Trotting Club was raised to £2500 and the total amount given in stakes at the Spring Meeting was increased to £10,000, there were some members of the New Zealand Metropolitan Trotting Club who were rather apprehensive as to the result. We feel sure that they have no misgivings now as to the wisdom of the policy adopted, for the success that has been achieved proves that, unless the circumstances are altogether exceptional, good stakes will attract good horses, and bring about keen competition. The meeting held at Addington on Tuesday, Thursday, and Friday of last week must be regarded as in every way successful, and for a gathering held under war conditions it was brilliantly so. It was unfortunate that the downpour of rain that followed the contest for the New Zealand Cup on the first day should have so seriously affected the remainder of that day's racing, but luckily the most valuable event of the year was decided on a track which, though somewhat slow, was not in bad condition for racing, and as a matter of fact, was improving with every race.

The times recorded on the first day were naturally affected by the state of the going, but with careful attention in the interval, the track was in splendid condition for the racing on Thursday and Friday, and some very high-class performances were registered. It is recognized amongst the followers of the sport that it takes a good horse to win a race at Addington; with the gradual reduction of the handicap limits the standard of the horses competing there is steadily improving, and we may take it for granted that the club's executive will continue the present policy which will have the effect of making a victory on its course the hall-mark of really genuine merit. The racing all through was full of interest, and for his share in bringing about that result the club's handicapper, Mr. H. Brinkman, is entitled to congratulation. As for the business side of the meeting, when we say that it was quite up to the usual Addington standard, it will be understood that Mr. A. J. Rattray, the club's very capable and experienced secretary, had all the necessary machinery for the work in smooth-running order. The New Zealand Cup has so often failed to produce a contest worthy of such a valuable stake that it was a gratifying change to find it bringing about a better race than usual. It would, however, have been better still had all the competitors left their marks properly, but, unfortunately, several of the horses engaged lost their chances at the start. The winner, Country Belle, began brilliantly, and though she was not the public favorite, her victory gained her owner, Mr. W. J. Moreland, many congratulations, for he bred and trained this year's winner, and her performances, including her second place in last year's race, have shown her to be a very high class mare. Our Thorpe registered a fine performance in finishing second after losing ground at the start, and in view of his form in the free-for-all on Thursday, he must have been very much harder to beat in the Cup had he begun much more quickly.

The free-for-all, which was the star attraction of Thursday's program, aroused exceptional interest, and no finer exhibition of speed than that displayed by Our Thorpe has been witnessed on the Addington track. He registered time that was much faster than the previous Australasian record for the distance, and the fact that during the race Our Thorpe was clocked to cover a mile in 2:5 2-5, and Country Belle a mile in 2:6, proves that the speed of our best horses is much greater now than they were able to show a few years ago. We have not yet reached the American standard, but in view of the different conditions, we are not so very far behind. A race such as the free-for-all adds distinction to a program, and we feel sure the committee would find it a wise policy to give more encouragement to the best horses by putting on a similar contest each day of the meeting.

PROBLEM FOR GRAND CIRCUIT STEWARDS.

When the stewards of the Grand Circuit meet in Cleveland, Jan. 11, they will have other subjects to thrash out in addition to the forming of a compact racing line for the 1916 season. Our old friend, the limitation of winnings, will be brought up again, President Devereux having revised the proposition which came near to being put through in 1913, limiting the stake winnings of a trotter to $15,000, and of a pacer to $10,000, after accumulating which amount they would be eligible only to such stakes as their records at that time left them eligible; in other words the early closing dates would not act as a protection, and after a horse had won up to the limit, there would be a new closing date (for him) to the balance of the events.

* * *

In 1913 and 1914 there was no trotter to "hog" the money in the big stakes of the Grand Circuit, Tenara promising to do so early in 1913, but breaking down long before the season was ended, and Lassie McGregor duplicating this performance the following year. This left the major portion of the money in the stakes fairly well split up among several horses, but last season Tom Murphy came along with that iron horse, Peter Scott, and monopolized practically everything in sight in the stake line, not only on the Grand Circuit, but also at the Panama-Pacific Exposition meeting at San Francisco, in November.

With the exception of the $10,000 M. and M. stake at Detroit, in which he was beaten by Lee Axworthy, Peter Scott won every one of the Grand Circuit classics for aged horses (the Tavern "Steak" at Cleveland is not included, as the peculiar conditions of the event barred Peter Scott). This was just what had been predicted as likely to happen by the critics, for Peter Scott had shown himself in 1914 to be a 2:05 trotter, who would race right around that notch every time it was necessary to do so to win. Had Lee Axworthy remained good all season the sailing might not have been so easy for the "brown bear" from Pittsburgh, but the star four-year-old made only three starts after the M. and M. and in one of these was taken into camp by Peter Scott. In practically all of the races of the latter after the M. and M. he was conceded the first money before the start, being barred in the auctions at any of the meetings where open pooling was permitted.

* * *

Not only the example of Peter Scott during the past season, but the fact that a condition exists at the present time which promises a repetition of the performance with another actor in the role of star in 1915, has caused the revival of the limitation of winnings rule, which was smothered three years ago. This time it is another Peter, the Cleveland trotter, Peter Mac 2:03½, who has yet to start in a race, but is pronounced by the best judges as a trotter more than likely to beat 2:00 the coming season. He has been a half, driven by a driver nearly four score years of age, in 59 seconds, and that is more speed than has ever been shown by any other trotter, with the exception of Uhlan and Lou Dillon, both of which crossed the two-minute mark.

The proposition which President Devereux will put up to the stewards at their annual meeting is far different from that of three years ago, as it provides two events for each Grand Circuit meeting, one for trotters and one for pacers, the entrants limited to horses which never have won a certain named amount; then, after a horse races for a time and his winnings reach another named amount he shall automatically become ineligible to these events, although his racing career will be protected by his also becoming automatically eligible to other early closing events to which his best records leave him eligible, even though he may not have been named in such events at the time the entries closed.

* * *

The conditions of the trotting stake which the Devereux proposition, if adopted, will make one of the features of every meeting in membership with the Grand Circuit, is as follows:

For trotters which have never won over $2,000 gross, $5,000; to be raced for in three heats; $1,200 for the first heat, $1,500 for the second, $1,800 for the third heat. Purse in each heat to be divided 50, 25, 15 and 10 per cent. Of the balance $150 to the winner of the event, $150 to the driver of the winner, and $200 to the horses standing fifth and sixth, respectively, in the final summary, of which 70 per cent goes to the horse standing fifth and 30 per cent to the horse standing sixth. Any division of the money not won by any other starter to go to the winner of the race. A distanced or drawn horse retains what money he may have won, but loses his position in the race.

Of the horses that start in the third heat the winner of the event shall be the horse not distanced that has won the most money gross. Should there be a tie in the gross amount won the horses tied shall race a fourth heat to determine the winner.

A horse entered in these events shall be eligible to start until it has won $7,000 gross in them, when it becomes ineligible to start again in them and all entrance money in the stakes to which it has become ineligible shall be refunded and it shall be entitled to start in any early closing event to which its winning race record made it eligible at the time it was barred.

The conditions of the pacing stake are identical except in the amounts, the stakes being for $3,000, and the horse become ineligible when it has won $5,000 gross. These conditions would not in any way interfere with the regular events, early closing or otherwise, but it would be compulsory on each association in the Grand Circuit membership to give such events.

* * *

It is possible that there will be opposition to the rule providing for these events from associations which maintain valuable classics, such as Detroit with its M. and M.; Kalamazoo, with its Paper Mills Stake, or Syracuse, with its Empire State Stake, all for $10,000, the management figuring that the addition of a $5,000 stake for trotters to its list of events will draw entries from the big stakes, certain owners refusing to take a chance against the cracks which are sure to be named for the classics when they realize that they have a chance to race for $5,000 and avoid meeting the Peter Scotts of the future. However, it appears that some change must be made in the conditions governing early closing events in order to avoid a repetition of 1915 Grand Circuit history; a year in which the identity of the winner of every one of the rich stakes raced subsequent to the M. and M. was practically a settled fact long before the horses were brought upon the track. Possibly the Devereux proposition will go a long way toward making such a repetition impossible; at least it looks to be worth a trial.—Western Horseman.

BETTING RULES AND REGULATIONS AT NEW ORLEANS.

New Orleans, La., December 19.—The rules and regulations governing the betting at the Fair Grounds during the coming race meeting, beginning January 1, were made known and will be posted prominently throughout the grounds. A copy handed down by Joseph A. Murphy follows:

"Individual betting is legal under the civil and criminal code of Louisiana and only individual betting will be permitted on these premises. No one must set up a place for the purpose of betting with any sheets, blackboard or paraphernalia of any character.

"There must be no display of odds, even on a program, nor any soliciting of betting. There must be no crying of odds. Each bet must be an individual transaction and the management requests that individual betters see that their bet is sealed by the individual stakeholder before leaving the place.

"Individual stakeholders are employed for the protection of the public. They are hired by the Business Men's Racing Association and no one has any authority to hire or discharge an individual stakeholder except the management. These men are under a properly executed bond. They shall receive no fee or tip and shall make no bets or have any money in their possession for the purpose of betting. Any stakeholder who refuses to hold an individual bet will be summarily discharged and patrons are especially requested to report to the management any incivility on the part of any stakeholder.

"Patrons are cautioned to get the correct number of the stakeholder so that he may be located, and they are requested to look carefully at the envelope before they sign it so as to avoid mistakes.

"Stakeholders will be compelled to rectify any mistakes made by them, but the signatures of the betters in acceptance of the terms of the aleatory contract will be considered as final.

"Individual stakeholders shall have in their possession no device to encourage, promote, aid or assist any person or persons to bet or wager; they shall simply witness and adjust a legal, aleatory contract after it has been consummated by two individuals."

Another notice issued to horsemen by Manager Joseph A. Murphy was that relating to selling races and claiming of beaten horses. It follows:

"In all selling races the winner will not be sold at auction. At any time within fifteen minutes after the official board has been displayed any person in good standing may put in a sealed bid for the winner with the clerk of the scales or the racing secretary. Money for this bid must accompany the bid unless the person bidding has sufficient funds in the office to cover the bid. Bids may be made in units of $100. Failure to place the proper amount in the envelope will not vacate the bid, but it will be considered in force to the amount of the even $100 under the fraction of $100 that might be placed in the envelope. Thus, for example, if there should be $725 in the envelope the bid will be accepted as $700. When the envelopes are opened the owner of the horse will be notified and will have the option of protecting the horse for the customary $5 or letting it go to the highest bidder, to whom an order for the horse will be given. Should there be two bids for the same amount, those bidding will draw lots for the horse. One-half of the surplus arising from this will go to the second horse and the other half to a special fund to be available for any emergency, charitable or otherwise that may arise. All other horses are eligible to claim by any one in good standing for an amount equal to the first money of the purse. When such horses have been claimed they shall not be eligible for sale or transfer by private treaty for a period of thirty days, but, of course, will be subject to sale or claim in any selling race in which they may run. When two or more persons claim the same horse priority shall be determined by lot except that the owner of the winner shall have his claim vacated if other claims are in for the same horse. No person may claim more than one horse."

NOTES and NEWS

Happy New Year!
And a prosperous one.

◈◈◈

Remember that all the horses are a year older than they were yesterday.

◈◈◈

A sure sign that "winter is with us" is found in the green grass that is starting so generously in the wake of the recent rains.

◈◈◈

Speaking of winter—a recent letter from Tommy Gahagan, the itinerant turf tattler, tells of hard-earned money spent for ear-muffs, wristlets, woolen mittens, a big overcoat and a pair of fleece-lined arctic overshoes.

◈◈◈

No, gentle reader, he is not in Chicago, either, but away down south in Indianapolis. Speaking of Chicago, however, speaking of Chicago:

◈◈◈

The editorial staff of our sole surviving contemporary may have some weird conceptions of what constitutes a climatic paradise, but you have to hand it to 'em on this Christmas number proposition. Taking the present Christmas number "by and large," as is Kin Hubbard's favorite way, the Review folks have certainly done themselves proud, if they will pardon our homely phraseology.

◈◈◈

Any horseman whose wife is so darned stingy that she will not stake him to the two bits required to procure a copy has adequate grounds for a suit for divorce.

◈◈◈

The Western Horseman's number, also, aside from that portion contributed by yours truly, reflects great credit to its publishers and to the enterprise of its patrons, while the Christmas editions of the Trotter and Pacer and the American Horse Breeder are also exceptionally attractive from every viewpoint. One or two other publications are due at this writing, but are probably delayed in transit by the rush of holiday mail. To each and every one of them we extend our heartiest fraternal wishes for success and prosperity during the coming season.

◈◈◈

Having thus disposed of a pleasant duty, permit this pointed personal question, Mr. Broodmare Owner—have you made those nominations in the State Fair Futurity for foals of mares bred in 1915? This is absolutely the last reminder.

◈◈◈

Mr. and Mrs. A. W. Longley, who for some months have made their temporary home at the Hotel Oakland, left a few days ago for their ranch near Bishop, Inyo county, where they will spend an indefinite period. In the meantime, Henry Smith and Hiram Rapelje will continue the education of the Longley colts at the Pleasanton Driving Park.

◈◈◈

The second "Businessmen's Race Meeting" begins at New Orleans today, with some seven hundred of the best horses of the country quartered in the stables there. The pick of California and Nevada thoroughbreds are in attendance and their friends here are confident that they will return a most excellent account of themselves every time they come to the gate and get an even break in the racing luck. Here's hoping.

◈◈◈

Adolph Ottinger, dean of the San Francisco matinee drivers, arrived home from a trip into the wilds of eastern Oregon just in time for the Christmas festivities. His interests in the Burns country are growing and he threatens to spend most of his time there during the coming year. He has only three horses left at present out of the many he has owned at various times, and as several parties are showing inclinations to purchase those three, the indications are that "Ott" will soon be "a-foot."

◈◈◈

It has long been the opinion of various members of the Grand Circuit strategy boards that the fast California-bred pacer Del Rey 2:03¾ would be a greatly improved horse if subjected to the process of castration. So thoroughly and widely has this notion been disseminated that the alteration has finally become an accomplished fact, so that summary writers next summer will have to remember to make it "b g" in stead of "b h."

◈◈◈

In spite of the fact that the war in Europe has made great inroads upon the horseflesh of all the countries involved in the titanic struggle, Secretary Wayne Dinsmore of the Percheron Society of America has just received word by cable from President Aveline of the Percheron Society of France to the effect that the government has authorized the exportation of two hundred stallions, foaled in 1912 or earlier, so that American breeders have not yet reached the point where they must be dependent upon the products of their own farms for the continuance of their operations. The American-bred draft horse, however, is very rapidly coming into his own and prices for homegrown individuals of pure lineage and proper type was never stronger.

Thomas S. Griffith of Spokane has been elected to membership on the Pacific District Board of Review of the National Trotting Association, to fill the vacancy caused some months ago by the death of the late Colonel J. C. Kirkpatrick of this city. Mr. Griffith is well known in trotting horse circles throughout the northwest and west and his selection will meet with the approbation of horsemen in general.

◈◈◈

J. E. Bransford of Salt Lake, twice mayor of that mid-continental metropolis and a steadfast friend of the harness horse for many years prior to the time of the sprouting of his first political aspirations, arrived back in California a few days ago on his annual pilgrimage and is stopping at the Lankershim at Los Angeles, spending a due portion of his daylight hours at Exposition Park, where he is an ever welcome figure.

◈◈◈

His Honor the Mayor, in other words Bert Shank, generally has a few good ones eating hay and oats somewhere in his immediate vicinity at his stronghold at North Randall, but this winter he has graduated into the Charley Dean class with a whoop, having at present a total of three score and one trotters and pacers in a more or less advanced state of development dependent upon him for the little old three a day—not forgetting the proper amount of exercise. He certainly runs small danger of suffering from either lonesomeness or inaction with this delegation to provide for.

◈◈◈

The various charities of the city of Baltimore will be benefitted to the extent of some thirteen thousand dollars as a result of the recent fall meeting of the Maryland Jockey Club. It is the club's custom to donate all proceeds of their events in excess of six per cent "legitimate profit" to some worthy cause, the surplus in this instance aggregating the neat sum just mentioned. If such a course of procedure were made universal, with the mode of speculation restricted to the totalisator or the pari-mutuel machine, there would be very much less of an outcry against racing.

◈◈◈

"They're off at Tia Juana!" The inaugural meeting of the Lower California Jockey Club was ushered in today, under what from this distance seem to be fairly auspicious circumstances. The few horses remaining at tracks in this neck of the woods were shipped down early this week, and special rates on the railroads attracted quite a number of the regulars from this and neighboring cities. Juarez is having some tribulations, and it is not improbable that a number of owners will ship from that point to Tia Juana in the near future, and Tia Juana can use the horses to a good advantage.

◈◈◈

There will be a special matinee held Christmas (next Saturday) morning on the Lincoln Park speedway, that it is expected will be one of the most interesting of the entire season in Chicago, as in addition to the cracks of the North Side, a number of the best horses from other parts of the city will also be in evidence, the present probability being that something like twenty starters in the various events. Al Whitney will start Blue Line p. 2:08¼ and others. Johnny Bangert will start one or two. A. G. I. 2:14½ will be on hand, as usual, and Dr. Brook, the green half-brother of Dr. Burns Jr. 2:04¼, will take the word. Dr. Fisher will be represented by his pacing mare Swamp Maiden 2:16¼ and his fast Bingen colt, Bingen Bond 2:23¼. The racing will begin at 10 a. m., and the entertainment will be enjoyable. The surface of the speedway has been placed in excellent condition and will enable the horses to step fast over it.—Horse Review.

TOO MUCH WATER CAUSES DECREASE IN ALFALFA YIELDS.

More water means less instead of more alfalfa, once a certain limit has been reached.

This is the valuable lesson of a six-year field test just completed by the Irrigation Investigations of the University of California at the University Farm at Davis. It was shown that, contrary to accepted belief, a limit is soon reached above which the yield of alfalfa actually decreases with increasing amounts of irrigation water applied.

In these tests, one-quarter acre checks were used, and each test was duplicated. Quantities of water varying from 12 to 60 inches were applied to the various checks. Two checks were left unirrigated as check plats. The average yield for six years from the unirrigated checks was 4.07 tons of hay per acre.

The largest average yield, 9.28 tons, was produced by applying 36 acre-inches of water per acre, in four nine-inch irrigations.

But the most economical yield was produced with 30 acre-inches of water per acre applied in four 7½-inch irrigations, 8:99 tons of alfalfa hay being produced. The average increase in yield of .29 tons per acre by using 36 instead of 30 inches in a season was not sufficient to pay for the increased cost in water and labor. Between nothing and 30 inches, the yields increased uniformly with the increased amounts of water applied.

A slight decrease in yield was shown from four 12-inch irrigations, while a decided decrease resulted from four 15-inch irrigations, which produced but 8.20 tons of hay per acre.

CHRISTMAS MATINEE AT SANTA ANA.

Santa Ana, Dec. 25, 1915.—"White Christmases" that professional Californians from the corn belt talk so much about may be all right in their way in countries where the folks are used to them, but most anyone would have a hard time finding any real fault with the kind of a Christmas enjoyed here today, with the sun warm and bright and harness racing as the feature of the afternoon portion of the celebration. Four races were contested before a nice crowd by members of the Orange County Driving Club, and with Santa Claus present in the grandstand in person with a remembrance of some sort for every person in attendance a genuine good time was the result. From the way the public takes to the matinee racing here it looks as though the trotter is "coming back" in great shape so far as this particular locality is concerned.

W. R. Murphy, who on the occasion of the last matinee spreadeagled the card by taking first in every event, was a bit tamer today, and while he was a hard one for the boys to handle they managed to take him into camp in style that rather evened things up, only one event going to his entry. Two newcomers to the green class accounted for that number, which started things off for the day, Fred Culver's seven-year-old trotter Brownie taking the second and third heat after Babe, a big fat mare owned ten miles out in the country, had won the first heat. The latter is owned by S. Teneick and could trot a twenty gait if given only a very little work. Murphy scored a win with Black Diamond after racing a nice contest with Fritz Schultz and Laddie, with three heats right in the notch from 2:28 to 2:29. Fred Cole with Atlantic Fleet bested Miss Patterson and Buster L. in the 2:25 pace, while Dr. H. J. Stevens with Doctor S. hung up the two fastest heats of the day in the 2:20 trot, winning the first in 2:19 and coming back in 2:18, with Dick W. and Tommy Murphy right at his heels. The summaries:

Green Class:

Browney	(Fred Culver)	3	1	1
Babe	(S. Teneick)	1	3	3
Wanna Wilkes, by San Juan	(W. R. Murphy)	2	2	2
Strathway Jr., b g by Strathway	(H. E. Johnson)	4	4	4
Carpus, b h by Earondale	(A. E. Waern)	5	5	dr

Time—2:40, 2:39, 2:37½.

2:30 Mixed:

Black Diamond	(W. R. Murphy)	1	2	1
Laddie, bl g by Aladdin	(Fritz Schultz)	2	1	2
Midnight	(Johnny Fries)	3	3	3

Time—2:29, 2:28, 2:28½

2:25 Pace:

Atlantic Fleet, ch g by Murray M.	(Fred Cole)	1	1
Buster L., ch g by Zolock	(W. J. Lindsey)	2	3
Miss Patterson, b m by Zenith	(W. R. Murphy)	3	2

Time—2:24, 2:24¼.

2:20 Trot:

Doctor S., b g by Carlokin	(Dr. H. J. Stevens)	1	1
Dick W., b g by Walter Barker	(W. R. Murphy)	2	2
Tommy Murphy, b g by Red McK.	(F. W. Faucett)	3	3

Time—2:19, 2:18.

MRS. E. F. GEERS ANSWERS LAST SUMMONS.

The countless thousands of friends and acquaintances of Edward F. Geers will be pained to learn that this Christmas was for him one of the saddest of his lifetime, the devoted wife who for so many years has been always with him having answered to the call out upon the long journey from which there is no return. For many months past Mrs. Geers' health has been the occasion of much concern to her friends, her life having been despaired of twice during the year just passed. Plucky rallies on both occasions led to the hope of her eventual return to complete health, but such a blessing was not to be hers, and on Sunday, December 19, at her home in Memphis, death put an end to both hope and suffering. A member of the Review staff who had the pleasure of knowing her, writes in part of her death as follows: "Mrs. Geers was in every way an excellent and admirable woman, the most faithful and devoted of wives and mothers, enjoying the respect and esteem of all who knew her and the sincere love and affection of her friends and close acquaintances. While only on rare occasions was she seen at the races, she being by preference inconspicuous in her tastes and ways of life, she was nevertheless deeply interested in her husband's success in his profession and had, throughout their long wedded life, been of aid and assistance to him in many ways in attaining his eminent position, while the reputation which he enjoyed was to her a source of intense pride and gratification. Of the children which blessed their union, the only son, Edward F., named for his father, was accidentally killed some years ago, but a daughter who has been the close companion and devoted ministrant to her mother during the latter's protracted illness, remains to mourn her loss."

Horsemen throughout the west will be quick and sincere in joining the Breeder and Sportsman in extending to their bereaved friend and his daughter their most heartfelt sympathy and respect in this moment of sorrow and distress.

NEW PARK AMATEUR DRIVING CLUB.

San Francisco, Cal., Dec. 28, 1915.

To Members:

The annual meeting of New Park Amateur Driving Club will be held in Parlor A, Palace Hotel, Monday, January 3, 1916, at 8 o'clock p. m. for the purpose of electing officers for the ensuing year, and such other business as may be brought before the meeting.

Respectfully yours,

F. W. THOMPSON, Secretary.

HEREDITY IN BEEF PRODUCTION.

The art of breeding beef cattle of superior merit is an accomplishment of which relatively few American farmers can boast. Occasionally by the purchase of a prepotent bull or by the fortuitous possession of an exceptionally good breeding cow, a breeder gets started in the right direction, and is able to follow the proper course for a number of years. A study, however, of the records of the large shows indicates that the average life of an exhibitor is less than 5 years.

Sporadic attempts have been made, with varying degree of success, to establish a dual-purpose type. For the most part these attempts have failed to make good in popular esteem and probably in function, so far as a given individual is concerned. There are undoubtedly a few cows of good beef conformation which produce a large amount of milk in every neighborhood. The great difficulty, however, has been that they do not breed true to type, in the majority of instances.

With the tremendous demand for dual-purpose cattle, and the failure of many attempts to produce them from Shorthorn, Red Polled, Holstein, Brown Swiss, and occasionally even from Jersey and Hereford cattle, it seems that the methods used to date have for the most part been incorrect. We may yet be able, with a more careful study of the functional process involved in the production of beef and milk, to establish a breed or a strain which is much more efficient than any that we now have.

In order to have a sufficient number of cattle for instructional purposes at the Kansas State Agricultural College, three breeds of beef cattle, Aberdeen, Hereford and Shorthorn, are maintained. Calves suitable to show as fat steers are selected from each crop rather than purchased. This year 5 entire steers steer herds were shown, every member of which was bred on the college farm. Close observation of the dams of these cattle reveals the fact that in no instance has a show steer been selected from a cow which would be placed at the top of the herd of breeding females to which she belongs, if the showyard standards usually used in placing aged breeding cows were applied. As a rule she would be well down toward the foot of the class. The thickest cows have not produced the best calves.

In other words, cows which are not of the accepted beef type transmit beefiness to their sons and also to their daughters, as is shown by their form previously to their first calving. When the heifers enter the ranks of matrons they lose to some extent the rotundity and symmetry of form and become a little sharper over the withers, longer and more slender in the neck, flatter in the rib, heavier in the barrel, and thinner in the thighs. Hence beefiness is either a secondary sex character of the male, transmitted in the same manner as the crest, burly head, and heavy horn, or else it is a character which is tremendously disrupted by feminine functional activity. Perhaps this disruption results from the shrinkage of the deposit of fat in the thicker muscles, due to extraction during milk production, thus changing the form of the individual without altering her type.

Through the co-operation of the animal husbandry division of the Bureau of Animal Industry the Kansas Experiment Station is inaugurating an experiment in breeding purebred Shorthorn cattle which will continue through 20 years. The project has been approved by the Office of States Relations as meeting the requirements for prosecution under the Adams' Fund. This fund was specifically appropriated for fundamental problems which are not of such a nature as to permit a report to popularize the experimental work of the institution.

The general plan in securing the foundation experimental stock was to secure 20 Shorthorn cows from the best beef herds in the United States and Canada, each one of which had produced at least one calf decidedly above the average of the herd from which the cow was selected. Each cow must have a sound, well-balanced udder and must have produced more milk than her calf was able to take during the early part of her period of lactation.

Following this method of selection a variety of types has been secured, some individuals of which would not pass muster under the critical eye of a judge looking for beefiness in a breeding female. Represented in the foundation stock are the herds of Cowan of Virginia, Carpenter & Ross, Edwards and West of Ohio, Robbins and Silverthorne of Indiana, Edwards of Canada, Brown, Forbes, Kreigh, Kilgour and Prather of Illinois, Leonard of Missouri, Saunders of Iowa, Kane of Nebraska, and Hill and Tomson of Kansas.

Many other herds were visited where suitable cows were found, but the owners refused to sell them. In a few instances correspondence indicated that the breeders were not particularly interested, but in the majority of instances the most hearty co-operation was secured, and animals were allowed to leave the farms with which the owners would not have parted in any other circumstances. It will be noticed that the majority of the cattle come from the cornbelt and from herds which have made a reputation in the showyard and salering. Individuals from the Augusta, Clipper, Mina, Secret, Gwendoline, Jealousy, Duchess of Gloster, Clara, Narcissus, Roan Lady, Marr Bessie, Orange Blossom, Lavender, Lovely and several Scotch-topped families are included in the foundation stock. The purpose was to secure cattle from herds and from families which were noted for the production of beef cattle.

The cows were assembled at Manhattan, where they will be carried on pasture until calving time. So soon as calves are dropped they will be taken from their dams, placed on nurse-cows and developed according to the best practice of the breeding of purebred beef cattle. The cows will be fed and managed according to the best methods of dairy breeders. A junior and senior calf will be castrated each year and be developed as show steers. Thus the value of the calves on a beef basis and the ability of the cows to produce milk can be determined.

The bull to be used at the head of the herd is Matchless Dale, a son of Avondale and the sire of the first-prize junior and senior Shorthorn steer calves and reserve champion at the 1913 International, the first-prize senior calf at the 1913 Royal, the champion steer of all breeds and ages at the 1914 Denver show, and the first-prize steer calf at the 1914 Kansas State Fair, the only exhibit made last year. The first prize on the two-year-old Shorthorn steer, the first prize on the calf, and the first prize on the herd and championship for steers were awarded to the get of this bull at the 1915 American Royal. In other words, the head of the herd is a tried Shorthorn bull of beef type. As an individual he would, if fitted, rank among the best aged bulls of the breed.

After the experiment has progressed sufficiently, each year the best milk producing cow will, if possible, be bred to the Shorthorn bull whose calves have won in the get of sire classes at the International. In this way it is hoped to keep the best beef blood in the herd and provide a check on the general matings.

The ultimate purpose of the experiment is to determine whether or not beefiness is an attribute of sex, and in what way it is related to functional development. A careful study of the pedigrees of International and Royal championship winners indicates that a championship bull is apt to produce champions. With the exceptions of Ruberta and Golden Abbotsburn, both of which appear in the pedigree of Ruberta's Goods, no champion Shorthorn female of either of these great shows appears as dam, grandam or great-grandam in the pedigree of a champion. Whether this is due to the excessive development necessary to win a championship, or that the type selected is wrong, or that when a cow produces a calf and large quantities of milk her form changes, are questions upon which this experiment will give information.

As the experiment progresses light may be thrown upon the dual-purpose type. In selecting beef cattle the breeder has usually chosen the fat steer as his ideal, and varies from this type only far enough to secure evidence of masculinity in the male and femininity in the female, in other respects selecting each sex upon the same basis. The dairyman has used the type associated with high production in the female and selects the bull as nearly to that type as his sex will permit. By using beef bulls from high-producing dams, and selecting cows upon their ability to produce, a double standard may result, one for males and another for females, rather than a dual-purpose type, which is a compromise between two ideals.

As the majority of the cows range in age from 5 to 8 years, many of them never having been even halter-broken, all of them having suckled calves and none having been hand-milked, their first year's performance at the pail will not represent their actual producing capacity. Probably many similar difficulties will be encountered before the experiment has settled down to a smoothly-running basis.

Every precaution has been used to see that the experiment will continue through a long period of years. This is essential, because under the best of conditions 6 years are required to replace a mature breeding herd with their offspring. When time is taken to select a definite type from the original herd, 20 years, the proposed duration of this experiment, may prove to be insufficient. In that time, however, some indication of the trend of the herd should be evident.—Breeders' Gazette.

U. P. HORSE OBSERVES SCHEDULE.

Omaha, Neb. Dec. 17.—Old Jim, one of the Union Pacific's most faithful employees, has been slated for retirement on pension and the chances are that while Jim will not draw any money from the pension fund, he will live a life of ease during his remaining days.

Jim is 21 years old and has been continuously in the employment of the Union Pacific during the last 10 years. Jim, being a horse, does not have to conform to some of the conditions required of men and women who go onto the company pension rolls.

Jim's last mail delivery from the headquarters building to the Union Station week days is made at 5:45 o'clock in the afternoon. At least that is the time when he and his driver should leave the building. Friday afternoon he was at his post of duty with his driver. The driver was in the building and was not in a hurry, but Jim was. He remained at the curb until 5:55 o'clock, when he seemed to realize that he had to get started if he caught a 6:30 o'clock train to deliver his mail. Without waiting longer, in his teeth he picked up the leather strap to which was attached a 10-pound iron weight, turned around and down Dodge street, at a slow trot starting for the depot. Arriving there, he waited the usual length of time required to unload mail from the wagon, again picked up his weight and left for the stable.

CANADA BEING DRAINED OF HORSES.

"Canada is being drained of the foundation stock of its horses through the mistakes of the men buying army animals for the Canadian Government," stated A. Yeager, of Simcoe, when asked by a Toronto Globe reporter the effect the shipping of so many horses from this country would have on the future of this important industry. "The number of animals is nothing," continued Mr. Yeager. "We would never miss twice as many, but the type will take years to replace.

"We have a surplus of serviceable work horses in this country—horses well broken to harness, good workers and hardy both as to climate and disease. The animals range in weight from 1,100 to 1,400 pounds. Nearly every farmer has one or two that he wishes to sell at a fair price. If all this stock was removed from the country the loss would only be felt temporarily, as most of the animals are geldings. Instead of the Remount Commission taking advantage of this market, however, they are completely ignoring it.

"Buyers are looking for fat, young animals, mares, as well as geldings being taken. This class of horse is for the most part made up of mares, as the average farmer's breeding stock is young and in the pink of condition. Here is where the buyers are making a mistake. The young breeding stock that has taken this country years to build up is now being wasted. Because these animals have a finer appearance inexperienced men are buying them in preference to workers. The ideal army horse is a strong, hardy animal, used to rough feed and hard work; an animal that will haul a gun into action and haul it away again. Will well-fed, five-year-old mares be able to do this work better than the ordinary farm blocks? They will not. Used to the very best treatment, barely broken to the bridle, they are taken out of the pastures or bright, airy stables and started for the battlefield. I say started, for it is long time before these animals reach the front. The horses are herded, 19 in a box car, and hauled to the stock yards. After being kept there for some time there is another ride in a drafty car to the training camp.

"If the Commission wished to get their horses to the front with the least possible loss they would ship the animals direct to the training grounds. This would not only save the expense of loading and reloading at the yards, but the horses would reach the grounds in less time without being exposed.

"Their lack of previous experience in harness makes the breaking-in a difficult job, both for the men and the beasts. Sore shoulders and feet claim their victims. By the time the animals reach the battlefield a much larger percentage than the average person is aware of has been lost.

"Again the double loading and unloading of the horses costs money. Training young animals is no small item. The loss of time getting the stock ready for service alone means a great deal of money. The greatest loss, however, will be that felt by the farmers of this country when the price of horses begins to rise and the quality begins to deteriorate, both due to the draining of foundation stock. All of these losses would be borne cheerfully, if necessary, but when horsemen find that a great deal of them have no excuse, it is not surprising to find these men dissatisfied.

"How can we avoid these losses? Simply by putting horsemen in the place of the present buyers. The present method is not working satisfactorily. A typical case occurred here some time ago. A farmer came in with two horses: one was a nine or ten year old and well trained. The other was a four-year-old mare, fat and practically unbroken to harness. The buyer refused to give $125 for the gelding, but offered $200 for the mare. Why did he do this? Because the mare looked smoother than the worker. The gelding that was turned down on account of the lack of smoothness is today hauling an oil wagon, which is much heavier work than his share of hauling a gun would be. If the men under the Remount Commission realized what the horses would have to do they would choose workers, not show or breeding animals. They are not only getting less for their money, but doing a vast injury to the whole country. Send the workers to the front, we can spare them, but leave the breeding stock at home.

"The United States is selling thousands of animals for military purposes, but that country is keeping its breeding stock, and because of this latter fact they are just one year ahead of us. If the present system of buying horses keeps up we will have to go to the States for breeding stock after the war.

"Another point on which horsemen are dissatisfied is the lack of competition in Canada between buyers from the different nations looking for horses. If Canada does not want our surplus work horses, why not let Britain, France or Italy have a chance to buy them? Many farmers are not breeding this year, because they cannot find a market for their present stock."

When asked the effect of the war on the breeding of pure-bred stock Mr. Yeager agreed with most of the other Canadian horsemen. "There will be a big demand for pure-bred heavy animals from now on," he said. "Great Britain, France and Belgium are being rapidly depleted of their horses. Even the best stock is being used up. Canada will find a ready market for her best horseflesh in those countries. The demand for good work horses will also be strong, but if the farmers keep on disposing of their mares for military purposes the filling of that market will have to be left to the United States."

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FROM RIO GRANDE DEL NORTE TO GUATEMALA.

When the casual tourist speaks of a "trip to Mexico," he has no more idea of the size of the great republic of the South than a child has of astronomy; when he returns, having seen El Paso or Laredo or Nogales, having whirled through the plains and the mountains of the plateau to the ancient capital of the Montezumas, and then arrives home after two or three weeks in a Pullman, he thinks he has seen Mexico. So wrote Ramon Jurado five years ago, before the revolutionary upheaval, but none the less interesting for all that. As a matter of fact, the said tourist has no more seen Mexico than a visitor to New York from across the Atlantic sees the greatest, best, most productive, most real part of the United States.

From Tecolato, on the Rio Colorado, below Yuma, southward to Tapuchula on the Guatemala line, is more than 2,000 miles; from Matamoras, on the gulf coast, to Tia Juana, in lower California, is more than 1,200 miles, and these distances represent the greatest length and breadth of the Estados Unidos de Mexico.

I have rowed down the Rio Colorado to the Gulf of California. I have ridden on the Rio Grande, and, far to the south where the overarching jungle makes night of the brightest day. I have been paddled up the great Rio Usumacinta in an eight-oared war canoe, the Mexico-Guatemala line beneath her rounded keel.

Incidentally, I have seen great three-ton mantas engaged in war to the death with fifteen-foot man-eating sharks just off the little West Coast harbor of Manzanillo, and, months later, have heard the waves lapping above the dungeons of San Juan de Ulloa, the fortress prison of Mexico at Vera Cruz, over on the coast of the Gulf of Mexico.

It has taken me the better part of a year to see this much of the great tropical empire, and even yet I know nothing of it. I have seen water led for scores of miles to irrigate millions of acres; I have seen 1,500 square miles of watershed drained into one set of turbines to provide light and power and heat for more than a dozen cities, and I know it is one of the lands of great industrial opportunity in this dawn of the twentieth century.

I have shot deer seven thousand feet above the sea; killed ducks at five thousand feet, and met the jaguar and the alligator and the tapir, at sea level in jungles so dense that it is twilight at midday. I have ridden in an electric car, ten minutes from the heart of Mexico City, where dwell 500,000 people, past a lake so filled with ducks that I could see water only in scattered patches—and I know this is the greatest game preserve in the world.

In Mexico there are no game laws. The sportsman hunts when and where he wishes, provided he can gain the consent of the keeper of the land. But the native man of means, who could afford his hammerless and automatic and his powerboat and his aeroplane, seldom cares for these things. It remains for the foreigner to come into the republic and establish his hunting lodge and his game preserves. There are parts of Mexico which have never heard the crack of the rifle or the boom of the scattergun. Into some of these I have entered; into others I am going, and what I know of the great slopes of Mexico from Popocatepetl and Orizaba to the sea only spurs me on to greater hopes of what lies in the tangled caoba forests of Yucatan and Quintana Roo.

I came into Mexico by way of the twin cities of Nogales, Arizona, and Nogales, Sonora. Neither one is worth mention, and the customs houses maintain what little population there is in either. But south of Nogales, Sonora, lies some of the finest grazing country in the world, and here, from the border down to the Yaqui river, is a vast game preserve, teeming with quail, wild pigeons, deer, mountain lions, foxes and coyotes. In the mountains which everywhere can be seen from the coast, there are probably a few bear, but Mexico as a whole is not a bear country.

This is the country best adapted to the man who has been accustomed to the outdoor world of the United States and Canada, for the tropical jungles, wherein lurks the best big game shooting of the New World, are death-dealing to most men, unless they gradually acclimate themselves by coming slowly down the coast.

From Nogales I wandered down to Guaymas, the port of Sonora on the Gulf of Lower California. When I landed there, a town of 9,000 people, saw the great bay and the gulf outside, I asked where I could rent a rod and reel and a launch. My answer was that all the fishing at Guaymas was done with handlines; that a rod and reel had never been used, though there were thousands of game fish outside, including the famed leaping tuna. More than this, a steel seine has never been used by the market fishermen, while power-boats for fishing are all but unknown, there being but one vessel, a thirty-five footer, worthy of that name in the port.

I hunted and fished little in Sonora, however, and had my first real sport with the little sixteen along the banks of the Rio Yaqui down near the Sinaloa line, shooting wild pigeons. These are not the blue mountain pigeons of the California hills, but are a trifle smaller, gray in color, and look more like an exaggerated mourning dove, with the exception of the white crescent on the throat.

Thousands of these birds breed in the thick jungle of the river and the result is that the sport in the fall months is excellent. They are strong, rapid flyers, pass in long flights over certain feeding grounds and are a source of much pleasure to the few Americans in this part of the country.

In Sinaloa, the State I next visited, one begins to enter the real jungle. Here, the railroad is merely a lane, 100 feet wide, walled in by jungle so dense that cattle cannot make their way through it until the herders cut paths for them. The trees are most of them thirty feet or more in height, and so interlaced with creepers and tough underbrush that it is an impossibility for the hunter to even enter it without the aid of mozos with machetes. Deer are abundant in this heavy jungle, small gray fellows, and they can be obtained only by waiting along the trails, for a full-grown buck, despite his antlers, will go at express train speed through the thickest part of the tangle.

Sinaloa's great game animal is the javelin — pronounced "hahvayleen"—or wild hog. In the books you find him down as the peccary, but this pig is not the true peccary, though he is a fighter, runs in droves, like the piglets from father's barnyard. I had some good sport hunting these, and discovered, on the side, that I had entered the jaguar country as well.

The jaguar is the great cat of Mexico. It combines the beauty of the lion, the strength of the tiger and the cunning of the leopard. Were a jaguar as large as a lion, the spotted American cat would whip the king of beasts in one round, and as it is, the jaguar is afraid of nothing that walks the earth, swims in the water, or flies in the air. He kills with equal impunity the alligator, the deer or the wild goose asleep on some pond, and if he once gets the taste of human blood, he will attack a full grown man just as quickly as he will a lamb or a calf. There are whole Indian villages in the jungles of Campeche and Chiapas and Yucatan, which have been entirely depopulated by the paws of one man-eating jaguar, for the persons he did not kill fled from their homes to build new grass huts in some less dangerous locality.

From Sinaloa, which is a great, low-lying State, I passed on down to Mazatlan, thence across by sea to Manzanillo, and up to Colima, a little, white-walled city, nestling in the valley twenty miles from the volcano of the same name, the only active volcano in Mexico.

Midway up the slope of this cone there is a beautiful, clear lake, which is filled with wild fowl of all kinds at certain seasons of the year, while around the foot of the mountain there is a heavy mat of jungle, which hides jaguars, mountain lions, wild hogs, deer and a few bear, not to mention the little spotted "windaroos," or ocelots, a sort of small leopard, not so large as the California red lynx. Unless by accident one runs across them in open country, it is almost impossible to get these animals without dogs, and a good hunting dog, in the shape of a hound or terrier, is unknown in the republic.

But I began to get into the waterfowl country when I came up the mountains, through the great gorges spanned by the national railways, into the Lake Chapala country and its marshes. The duck shooting here has been aptly described by different writers, but I want to add a word about the jacksnipe of Mexico. Coming down from the north in annual migrations, these wary little birds have been shot at so little in the republic that they lose something of their shyness and offer better opportunities to the sportsman anxious for a big bag. The jacksnipe shooting on Lake Chapala's marshes and the other lowlands of the plateau, is of the best in the world, and as this is one of my favorite game birds, I enjoyed myself in the fall months on these lakes.

It is impossible, even in ten articles of the length of this, to detail my experiences on this remarkably interesting tour of Mexico which I have nearly completed. To cover it day by day, even with the aid of the exhaustive diary I have kept is an impossibility, but there are some few things which I have learned regarding outdoor sports in Mexico which may be set down for the guidance of those who may seek new fields for rifle or shotgun or rod.

The zones of wild life in Mexico are exceedingly well divided by altitude into three distinct classifications. Coming into the country from the north there is the level or plain zone, which comprises much of the great States of Sonora, Chihuahua, Coahuila and Nuevo Leon. This is a rolling country, rounding over from sea level on the east to sea level on the west, broken here and there with mountains, poorly wooded, poorly watered, but so well dowered with lush grasses at certain seasons of the year as to form the ideal deer country of Mexico.

All the fishing worth while, and much of the shooting, is contained in the sea-level zone. There are no trout, bass, salmon, or other game fish in the rivers of Mexico, but in her coastal waters there are numbers of the finest and gamiest of sea fishes, most of which have never been caught in sportsmanlike fashion.

In the sea-level zone, south of the Territory of Tepic on the west and the State of Tamaulipas on the east, is the best alligator and jaguar shooting of the entire republic. The fishing in the hot parts of the coast, of course, is not so good as along the northern sea shore, but the Pacific, particularly, is full of game fishes at all places at all seasons of the year. Besides these, there is always the best of sport to be had with big fifteen and twenty-foot sharks, which make bathing all but impossible in the tropics.

Some day I hope to hook up with one of these monsters with, say a sixteen-ounce rod and a twenty-one Cuttyhunk line. There will be something doing, I know; I am not even confident that I shall bring the monster up where I can put a rifle ball into him, but I also know that I shall have some good sport on the warm, sun-kissed sea of Mexico.

The plains and the sea-coast zones both rise gradually to an altitude of 7,000 to 8,000 feet in the plateau zone, from which the cones of the highest mountains in Mexico pierce the very heavens. Mexico City, in which I am writing these lines, is 7,400 feet up in the air, while there are other towns at 8,000 feet and over. Orizaba, the highest peak in North America, with the exception of Mt. McKinley, is 18,162 feet high, according to the latest measurements, while Popocatepetl and Ixtaccihuatl, which overshadow this city, are above 16,000 feet.

Naturally, hunting at such an altitude partakes rather of labor, but the deer and the wild pigeons and the occasional bear and mountain lion—called "puma" down here—more than make up for it. To give some idea of the number of deer killed by native hunters with pitfalls, running nooses, traps, spears, arrows and crude muzzle-loading guns, I may say that one hide dealer in Mexico City received 900 deer skins from the plateau region alone, during the month of December 1909, and it was by no means a record-breaking month.

Leaving the City of Mexico again, after having seen the wonderful pyramids of the sun and moon out at San Juan de Teotihuacan; after having viewed ten thousand peons crawling up the hill of Guadalupe to pay their devotions to the patron saint of all Mexico, I turned again to the jungle and wandered down through Morelos, Guerrero, and Oazaca, into Chiapas, and across this fever-stricken jungle-covered State to Tapachula, on the very line between Mexico and Guatemala.

This entire country is scattered with tree-grown ruins of great cities, whose builders lived and loved and died before even the Aztecs followed the Toltecs and the Mayas into the Mexican plateau. There is material here for all the archeologists of the world for the next century, and even then, at the end of their combined labors, they will know less about the primitive dwellers in Mexico than they know now about the Pelopponesians or the ancient Egyptians. Mexico's remote past is buried and buried well, but the imperishable carvings on the walls of these ruined temples and once-palatial residences bear mute witness to a love of the chase of the deer and the jaguar, far in excess of the outdoor spirit of Mexico today.

Shooting the game of this part of Mexico can scarcely be called hunting, for the furred and feathered kindred of the wild know so little about man that they almost come and examine the rifle or the shotgun as it lies in one's hand. I remember particularly, on a lonely trail in Chiapas, well up in the rough, timbered mountains, killing a deer late one afternoon. The echo of the shot had scarcely died away amid the peaks when a second buck walked out into the trail not fifty feet from where I stood. He stopped stock still, looked at me with what seemed curiosity, and then deliberately walked down the little path toward me. I had no use for more meat, and his head was not exceptionally good, so I stepped to one side, giving him about three or four feet in which to pass. On he came, and actually walked past me at a distance in which I could have touched his gray back with the muzzle of the rifle.

It seems impossible that he should not have seen me, and his hearing was certainly good, for when he had passed me by about twenty feet, I let out a yell sufficient to wake the sleeping kings in some of the ruins round about, and he leaped into the underbrush like a flash and was gone.

It does not do, however, to trust a jaguar thus. He will come down the trail toward you, he has no fear whatever, but he will not pass you. Either you or he is going to die right there, and it is my principle when I know a jaguar sees me, to get him first.

My mozzo and myself met a small "tiger," as the natives call the jaguar, on a trail in the isthmus of Tehuantepec about six o'clock one morning. It is necessary to rise early, travel late and rest in the shade from ten to two o'clock when passing through this country, and we had been on the road, afoot, another mozo bringing the pack animals a hundred yards or so down the trail.

We came around a bend under an immense tree, and walked right onto this jaguar, coming down the hill as we were going up. He stopped, raised his head, glared at us a minute and came right along. Running like a flash, a rabbit crossed the path just behind him. His acute ears heard the patter of the rabbit's feet and he turned on all fours as on a pivot,

but the rabbit was gone, and the cat resumed his leisurely walk, still in our direction.

He was a small tiger, not more than five feet in length, and possibly two feet in height at the shoulders, but he had forgotten fear, and as he came his tail began to curl at the tip and to lash gently from side to side. At forty or fifty feet I concluded he had come close enough, and I put a .351 bullet between his eyes. He leaped straight up in the air, a habit which all jaguars have when shot, so far as my experience goes, at least, and came down on all fours.

Examination afterwards proved that the soft-nosed ball had mushroomed and literally made a paste out of his brains, lodging against the back wall of the skull, but he fell into a crouch as he came down, seemed about to leap forward and then dropped over on his side, stone dead.

The mozo declared that if I had not killed the jaguar, the cat would have come right on and attacked us, just as he would have leaped on a deer in the path. I have never seen a wild animal who would do this, and I believe that the man-smell and the general appearance of a human being, would turn the tiger aside, especially if the hunter shouted. Most animals are afraid of the human voice and I cannot believe the jaguar is an exception, though well-educated Mexicans, familiar with the ways of the spotted cat, tell me that it is afraid of nothing, and will attack anything that walks.

Among the most interesting features of this trip was the finding here and there throughout the forest, on the faces of cliffs, under a clump of great trees, or on the summit of some mound-covered ruin, of a great stone idol, representing no one knows what, but totally different from the carvings at San Juan de Teotihuacan, Hitla, or Palenque, way down in Yucatan.

To my questions regarding these, the few natives merely shrugged their shoulders, with nods of ignorance. It evidently had not occurred to them that anyone ever built these effigies, that here some primitive Phidias planned and carved and then became dust beneath the feet of his imperishable statues. Some day this wonderful jungle-land will be opened to science, and then we may know something of an empire that was greater than either the Pharaohs or the Ptolemies and whose sculptors were as capable as the image-cutters of Athens or Kannak or Thebes.

Everywhere I went, even in the Indian villages, I was treated as well as the miserably poor creatures could treat a stranger who did not speak their tongue, for we must remember that the language of these tribes is the same that it was one thousand or ten thousand years ago, and most of them know very few words of Spanish. Their homes are wattled grass, their clothing the cheapest cotton, often only a square cloth woven by hand from the native fibre plants, while their food is thin cakes of cornmeal called tortillas, beans, and fruit from the wild trees of the jungle. They are not hunters, and never will be; they are too lazy and too indifferent, but they are fairly good guides, though they have little of that unerring sense of direction when off the trail which is possessed in so marked a degree by the Indians of the northern United States.

The consequence of their not being hunters, except in a small way, is that there is very little wild meat eaten in the southern part of Mexico except by the foreigners who occupy lonely posts in the lumber, rubber, chicle, or mining trade.

With one more experience, I must close this paper. I had the unique pleasure of riding up the Usumacinta river, in an eight-oared war canoe, an adventure seldom if ever before enjoyed by a white man. I had made friends with the chief of a small tribe, who was going to visit the head man in another tribe, and in this way he carried me for more than one hundred miles along this winding river, from the border lands of Chiapas over into the middle of the peninsula of Yucatan. From there I found that it was easier to come back to the Pacific coast, take steamer for some northern port, Manzanillo in this instance, come across to Mexico City and then go down the east coast by steamer to Yucatan, than to go across the territory of the fierce and treacherous Mayas, into the capital of the famous peninsula.

GOSSIP FOR SPORTSMEN.

Things have gone to the devil generally on the Suisun marsh this year. Such doings and conditions have never been known before in the history of the marsh. It is just shot to pieces. There have not been ten sprig killed on the Suisun marsh proper in the last three weeks. They have left in a body—bag and baggage. Teal, mallard and canvasback ditto. Literally driven out—scared to death. So states one of the "old timers."

Last year one or two of the clubs commenced shooting a little afternoons preceding regular shooting days, which are Wednesdays and Sundays. For years it has been an unwritten law on the Suisun marsh in regard to these two shooting days, and has been faithfully and honorably adhered to until recently.

But this year real sportsmen went begging and the gamehog took full possession of affairs on several of the preserves and utterly ruined the shooting, not only for themselves, but for the balance. Men who have shot for twenty-four years on the marsh were asking one another, "Where are the sprigs this year?" In former seasons at this time the very best shooting was to be had. But during all of this month December no birds were killed outside of a few spoonies or an occasional "hospital" duck that was too sick to get across the track out to the bay.

It was reported and well known that on two of the clubs a hired man shoots on days between regular shooting days for the special benefit of whom it may concern.

On three or four of the preserves the shooting commences about three o'clock every Tuesday and Saturday afternoon and is kept up until just before dark. Any old hunter will tell you that such a state of affairs would drive the birds away from the marsh in a body. Sprig are especially migratory birds. A band of canvasback or teal or spoonbills or widgeon will stick to a section until the big rains finally drive them away. But sprig are capricious and wary and at the slightest undue influence they will leave in a body. They are here today and there tomorrow. And the truth of all this has at last been forced on the members of the various preserve clubs. Several of them have already taken their kits down for the winter. "No use going up there any more," they said; "there are no birds."

And even among those who have been the most persistent in this injudicious slaughter the word is passed that it is advisable to stop the practice. Almost everyone interested, in general conversation is talking about the necessity of forming an association for next year to confine the shooting to two days a week, the same as before. All now see the folly of trying to overdo a good thing.

Sunday, December 19, four men killed ninety-five birds on an island down at the bay shore, including fifty sprig and twenty-five canvasback. But on the Suisun marsh proper there were hardly fifty birds killed among twenty men, and the birds all spoonies at that. The birds have been driven off the marsh by undue shooting. Another condition is that it would be advisable to bar all keepers and hired men from shooting for the members next year. Certainly anything so unsportsmanlike as that should meet with the unanimous condemnation of all sportsmen.

That undue eagerness and enthusiasm is what really carried most of these sinners out of the regular path of sportsmanship, rather than any premeditated plan either to get more ducks than the law allows or to injure their fellow sportsmen, is believed by the older Suisun frequenters. But now it is clearly evident that too much shooting is impracticable, all concerned would be willing to embrace the first opportunity to control matters on an association basis. But it is impossible to be both a sportsman and a gamehog—a man must decide to be either one or the other.

* * *

Not for many years have local duck-hunting sportsmen observed such a disappointing scarcity of wild fowl in the bay counties hunting districts. What in past seasons has been generally the most enjoyable period for the trigger-pullers has turned out, for about four weeks now, an exasperating dearth of ducks at many favorite shooting resorts.

Along the east San Pablo shores, for instance, in past seasons canvasbacks and bluebills have been most plentiful at this time of the month, and splendid shooting has been the vogue all along the shores from Berkeley up to Rodeo. Northern birds were in evidence by the thousands. Not this year, however. Just where the northern flight is, and why the birds are not in the upper bay, is a puzzle that experienced bay gunners cannot answer.

It is true that there is quite a showing of these birds in San Pablo bay, but they are evidently wised up to shore-line dangers and do not "work in" during the daytime. As an instance of webfooted wariness, one well-known hunter had over 100 decoys out, near his blind off Sobrante, one Sunday; four ducks was his reward for an all-day vigil in the blind. In that section, last December, "can" limits were frequently shot by 10 a. m., sometimes earlier.

Alameda marsh duck ponds, most of them, are also on the waiting list for the expected feathered bands. Fair shooting was had Sunday a fortnight ago by Fred Herron and Ted Butler on the Hesse ponds, near Alvarado. Lou Schroeder's trip to the nearby Mudhen Club pond was rewarded with a small string of birds, mostly spoonbills.

Many of the Alameda marsh gunners have had ample time to forage over adjoining pasture tracts for mushrooms. The south bay has been covered with rafts of wild ducks recently. The bombardment they were subjected to since the opening days has evidently schooled the birds to slip into the baited ponds and other feeding places at night and rest on the bay waters during the daytime. Across the bay, along the Redwood City and San Mateo shores, bay blind gunners have had fairly good shooting the past ten days.

The Petaluma and Sonoma marshes as well as the Black Point bay shores have offered poor shooting recently. Farther north, however, in the Napa marshes, near the bay shore, better sport has been available.

* * *

Where have the Suisun sprig gone?

Most probably up to the Butte creek overflow section—and in the rice stubble fields of that district. Millions of ducks and geese are in that section.

The recent rains have scattered the birds pretty well, and the shooting on the preserves has not been overly good recently. That is where the wild fowl are and also all of the northern migrants that have come down, and it is more than probable the birds will stay there as long as the good feed holds out. There is nothing particularly tempting in the feed line between the upper Sacramento valley country and the Imperial valley grain fields or the Colorado delta.

Down around Los Banos and Dos Palos, in the San Joaquin valley, the recent rains have formed many ponds. The reports recently are that teal and sprig have been fairly numerous.

* * *

While the quail season has recently been better than it has been at any time this year, the sportsmen were bemoaning the fact that they had to suspend operations with the passing of 1915.

The quail season has not been favorable this year for the reason that the first part of the period was too dry, making it impossible to use dogs with any degree of success. The birds were numerous enough, but they were hard to bag until after the rains set in, since which time the sportsmen have been more successful in the pursuit of them.

The number of birds killed this season has been far below the usual number, all of which augurs well for a good season next year with the proper weather conditions, as there will be a large crop of breeding stock left.

* * *

Cottontail rabbits have been more plentiful in California this year than ever before, which is accounted for by the protection given them by the State laws. Hunters who have been seeking these little animals as a rule return with the limit, and the sport is good in almost any section, except where floods occurred last year. While the cottontails are plentiful everywhere in the State, they are more numerous in the sections where they can get green feed all the time.

Many prefer cottontail to other wild game for eating purposes, they being considered a great delicacy. The season closed yesterday, after which time they can not be molested until October 15, 1916.

* * *

Steelhead angling in the coast streams of district No. 2 has not, with the exception of Paper Mill creek, offered anything like the good sport of past seasons. Russian river advices state that the river is clearing and running down and the prospect for good fishing in the near future is excellent. Near Duncan's Mills a number of trout have been caught the past week.

THE A. K. C. REGISTRATION RULE.

Since the American Kennel Club sent out notice that only dogs, the sire and dam of which both are registered in the A. K. C. stud book, would be eligible to registration after January 1, 1916, a great many letters have been received asking the rules governing registration, address of the A. K. C. and whether it was true that no dog born after January 1 would be eligible to registration unless proper notice was mailed to Kennel Club by this date. The rules under which a dog may be registered in the American Kennel Club are:

1. American bred dogs are only eligible by virtue of the previous registration of both sire and dam in the American Kennel Club stud book.

2. Foreign bred dogs are only eligible if their pedigree can be established for three full generations of both sire and dam.

3. Any imported dog registered in the English stud book must retain its English registration name followed by (Eng.) when applying for registration in the American Kennel Club stud book.

4. The breeder of a dog is the person either owning or leasing the bitch at the time of service.

5. No change in the registered name of a dog will be permitted after December 31 of the year of registering.

6. In changing ownership the original stud book number will be retained, and if re-registered the dog will be entered in a subsequent volume of the stud book the same as an original registration.

7. In applying for change of name or ownership the original registry receipt properly indorsed must be returned.

8. No kennel name will be recognized in connection with the ownership or breeding of a dog unless such kennel name has been previously registered with the American Kennel Club and approved by the stud book committee.

All dogs whelped prior to January 1 do not have to be registered, but it is necessary that their sire and dam both be registered. The address of the Kennel Club is 1 Liberty street, New York.

Underground Elk Dentistry.—A curious fact was developed in the recent round-up of elk at Buttonwillow, in Kern county, none other than that the teeth or tusks of the bull elk were uniformly missing. These teeth, as is well known, are prized as charms by members of the Order of Elks and therefore have a commercial value. The teeth are not used or needed for mastication by the animals and it is said that at a previous round-up many elk were roped and the teeth extracted. Also, the story goes, that vaqueros have frequently lassoed the animals and pulled the teeth. In any event, of some fifty bull elks examined, none had the usual teeth and presumably many a member of the B. P. O. E. is wearing an elk tooth charm at the expense of the antlered herd at Buttonwillow.

Drink Jackson's Napa Soda.

WHEN THE ALL-AMERICAN TEAM WENT A-SHOOTING ACROSS THE SEA.

[By Billy Bowlegs.]

In 1901 an American trap team journeyed to England and wised the Britons to several angles of the blooie game they wot not of. The story of that classy gang of gunpointers may prove interesting to readers of the Breeder and Sportsman, so here's where it flickers.

Paul North of Cleveland, Ohio, is the man who really discovered that the British were ripe and a great deal of the American team's success can be blamed on him. The details were arranged by Tom Marshall, team captain for the Americans, and by Captain Butts for our cousins overseas. The big noise happened in happy June time, on the Middlesex Gun Club's grounds in dear old Lunnun town. In giving the American team's personnel each gunman's Indian handle also is hitched on. Headed by Chief Long Talk Tom Marshall, Keithsburg, Ill., the others were: Heap Talk Fred Gilbert, Spirit Lake, Ia.; Dago Charlie Budd, Des Moines, Ia.; Kinnikinic Bill Crosby, O'Fallon, Ill.; Bold Eagle Rollo Heikes, Dayton, O.; Bullhead Jack Fanning, New York; Brook Trout Jim Elliott, Kansas City; High Kick Dick Merrill, Milwaukee, and Buffalo Hump Frank Parmelee, Omaha. Substitutes were Ernie Tripp, of Indianapolis, and Ed Banks, of New York.

Others who made the journey were: Emil Werk and daughter, of Cincinnati; Paul North and wife, Cleveland; Frank Harrison, Jersey City; Roy Woodward and Harry Getchell, of Brockton, Mass.

The men shot at 100 birds each, 18 yards' rise, unknown angles. There were five trap houses and fifteen traps, three in each pit. The match was best three in five for a purse of $10,000. The British were allowed the use of both barrels, the Yanks being limited to one.

Well, all the details were finally arranged and came a time when the referee started the chosen twenty on their historical test of skill. Tom Marshall led off, drew a screaming left angle and snuffed the clay close up in his usual brilliant style, giving a hint of what was coming from that gang of fast pointing, hard shooting invaders. And come it did, so speedy and true that the Yankees won the first fest by a margin of 63 kills. The second race was such an easiness—Uncle's men 81 to the good.

But the third and last foray of this fruit gathering expedition was "petty" larceny, pure and simple. Honestly, it was a crime. The Jay Bulls never had a look-in—they couldn't even get started to peek, so fast was the pace—and the final try, the mix that meant "Come to me, mazuma," showed the childers of Sammy IT by 93 majority. Of course, there was heap much happy gladhand stuff at the finish, for the Brits were game losers. In fact, they figured the match had been lost to their own people, after all, so why grouch or feel sad?

By this time the tight little isles were hep that your Uncle's chosen band was a tough outfit, but the canny Scots were from Mizzou, so the team trekked to Glasgow and performed the pleasing operation of separating the Highlanders from a wad. It was awfully easy, for the bur-r- boys refused any handicap, but the foxy Scotch put up only 500 washers. Then came an individual race between a Kilty named Faulds and the Hon. "T. Bill" Crosby, who hails from the state that owns Auroaria, Peroaria and Chicawgo. This affair was a little surprise party to "T. Willie." The match was at 200 birds each, 100 being thrown from a tower, and "Kinnikinic" was hep to that game about as much as a jaybird to Delsarte. But the old Illinois trapshark made good and gathered the corn. Tight squeak, though, for William won by only three birds.

Followed then a race by the Americans for a splendid cup given by the British, to determine who was champion of the invaders. It was a swell scramble and wound up with Charlie Budd and Fred Gilbert tied, both sons of Hawkeyeland. In the shoot-off the Spirit Lake wizard won a close race by a slender margin.

Paul North was so tickled over the way the British donated that he piloted the boys to London and gave them a big blowout at Hotel Cecil, a swagger indigestion breedery. This eats was full brother to another feed at the Royal Cafe, given by the Englishmen. Then one day the Americans hired a couple of vans to haul their money in, rambled down to the ocean, bought a ship and came home.

AT THE TRAPS.

Montana Traps—Nine of the members of the Deer Lodge Gun Club held a shoot at the local fair grounds December 12. On account of the cold weather, no out-of-town visitors were present, so no medals were contested for. There were five events, two of 15 birds each, one of 20, one of 25, and one of 12 pairs. The scores were as follows:

Events—	15	15	20	25	12
Lee Williams	15	10	17	..	20
Tippett	12	12	19	20	20
Larabie	9	12	18	17	17
McMullen	12	11	17	21	..
Ray Williams	13	10	..	..	..
Bennett	11	12	17	20	..
Coleman	14	15	17	22	18
Valiton	13	12	17	..	18
C. Bielenberg	..	12	16	..	..

Orange Belt Trap Shoot.—Harry Cline won a leg on the Wilshire trophy last Sunday morning, which was contested for at 50 targets at the traps of the Vernon Gun Club, by breaking 47 out of the half-century. Cline was shooting the eyes and ears out of the targets and didn't flinch once during his performance. He declared that one of the birds he missed was a cast-iron one and that he discovered his firing pin was made of rubber when he missed the other two. Cline has been shooting regularly at the Vernon Club since the trophy has been put up, but this is his first leg on the prize. Three wins and the trophy becomes his for keeps. Two more scores like he made last Sunday and he will have little difficulty in copping the cup.

Although it was the last Sunday in which local shooters could hunt quail, twenty-four shooters favored the Vernon Club with their attendance and competed in both practice and the trophy shoot.

Stanton Bruner was high gun in the practice shoot with 94 dead birds out of 100 shot at. The final shoot of the year on the blackbird watch fobs was also added in the trophy shoot, the scores on the prize counting on the fobs.

Cline won a fob in class C, Stanton Bruner in class B, Dr. Packard and Frank Mellus tied for a fob in class A and Manderville won in class D.

Second high gun in the trophy contest ended in a three-cornered tie. Frank Mellus, "Doc" Packard and Stanton Bruner each broke 46 out of the 50. The scores are as follows:

Wilshire trophy shoot of 50 targets, and practice shooting—

		Handicap.		Practice.	
Name.	Yds.	Birds	Bke.	Birds	Bke.
C. B. Monaghan...	18	50	44	50	47

Registered Tournaments For 1916.—The Interstate Association, through Secretary E. Reed Shaner, requests us to: "Please state in Breeder and Sportsman, for the benefit of gun clubs that intend applying for Registered Tournaments, that application blanks and the literature explaining our 1916 policy will be put into the mails about the tenth of January."

NATIONAL RIFLE ASSOCIATION NOTES.

At the present time there is an unprecedented revival on throughout the country in rifle shooting, brought about by the enactment of a law by Congress last year authorizing the free issue of rifles and ammunition to rifle clubs organized by civilians. Under this act ten citizens in any locality can organize themselves into a government rifle club and adopt by-laws approved by the Secretary of War. The club then affiliates with the National Rifle Association of America and is issued by the War Department one new Krag rifle for every five members of the club and 120 rounds of ammunition to each member annually for use on the rifle range. The work of organizing the clubs, looking after them, issuing decorations and medals, and classifying their work, was put in the hands of the National Rifle Association of America by the War Department and this organization, which for forty-two years has been working to make rifle shooting a popular sport in this country, has suddenly sprung into prominence through its co-operation with the government by the organization of these clubs. Within the last year the association reports that it has completed the organization of over 400 clubs, not only in the United States proper but in Porto Rico, Canal Zone, Alaska and Hawaii. Over a million and a half rounds of ammunition has been issued to these clubs during the year and about 3,000 rifles. The possibilities of this movement are unlimited and depend only upon the securing of range facilities where such clubs can carry on their work. With this object in view Congress will be asked at this session to provide for a Commission to investigate the entire subject of range construction from a national defense standpoint, survey the entire country and recommend a permanent national policy of range construction and localities where such range construction and localities where such ranges should be constructed. In addition the National Rifle Association will ask for a national charter and an annual appropriation of $25,000 from Congress to assist it in carrying on the work as it should be done. Although the Association has a perfect organization with secretaries and branches in every State there is no way in which it can reimburse these secretaries for their traveling expenses and time, and it is hardly to be expected that these men, who are active and prominent in business, should devote their time and money to this work without reimbursement.

The National Board for Promotion of Rifle Practice has also been very badly handicapped for the lack of funds to carry out its plans for the broadening of the rifle movement in a proper national manner, and to meet this the Secretary of War will ask that the amount of money now available for the Board, which is only $10,000, be increased to $50,000 and that this money be made available for the purchase of target supplies for issue to rifle clubs and to pay markers on State ranges where targets are put at the disposal of civilian clubs, as under the present regulations the State military departments can not pay the marker's salary except when working for the National Guardsmen. So, taking everything into consideration, the future for rifle shooting in this country looks very bright and if Congress gives the help and additional encouragement to the clubs it will only be a very short while before we will have half a million qualified military marksmen in this country, which will be a very valuable asset in any scheme of preparing volunteers in this country for military service.

One very satisfactory feature of the rifle club work is the way that the whole question has been approached by big employers. Many of the largest corporations of the country have endorsed the plan of organizing Government rifle clubs among their employees and in some cases have assisted financially in furnishing ranges for clubs. These corporations take the stand that it is beneficial all around to have their men spend their time on the rifle range Saturday afternoons and Sundays where they get the benefit of the outdoor life and fresh air, giving good health which is so conducive to efficiency of employees and which in many cases take the men away from saloons, pool rooms and like resorts. Successful clubs are maintained at many plants and the interest in these clubs seems to be on the increase, their membership growing larger constantly and larger turnouts reported at the ranges.

Another prolific source for the organization of government rifle clubs is the semi-military fraternal organizations. The order of Maccabees have about completed the organization of over sixty clubs among their different branches and will begin active work on the ranges after the first of the year. The Order of Woodmen also have several successful clubs.

One of the most prominent features of the work of the National Rifle Association is the league matches which it runs off on gallery ranges during the winter, the object being to keep the men interested in shooting as well as keeping them in constant training so that they will be in better shape for their outdoor work during the spring and summer. Several of these league matches are War Department matches but are held under the management of the National Rifle Association. In the Interclub match, which is a War Department competition, 72 clubs that cover the entire United States have entered teams in the competition. This will make six leagues of 12 clubs each lettered from Class A to Class F inclusive. The first three classes are arranged according to the order in which these clubs finished in the 1915 competition and all the other classes are composed of new clubs, showing the great increase in this small-bore work. Last year only 36 clubs entered the matches so that there are double the number this year. It is expected the matches will begin the week ending December 25 and they will last for 11 weeks. The winning team in each class will receive medals, but any club in any of the classes can win the national trophy if they make the highest grand aggregate in all the matches. Each club will be represented by a team of ten competitors, the five highest scores to count for the team's weekly record. Each man will fire 20 shots prone at 75 feet using .22 caliber rifles with sights other than telescopic anywhere on the rifle. The target used has a half-inch counting bull with concentric rings one-quarter inch apart, the sighting bull being 2 inches in diameter. There is also a large entry for the intercollegiate league matches. These will begin the week ending January 15 and will also last for 11 weeks. The inter high-school matches and the military school matches will begin the same time. Efforts are being made to get out the targets for the first match in the school and college matches so that the teams can shoot their first match before the Christmas holidays. In these matches the old target with one and one-half inch sighting bull will be gone back to. The shooting as formerly will all be done at 50 feet, using the .22 caliber rifle and short cartridges.

Rem-UMC Notes.

Edgar A. Miller, prominent trap shot of St. Louis, using a Remington pump gun won the 1915 Handicap Championship of the Missouri Athletic Association with an average of .9760, scoring 244 out of a possible 250.

C. H. Newcomb, the Penn State champion, is keeping up his good work in and about Philadelphia. Shooting Nitro Club shells, he tied for first place with F. S. Cantrell at a Holmsburg Jct., Pa., shoot recently, breaking 93 of his 100 targets.

The newly organized Lewisville (Ind.) Gun Club held an interesting shoot at which the three high guns, all shooting Nitro Club shells, were very evenly matched, F. Huber winning with a score of 46x50, while John Logan and C. Huber captured second and third places respectively, scoring 45x50 and 43x50.

THE FARM

PIGEONS.

We read much of the profit to be derived from raising pigeons for squabs, of the money to be made from the "slaughter of the innocents," but little as to their desirability as pets. Many a boy with his single pair or his small loft of fantails, Homers, Tumblers, Pouters or other varieties, will vouch for the fact that this is all wrong, that more solid enjoyment and interest can be extracted from his feathered pets than from a houseful of inanimate toys. Many a brain-weary professional man fiids needed relaxation, and life takes on a more roseate hue, in the company of his cooing and strutting friends. The loft may be a soap-box in the corner of some outbuilding, and shelter but a single pair of pigeons, or it may be more pretentious, and house a larger flock in greater variety. In any event, the pleasure derived is real, helpful, improving, and the cost small. A singlemated pair will give a start, and a small box in some out-of-the-way corner, with two nests, will serve them for a home. Many a city boy, with little or no ground space, has his pigeon coop on the roof of the house, and he is elevated in more senses than one by his associations there.

Aside from any utilitarian qualities they may possess, this family of birds is well worthy of the consideration of all country dwellers. Most people like to have about them some animals which are responsive to kind treatment. Most varieties of pigeons respond readily to kind attention, and many of them become very tame. The care and breeding of pigeons is also an excellent method of cultivating the faculty of close observation and careful attention to minute details, and is thus to be commended to any one, young or old.

In most of our cities large flocks of pigeons may be found building their nests and raising their young in the steeples of churches, towers of public buildings, and various other secure retreats. Belonging to no man, they seek their food in the streets, about warehouses, and wherever scattered grain may be found. I have seen them about ferry houses, and even on the ferry boats, walking unconcernedly about almost under the feet of the hurrying passengers. I have known clerks in some of the business offices to buy pigeon feed to scatter in the courts and on the window ledges to lure these aerial wayfarers where they could be observed, and thus enliven the monotony of the caged workers. And a hardened individual he must be who would harm one of these trusting innocents!

Why, then, should not the occupants of a country place enjoy the companionship of such easily raised and cheaply kept feathered pets? A point in their favor is that, if desired, they may be made to pay their way. The young of about all varieties make excellent squabs—if one have the heart to kill them. If not, and if good birds be procured for foundation stock, a fair income may be secured from the sale of breeders. I have in mind one boy, who started only a few years ago by keeping a few pigeons as pets, who has won prizes at some of our best shows, and now has a demand for bird beyond his ability to supply, at prices that most of us would consider high. His pets have much more than paid their way.

Pigeons form a family distinct from true poultry. The anatomical structure is entirely different. The male and female both sit on the nest, although, true to tradition, the male does only about one-fourth of the day's work. But the most singular distinction is the peculiar method by which the young are fed. The latter, unlike chickens, are helpless when hatched, and remain so until near maturity. They are fed in the nest by the parent birds, with what has sometimes been called "pigeon's milk," a curdy secretion produced in the crops of the parent birds only at hatching time, which is disgorged into the beaks of the young. After about three days, a little of the ordinary food of the pigeons is mingled with it, after which the curdy secretion decreases for about a week or ten days, when it ceases entirely.

The young reach full size in about a month or a little more, so that the stock may be increased very rapidly, as the female usually lays two more eggs before the young are out of the nest. Some varieties hatch and raise as many as six or eight pairs each year, and occasionally we hear of some that exceed this.

Our domestic pigeons are descendants of the Rock Dove, or Blue Rock Dove. It is a curious fact that none of the other species of doves is capable of domestication. The number of existing varieties into which pigeons have become divided is bewildering to the novice. The requirements for some of the varieties, according to show standards, hinge upon so slight a matter as a definite number of white feathers in a wing.

Most, if not all, of the varieties make good pets if properly handled. Probably the best guide in selecting the variety to be kept would be the personal preference of the one most interested.

The best known variety of pigeon is probably the Homer. Its distinguishing characteristic is its remarkable power of flight, and its attachment to its home. The birds of this variety are strongly built, yet trim and neat and pleasing to the eye. This is the variety most largely used for squab breeding, both pure-bred and crossed with Runts and other varieties, and hence are excellent for the amateur who wishes to make his pets pay their way by sacrificing them to market demands.

There are several different colors of Fantails, the white being the most popular. The Fantails are bred for a great spread of tail, which is carried upright, or rather forward, like a fan. The back is short, breast full, neck long and slender, and head carried upright, meeting the tail.

The Pouter has long, feathered legs, a long but slender body, an erect carriage, and has the power of filling the crop with air to an enormous extent, forming an almost perfect globe. This gives it a very odd appearance, and many fancy this variety on this account. There are several colors. A young Pigy Pouter, left an orphan, and given to a lady who fed it and cared for it, became so tame that it would ride on her shoulder all over the house and garden. If she were in a room filled with people, and gave a peculiar call, the bird would seek her out at once, and manifest unmistakable affection.

One old faicier, who has kept a large number of varieties, declares that he considers the Short-faced Tumblers the best for pets, though, owing to their peculiar method of flight, they are often the victims of hawks and crows. The Tumbler is a small bird, with a peculiar carriage, globular head and diminutive beak. Its singular method of turning somersaults, or tumbling, in its flight, gives the name. Some very highly bred specimens have this quality to such an extent as to be almost incapable of flight. Their peculiar antics are very amusing. Of the same class are the Parlor Tumblers, still less capable of flight, and much more given to tumbling or rolling.

Those mentioned are probably the leading varieties kept for pets, though there are several other candidates, each with its peculiar recommendations. Jacobins, Turbits, Owls, Dragoons, Swallows and Magpies are a few of the other varieties to be noted. The only way to settle as to the variety to be kept for pleasure is to study the different kinds, select the one which, considered all around, is pleasing. It may be necessary to breed and handle several kinds before a choice is finally made. But there cannot fail to be much pleasure derived, as well as knowledge acquired, in the operation.

In preparing quarters for any breed of pigeons, bear in mind that each pair requires two nests, for the reason that the female lays her second hatching of eggs and begins to set on them before the first pair of young are large enough to leave the nest. And be sure to provide plenty of nesting material if you keep them confined. Pine needles are excellent for this purpose.—Rural World.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Gombault's Caustic Balsam will give you immediate *Relief.* A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that." —Ed. Rosenburg, St. Ansgar, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

BEST POLICY 42378, one of the best bred horses in the world. Handsome bay horse, small star in forehead, left hind pastern and left fore heel white. Has size, heavy boned, stylish, pure gaited trotter, sound, and a splendid individual in every respect. Best Policy is by Allerton 5128, dam Exine 2:18¼ by Expedition, next dam Euxine by Axtell, next dam Russia by Harold 413, next dam Miss Russell, dam of Maud S., etc. Best Policy has trotted a mile on the Hanford half mile track in 2:12. He is ten years old and with little training would make a good game race horse, and ninety percent of his colts are trotters. He will be sold at a great sacrifice. For price and further particulars address

BREEDER & SPORTSMAN,
P. O. Box 447, San Francisco, Cal.

FOR SALE.

The five-year-old pacer The Fool, trial this season with limited opportunity in 2:11, halves in 1:03, quarters in 30 seconds. A pleasure to drive this fellow and an amateur will drive him in better than ten in the matinees next season.

Also Oro Bond, three-year-old. But for a slight injury late in the season would have been heard from in the stakes this year. He is now sound and ready for some one to point for the races next year. Will make a sure enough racehorse. These two priced to sell.

Breeding and price on application.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

DIVERSITY OF FARM ENTERPRISES.

In most cases where studies on the profits in farming have been made, particularly in our oldest agricultural districts, such studies indicate that the most successful farms are those which have from two to four major sources of income, i. e., they have a well-balanced and diversified business. In certain instances it may pay better to have only one enterprise, but usually when one crop pays much better than all others the production of it increases rapidly and soon the price falls to the point where other crops or products are equally as profitable. Diversified farming is often confused with farming where there is a little of everything and not much of anything. Either extreme lessens the chances of success. When the price of certain crops is very low then livestock usually becomes desirable. However, if the returns per animal are poor, cash crops even at a low price are essential. A well-balanced business insures against losses and provides a much better utilization of the labor and equipment.

TO MAKE GOVERNMENT WHITEWASH.

Take half a bushel of unslacked lime; slack it with boiling water and cover during the process to keep it in the steam; strain the liquid through a fine seive or strainer; add a peck of salt previously well dissolved in warm water, three pounds of ground rice boiled to a thin paste, and stir in boiling hot one-half pound of powdered Spanish whiting and one pound of glue which has been previously dissolved over a slow fire, and add five gallons hot water to the mixture. Stir well and let it stand for a few days, covered up from the dirt. It should be put on hot. One pint of mixture will cover a square yard properly applied.

WHEN YOU SEE

these blemishes on your horses, remember we have shown and proven for over 20 years, that Save-The-Horse positively cures them.

Doubt and fear never earned—or cured anything—and delay is costly. The Horse Cannot Cure Itself! Money Must be Spent! The Problem is, to SPEND WISELY.

Save-the-Horse Does Not Blister
Does Not Discolor or Destroy the Hair Nor Leave a Scar
Horse works as usual.
THE RESULT IS PERMANENT.

"It's the Most Powerful Medicine I Ever Used,"
writes W. J. Stonesefer, Route 1, Keymar, Md.

Eevery bottle sold with Signed Contract to return money if remedy fails on Ringbone—Thoropin—Spavin—or Any Shoulder, Knee, Ankle, Hoof or Tendon Disease.

Regardless of price or any other reason, Save-The-Horse is the cheapest remedy known. It goes through and through both bone and tissue—it works inside, not outside—and produces a cure that withstands every test. No blistering, scar or loss of hair. Horse can work as usual—winter or summer.

But write, describing your case and we will send our—96-page illustrated Book—Sample Contract and Advice—All Free (to Horse Owners and Managers).

Harpers Weekly and The Breeder and Sportsman

$5.50 WORTH FOR $3.25

Breeder and Sportsman

One Year, 52 Copies, Regular Price $3

THE BREEDER AND SPORTSMAN is the oldest weekly journal devoted to the Horse west of Chicago, having been established in 1882. This interest, together with the Kennel, Gun, Fishing, Coursing and kindred sports receiving the most attention in its columns; together with Agricultural and Dairying Departments, under whose headings especial attention is paid to the breeding, etc., of Cattle, Sheep, Hogs, Poultry, and all other animals connected with stock raising.

As an advertising medium to Racing Associations, Horsemen, Stock Breeders, Manufacturers of Sulkies, Carriages, Wagons, Agricultural and Dairying Implements and Machinery, Sporting Goods, Fanciers, Stock Foods, and all others desiring to bring their wares to the attention of the classes to whose interests the paper is devoted within the field mentioned above, the BREEDER AND SPORTSMAN will be found indispensable.

Harpers Weekly

Six Months, 26 Copies, Regular Price $2.50

At no time has it been so evident to Americans as now, that the most important thing in the lives of all of us is the progress of the European War.

Next to your daily bread the war interests you most vitally. It may even come to be the most important part of your problem of living.

The periodical of greatest fundamental interest to you today is the one that can best report those phases of the war that come closest to your country and you.

Because of connections abroad and at home, HARPER'S WEEKLY is that publication.

As a critical commentary that presents inside facts, it is the necessary bridge for intelligent readers between the daily newspaper and the monthly review.

You want HARPER'S WEEKLY now. You can get it now on trial at a remarkable reduction.

Send $3.25 Now and Get Them Both

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effectiv , so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Coon Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

FIRST PRIZE, $35; SECOND PRIZE, $15.

The Above Prizes will be Paid on February 20th, 1916

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916; when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS.—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All Starting Payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start at Two Years Old are not barred from starting again in the Three-Year-Old Divisions.

CONDITIONS:

The races for Two-Year-Olds will be mile heats, 2 in 3, not to exceed three heats, and if not decided in two heats, will be finished at the end of the third heat and money divided according to rank in the summary; and for Three-Year-Olds—three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary. Distance for Two-Year-Olds, 150 yards; for Three-Year-Olds, 100 yards.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment, nor will any entry be liable for more than amount paid in or contracted for. In entries, the name, color and pedigree of mare must be given; also the name of the horse to which she was bred in 1915.

Entries must be accompanied by entrance fee.

Nominators liable only for amounts paid in. Failure to make any payment forfeits all previous payments. This Association is liable for $3000, the amount of the guarantee, only.

Hopples will be barred in trotting and pacing divisions.

Right reserved to declare off or reopen these Stakes in case the number of entries received is not satisfactory to the Board of Directors.

Money divided in each division of the Stake 50, 25, 15 and 10 per cent. There will be no more moneys in each division or heat than there are starters.

Entries open to the world. Membership not required to enter; but no horses, wherever owned, will be allowed to start until the owner has become a member.

BREEDER AND SPORTSMAN
Turf and Sporting Authority on the Pacific Coast.
(Established 1882.)
Published every Saturday.
F. W. KELLEY, Proprietor.

OFFICES: 363-365-366 PACFIC BUILDING
Cor. of Market and Fourth Sts., San Francisco.
P. O. DRAWER 447.
National Newspaper Bureau, Agent, 219 East 23rd St., New York City.
Entered as Second Class Matter at San Francisco P. O.

Terms—One year, $3; six months, $1.75; three months, $1.
Foreign postage $1 per year additional; Canadian postage 50c per year additional.
Money should be sent by Postal Order, draft or registered letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.
Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THE NECESSITY OF CONDITION.

The returns from the recent Chicago sale lay especial emphasis upon the necessity of condition in animals sent to the great public sales from this or any other section of the land. The California patrons of the event spared no pains in picking from the best of their offerings to get together a consignment that in the whole would be truly representative of the California trotter as he really is, but for some reason they apparently failed to take the proper precautions needed to land their animals at the ring side in first-class condition. This applies most especially, from information obtainable at this distance from visitors to the auction, to the band that went from the northern portion of the state, though those from the south reached the Windy City market in a condition that was none too good.

A letter from a prominent eastern trainer who was among those present, a man who was a steadfast booster for the Prince Ansel family in particular, bears the word that Prince Ansel, his youngsters and the few mares that formed the balance of the consignment from the Woodland Stock Farm, reached the sales pavilion "in a most deplorable condition." Prince Ansel was low in flesh, weak, and presented the general appearance of a horse that was all in, not merely temporarily but permanently; the mares presented an unkempt, unattractive appearance, and the weanlings were so weak that their buyers are up against the task of feeding them for some weeks to get them to a point where they will have sufficient strength to stand breaking and handling. Under these circumstances, it is not to be wondered at that the grand old horse, with apparently many years of usefulness before him, should have sold at a price less than two hundred dollars, that the mares should have gone to new owners for practically nothing, and that the well bred colts and fillies should have been "butchered to make a Roman holiday."

It is asking the impossible of buyers, especially in view of the general state of the trotting horse market, to expect them to pay good prices, or even reasonably fair prices, for animals in this sort of shape, no matter what their breeding or their inherent qualities of excellence. Gold in its natural state would be passed by unrecognized by a very great majority of people, and an uncut diamond is a thing of little value when held up beside the finished product for comparison. To bring a price on the market these days, a brood mare even if she be a famous producer, must show virility and "good keeping qualities," while youngsters, especially weanlings, must be well grown, husky and full of life and spirit. To send any other kind to market is to invite disaster, and the invitation will be accepted without hesitation or apology. Horses cannot be jerked up out of paddock or pasture, railroaded for days at a stretch with indifferent attention enroute, and arrive at a sale ring in shape to sell. Sellers must be fitted to sell with all the care that campaigners are fitted to race if prices in keeping with their real value are to be realized, and this lesson is one that western breeders must take to heart if they are to ship successfully across the continent to market. Their own interests, as well as the good name of the California trotter, demand it, and we hope that never again will it be said of a shipment of locally bred animals that they reached the market in a "deplorable condition." They must reach there not merely in fair shape, but in prime shape—otherwise they had best be kept at home.

Even men whose natural senses are defective in some manner or another realize the important part that condition plays in contributing to the "tout ensemble" that constitutes real attractiveness in a horse. Some years ago before the motor had swept the highclass road horse from our city streets two men, excellent judges of horse flesh, were standing on a busy corner when an especially attractive outfit went breezing past. "Man!" exclaimed one of them enthusiastically, "Look at that bird of a trotter."

"Wow!" rejoined his friend, "That is the best looking horse I ever saw in this whole Burg!" Just then a third party behind them, hitherto unnoticed by either of the wise ones, added his mite. "Gosh!" he chimed in, almost before the words of the second speaker were out of his mouth, "and ain't he fat!" At this the first pair turned to see who it was that joined them in expressing appreciation of a noble animal.

It was a blind man! — but he knew horses.

Need we rub the lesson deeper?

A WORD TO BREEDERS.

With the season of 1915 put once and forever behind them, and with January turning into its second week, the opening of the breeding season in this particular section of the world is not many moons removed, so that it behooves the owners of both brood mares and stallions to begin laying their plans for the year's activities along this line. The wise stallioneer is the one who gets his horse or horses before the public early and keeps them there throughout the season while the wily brood mare owner will soon begin to study of "pedigree and performance" as a means of determining to what stallion he will send his favorite mares. The mediums that bring the two together are announcements, through the trotting turf press, the stallion card and the season folder, all of which this office is in position to furnish to the very best advantage to all concerned. When midsummer rolls around the Breeder and Sportsman will have rounded out its thirty-fourth year of usefulness to horsemen of the Pacific Coast, and with the passing of the Pacific Horse Review and the apparent elimination of the horse department from the pages of the North Pacific Rural Spirit, it becomes the sole far western servant of the horse breeder. For no season of this long term of life has it failed to put owners of the two sexes of trotters into touch with each other and each other's horses, and in that time no stallion has risen to prominence in this state, or its nearest neighbors, whose fame has not been enhanced and the pocketbook of his owner enriched through the judicious patronage of our business pages and by means of advertising in other forms which emanated from this office.

This, perhaps, is the strongest argument that we could advance in support of the statement that stallion owners will find the liberal use of our business pages, our reading columns and our advertising matter of inestimable assistance in making their operations profitable. It is the horse that is kept before the public eye that attracts the public attention, and the most successful sires are in every instance the ones that are the best advertised. Already we are listing orders for both season announcements in our "stallions for service" department, and for stallion cards and folders to be disseminated throughout the state by enterprising owners, and we will be glad to receive your orders and to extend to the filling of them every facility at our command.

To brood mare owners we would say, watch the Breeder and Sportsman for the cards of the various horses that will be in service in California this season, study them carefully to acquaint yourselves with their blood lines, their performances on the turf, and their achievements in the stud. Then mate each of your mares with the one horse whose blood should best nick with hers, according to your knowledge of speed production, and nominate her, at the proper time, in every futurity on the coast to which she is eligible. Haphazard breeding is no longer profitable (or rather it was never so), as the market for any kind of a trotter save one that will do to race is no longer worth breeding horses for, and a good youngster without futurity engagements is just about as useful as a shirt without a tail—and in just about as great demand.

We are fully aware of the trials that have beset the horse breeder in this section for the last several years, and of the considerable decrease in breeding operations, a decrease that will have the effect of putting just so many dollars more on the price of every really good trotting bred horse in the not far distant future. The eventual establishment of district fairs in this state is inevitable, a modification in the present laws prohibiting race-track gambling in every form is not improbable, and with the coming of either district fairs or pari-mutuals the price of trotters and pacers will go upward with a rush. We are in hard straits at present, as no one will deny, but our condition will be bettered with the coming years. The wise breeder will prepare against that day.

Some years ago when thoroughbred racing was abolished practically throughout the United States, the owners of mares of that class found themselves in much the same predicament in which the harness horse breeders are involved at present—perhaps worse, for the trotting mare has a wider field of usefulness than her less generally serviceable sister. And about the best use an owner could devise for his matrons was to breed them to jacks, a practice that for some seasons was not unusual, or if he held a particular grudge against some ancient enemy he could even all scores by wishing onto him a big band of thoroughbred mares. There was no market in the country for a colt of pure lineage of the running strains, and the result was that breeding of that class of horses was practically discontinued for a term of years. Then came the swing of the pendulum in the other direction, and owners of good colts found themselves well prepared to fill the fast growing demand for them at fair prices. In fact, there were not a sufficient number of thoroughbreds of real quality to go around, hence the European visits of the emissaries of various wealthy horsemen and their return with goodly numbers of foreign bred young things. At this writing, the owner of a really good mare has the satisfaction of knowing that if he breeds her to the proper sire he has every chance in the world of disposing of the resultant foal at a handsome profit, and the thoroughbred revival has not yet gotten well into its stride. There are yet a good many horses well along in years that are able to go to the post and bring home the bacon occasionally, but the ranks of this class are rapidly being thinned, so that when the last of them are gone the demand for the younger ones that are up and coming will be just so much more pronounced, with prices just so much higher. Now is dawning the day of harvest for the few men who maintained their breeding operations even in a curtailed fashion in the face of the discouragements of the past several seasons, and the experiences of the breeders of the trotter will be found to run in similar lines.

Retrenchment at this moment is not going to improve your condition. Keep going, keep breeding good mares to good stallions, keep nominating the foals, keep training them and going to what races are available, and some day you will find that you have worked out your own salvation and that of a lot of other good men and true, and you will be well repaid for all the dark days that have been your lot.

THE THOROUGHBRED AND THE FAIR.

While once in a while we strike an "orthodox" harness horseman who can see absolutely no good whatever in the recent suggestion from the members of the Golden Gate Thoroughbred Breeders' Association that the thoroughbred be given recognition in making up the speed programs of the county and district fairs throughout the state and that the two interests pool their resources and join hands in the fight for a state subsidy for fairs and the enactment of ameliorating legislation, the general run of men with whom we have talked the matter over realize that much might be accomplished for the good of the cause through such concerted action, and feel that the proper steps should be taken to bring about a union of what have, in the past, been "warring factions." Personally, the editor of this publication, while fully aware of the numerous obstacles that must be met and overcome before such a consummation is within the range of practicability and possibility, is heartily in favor of making a try at it. It has been done before with excellent results, as, for example, at the Arizona State Fair, and there is no really valid reason why it cannot be done throughout a circuit of smaller fairs, such as those we have here in California.

We would appreciate the expressions of horsemen of both persuasions in regard to the proposition, as in that manner the key to the situation may best be devised. State your views to us personally or by letter, and don't be afraid to speak right out in meeting.

The Blue Cross and the Great War

JOHN ASHTON, BRITISH GAZETTE

"And for these also, O Lord, the humble beasts, who, with us, bear the burden and heat of the day, and offer their guileless lives for the well-being of their masters, we entreat Thy most tender love of heart. See Thou not unmoved the cruel blow and the sharp goad. Thy beasts, kindly Master, Saviour of the world!"

This beautiful and touching prayer from the Russian Liturgy of St. Basil, written A. D. 370, is still remembered, in principle, by the Cossack when he sallies forth to battle, mounted on his fleet and wiry steed the Arab of the Steppes. While praying for his own salvation he does not forget to intercede for his horse, for he estimates and appreciates the value of his faithful servitor at its true worth. He is well aware, too, like a general of troops, like the Bedouin of the desert, like the cowboy of the west, like the vaquero of the pampas, how very essential to him is the fitness and well-being of his horses.

It was Buffon, the great French philosopher and naturalist, who declared that the greatest conquest man ever made was when he subjugated and tamed the wild horse and made the noble beast his servitor and helpmeet. We have recently seen accounts in the press wherein writers with more sentiment than specific knowledge of the subject have seriously predicted that mechanical vehicles would, in the near future, entirely supplant horses, and other beasts of burden, for military purposes; so that, consequently, the terrible suffering endured by our innocent dumb friends in warfare would be avoided. Unfortunately such utopian desires will never be realized. The horse is for ever predestined to pay his share of the sacrifices demanded by war. As well might a general think of equipping his army without guns or rifles as to dispense with horses. Without horses (or some animal equivalent, at least) his field artillery would be useless; and his men must have their supplies, and wounded must be evacuated in regions inaccessible to motor-driven vehicles. Then of course cavalry will always be an indispensable element of an army in the field.

Indeed, it almost seems an anomaly, living as we do in a mechanical age, as it were, to note how dependent we are on the horse's energy and versatility for the successful conduct of military operations. Despite the incredible and unprecedented number of automobiles and motor wagons of various descriptions being employed in the great war, never was the need of horses more forcibly felt, never were their services more appreciated, and never were they employed in such vast numbers in warfare previously. As to their effectiveness and the role they have played in this war, to only cite what happened in the preliminary days of the conflict would amply justify the most flattering eulogiums in behalf of our friend the horse. We know that in the famous retreat from Mons, the (at that time) "little army" of Marshal French was in grave danger of being captured or annihilated by the tremendous strength of the Germans, greatly superior in numbers. The grip was tightening on his two flanks; almost every road was blocked; the road leading into the fortified town of Maubeuge (still held by the French at that time) was purposely left open by the Germans, as the latter expected that French would allow his toops to be driven, like sheep to the fold, into the false security of a fortified town. But French was too wary for that; he knew that the fate of his whole army would have been sealed had he entered Maubeuge—it would have been a second Sedan. The rear-guard actions fought in that memorable retreat form one of the most gloriously epic pages in Britain's history. But all this would have been to no purpose had it not been for the magnificent work of the English cavalry, fighting and riding like demons to prevent the enveloping tactics of the Teutons. Thus the retreat was successfully carried out in good order, almost to the gates of Paris; then the English army re-formed, turned about, and together with the French delivered the staggering blow to the Germans at the battle of Marne.

The Germans, too, are indebted to the horse for many of their initial successes of the campaign, when great masses of their cavalry swept all over Belgium and the north of France, moving at a great pace, like swarms of hungry locusts. And later in their eastern operations the rapidity of their advance in Courland and Lithuania has been due to their formidable and numerous cavalry contingents; while, at the time of writing, we learn that the junction of the Germano-Austrian and Bulgarian armies was effected by means of rapid cavalry tactics.

True that since the trench mode of warfare became imperative, cavalry work has been relegated to the second place, yet it should not be surmised that horse regiments have been altogether idle. Patrol work still goes on, and in every big offensive movement, whether by the British, Germans or French, masses of cavalry have invariably been mustered just behind the infantry, ready to pierce the shattered lines of the enemy, so as to make a rapid advance. But cavalry only absorbs a portion of the horses required in a military campaign. The stupendous number of guns employed in the frightful war means vast number of horses, and large reserves must be constantly on hand to fill the breaches made by disease, shot and shell. Millions of men in the field require an enormous amount of food, munitions, equipment and supplies in general. The bulk of this work—hauling from the railway stations nearest the front to the trenches—falls to the horse.

Up to the first days of November we know officially that England had already 860,000 head in the field. I am informed on good authority that France had 600,000. Judging from these figures we can calculate about 1,500,000 for Germany and Austria-Hungary. We can count on Italy's having about 700,000 and Russia must have employed at least 700,000 or 800,000; while we can put down about 600,000 for Turkey, Bulgaria, Servia and Montenegro. Thus we get about 4,500,000 head for the nations at war in Europe—and the end is not yet in sight! Of course included in these numbers are many mules to share the credit with the horse; England has purchased many, but the proportion among the other powers is small, except perhaps in the case of Italy. Certainly automobiles have done wonders in this war, yet it should be observed that their utilization in such large numbers has simply meant that it has enabled military strategists to conduct the war on a scale of magnitude never before heard of. Mechanical vehicles have supplemented the work of the horse. Indeed, it may be said that railways, automobiles, and horses are necessary complements to one another. Each has its own particular sphere of activity; there is plenty of room for all three .

As soon as war was declared, emissaries from the various fighting powers began buying horses. Readers of these lines will know of the consistent purchases made in the states and Canada. Large numbers have been bought also in Argentina. France and England have been heavy buyers in America. Certainly this does not necessarily mean that these countries are actually short of equine stock; rather does it signify that the native breeding stock and active work horses in those countries must not be too unduly drawn upon in furnishing the necessary quota for military purposes. The idea is to buy cheaper horses, which will answer the same purpose as more expensive native animals for a short life under shot and shell fire.

What a mighty good job it is for these countries that they are able to replenish their wants by buying elsewhere; otherwise the calamity to native breeding stock would be almost irreparable. Germany had been preparing for a long time, and had bought both breeding and service stock extensively for years in France and Belgium. Just before the war broke out she concluded an enormous purchase of Irish horses for cavalry purposes. To fill up gaps during the course of the war she has had all Belgium, practically, to draw on, as well as much of northern France, including the Ardennes, where good draft stock abounds. She has doubtless been able to purchase many horses in Sweden, Denmark, and Holland; and even to cede draft stock to her ally, Austria-Hungary, a country notoriously deficient in heavy draft horses. I have traveled in that country and remarked that much of the heavy hauling and plowing is done by oxen. On the other hand, the fertile plains of Hungary produce myriads of light horses, rustic and resistant, suitable for cavalry work and light hauling. Since the war began, many of these Hungarian horses have most certainly been acquired by the Germans to replenish losses in cavalry mounts. Russia is about the only fighting power entirely independent in the matter of horses, as the Steppes produce almost unlimited numbers. Italy is probably the country where the proportion of mules to horses in use in the war is greater than with any other belligerent power. Turkey, it should be noted, is employing a lot of camels as pack animals.

If war means glory and honor, and, when it is just, stirs the patriotic sentiments to their innermost depths in loyal breasts, it also signifies a fearful amount of physical and moral suffering to man and beast. Yes, who, knowing well the temperament of man's noblest friend, can deny that the horse suffers morally? His bodily sufferings in a war are indisputably great. Presenting a relatively large target to all kinds of missiles; unable to take cover like his master, defenceless, and oblivious of danger, his lot is, indeed, a pitiable one. What a grand thing it is that there are men and women who, while ready at all times to help in the work of alleviating human suffering—the most noble and sacred duty of all—are yet willing to aid in a practical manner the humane efforts tending to succor wounded and diseased animals evacuated from the front.

During the Balkan War of 1912 an organization known as the Blue Cross, under the auspices of the Dumb Friends' League, London, Eng., began to undertake the work of caring for horses and kindred animals wounded and disabled in military operations. At the beginning of the present war this society, which is supported by voluntary contributions, offered its services to the French Ministry of War. They were gladly accepted, and several hospitals, capable of accommodating in the aggregate many hundreds of equine patients, were established at convenient points in the rear of the fighting line. The British army have their own veterinary corps, dating from the Boer War, but as the French were not similarly organized it will be seen that La Croix Bleue (as it is known in France) had ample scope to carry on its good work. The first hospital was formed at Lerqueux; this place was eventually closed, as it became part of the English army zone. Shortly after Lerqueux hospitals were opened at Troyes, Provins, Moret, and St. Mammes. Experienced veterinary surgeons, assistants, and grooms were engaged to operate these establishments. It is hardly necessary to state that the results obtained have been eminently satisfactory to the French military authorities. When Italy joined in the war she sent representatives to the headquarters in London and also to France to study the working of these hospitals. The Earl of Lonsdale, president of the Blue Cross, ably assisted the Italians to organize their society. The result was that the Italian Government decided to form a Blue Cross (Croce Azzurra) to take charge of its wounded and sick horses during the campaign. The Italians seem to have done the thing thoroughly, and have completely militarized the movement.

The work of the Blue Cross, attached to the French Ministry of War, is of course necessarily limited in its scope on account of its being kept up by charitable subscriptions. Only the lack of sufficient funds has prevented this society from opening up many more hospitals. That there was ample room for an extension of the work the writer of these lines can vouch for from personal experience connected with the organization. Any one who has been over a battlefield or seen the poor, wounded creatures being unloaded at some depot behind the front, can quite realize the need there is for charity in this direction. The cost of operating the hospitals is considerable. All the grain, forage, head collars, stall ropes, drugs and medicines, blankets, instruments, blacksmiths' forges, bandages, and wages of staff are furnished by the society. The French are not out of pocket one penny. Even the rent of the buildings is paid by the Blue Cross. While the bulk of the funds comes from London, many charitably disposed persons in France have rendered signal help. Certain Americans have also sent subscriptions. Probably more funds would have been sent in were it not for the fact that many people thought because the society was accepted by the French army the latter paid the bills.

The hospitals are inspected frequently by the French military veterinarians and staff officers. As soon as a batch of patients is cured and ready to leave the animals are submitted to the examination of these officers, who accept them or order them to remain longer in the hospital, as the case may be. Wonderful results in the way of cures have been obtained. From Moret and St. Mammes (the chief hospitals near to each other) at the date of writing (Nov. 5) about 900 head have been evacuated as completely cured. All these animals will go back to the front. At the time Troyes was closed early in October, through lack of funds, nearly 500 head had been sent out cured, and at the time of writing Provins had evacuated a like number. Time means money where horses are kept, so the idea is to cure and fatten up the horses as quickly as possible. The vast majority of slightly wounded and run-down cases are of course treated by the French in their own cavalry depots; yet it should be said that a vast number of horses that died or were sold as cast could have been saved had there been money enough to open up more Blue Cross hospitals.

Without dwelling on the technical side of the subject I might say that almost every disease and wound known to veterinary science found its way into these hospitals. Shrapnel wounds (principally in the back and croup) were numerous. Bullet wounds in various parts of the body were frequent; many horses had an eye shot out, without otherwise being injured. Bayonet wounds, and wounds from aerial darts dropped by aviators were met with occasionally. Fearful wounds in the limbs were often met with. These injuries made one reflect on the great number of horses killed outright, or those so severely injured that human aid could avail nothing. Some horses were completely riddled in the back and croup with projectiles, and numerous operations had to be performed before the animal was cured. These animals formed the "interesting cases." Two classed of injuries showed up in quite phenomenal numbers, fistulous withers and quittors. A veterinarian saw more of these cases in six months of the war than he would encounter in all his life in normal times. Both of these conditions take a long time to cure, especially the former. Strange to say, I never saw a single case of poll-evil, but we had lameness in all its many and varied forms. Founder was met with frequently; cracked heels galore; as well as rope galls and sore backs. Lymphangitis cases were numerous, and we had navicular disease, sidebones, ringbones, spavins, stringhalt, capped hocks and thrush without end; canker in foot rarely.

When the cold weather came on last winter we got a great number of lousy and mangy horses at Lerqueux, and all of them were in a run-down condition. All these cases were clipped before being treated. I ought to mention that all the French horses were inoculated with mallein as a precaution against glanders. Chronic lameness, such as navicular disease, generally meant the operation of neurotomy. Trepanning was also practiced with success. Pneumonia cases were not infrequent; while the great, insidious enemy of the horse—colic—often showed itself.

However, the mortality was very low on the average. The most deaths occurred subsequently to the retreat from Belgium and the battle of the Marne. Oh! what poor skeletons I saw at Lerqueux! Some

of the poor beasts had been galloped about for days and days without hardly anything to eat and drink; they were all lousy, too. So weak were they that, covered with sores and wounds, they could scarcely walk from the railway station to the hospital. The poor animals ate ravenously, and just when some of them appeared to be doing well they would break down, and, despite every care, give up the ghost. Later, after the trench mode of warfare began, there was a great diminution of such extreme anemic, run-down cases. Every type and breed of horses in western Europe passed through our hands; also horses from north Africa brought by the French colonial troops, such as Barbs and Arabs—beautiful, small horses. I saw many Percheron mares and geldings, and Nivernais, Ardennais, and Boulonnais; occasionally we got a Shire or a Clydesdale gelding—some horses that had escaped from the British and got into the French lines. Many Thoroughbreds were seen that had been requisitioned from racing stables; we also had a few wounded mules, and once in a while we got a German horse. But horses have no nationality; a horse is a horse, and equal care and attention are lavished on all.

We have had a fair number of American and Canadian horses under treatment; some of these do not make the most tractable patients, especially when in the blacksmith's hands. As I am penning these lines a troop of cavalry (reserves) are passing my window; all the riders are mounted on American horses. Receiving as we do horses of all dispositions, one must be continually on the lookout against accidents. While the writer was at Troyes one of the grooms received a kick in the abdomen which caused his death in about 30 hours. This is the only fatal accident that I know of in connection with the Blue Cross work. Many horses arrive so weak that one can do almost anything with them, but regaining strength often imparts a friskiness more than interesting. All the equine patients in a convalescent state are regularly given the freedom of large pastures for a few hours daily, weather permitting; in other cases the horses are walked in fours, two or three miles on the road.

A register of all the animals is carefully kept at every hospital, giving the military matriculation (stamped on the hoof), stall number, age, color, height, markings, and nature of injury or disease, as the case might be. In some cases horses have been recognized that have sojourned in the same hospital on two or three separate occasions.

Once more the anniversary of Him who died for man comes round with no signs of peace on the troubled horizon in Europe. But let us all fervently hope that an enduring Treaty of Peace will have been long ago signed ere another Christmas comes, and that peaceful arts and commerce will gradually dissipate the acrimony, jealousy, hate and spite of the warring nations. Certainly nobody ever hopes to see such another horribly destructive war as this. Long, long years will be needed to heal the awful bruises sustained by all the belligerent powers. Some time in the future—not in our time, let us hope—another conflagration will break out among the civilized powers. Then once more the horse—and his half-brother, the mule—will take their share of the sacrifice.

Just like the simple soldier,
Never to reason why,
Filling the breach when duty calls;
Ready to do or die!

RASTUS 2:05¼ COMES TO CALIFORNIA.

The brown pacing gelding Rastus 2:05¼ has been purchased from A. Traub of Kansas City, Mo., by S. H. Cowell of San Francisco and has been shipped to Walter Tryon at Sacramento. He is by Liberty Boy, a son of White Foot 10554, and his dam is Georgia Rose by Grant's Abdallah. He was a good consistent pacer on the Grand Circuit and will be a feature on the California circuit this year. Herschel Knight, caretaker of Rastus, started from Kansas City with the horse. Near Bonner Springs the car was sidetracked and entered by four men, who claimed they were railroad detectives and had to make a search, stating there had been a robbery. The leader pointed a gun at Herschel, with the command "Hands up!" and immediately fired, the bullet passing through the young man's body. They then took the victim's watch and made their escape. Herschel staggered back to the caboose, bleeding copiously, and fell in a faint, where the train crew found him. He was taken to a Lawrence hospital, dying the next night. Herschel Knight was a good, clean young man, the only support of his mother, whom he left destitute at Kansas City.

SORT OF A "SIMULTANEOUS" BUNCH.

The Cox family, of New Hampshire, had a field day on November 2. Walter, who was known as the David Harum of the trotting turf until he let Lee Axworthy 2:03¼, Peter Scott 2:05¼, and Mary Putney 2:05½, slip through his fingers, won his fifth race within a week. His father, Charles E. Cox, was elected alderman in Manchester, N. H. Louis S. Cox, a brother, was chosen district attorney in Essex county, Mass., and Channing Cox, another brother, led the field in his election district in Boston as a candidate for the Massachusetts Legislature, in which he was the speaker of the house at the last session.—Spirit of the West.

Good and Bad Effects of "Early Closers"

TEDD H. KLINE, HORSE WORLD

Once upon a time an ambitious turf scribe, in a moment of enthusiasm, described horse racing as "The Sport of Kings." Truer words never were spoken, but had this same scribe been gifted with second sight or ability to see into the future he would have gone a little further and exclaimed, "Early Closing Events Will Also Be the Sport of Kings."

For be it understood that pikers have no place in this realm.

Talk about your stock exchange, your bucket shops, your faro bank, roulette wheel, poker, dice or the mere betting on a horse race. Why, any of these pastimes are casino compared with that terrific gambling game known as The Early Closing Event.

Think of putting, we will say for argument, ten thousand dollars into a pool on March 15, that you will not race for until August 1. Think of the good things on March 15 that become pelters, for one reason or another by August 1. Think of the owners who have contributed who never realized a cent on their investment. This is the only real, genuine, dyed-in-the-wool, blown on the bottle and marked on the wrapper bunco game in the world.

Of course it is well known why, in the beginning, they were started. Simply because racing associations needed running expenses to tide them over until their meetings had started, and I am not sure but what the same condition exists in many places today.

But the point is, why will horsemen continue to cheat themselves? Is it because of the pot of gold they think is at the end of the rainbow? Can you imagine a good, game business man who races a trotter, taking the same chances with his money on any other proposition? I certainly cannot, and facts prove that he does not, but he thinks nothing at all of sending some 15 or 20 racing associations anywhere from one to ten thousand dollars, months in advance of the races, knowing then that he is liable never again to see a cent of his money.

My rich friends—and I respect them all for what they mean to the business—will exclaim, "Bother ten thousand dollars, if we can get a Peter Scott and make a clean sweep through the Grand Circuit."

But on the other hand, what of the middle man or poor man with only one horse or possibly two? Has he no place with us? Are we developing a game of freeze-out on the harness turf, where it soon will be a case of the survival of the fittest?

Right now, I happen to know that the several tracks which represent the Grand Circuit have their books clogged with the accounts of poor horse owners who took that awful chance, staked what they thought were a couple of good ones clear through and then met with the inevitable. Some of these accounts have been settled with the various associations at 50 cents on the dollar, some at 25 and some at 10, while others never will be settled. But these compromises helped but little for the reason that campaigners were kept out of the game for several seasons because they could not meet the demands of the associations, while others never will get back to the races on account of this sword of Damocles which hangs over their heads.

I ask, in all fairness, is this condition right? We need every honest man we can get into the game, but we cannot get them in or keep those in which we already have, by strengthening the wall of early closing events about us.

It has been argued, by those who do not know the real facts, that the early closing event is a great stimulus to the sport because of its wonderful advertising power for the track. Perhaps—to advertise breweries, hotels, department stores, et cetera—but not the track. I am prepared to show you that as drawing cards for Grand Circuit meetings or any other meetings for that matter, the early closing event is about the poorest proposition we have. And here's the reason.

In the spring of the year, a secretary announces his early closing entry list. It is a good one, of many horses which (more's the pity) are known only to the regulars. Perhaps one or two are known to fame. Then the secretary or his publicity man proceeds to furnish the daily papers of his city, ream after ream concerning the horses which are to start in the so-called classics at his particular meeting. The public's appetite is whetted and curiosity aroused.

"Bravo," they all cry. "At last we will get a chance to see Caesar The Just, which performed so well in the Peninsular Circuit last year and ended the season by going a trial mile in 2:04, at Lexington."

All well and good, but when the day comes for the great race, Caesar the Just and a dozen others that have been touted are not even on the grounds or else are too lame to start, while your local newspaper men and race enthusiasts look daggers at the secretary and publicity man and think things they dare not say or print.

Here is another thing that makes the early closing event so much bunkum.

And that is not all. If Caesar the Just happens to stay sound and reports for this race, he usually so far outclasses his opposition that the race is a joke and the public which has paid its hard earned money at the gate simply sneers at the management.

If you think I exaggerate let me refresh your memories slightly by recalling certain performers of bygone days which made jokes out of nearly every early closing event in which they started: Direct Hal, Joe Patchen II., R. T. C., George Gano, Baden, Dudie Archdale, Peter Scott and a dozen others whose names I cannot now recall.

And right in this connection, it was the writer's business to handle the publicity work for the 1912 meeting of the Furniture City Driving Club at Grand Rapids and my experience in that capacity is well worth recounting.

The association gave that year, if I remember correctly, six early closing events, including the Furniture Manufacturers' Purse for $10,000 and The Comstock Purse for $5,000. A record entry was had in all stakes. The big purse received 31 nominations, the Grand Rapids Railway Purse 38, and all others in proportion. In my opinion, an early closing entry list never presented a better opportunity for some glorious publicity work and I set out with a zeal. I wrote column after column of dope, so called, and after the races were all over and the story told, but one horse among the original nominations about which I had written came through for me and that was none other than Joe Patchen II; but at that he so far outclassed the others, he made a terrific joke of the Comstock Purse on which we had counted so much. Of the 38 nominations received in the Railway Purse but eight horses scored for the word and of these eight not a single one of them was a horse that the winter and spring scribes had raved over, to any extent. R. T. C. was nominated to start in The Alcryon Purse for 2:07 trotters against Dudie Archdale and Helen Stiles. The local folks were crazy, so to speak, to see R. T. C. and Dudie hook up and I wrote some appetizing tales for them. Result? R. T. C. went wrong and did not start; Durfee to win, laid up with Helen, which took all the run out of Dudie and altogether the race left about the worst taste in the mouths of the Grand Rapids race goers that they ever experienced.

But why go on—I believe my readers will see the point to the above. Facts, like actions, speak louder than words and any time you want to know about the value and effects of the early closing events on harness racing just delve into your history for a minute and you will find enough to suit the most fastidious.

There is still another phase of the situation which makes a farce out of the early closer, and that is the matter of a 2:05 trotter or a 2:06 pacer racing as a green horse through an entire season. If anything holds the harness turf up to ridicule it is this state of affairs. It is high time this iniquity were eliminated. Horses should be classed by their money winnings or their best record as the season progresses. We are living in the dark ages on this proposition. However this is a subject for another article and should not be dwelt upon here.

During the course of this article I was supposed to say something about the good effects of the early closing event, on harness racing, but after a very careful survey of several years' Grand Circuit racing and a close analysis of more than one stake race, I cannot see where the early closer has enhanced the sport one iota, for try as I will I cannot believe it does anything but afford an excellent opportunity for the rich man to gamble, a better opportunity for the poor man to become a poorer and gives the racing association a chance to gather in a bundle of current expense money before the meeting starts.

In order to forestall any criticism that may come from those who happen to know that I am interested in the promotion of three-year-old futurities, let me say right here that I do not consider our newspaper futurities or the colt stakes promoted by the American Association of Trotting Horse Breeders, in the same class with the early closing events as conducted by Grand Circuit tracks and minor organizations. For several reasons, viz.:

The same person does not always make all the payments through the building of a futurity.

The payments are extremely light and very far apart as compared with the payments in the early closing events.

The money eventually raced for, in the colt stakes, is always more in proportion to what has been paid into them, than in the early closing events. For example this year's Stallion Stake of the American Association of Trotting Horse Breeders was worth twelve thousand six hundred and fifty-five dollars ($12,655) and yet it cost but the small sum of $155 to start a colt in it and this amount was all payments, including the initial and starting fees. Except from the third payment to starting fee, all payments were a year apart and in some cases the colts changed hands, so that the man who made the first payment did not make the second, the man who made the second did not make the third and the man who made the third did not pay the starting fee.

So that I say, while of course a futurity is a jack pot, at the same time it cannot be considered in the same breath with the average Grand Circuit early closing event and subsequent rake-off therefrom.

Summing it all up, the early closing event is a bad proposition for every one connected with the sport, except as I have said, the extremely rich man who does not care for dollars and "sense." It is bad for

the middle man because the risk is too great, it is bad for the association from an advertising standpoint and that means getting money at the gate, and it is bad from a racing standpoint because we compel outclassed horses to race against a stake horse after he has shown the ability to do certain things.

Then there is another reason why it is bad, and while this subject ought to be tabooed in many journals, I cannot refrain from saying something about the relation of the early closing event to the speculation, that is a vital part of our best meetings. There always has been and always will be a clamor for good prices, especially with relation to the auction betting, but we cannot continue the early closers with their invariable outstanding horse, and give the bettors what they ask. This works a hardship two ways. First with the bettors and second with the association which counts on a certain revenue from the betting. The larger that is of course the larger the association's percentage, but "The Favorite Barred" sign kills interest, not alone in the racing itself but in the speculation, a thing more vital to the sport than most of us are willing to concede.

Well, I guess I have presented my side of the case and I now look for the attorney for the defense, whoever he may be, to present his side. I have always been taught to believe that there are two sides to every story and there may be in this instance, but, as I have said before, after a very careful survey, I am at an utter loss to see where, for a long period of years, the early closing event has worked anything but harm to the harness turf. Would it be too radical for me to say that I sincerely believe we are about 50 years behind the times because we have fostered it so long?

God speed the day when we shall have naught but dash races on the harness turf, with practically every event an over-night one, or, if you must have early closing events, let them expire say a week before any meeting opens. Do away with so-called "green" horses after they have shown spectacular ability and so classify them that, as on the running turf, the pelter will have the same chance as a stake horse. Put your auction blocks in the attic and equip your plants, where they will let you, with mutuel machines and put in the National Museum at Washington, along with the first locomotive, first automobile and many other ancient inventions, the death certificate of The Early Closing Event—and proceed to forget it.

1915 A RECORD YEAR.

Although the official records are not yet at hand, lacking which no definite statement can be made so far as statistics are concerned, such as the total number of race meetings held in the United States and Canada during the past year, it seems but fitting that a brief resume of the activities in the trotting world during the past year should be contained in this, our last issue of 1915.

In 1914 the number of race meetings held in the United States and Canada was 1,393, which, if we are correct, was the greatest total in the history of the sport. That this record will be eclipsed when the statistics for 1915 will have been compiled there seems little doubt. In New England alone interest in the light harness sport was greater than ever before, if the number of meetings can be taken as a criterion, there having been at least fifteen more than in 1914. This seems to have been the rule all over the country, and, when the facts are known, we confidently expect the volume of harness racing to be greater than in any other year since the advent of the sport.

The auction sales can best indicate the stability of the industry. We have seen prices correspondingly higher than were paid at the various auctions this fall, but, quality considered, it is the consensus of opinion that practically every animal that went under the hammer brought just about what it was worth. Youngsters of fashionable breeding when carefully prepared for the auction ring have brought prices that were satisfactory in almost every case. The fact that five yearlings brought an average of $1,730 at the Old Glory Sale, and that the highest price for a horse of any age at the recent Chicago Sale was paid for a yearling, will furnish food for thought.

The past year has seen, we believe, a greater percentage of available mares bred than ever before. The Europan war doubtless was an incentive, as breeders could see a better market in the future for the by-product. Should the war continue another year, more than one million horses will have been shipped from our shores, so that 1916 should be another banner year for this feature of the industry.—American Horse Breeder.

A correspondent writes: "Ventura, with the best intentions, had arranged to start this year right with a New Year matinee, but owing to a plentiful and long continued rain, has postponed the event until the first dry Sunday."

* * *

There are still a few substitutions available in Pacific Breeders Futurity Stake No. 15, for foals of 1915, now yearlings. If you have failed to nominate your foal of that year, it might be well to take advantage now to secure a substitution and thus save future regrets.

Holiday Time at Hemet Stock Farm

Hemet, Cal., Jan. 3, 1916.

Telegraphic reports to the middle of last week told of an inch or so of snow in the region of San Bernardino and other cities of that general locality, but a residence of some years in the heart of the mountin fastnesses of Southern Montana had robbed a snow bank of all its terrors for the writer, so that when opportunity presented itself for making a trip into the latest haunts of the winter storm king it was eagerly taken advantage of, snow or no snow. San Francisco herself had been visited by a touch of cold weather just prior to my departure, though the little freeze had not been attended by a fall of "the beautiful," and the air was simply very stimulating and invigorating to one who had been used to a degree of cold which made the thermometer register much farther down the scale. The first sight of snow came Friday morning in the Burbank neighborhood, but closer in toward the city of all the angels all traces of the unaccustomed visitor had been removed. It seemed a bit strange to read in a Los Angeles paper of a man being treated at one of the local hospitals for injuries received in a snowball fight, and on the day before my arrival the movie folks had been busily engaged in staging "Alaska Stuff" on the heights of Hollywood.

From Los Angeles to Riverside no traces of the storm were in evidence save on the peaks in the distance, where snow belongs, but from Riverside to Hemet I ran into one of the surprises of my short and innocent career—seven inches of snow in the Perris Valley. Really, the rolling highlands and the nearlying hills presented an appearance that would not have been incompatible with a winter landscape in the edge of the bad lands in the Dakotas, and here again the "opportunists" from Universal City were much in evidence. It is only a few short days until theater-goers will be gazing in rapt attention at thrilling scenes in which snow shoes, fur parkas and mukluks, dog teams, and all the other appanages and personages of the frozen north will be much in evidence—all staged and photographed in Sunny Southern California. "It's an ill wind," and so on—and the storm certainly played right into the hands and pocketbooks of the movie people. Nor did it work any great damage to anyone, as the snow itself was not detrimental to the fruit and olive orchards, and the weather moderated immediately and failed to be followed by a freeze of any severity, so that in reality the region is just so much ahead. Between Riverside and Hemet there are many thousands of acres of barley already sown, and in some instances already sprouting, and the impetus given to the growth of this crop will assure a bumper harvest, with any seasonable moisture at all in the coming months.

The Hemet Valley, sheltered to a wonderful degree by the surrounding hills, received much less snow than did the Perris neighborhood, though on Friday morning there was enough of the white stuff in evidence to set the kids—and some of the older folks—to throwing snow balls and building snow men just like they did "back east," for Hemet has attracted a very large percentage of its population from the sections across the big divide where winter is a very real and appreciably different season from what it is in California. To them, the snow came largely in the nature of a "letter from home," and they proceeded to make the most of it while it lasted, which was a very short time indeed. The sun came out in its usual style for a good portion of the day, followed by a continued moderation during the night, so that within a few short hours the snow line had retreated well into the hills, where it will probably be contented to remain for the balance of the winter. High up on the hoary head and deep scarred sides of old San Jacinto the big drifts will linger until well into the summer, but it is hardly likely that the floor of the valley will receive another covering of the kind for many a long month to come.

Budd Doble, to all appearances younger than when he last invaded the raging Grand with that good race trotter, Kinney Lou 2:07¾, was on deck to greet me as the train pulled into the comfortable little city that Mr. W. F. Whittier has placed permanently and prosperously on the map of the world, and after a hasty luncheon at the hotel we made our way out to the Hemet Stock Farm, the show place of the town and of the community at large. I was no stranger to the farm, as it has been nearly three years since I first inscribed my signature in the visitors' book in the office, along with those of many better and more widely known men—and ladies, too, for that matter, as the place attracts as many of the fair sex as it does of the sterner portion of the visitors to the valley—and it was with a great deal of pleasure that I set about renewing my acquaintance with both men and horses.

Wilbur Lou, who brought the establishment so much fame in the three years of his career on the California and Arizona tracks, I found running in a roomy paddock, full of vim and vigor and always ready to make new friends from among his visitors, as he is one of the nicest tempered fellows imaginable and likes to be noticed and played with. It is hardly probable that he will again be seen at the races, as he was the victim of a bit of hard luck early last season, but this is of little moment, as from the start he has gotten as a sire this year his services will be pretty largely in demand in the future, so that his time will be best spent entirely at home. No stallion in California, or for that matter in many other sections, has had a more auspicious entry to the ranks of great sires, and there is every reason to believe that this fame will be enhanced every season for many, many years to come. Bred to seven mares in the spring of his three-year-old form, he obtained seven living foals, four of which are in the standard list today, while another showed her ability to trot in standard time as a two-year-old, while the others were never trained for speed. Truly a wonderful record for a young sire, especially when it is further taken into consideration that one of the seven is Natalday (2) 2:13½, the best two-year-old futurity winning trotter yet produced in California.

Just at present the youngsters that were raced or trained much during the past season are taking things pretty easily, running in the alfalfa fields or spending much of their time out in the paddocks, while the energies of Mr. Doble and his assistants are being directed to the breaking of the yearlings and the conditioning of some of the older horses that had a let-up in 1915. Miss Gailey 2:11¼, nicely grown and filled out, is taking her work in a very pleasing manner and her trainers think that she is the making of quite a bit better than a 2:10 trotter for her sire, the dead George W. McKinney 2:14½. She was a nervous, high strung thing, and the rest and added age seems to have benefitted her considerably. Harry R. (1) 2:24¾ pacing, also a six-year-old, is a nice bodied fellow with a very good way of going and considerable speed, as he has a matinee record of 2:12½ over a two-lap track, gained as a three-year-old. All the four-year-olds, including Allie Lou, the lass that made such a good campaign for the farm this last season, are having a nice easy time in view of the hard work that is to come their way later on when active speed making commences, and are in excellent condition to start in on when the time comes. Allie has added a bit of flesh since coming home and looks fit as a fiddle for another campaign. Racing in class races against all comers, it is hardly likely that as a four-year-old she will pull down another eight thousand to be added to the Whittier bank account, but she will be there or thereabouts when the money is cut at the end of the race.

Of the three-year-olds only two are at present doing anything other than playing in the fields and munching sweet hay from the feed racks, the "vacationers" including Goldsmith Lou (2) 2:29, Fiesta Lou (2) 2:22½ and Gertrude Rives, all by Wilbur Lou, and Don de Lopez (2) 2:25 by Kinney de Lopez. Billie Boyd (2) 2:30, by Wilbur Lou—Lady Zombro, is having his education extended a trifle, and Frank Rees is just breaking the recently purchased Ailsie Lou, a black filly by Wilbur and out of Bonnie Ailsie 2:08½, the dam of Contention B. (3) 2:08¼ and the trotter Carlschen, who obtained a standard record as a two-year-old. Ailsie, I believe, will mature into a better individual than either of the two just named and should have a profitable amount of speed. Unfortunately her futurity engagements were allowed to lapse before the farm purchased her, so she will not be pushed to any great extent until fairly mature.

The farm has nine foals of 1914, now two-year-olds, all staked in the coast classics, and of these the following quartet are now being handled: Zeta Lucille,

Matilda Lou, Wilbur Direct, all by Wilbur Lou and out of Zeta W., Lady Zombro and Betsey Direct, respectively, and Louise de Lopez by Kinney de Lopez and out of Louise Carter, dam of Wilbur Lou and several others. With the exception of Matilda Lou these babies were handled a bit last spring and showed eighths in 17½ to 19 seconds before being turned out. They are all nice sized and all a uniform color, chestnut, with in some instances a very little bit of attractive white marking. The other five will be taken up in a very short time, and from what I saw of them in the pastures and paddocks they are of equal quality with those just mentioned. Once in a while Wilbur and Kinney de Lopez get a black one, but almost all of their colts are chestnut, with bay the second color.

Among the yearlings the bays and chestnuts run about an even race, and there are eleven of these spunky boys and girls being broken, the full crop of 1915. Nine of them are Wilburs, one is by Kinney de Lopez, and the odd one is a chestnut filly by Itinaris. As is right and proper for things of this age at this season they all have a thick coat of hair, but no matter how luxurious this crop gets the quality shows from beneath without fail. They are a rugged bunch, with nice conformation and good legs and feet, and show that they have had all the feed needed to insure proper growth at an early age. Not a pacer has as yet developed among them and most all of them that have gotten along in their lessons to the point where they are well bridle wise show natural trotting inclinations, so that from among them the farm will no doubt develop a few that will give a fair account of themselves when their futurity engagements roll around to be filled.

* * *

While most of the stable room at Hemet is taken up by the horses belonging to the farm, there are ample accommodations for outside trainers, and a few of the latter are usually to be found here at this season, as the track is a most excellent one and the weather during the training season and late winter most conducive to speed making. Lou Taylor, who for several years was located either at San Jose or Pleasanton, came here last summer when the Hemet horses came home from the exposition meeting, and seems fixed to stay quite a while longer, indefinitely in fact. Lou finished the prep on his two-horse-stable here last season and then went out and raced for two meetings, winning every race he started in, so naturally he thinks Hemet a pretty fair place to get 'em ready. His trotting filly Luana by Kinney Lou and out of a good daughter of Stam B., has not grown much since leaving the northern part of the state, but has developed into a right good kind of a race mare. She is full of spunk and nerve and her legs are clean and hard as a real trotter's, so Lou will probably figure in some of those races that are hot contests this season. For the pacing brigade he still has the chestnut gelding by Kinney Lou out of grand old Carrie B., the dam of Lovelock and Ray o' Light and one or two others, and figures him as a 2:05 performer for 1916 with any kind of luck at all. His legs are all to the good and he is a nice headed fellow that can be rated and placed wherever wanted, which is an absolute essential to real racehorse quality. The third member of the Taylor string is the two-year-old bay filly by Yoncalla out of Yolanda 2:14½ by McKinney, and while she has had but little work as yet she has grown nicely and looks to be the making of a useful sort of a filly. Lou, since going to Hemet, has developed into quite a gasoline skinner and he and Mrs. Taylor, with Mr. and Mrs. A. L. Blackwell, spend a good deal of time skimming over the good roads of the surrounding country. To tell the truth Lou has been gadding about a good deal of late and rather soldiering on his right-hand man, Murphy, who accompanied him on the move south, but he promises to get to work right away and be ready for the bell when the season opens. The Taylors and Blackwells are making their home together and are mighty comfortably situated.

* * *

Bob Sebastian, who prepped a string at Hemet last winter and then had a good season down in the central west, is spending some time here with his people, as Hemet is home for them, and expects to go to Omaha about the first of April and take over the horses belonging to Thomas Dennison of that city, who made numerous friends in California during his visits to the exposition race meetings. Hal McKinney, who made two good campaigns for Bob on the bull rings of the short grass country, will head the pacing division, and there will be a number of others to go along with him that will be of the hard to beat variety. Bob describes Omaha as the coming trotting horse center of that portion of the central west, as the folks who are getting into the game there are enthusiastic over the outlook and have plenty of backing and the public takes to it like ducks to water. Hemet he declares to be one of the best places in California to prepare for a campaign, as the climatic conditions are not sufficiently unusual in any way for a change to any ordinary country to throw a horse off his form, and his only regret is that he hasn't his 1916 stable here now. Just at present he is working only one horse, a green trotter on which he has an option and which is doing everything asked of him so far very handily. He is a nicely turned six-year-old chestnut gelding by Strathway out of Badger Girl and just before the recent break in training weather had negotiated the half-mile track here in 2:23 with an eighth in :16¼. If Bob decides that he will do he will take him along when he makes the jump to Omaha in the spring.

* * *

The Hemet Stock Farm plant is one of the most attractive ones in the west and under the progressive policy of Mr. Whittier and the watchful eyes of Budd Doble it is kept in the pink of condition for training purposes the year round. Within a very short time the number of horses in active work here will be increased materially, and there is never a day goes by that the visiting horseman cannot find much to interest him, either on the track, around the comfortable stables, or out in the paddocks and pastures among the loafing horses or the mares and young things. Hospitality seems to be the middle name of everybody in the valley, and especially of those around the farm, and no one can spend a day or a number of days here without leaving with a feeling of regret. For my part, I am outward bound just as soon as I wind up this brief sketch and make a two-block run for a train, but I have my mind firmly composed on this one point—I am coming back at the very first opportunity and stay just as long as possible.—[N.]

NOTES and NEWS

Anvil 2:02¾ who is to be in the stud at Pleasanton this season, has already had a good number of excellent mares booked to him.

◈ ◈ ◈

Notwithstanding the threatened opposition from the Mexican government, the meeting is going on at Tia Juana as proposed by the promoters. Nothing further has appeared that would indicate governmental action to stop racing at this track in the near future.

◈ ◈ ◈

Take a few moments off some day or evening and drop us a line concerning the colts that you are handling this winter, especially the ones that have never been in print before. We will appreciate it, and your friends will be glad to know what you are doing.

◈ ◈ ◈

When Robert A. Smith reached Denver on his way home after the Chicago sale, he received a telegram that his father had died, and he immediately started back to Philadelphia. His many friends here will regret to learn of Mr. Smith's bereavement. On his return a meeting of the new Pacific Coast Fair Association will be held.

◈ ◈ ◈

Hemet Stock Farm has recently purchased of F. D. Myers, formerly a resident of California but now living in Pennsylvania, the famous matron Bonnie Ailsie 2:08½ by Faustino 2:12¼ and her two filly foals by Wilbur Lou (3) 2:10¼, one a black three-year-old and the other a bay yearling. They are both nice individuals and are being broken at present at the farm.

◈ ◈ ◈

D. W. Wallis, for many years high in the service of Miller & Lux and until quite recently the general cattle superintendent, retired from that firm's service the first of the year and will assume a less strenuous mode of life from now on, making his home in Los Banos. Mr. Wallis has some very promising young things in the trotter and pacer line and it is an even money bet that he will see more of them than formerly.

◈ ◈ ◈

Every owner of a trotting bred stallion on the Pacific Coast is vitally interested in seeing that the Pacific Breeders Futurity Stake No. 16 for foals of 1916 is filled with a goodly number of entries. The Secretary is sending out letters to stallion owners, together with a blank list with the request that they send in a list of mares that were bred to their stallion or in their vicinity that might be entered in this stake. If you own a stallion or are interested in the preservation and advancement of harness racing, don't fail to boost this stake.

◈ ◈ ◈

As a result of the hardship of a long trip across the continent, Prince Ansel (2) 2:20½ was in such poor shape that when he was put up at auction at the Chicago sale he brought less than $100. While it was not expected that he would bring a big price on account of his age, which is well over twenty years, his record as a sire of three world's champions, viz., Anselila (1) 2:17½, Verbena Ansel (1) 2:26, and Anselot (1) 2:28½ made this season, should have been taken into consideration and he should have brought a much higher price.

◈ ◈ ◈

There are a lot more horses in training in California and on the Pacific Coast generally this year than most people think, and in view of the fact that there will be ten or twelve district fairs in California in 1916, the prospects are better for harness racing than they were in 1915, notwithstanding the two big meetings at the Exposition. While there was several hundred thousand dollars paid out in stakes at the P. P. I. E. meetings, most of it went to but a few owners. With a lot of small meetings on the coast the man who campaigns but one or two horses will stand a better show this year, especially as he will not be in competition with some of the leading Grand Circuit performers.

◈ ◈ ◈

After its usual custom Allen Farm, Pittsfield, Mass., has just issued its annual publications that go hand in hand, the Allen Farm year book and the price list. So well is the year book arranged, and so completely and carefully is it compiled, that in a very few moments one may see all that certain products of the farm have accomplished in the past season, and then by turning to the price list he may choose the one individual whose blood lines suit him best as compared with those of the winners in the year book's summaries. By breeding trotters that will race and by putting them before the public in this form, Allen Farm has established a ready market for its products at very fair figures, retaining the middle man's commission to put it into an investment in printer's ink, which pays much larger dividends.

◈ ◈ ◈

Tia Juana opened on New Year's day as per schedule with a very pleasing attendance, some six thousand sport lovers making the trip to the border to see the thoroughbreds perform. The early days of the meeting have been marked by good racing, although the track is not fast nor is the class of horses in attendance the absolute pick of the land, and if the promoters are able to maintain racing of this kind for a few weeks the meeting will receive a big boost, draw larger crowds and attract many more horses, as numerous owners held off from shipping until they could see how the situation in general was going to turn out. Numerous visitors to the opening, with whom a representative of this publication has talked since their return, have nothing but a good word to say for the new venture, which is pleasing in the extreme.

◈ ◈ ◈

At the Meadow Brook Farm, near Pleasanton, the high wind on Sunday blew down a portion of the fence and a number of well bred light harness horses strayed from their quarters to the railroad crossing where four of them were killed by a passing train. The four consisted of a two-year-old black filly by True Kinney out of Ida Millerton 2:12¼ by Millerton, recently purchased by Mrs. A. G. Wilkes of Francisco for $500. Millard Sanders had this filly in training with a view of campaigning her the coming season. The other three were yearlings, also from the Woodland Stock Farm, and belonged to C. A. Harrison, consisting of a bay filly by Robert Bingen 2:11¼, out of Caritone by Antone; a bay colt by True Kinney, out of a Director mare, and a bay colt by True Kinney out of Silver Haw (dam of Helen Stiles 2:06¼) by Silver Bow. These yearlings were entered in the Pacific Coast futurity stakes and their loss will be a great disappointment to Mr. Harrison.

A. L. Blackwell, whose former contract with Hemet Stock Farm expired a few days ago, is taking things easy down at that Southern California hamlet while waiting to see which way the cat is going to jump. If indications point to a good circuit of fairs here during the coming season Art prefers to remain in California, but if things look the other way about he has a nice opening waiting for him back in his old home in Iowa, with a stable to take to the Great Western Circuit. In addition to making a host of friends in this state he has also had considerable success with his horses, making a nice campaign a couple of years ago with the Borden stable and putting the finishing touches to most of the Hemet Stock Farm futurity colts. Allie Lou's winning form at both exposition meetings was due to work received almost entirely at his hands and he drove her personally in two of the best races she went during the entire season, those over the half-mile track at Riverside where she forced Virginia Barnette to trot in 2:13 to win, while in those hot two-year-old races at Pleasanton he was separately timed in the trot with Don de Lopez in 2:15½, and in the pace with Fiesta Lou in 2:14½.

Sires of Hundred or More Performer

H. T. WHITE, AMERICAN HORSE BREEDER

Not long ago some account was given in this column of the sires that were represented by one hundred or more trotters and pacers, the idea being to show that old-time standards in at least one important branch of the breeding industry must be abandoned.

When it was announced that Bingara, at the age of 14, had become a "centuary" sire, i. e., was represented by one hundred standard performers, the Breeder printed a list of sires with one hundred or more (counting pacers as well as trotters) standard performers, and gave the age at which each stallion reached the "century" mark. That was an interesting and instructive tabulation, but it did not show which horses were credited with one hundred or more trotters. This is a point concerning which the big interest centers, and, having considerable curiosity as to what stallions had one hundred or more trotters in the standard list, and how old each sire was at the time his "century" mark for trotters was reached, I went after the information, and present it herewith in convenient form for preservation and reference, the figures being to the close of 1914. The column showing the age at which each member of the list reached the "century" mark, as to trotters, is, of course, the meat of the whole matter. In these days, when colt stakes run to such large sums and engage the attention of breeders far more than any other form of racing, the question of how early in his stud career a stallion shows his class as a sire is an important one.

The table follows, it being understood that, in the case of the older horses, allowance should be made for the fact that many of their get were raced to high wheel sulkies:

Born	Name	100 Trotters	Age
1901	Bingara	1915	14
1895	Peter the Great	1913	18
1886	Allerton	1904	18
1893	Bingen	1912	19
1893	Moko	1914	21
1892	Axworthy	1913	21
1886	Axtell	1907	21
1875	Onward	1897	22
1887	McKinney	1910	23
1880	Wilton	1903	23
1874	Red Wilkes	1897	23
1868	Electioneer	1891	23
1886	Prodigal	1910	24
1882	Baron Wilkes	1906	24
1870	Nutwood	1894	24
1879	Pilot Medium	1904	25
1876	Alcantara	1901	25
1881	Gambetta Wilkes	1908	27
1879	Simmons	1906	27
1882	Elyria	1910	28
1878	Jay Bird	1907	29

There you have at a glance a complete view of one very important section of the breeding problem. the precocity of each member of the list (so far as his first generation of descendants are concerned) is blazoned forth so that none who reads may escape the lesson taught thereby. For example, the first seven stallions on the list are to be charged (when considering their achievements with those of the balance of the company) with the decided advantage of having had all their get raced to the bicycle form of sulky. The eldest of these seven are Allerton, Prodigal and Axtell, all foaled in 1886, and it is significant that the latter has a son, Axworthy, in the distinguished company.

And that fact suggests another line of investigation which at once proves fruitful of good results in the matter of instructive facts. Since Allerton (third on the list) and Prodigal (thirteenth) also were foaled in 1886, they naturally are compared with Axtell as to every department in which a sire may excel. Such comparison, of course, would be fruitless unless the three horses were practically on even terms in the matter of opportunity, and it so happens that they are about as well matched in this respect as any trio that could be selected. Each was given an unusually good chance in the stud. Axtell, world's champion trotting stallion at three years, with his 2:12 mile to high wheels, stood first at a $1,000 fee, and, under such cirstances, it is certain none but mares that would qualify as matrons under a high standard were booked to him.

Allerton was a great race horse trotter, and, in addition, was the first of his sex to beat 2:10 to high wheels, and a 2:09¼ mile at five years was an achievement of championship caliber. That Allerton, under the shrewd management of C. W. Williams, was given a first-class chance in the stud is well known, and that he responded nobly to his opportunity likewise is a matter of common knowledge. He is one of three sires that, at the close of 1914, had two hundred or more sons and daughters in the 2:30 trotting or 2:25 pacing lists, his score being 264, to 234 by Gambetta Wilkes, and two hundred by Onward. In other words, in the matter of quantity—standard speed alone considered—Allerton stands out from all other sires of trotters, and yet his most ardent admirers hardly would claim that, in quality, he is at the head, because the records (which now fairly may be made up in his case) show that he got no colt trotters worth talking about, in comparison with other sires, and that much the same condition exists when the list of great aged trotters, winners of important events, is carefully searched from beginning to end. The one supremely important feature which the first generation Allertons lacked was class.

Prodigal is pretty much in the same boat. Started on his stud career by Marcus Daly, a man of wealth, who himself was a critical judge of bloodlines and of possible brood mares (and who was assisted in the work by Ed. A. Tipton, a recognized expert in such matters), Prodigal had his chance early in life. Later, he was owned by Hon. J. W. Bailey, of Texas, who was a worthy successor of Daly as a severe judge, when brood mares were under consideration, and who gave the horse a large band of carefully selected mates. Prodigal, like Allerton, is dead, and it is possible to judge his career as a whole in a fair and intelligent manner.

What is the outcome of such consideration? Prodigal sired standard speed in tremendous quantities, his figures at the close of 1914 being 132 trotters and 31 pacers, and the precocity of his get was remarkable, he at one time (and possibly now) having more 2:30 or better two-year-old trotters to his credit than any other stallion. And yet, as winners of colt stakes (and especially of important fixtures of that sort), the Prodigals do not reach the heights of success attained by the get of Peter the Great, the Bingens (father and sons), or Axworthy. Nor has the Prodigal or the Allerton strain bred on in the male line as has the blood of Bingen, Moko, Axworthy and Axtell—all, except the last named, being younger than either Allerton or Prodigal. These facts are of particular interest and value to breeders and horsemen because they are part of the history of sires that absolutely are at the top in the matter of standard speed production, when quantity alone is considered. Allerton has no son to compare, in prominence as a sire, with Axworthy in the Axtell family, Mobel among the Moko tribe, or Todd and Bingara for the Bingens; and Prodigal is again in the same boat, although, as a sire of broodmares of the top class, he is resplendent. In the near future I hope to be able to compare the daughters of Allerton, Axtell and Prodigal as producers, taking account both of quantity and quality, and I am sure the facts will contain valuable lessons for breeders.

Three members of the above list—Red Wilkes, Onward and Alcantara—were foaled at approximately the same time, so far as the purposes of survey at the present day are concerned, their natal years being 1874, 1875 and 1876, respectively. At thirty years from his birth, the work of a stallion that has proven himself to be of the top class as a sire, or as a progenitor, or both is completed, and this trio are close together in achievement, to the extent that each has accomplished far more than the average trotting sire. From my point of view, Onward is decidedly the greatest of the lot, but, on this point, the figures to the close of 1914 tell the tale concisely and effectively. Here they are, the trotters, pacers, and speed producing sons and daughters of each being shown, together with the second generation total:

Name	T.	P.	Sons	Dau's.	2d Gen.
Onward	155	45	176	200	1324
Red Wilkes	133	45	150	177	1323
Alcantara	121	54	80	99	695

A close race indeed, in most particulars, between Onward and Red Wilkes, with practically no difference (1-1324) as to the number of their second generation descendants—not the total of the family with the second generation included. In the matter of the respective merits of the speed siring sons of Onward and Red Wilkes, an inexhaustible supply of food for discussion easily may be found, and this state of affairs is made still more plain when one goes carefully over the list of sires by each of the stallions and compares them from various points of view, the obvious conclusion being that there is, in this respect, no great difference between the two. In the matter of their producing daughters, however, there is no question about the superiority of Onward, since mares by him have produced 2:10 or better trotters (two of which entered the list at three years), while the daughters of Red Wilkes are the dams of but four 2:10 or better trotters. The fastest trotter from an Onward mare (1914) is Grace 2:04¾, and there are three that have beaten 2:08, all in races, the other two being Czarevna (3) 2:07¼ and Ario Leyburn 2:07¼. The fastest trotter from a daugher of Red Wilkes is Gay Audubon 2:06¾, and none of the other three has a better mark than 2:08¼, the average record of the four being 2:08.6, while that of the seven 2:10 list trotters from Onward mares is 2:07.85, so that, in every particular, the Onward mares make the best showing, to which general statement may properly be added the fact that one of those mares (Orianna 2:19¼) is the dam of two three-year-old trotters that are members of the 2:10 list, Czarevna 2:07¼ and Grace 2:08, the latter subsequently reducing her mark to 2:04¾, while Czarevna, having been sent to the breeding ranks at four, was not afforded an opportunity to show the full measure of her speed.

The strength of the Alcantara strain, as plainly shown by the figures given above, lies in the female line, ninety-nine of his daughters having produced standard speed, while only eighty of his sons have sired it. These dams have produced 117 trotters and seventy-four pacers, an average of practically two performers per mare, a wonderfully good showing when the large number of mares is considered. Alcantara, by the way, is the only sire of one hundred or more trotters that has not a single representative in the 2:10 trotting list. This unique fact leads one to wondering how the other sires of one hundred or more trotters stand in respect to their 2:10 trotters, which information will be found herewith:

Sire	2:30 Tr's.	2:10 Tr's.	Family
Allerton	205	6	Wilkes
Peter the Great	159	27	Happy Medium
Electioneer	158	3	Hambletonian 10
McKinney	157	16	Wilkes
Onward	155	5	Wilkes
Nutwood	137	1	Hambletonian 10
Bingen	137	9	Electioneer
Red Wilkes	133	2	Wilkes
Prodigal	132	4	Mambrino Chief
Jay Bird	130	7	Wilkes
Axtell	129	6	Wilkes
Baron Wilkes	122	5	Wilkes
Alcantara	121	0	Wilkes
Axworthy	116	11	Wilkes
Wilton	112	4	Wilkes
Gambetta Wilkes	111	3	Wilkes
Moko	111	9	Wilkes
Elyria	109	2	Mambrino Chief
Bingara	108	6	Electioneer
Pilot Medium	103	4	Hambletonian 10
Simmons	101	2	Wilkes

The most cursory examination of this list (which is based on figures to the close of 1914, Bingara alone excepted) shows what the bike sulky has done for our best sires in the way of assisting them to produce 2:10 trotters, since, of the three stallions that have one hundred or more 2:30 trotters and also have ten or more in the 2:10 division, not one has a performer whose record was taken to high wheels. Another noteworthy point is that Nutwood, by odds the greatest all around sire of his day (since he at one time had more standard performers than any other horse, and later achieved a like triumph as a sire of broodmares), in the above list, shows the same number of 2:30 trotters (137) as Nutwood, but his 2:10 score is nine. What percentage of the modern sire's supremacy is due to the advent of the bike sulky and what to the superior speed qualities of his get affords a large field for speculation, but the question is one that never can be definitely decided.

Thirteen of the twenty sires in the above list are descended from George Wilkes and but two from Electioneer, and yet the great progenitor of the present day (Bingen) is a grandson of Electioneer. And, in passing, it will not be amiss to call attention to the fact that both George Wilkes and Bingen (greatest sire of the Electioneer family) were double gaited horses and could pace a streak. Not for argumentative purposes, because that were a useless labor—the arguments go on every winter—but merely that what by some people is deemed an important (and by all an interesting) similarity in those two giants among sires and progenitors may not be overlooked.

Another big fact shown by the above list is that the sire who has by far the greatest percentage of 2:10 trotters—Peter the Great—is neither a Wilkes nor an Electioneer, he running in the male line to Happy Medium, while, on the female side, the most notable strains are those of Pilot Jr. and Sentinel, the latter a brother of Volunteer, at one time a leading sire, but who failed as a progenitor. All these facts have a bearing on the breeding problem, and constantly present a live issue in ever-changing form. And there is no dodging them by the man who seeks to produce a fast colt trotter. It always has been the fashion to deride "pedigree fiends," and, no doubt, some people, in the pursuit of knowledge about horses via the bloodlines route, lose sight of many important collateral facts, but, all the same, the earnest study and the proper appreciation of bloodlines is the foundation of all useful knowledge in the matter.
